

SHOWS VALUE OF TRAINING

PHYSICAL EDUCATION TAKEN UP BY HAYWARD BEFORE HIGH SCHOOL BOYS

COTTAGE GROVE VISITED

The First Lecture Engagement Meets With Warm Approval. Next Tour Will Take Coach Into Southern Oregon.

Trainer W. L. Hayward is in the city for a few days, having returned from his lecture trip to Cottage Grove and is preparing for a more extensive tour into the southern part of the state. He will leave the latter part of this week, probably on Thursday.

"There were about 250 people attended the lecture at Cottage Grove and they expressed a great deal of interest in the lecture," said the track coach yesterday.

"One of the objects of these tours of the state is to get the boys of the state to take an interest in physical training. I have found that in the last few years the freshmen that are coming to college are falling off in average physical ability and development. As a result of this we have decided that something must be done to discover the cause of it. It is a condition which should not exist and I am making these trips in an effort to see what is the trouble, and then we can proceed to see that it is remedied.

"The freshmen that come to college now having had previous physical training of some sort or other are holding their own and come up to standard all right. But it is the men who have not been taking this work either in the form of some sport or the regular gymnasium exercises that lack development. Very few of the high schools of the state make any special effort at all to put this part of the students' education before them in such a light that they will take advantage of it and put themselves in trim.

"My lectures are accompanied by both slides and moving pictures, although at Cottage Grove I did not use the 'movie' machine since it arrived only today. No special stress is laid on any one sport or activity, but the pictures show all sides. I have slides of the various organs of the body and an effort is made to convey to the audience the bad effects of dissipation and intemperance on the body and system in general.

"Along with these are slides that show the various gymnasium exercises and which will give the high school instructors some idea of what exercises bring the best results in the gymnasium. There are also pictures taken at several meets, and which show the manner in which a meet is held and the various events.

"The principal idea of these tours is to give the high school instructors of the state as well as the students, a better insight into the workings of physical education so that the present average development of the incoming freshmen will be raised to standard.

"My next tour will be into the southern part of the state and I will go as far as Klamath Falls. Stops will be made at a number of the principal towns where high schools are located.

"The fantoscope which has just arrived is not yet in the best of running order, it being a new machine, but I hope to have it working before I start on the trip. The machine is a new make and has the feature, by means of an air space which intervenes between the lens and the film, of preventing the film from being set afire when the machine is stopped. This portion of the machine which produces the light is to the left of the shuttle instead of directly back

DEBATING PRIZE WILL BE DIVIDED AMONG FOUR

Numbers of This Year's Oregon Team Will Share Brookings Prize

Eugene Brookings, President of the Young Men's Business Club of Portland, and President of the Oregon Higher Educational League, in addressing an assembly at the University last May, made a promise of a gift of one hundred dollars to be divided among the men who would be successful in making the Varsity debating teams. Without a doubt, the four men of this year's teams will receive the above sum which, according to Coach Prescott, will be divided equally among them. Mr. Brookings is very much interested in college debating. In the last fight of the University to defeat the referendum, initiated against its appropriations, he worked earnestly and unselfishly for the University, and he was instrumental in the successful outcome of the fight.

MANY COLLEGE GRADS ENLIST IN U. S. NAVY

Local Recruiting Officer Says Advantages for Educated Men Numerous

That an unusual number of college men are enlisting in the United States navy, is the statement of Chief Engineer K. W. Wheeler of the local recruiting station. According to Mr. Wheeler the advantages for college trained men in the navy are numerous. He says that it is possible for a man with an education to secure a commission in from eight to ten years.

At the present time there are nearly forty officers in the navy above the rank of captain who have risen from common seamen. The most notable example is that of Captain W. E. Whitehead of the U. S. S. "St. Louis" who although but 39 years of age, has come up from the ranks.

The last man enlisted at the local recruiting office was a graduate from O. A. C. Vernon Parsons, an attorney of Eugene and a graduate of the University of California, has also served an enlistment in the navy.

