Most Widely Acquainted Student May Have an Oregon or the Emerald for One Year

William Holt, manager of the Oregon, and Anthony Jaureguy, manager of the Emerald, both offer subscriptions to their respective publications to the first student who sends in a correct list of the names of the people in the new Student Body panorama.

The details of this contest are now under consideration.

"Copies of the panoramic view which was taken at the assembly hour Wednesday, October 23, are selling rapidly," reports Harold Hamstreet, who is in charge of their distribution. "I have sold 25 already and I have not yet completed the circle of sorority and fraternity houses."

The picture is 40 inches long by 8 inches wide, printed on Gloss paper, and sells for 50 cents. Four hundred more copies are being printed, and will be ready this week. Two hundred of these will be put on sale at the Y. M. C. A. Book Store.

It has been suggested that an enlargement of this print be made and a copy sent to the 1915 exposition in San Francisco.

PUNCH CLOCK TO SHOW RECORD

One department of the University of Illinois has a clock in each room for students to punch their time both when coming to and leaving class.

Entering the University of Missouri at the age of 16 with Junior standing, Margaret Lovell Million, of Mexico, is perhaps the youngest third-year student in any college in the country. Miss Million comes from a small college, of which her father is the president and her mother is a dean.

I.C. LEWIS SPEAKS ON HORTICULTURE TOPIC

He Says World-Wide Prohibition Would Ruin Oregon's Cherry Industry by Curbing Cocktails

"If the rest of the United States and Europe go dry, the cherry industry, which is one of Oregon's greatest assets, will get a hard knock," said Professor I. C. Lewis, of the Oregon Agricultural College, Thursday afternoon, in an address on "The Rise and Development of American Horticulture," before the class in Industry and Commerce. The Pacific Coast, with the exception of a very small section around Chesapeake Bay, is the only place where cherries of quality can be raised. The Royal Anne, which is the most commonly grown, is used almost exclusively as a cocktail cherry, and is shipped in great amounts to the East and Europe. The country around The Dalles leads in the growing of this fruit.

The apple industry has an immense future before it, which few men realize. It is essentially an industry of the Northwest, not only because of the soil and climate, but by reason of the distribution of population. The production of apples, to be successful, must be on a large scale, which is so characteristic of the West. People say the industry is already overcrowded, but I estimate that in 1920 there will be 62,000,000 carloads of apples shipped from the Coast.

On December 10 Professor Lewis will speak to the same class on the exports of the Pacific Coast.

MORAL AND ETHICAL TOPICS TO BE DISCUSSED IN MARCH

Tommy Boylen has been chosen chairman of a group of 50 men who will conduct the series of meetings in the interest of a better understanding of moral and ethical subjects to be held March 17, 18 and 19.

He will select four men to act as chairmen of committees having charge of various phases of the work of conducting the meetings. Dr. W. D. Weatherford, of Nashville, Tennessee, is the only speaker selected as yet.

The movement for the meetings has grown out of a feeling on the part of many students that most of us are deficient in knowledge of moral and ethical subjects.
