PORTLAND PHYSICIANS

LISTEN TO DR. DEBUSK

Pedagogy of West and East Similar, He Says, After Investigating Conditions.

At the request of the medical society in Portland Dr. B. W. DeBusk, professor of education at the University of Oregon, spoke before them last Wednesday evening in an open discussion of Dr. Leo Riceu's paper "The Importance of Recognizing the Type in the Treatment of Disease."

Dr. DeBusk has done work dealing with the physical types of children. In speaking of the types and groups of diseases which Dr. Riceu worked out from his researches with Metchnikoff at the Pasteur Institute, Paris, Dr. De Busk

ALUMNI TEACH IN PORTLAND SCHOOL

Lincoln High Evening Department Employs Nine of Oregon's Old Grads.

Nine of the alumni of the University of Oregon are teaching in the Lincoln high school evening department in Portland. The principal of the school is John C. Veatch, '07, president of the Portland Alumni Association and ex-president of the state Alumni Association.

Classes in the evening school are offered in all of the regular high school subjects and commercial lines the principal demand is for commercial law, Spanish, shorthand and typewriting.

The other alumni teachers are: C. W. Robinson, public speaking; Emily McMickle Muhr, German; Martin Hawkins, law; Frances Cooper, English; David Pickett, mathematics; R. K. Terry, history; W. C. Nicholas, spelling and McCornae Snow, history.

LUNCHEON IS POSTPONED.

The next meeting of the Alumni Association of Portland will be held on January 8, at 12:30 at the Hazelwood. The meetings are held on the first Saturday of every month, but as this date in January is New Year's day the meeting will be on the second Saturday.

Preparations are being made to accommodate a much larger number than previously, because last time the room was overcrowded. The men are turning out much better than they ever have in the past.

The general policy of the program committee is to have a short, snappy speech or two, open discussion, and songs led by old glee club men who may be present. The whole thing is informal, without dues or fees.

The speeches for the next meeting have not yet been chosen.

said: "I have discovered the same types in school children and have worked out the relation of the type to the rate of the physical and mental development of the child."

Dr. DeBusk has just returned from a series of institutes held since the beginning of the school year in which he lectured on educational hygiene. During this time he has personally talked to over 1600 teachers.

When asked his impressions of far west pedagogy he said: "I have met graduates of Harvard, Yale and many other eastern colleges, teaching throughout the state. I find very little difference in teaching methods and conditions in Oregon than in any other state."

"From a hygienic point of view the schools of Oregon stand high. They have good buildings, good lighting and ventilation."

Dr. De Busk has attended institutes at Portland, Albany, John Day, Burns, Prineville, Astoria, Tillamook, Hillsboro, Salem, Dallas, Pendleton, Hood River. He believes that before very long teachers will be required to have some pedagogical training and to be graduated from a high school or possibly from a normal school.

W. S. C. is having some trouble to keep her football coach, too. It seems that California has offered Dietz a position at a higher salary, and the Pullman alumni are so perturbed that they are raising an "alumni coach fund" to help pay his wages and get him to stay.

Coming close to Dobie's record of eight years' undefeated coaching is the record of Percy Houghton, of Harvard. When Cornell beat him this year it was the first time in five years he has come out at the little end of the score. Like Dobie, he has been tied twice during this time.

A branch of the International Polity club has been organized at the University of Pennsylvania.
