

MILITARY COURSE BULLETINS WILL GO TO MEN UNDER DRAFT

University Offers Preliminaries
to All Men in the State
Soon to Enter the
Service.

**WORK UNDER COL. LEADER
TO HASTEN ADVANCEMENT**

Department Includes Nearly
All Phases of War
Activity.

The complete list of courses in military science has been compiled and is now being circulated around the state by Acting Assistant Adjutant Dean H. Walker. The courses which are open to citizens of the state as well as students, deal with nearly every phase of military activity.

The bulletin which gives the detailed information follows:

Under the direction of Lieutenant Colonel John Leader, late commandant of the Royal Irish Rifles of the British army, who has come to the University direct from three years' active service in France, a complete and modern military department has been organized.

With the aim of being of greatest possible service to the country during this time of need, the University of Oregon has made special provisions whereby everyone will have an opportunity to secure the unusually valuable military training it has to offer.

Enter as Special Students.

Men subject to the next draft, or who are on reserve lists and waiting for call, will be given an opportunity for preliminary training, which will greatly increase their chances for early advancement when they enter service. Men of ordinary intelligence, who are eligible for military service in the United States army, and who can give satisfactory proof of their serious intentions, will be allowed to enter the University as "special military students." The entrance fee is \$5. No other fee will be required. This arrangement sets aside the regular entrance requirements in this particular case, but the right is reserved to reject or to drop at any time any applicant who is not judged capable of carrying on the work.

It should not be understood that this work is being done, at present, under the direct authority of the government—that commissions can be gained now, or that any guarantee is given that anyone will be sent to an officers' train-

ing camp. What the University is doing is to provide an opportunity to secure excellent military training at once.

Commissions Are Possible.
However, application has been made to have a branch of the reserve officers' training corps established at the University, and inasmuch as the government requirements have already been far exceeded, there is every reason to expect it to be granted soon.

When the reserve officers' training corps is organized there will be opportunity either to gain commissions directly at the University, or to secure admission to some of the regular officers' training camps. Naturally, anyone who has had military training previous to entrance to one of these camps will have an advantage over those who have not.

Any man who is on a reserve list waiting call, or who is subject to draft, can, by entering the University now, secure an initial advantage and greatly increase his chance of future advancement. As soon as he enters service he will be asked to state what military training or other special qualifications he has, and if he can show a knowledge of some of the work listed here, his chances for early promotion are very much increased.

The winter term of the University year is just beginning, and anyone who wishes to enter this term should apply during the next few days. Please address Dean H. Walker, acting assistant adjutant, University of Oregon, Eugene, Oregon.

COURSES

Military Science I.—Parade daily at 1 p. m. Includes exercises in bombing, bayonet exercises and musketry drills, construction of trenches, etc. One hour credit if desired and claimed at time by students. In case of underclassmen, includes or substitutes for old gymnasium requirement, except in case of special corrective work.

COLONEL LEADER.
Military Science II.—Lectures: Section A, at 2 p. m. Monday, Wednesday, and Friday; Section B, at 7 p. m. Tuesday, Wednesday, and Thursday. Lectures on tactics, field engineering, topography, military organization, trench fighting, musketry, morale and machine guns. Members of Military Science II and III will have preference for officers and non-commissioned officers in University battalion. Two hours credit.

COLONEL LEADER.
Military Science III.—Field Engineering: Military topography, mapping, map reading, construction of trench systems, barbed wire entanglements, tres-

tle, frame and pile bridges, road-making, railway work. Saturday, 8 to 12. Two hours credit. Either fielding engineering or topography may be taken separately as one hour credit. Work in camouflage and explosives also included in this course.

COLONEL LEADER.
Assisted by other members of the faculty.

Organization Is Offered.

Military Science IV.—Military organization: The organization of the army into different units; the organization of the staff into executive, record, personnel, administration, operations, intelligence, supply, sanitary, signal, engineers, ordnance, etc. March organization: March discipline, supplies, billeting, camps, field cooking, transport, ammunition, rations, etc. Organization of armies by regulars, national guard, home guard. Two credits. Monday and Friday at 4. Villard hall.

PROFS. HOWE AND BATES.
Military Science V.—Military law: A brief study of military law and the organization and procedure of courts-martial. Two credits. Wednesday and Friday, at 11 o'clock.

PROFESSOR BARNETT.
Mathematics Courses for Military Training.—Winter term. (Advanced algebra and plane trigonometry are fundamental to military science.)