The possibilities for trained men in the navy have been greatly increased during recent years, especially in the engineering branch, says the recruiting officer. An enlisted man with engineering knowledge can enter the navy with a salary of \$25 per month and all expenses paid.

ALBANY MEN TO ADDRESS COLLEGE Y. M. C. MEETINGS

I. B. Rhodes, of Portland, and Bishop Scadding, Also Scheduled

W. P. White, of Albany, and pastor of the Presbyterian church at that place, is scheduled to speak at the regular Y. M. C. A. meeting Thursday evening from 7 to 8 in Deady Hall. His subject will be "Approved men." Music will be furnished by the Dormitory Orchestra and there will be brief reports of the Kansas City Student Volunteer Convention by John Black and Erie Lane, representatives from the University.

The following week another Albany man will address the Y. M. meeting. This is Carlton E. Sox, a business man and president of the city Y. M. C. A. He is also a graduate of the Stanford University. His subject will be "A College Man's Debts."

On February 12, I. B. Rhodes, of Portland, state association secretary, will speak on "Our Neighbors" and February 19, Bishop Scadding, of the Episcopal church, will address the meeting.

Psychological tests of mentality to be applied to all members of the Freshman class at Dartmouth. as in ordinary machines. By a system of reflectors the light is thrown on the screen."

POOL IS AGAIN READY TO USE

FILLING TONIGHT WILL MAKE FIRST PLUNGE POSSIBLE TOMORROW

NO SWIMMING CLASSES AS YET

Seniors May Have to Swim 100 Yards Before Graduation. Aquatic Meets With M. A. A. C. May Be Staked in Future.

For the third time since the beginning of work last fall the swimming pool is announced as ready for use. Water will be turned into the tank probably this evening, or at least by tomorrow morning, and most of the swimming enthusiasts will get to take their initial plunge in the new tank tomorrow afternoon if all goes well.

It has been estimated that eight hours will be taken to fill or empty the tank, as the inlet and outlet pipe is so small. Some criticism has been expressed at this feature of the plunge, but under the conditions any larger pipe would have meant the expenditure of several hundred dollars extra, and it was decided that the money could be used to better advantage. However, the janitor has figured that by changing the water Sunday, no inconvenience will be experienced from the slowness of the change. The only work involved will be in cleaning the pool when empty, and from sixteen to eighteen hours will suffice for emptying, cleaning and refilling.

All wood-work in the plunge room has been repainted during the past two days, and will be dry by tonight. The entire floor of the plunge room surrounding the tank has been filled, with the addition of shower rooms the new natatorium presents a neat and artistic appearance.

There is one pool in the state, that of the Multnomah Athletic Club, which is a little larger, but there are none better equipped or finished. The floor slopes from four to eight feet, allowing depth for diving at the deep end. Under water lights will aid in diving.

No definite arrangements for swimming classes have been made as yet, but plans for this feature of the pool's use are now being made. It is possible that an instructor will be engaged, or some faculty member who has piscatorial instincts may take charge of the work for the remainder of the year.

The proposed faculty rule that every senior who wishes to be graduated must be able to swim one hundred yards, will probably be instituted in some form in the near future. Similar rules to this are in use at other universities where swimming pools are found in connection with gymnasiums.

If swimmers of any pronounced prowess are found enrolled in the student body in sufficient numbers to make it worth while, steps will likely be taken to enter in competition with M. A. A. C. and other clubs in water contests.

SIGNAL HONOR IS DELAYED

Election to Phi Beta Kappa Not Known for 8 Months.

Elected last May to the membership of Phi Beta Kappa, supposedly notified of the fact at the time and unaware of anything of the kind until only last Friday, is the experience of Dr. Joseph Schafer of the University.

Dr. Schafer is a graduate of the University of Wisconsin, 1894. Phi Beta Kappa was installed there in 1899. Members of the Alumni have been elected at different times and a letter was sent to Dr. Schafer last May notifying him of his election, and evidently was lost in the mails.

