

PRIZE AD MELTAWAY CHOCOLATES

Hoover Eyes!

I've read of many kinds of eyes
In magazine and story;
Of every kind and every size
With gray for hero's glory.
Some are black with passion eyes
(A villian always has 'em)
But what I can not real eyes
Is why they bore a chasm.
Oh, there are many kinds of eyes,
I cannot understand it,
And there's no end to all my whys
But last of all comes "fooder" eyes.
(Some people call it Hoover eyes)
So we've days most awfully "meatless"
Others that have shrunk to "wheatless"
All are very sadly "catless".
Still patriotic we can be
Listen to this remedy
Just take home upon these days
Our Hoovered Chocolate Meltaways!

Buy A Liberty Bond

"And when they had tied him up with the thongs, Paul said unto the Centurion that stood by, Is it lawful for you to scourge a man that is a Roman, and uncondemned? And when the centurion heard it, he went to the chief captain and told him, saying, What art thou about to do? for this man is a Roman. And the chief captain came and said unto him, Tell me, art thou a Roman? And he said, Yea. And the chief captain answered, With a great sum obtained I this citizenship. And Paul said, But I am a ROMAN born."

This was nearly two thousand years ago. Paul boasted of his citizenship. He was "a Roman born".

We are born citizens of the United States, the greatest nation that the world has ever seen. Are we also proud of our citizenship? Do we value it for what it is worth?

Our country is calling on us to subscribe for Liberty Bonds. Are we doing our part?

The banks of Eugene have arranged so that any student can purchase a \$50.00 Liberty Bond by paying \$5.00 down and \$5.00 a month for nine months thereafter. These bonds are the best security in the world. Every student should own a bond or at least have an interest in a bond. If you belong to a fraternity or sorority and do not feel able to meet the cost of a bond yourself, see that your society purchases a bond and that you have an interest in that bond.

In future years it will be a pleasant memory to you that you have helped in this national crisis.

CONSIDER THE CLAM, ALL YE WHO WOULD CONSERVE FOOD

Lowly Bivalve Placed in Same Class With Lordly Oyster by Professor Edmondson—Recommended as Meat Substitute.

People who are inclined to pass by the clam as an article of diet are missing something, according to C. H. Edmondson, of the department of zoology at the University of Oregon, who recommends the clam as equally palatable with the oyster and similar in flavor.

Professor Edmondson, at the direction of the United States Bureau of Fisheries, spent the past summer making an investigation of the shellfish resources of the northwest coast.

Strong appeals are being made by the government to every household, hotel, and public caterers everywhere to reduce the consumption of red meats, beef, pork and mutton, that our soldiers and the soldiers of our allies may be fed.

The Bureau of Fisheries has, therefore, been encouraging the use of fish and shellfish as partial substitutes for the meats to which people have been accustomed.

Shellfish Are Recommended.

The suggestion of the government is to substitute shellfish occasionally to replace the red meats needed for the army, not to use them for a steady diet.

"The purposes of the survey," said Professor Edmondson, "were to determine the species of edible shellfish; where they may be obtained in quantity; to co-operate with those interested in marketing this product of the sea; and to initiate a line of investigation looking forward to a more complete knowledge of the life histories of these shellfish. Little is known concerning the time of spawning, the early development, the rapidity of growth, time of maturity or length of life of the edible clams of our coast. The more light thrown on the life history of any organism the more possible will become an intelligent control along lines of greater conservation or increased production."

In the course of the survey, Professor Edmondson traversed the coast of Oregon from a few miles south of Bandon to the mouth of the Columbia, making observations on all the important rivers, bays and inlets and noting the location and relative abundance of edible shellfish. The survey also extended along the Washington coast as far north as Gray's Harbor.

Limited to Edible Clams.

The investigations were limited almost wholly to the edible clams, which field in itself is a very large one.

There are seven species of clams on this coast, according to Professor Edmondson, which are used for food more or less commonly. Besides these there are the sea mussels which cling to the rocks, exceedingly abundant in certain localities, but not made use of to any great extent, and the rock-borers, considered by many a great delicacy.

COUNCIL IS SEEKING TO AROUSE INTEREST

FRED PACKWOOD CHAIRMAN OF
COMMITTEE APPOINTED TO
REVIVE OLD-TIME EN-
THUSIASM.

Visiting Teams Will be Entertained;
Books Will be Gathered for
Soldiers.