3 GOLF CUPS ARE OFFERED

LOCAL JEWELERS TENDER SILVER TROPHIES FOR U. OF O. PLAYERS

FEW STUDENTS FOLLOW GAME

Prescott Was Winner in Last Year's Handicap and Open Events. Meeting for Players to Take Place Monday.

Three silver cups have recently been promised by Seth Laraway, H. D. Smart and J. S. Luckey, as prizes to be awarded to the best golf players in the University. A meeting of all golf enthusiasts has been called for next Monday, January 13, in Villard Hall, at 2 o'clock, for the purpose of making arrangements for the tournaments.

Bert Prescott, assistant professor in public speaking, and who for many years has been interested in golf is largely responsible for the securing of these three cups from the above named jewelers of the city. Prescott states that the purpose in offering these prizes is to stimulate and to promote interest in golf among the students and faculty of the University. In regard to the nature of the contests, he states, there will be a handicap match and an open tournament for the men. A cup will be awarded to the winner of each. A match will also be held for the women, the winner of which will receive a cup. Miss Perkins has won the woman's match for the last two years.

Between fifteen and twenty students and faculty members are at the present time actively engaged in the sport. The number of student players who are taking advantage of the grounds of the Country Club is not as large as it was last year, for a fee of one dollar per month on each player is levied by the club for the use of its grounds.

Last year a similar contest was held and a large amount of interest was taken both by the players and those otherwise interested. Prescott won both the handicap and the open matches for the men.

All interested persons who have any abilities along this line are urged to attend the meeting on next Monday at two o'clock in Villard.

ALUMNAE WILL ENTERTAIN

Reception in Portland Is in Honor of Wellesley's President.

All members of the Collegiate Alumnae Society, the Oregon Alumnae Society, the Wellesley College Alumnae Association and the faculty of the University of Oregon are invited to attend a reception given at the home of Mrs. Robert W. Lewis of Portland, Wednesday afternoon, in honor of Miss Pendleton, President of Wellesley College, who is now visiting in Portland.

The Alumnae associations have the affair in charge, Mrs. Lewis having offered the use of her house for the occasion. It has been impossible to reach everyone by direct invitation, so the association has taken this means of inviting those who were not reached directly.

DONALD TO MANAGE DEBATE

Walker Appoints Junior to Handle Oratorical Affairs Also.

James Donald, a Junior, has recently been appointed manager of Debate and Oratory by Student Body Manager Dean Walker. Donald, under the supervision of Walker, will make arrangements for all forensic contests held at the University and attend to the financial side and other details, of this student enterprise.

NO HYDRAULIC "FLUNKS" SAYS PROF. M'ALISTER

Course Framed as Hardest and Limited to Senior Engineers

For the first time since its beginning, according to Professor E. H. McAlister, there will be no "flunks" in the class in hydraulics. This particular branch of the engineering science taught in the University, is limited to seniors, and has been classed by generations of college students as the hardest subject offered in the department.

In a short talk before his class yesterday morning, Professor McAlister stated that the present aggregation of Senior "S. I.'s" in this division, has only been exceeded in number during one previous year, and that it is the only class in hydraulics in which at least one or two students were not threatened with flunking.

WOMEN SHOULD OFFER TICKETS SAYS WALKER

Men Who Escort Them to Games Would Be Saved Unnecessary Expense

Next Friday night at the gymnasium will be held the first basket ball game of the season and this will be the first occasion upon which the student body tickets have been used since this plan was inaugurated at Oregon by both men and women of the university.

Every student upon paying his student body tax was issued one of these tickets which admits him to all the intercollegiate games of the year. The tickets must be presented at the door and they will be punched by the doorkeeper.

"This plan has aided us a great deal this year," said Manager Walker yesterday, and from now on we will have a chance to see how it works. So far football has been practically the only activity on the campus, and, as the custom does not permit of any "fussing" at the games, the men and women took their tickets and went to the games. Now that basket ball season is here it is going to be up to the girls to volunteer the fellows the use of their tickets for the game, thus making it unnecessary for the men to have to pay an extra price.

"Personally, I think that it would be utter foolishness for any of the girls to allow a man taking her to the game to go down into his pocket and dig up the price of admission. The tickets have all been bought and paid for and I see no reason for another admission. The girls of the university should volunteer to let the men take their tickets and have the seats reserved if they want reserved seats.

"While, of course, from a managerial standpoint it is to my advantage to have the students buy extra tickets, yet I think that with a little care the men and the women of the university will be able to work out this problem without any difficulty."

President Moteschenbacher expressed himself as highly in favor of the girls volunteering the use of their student tickets when asked to go to the games. "I believe that it is only the right thing that a girl should offer her ticket. It seems to me that this is one of the best phases of this plan. It saves everybody money in the long run. Too many of the students at the University are either wholly or partially working their way through school and I can see no possible reason, as long as the students have the tickets, why they can not go together and enjoy that part of it as well as the games. I sincerely hope that the girls will make a special effort in this matter, and will see that nobody is slighted in this matter."

Out of nine men to take the Rhodes examination at Oklahoma three passed.

BEARS TAKE ON 'VARSITY

WALKER AND JAMIESON ORGANIZE FOR PRACTICAL GAME

CONTEST COMES TOMORROW

Quintet for W. S. C. Game Friday Not Yet Chosen. Sims, Fenton, Rice, Bradshaw, Bigbee and Ferney Show Class.

(By Fred Dunbar.) Tomorrow afternoon at 4:30 the "Bears" vs. Varsity!

The first basket ball game of the season will take place tomorrow afternoon when the "Bears" clash with the Varsity in the gymnasium. The entire personnel of the "Bears" has not been determined upon as yet, but the principal feature of the game will be the old-time and far-famous combination of Walker and Jamison, as forwards, who will once more be seen upon the floor working together.

Three years ago this pair surrounded by a wonderfully fast aggregation of basket tossers and speed demons literally took the breath from the spectators whenever they appeared and to be able to see them once more, probably not quite up to their old form but still able to give the present team a good rub will be a rare treat. This will also probably be the last time the pair will work together on the University floor. The admission will be free.

The idea of this game is to give the Varsity a little needed practice in preparation for the W. S. C. game to be played in the gymnasium Friday night.

The W. S. C. team is making a tour of the northwest and playing a number of teams along the route. Last night at Salem they beat the Salem Tigers by a score of 30 to 32. The Tigers have a fast organization of players with a number of eastern collegiate stars. This means that W. S. C. has a fast bunch and that Oregon will have to show a great deal of class to get away with this game, the first of the season.

Coach Bezdek has a large number of aspirants out for the team this year and a goodly number of them rank up as fast men and heady players. At the present time Fenton, Sims, Rice and Bradshaw are making the strongest show for places on the team. All four of these have played on the Varsity in former years, and, of course, this gives them an added advantage in experience over the new men. At the same time "Skeet" Bigbee and Ferney are both making good on account of their speed. Bigbee is known as the fastest little forward in this part of the state in prep school ball, and, while he may be a trifle light for the collegiate game, he is making a creditable showing. Ferney is also very fast on the floor and may get a chance at the Varsity before the close of the season. George Stevenson also is on the waiting list and may show up better later in the season. "Steve" played in several of the Varsity games last year and may develop more speed as the season progresses.

The tentative line-up for the "Bears" is Walker and Jamison, forwards; Lynch and Lyle Bigbee, guards, and Koke, center. The men who will probably go in for Varsity fire are Fenton, center; Rice and Bigbee, forwards; Sims and Bradshaw, guards.

Crew training has commenced at Stanford.

Illinois will offer a complete course in athletic coaching next year.