Fred Packwood, appointed by President Sheehy to fill the place on the student council left vacant by the resignation of Kenneth Moores, took the oath and was seated last night when the council met in regular session. Packwood is a senior, and his first committee assignment is as a member of the rally committee, organized last night to undertake the task of reviving the interest heretofore taken in all demonstrations staged by the students. The other members of the committee are Larue Blackaby, Paul Spangler, President Sheehy and Slim Crandall, yell leader.

Two permanent committees were provided for at the meeting last night, one to fill a need that has long been evident, that of providing entertainment for visiting teams that come to the campus. Hereafter there will be no neglect of the teams that come to Eugene to participate in contests with Oregon. From the time they arrive until they step aboard an outbound train, their smallest needs will be attended to. Visiting teams will be met by the following committee, which will administer to all their wants while they are guests of the University: Dundore, Service, Harris and three

"For the most part," he said, "the clams of highest economic value are confined to the tide flats of bays and rivers. One of the largest and most abundant bivalves of the Northwest coast is the great blue or Washington clam, which has a very wide distribution on the Oregon coast, being especially abundant in the lower Yaquina river and obtainable in almost all of the important bays southward to Coos Bay. This clam, however, has not yet found its way into the Siuslaw river. The eastern or mud clam has become a permanent resident in nearly all the bays along the Oregon coast. The finest are found in the Siuslaw river between Florence and Acme. Here it is very abundant to the exclusion of the other varieties. This clam is one of the very best. Netarts Bay is well supplied with excellent food clams. Tillamook Bay is famous for its large cockles and maintains a clam cannery of small capacity.

Razor Clams Growing Scarce.

"For the past two years razor clams have become exceedingly scarce throughout the length of our coast. While a few may still be taken at times here and there, many places where they were formerly very abundant they are now entirely extinct. The chief cause is probably the shifting of the sand which has literally torn out the beds of clams and destroyed them or washed them out into deeper water. South of Newport, where there were extensive beds of razor clams a few years ago, the beach is now swept clean of sand down to the hard rock.

"Probably many persons living in the Willamette valley do not know how cheap they may obtain fresh shellfish from nearby coast towns.

"It is gratifying to note that the quantity of shellfish shipped from the coast to inland points is on the increase and that steady markets are being established in numerous Willamette valley towns for this sea food.

Must Conserve Supply.

"We are not only concerned with the present status of the resources of shellfish on our coast, but we must learn how to intelligently conserve, protect and cultivate, in order that with an increasing demand the production may not be lessened."

With this object in view, Professor Edmondson has initiated lines of experimental work at Florence and Newport in the natural clam beds. "These experiments," he said, "require a great deal of time to carry out satisfactorily. Results cannot be obtained at once. Investigations are also being carried on in the laboratories of the state University with the hope of determining some factors which may in the future be of material value in the production of this important sea food."

freshmen, John Kennedy, Arnold Koepke and Joe Trowbridge.

The other permanent appointments made were those of Fred Packwood, Jesse Witty and Herman Lind, as a committee to take charge of the work of gathering and shipping to the military camps books, magazines and other literature. While this branch of the service being rendered to the soldiers will be entirely in the hands of the committee members, they will co-operate with Librarian M. H. Douglass, under whose supervision several shipments of literature have already been made and who is thoroughly in touch with the situation.

Forty-one dollars clear profit, from which \$21 was deducted to pay the balance due on the gold fobs given to the members of last year's football team, was the report made by the dance committee on the student body dance of Saturday night. The total receipts were \$65 and the expenses of the dance \$24. The committee was made permanent and will continue to act for the series of dances which are contemplated.

U. OF O. GIRL CABLES ARRIVAL IN FRANCE

Miss Ada Boone Coffey Called by Red Cross from Studies.

A cable telling of her safe arrival in France has been received from Miss Ada Boone Coffey, by her sister, Mrs. Rose C. Powell, of this city. Miss Coffey was a student at the University of Oregon before she left to take up Red Cross work. She expected to be assigned to a convalescent hospital in Normandy, and that is probably her location at present. She attended college for three years before she left to take up the Red Cross work, and was a member of the Delta Delta Delta sorority.

LUCKEY'S JEWELRY STORE

The Quality Store

We carry only the best known and most reliable goods—nationally advertised goods—in other words, real quality goods.

We have the finest lines of jewelry, watches, Oregon seal rings, fraternity crests, watch fobs, etc., and our repairing department has had nearly fifty years of careful, conscientious work.

Besides this, we like to have the students come in we appreciate their trade and we anticipate their needs.

You will find that we have what you want when you want it.