(2) Advanced algebra: An elementary course open to freshmen. Winter term: 4 hours, at 10 o'clock.

PROFESSOR DE COU.
(3) Plane trigonometry: An elementary course open to freshmen. Winter term: 4 hours, at 8 o'clock.

PROFESSOR WINGER.
(6) Differential and integral calculus: An introductory course beginning in winter term. Pre-requisite, analytical geometry. Winter term: 3 hours, at 10 o'clock.

PROFESSOR WINGER.
(100) Differential and integral calculus. An extended course for science and engineering. Winter term: 4 hours, at 9 o'clock. **PROFESSOR DE COU.**
(103) Differential equations. Pre-requisite, calculus. Winter term: 2 hours, at 11 o'clock.

PROFESSOR DE COU.
Zoology and Medical Training.—First aid: This course will comprise lectures in general anatomy and physiology; practice in bandaging and first aid to the injured; use of a few necessary drugs; methods of resuscitation from gas and drowning. Winter term: Tuesday and Thursday, at 10 o'clock. One lecture and one demonstration hour. One credit. **PROFESSOR BOVARD.**

Military Hygiene and Camp Sanitation.—Course of lectures on personal hygiene necessary under war conditions. Lectures on water supplies, methods of sewage disposal, etc. Spring term: one lecture, one credit.

PROFESSOR BOVARD.
War Geography Is Course.

Department of Geology.—(5) Economic geography: A study of geography in its broadest aspects; the factors controlling commercial relations of the various nations, with an intensive study of the more important countries, particularly of those directly engaged in the present war. Special attention will be directed each day to a discussion of the geography of the war, the topographic and economic factors in play upon the different points. Monday, Tuesday, and Thursday, at 3 o'clock p. m. Three credits.

PROFESSOR SMITH.
(7) Military topography: This course will be given under the head of field engineering, and consists of field sketching, contouring, plane table work, practice in relief map making, and study of special problems, as visibility, etc. Saturday morning.

General Chemistry.—An introduction to science. A section for beginners to be organized for second term if a sufficient number of students apply. This course will be given Tuesday, Thursday, and Friday, at 10. Laboratory, Friday afternoon, unless Monday or Tuesday afternoons shall be found to be better

Pierrot and Pierette Have Brought Such Charming, Bewitching Lingerie

TRIMMED IN FILMY LACES AND WONDERFUL EMBROIDERY

Corset Covers

Camisoles \$1, \$1.50,
\$2.00, \$2.50, \$3.00.

Beautiful crepe de chine and wash satin Corset Covers and Camisoles, in white and flesh color, trimmed with dainty lace and French knots.

Pretty Silk Chemise
\$3.00 to \$7.50.

Delicate silk Chemise in wash satin, crepe de chine and jersey; some plain and some lace trimmed; some with embroidery and French knots

PROFESSOR STAFFORD.

Physics Department Aids.

Physics—(5) Electricity and magnetism: 11 o'clock Monday, Tuesday, and Thursday. Repeated at 10 in spring term. Pre-requisite for course in applied electricity.

(6) Sound and light: 10 o'clock, Tuesday, Thursday, and Friday. Repeated at 11 in spring term. Pre-requisite for the course in photography.

(2) Essentials of electricity and magnetism: 9 o'clock, Monday, Wednesday, and Friday. More elementary than course 5, but may be substituted, if necessary, on account of schedule.

In the spring term, courses 5 and 6 will be repeated as indicated above, and the following special courses offered:

(103) Photography: Pre-requisite course 6. A knowledge of chemistry is very desirable. Lectures and laboratory. Three hours credit.

(119) Applied electricity: Pre-requisite course 5 (or 2). Trigonometry is desirable. Particular attention to problems in military practice. Lectures and laboratory. Four hours credit.

Train for Balloon Observation.

Department of Architecture.—(29) Perspective: Birdseye drawing, especially adapted to observation from hill-tops, balloons, aeroplanes, etc. Two credits. Friday, at 8.

PROFESSOR ADAMS.

(34) Graphic statics: Particularly interesting to engineers on emergency bridge work, etc. Two credits. Tuesday and Thursday, at 9.

PROFESSOR ADAMS.

NEW COURSE IN POETRY

English poetry is a new course being offered this term in the English department. Selections from different authors, from Chaucer to the present, will be studied. "The intention of this course is to teach poetry everyone should know," said Professor Howe. "It is the first course ever offered by the department on these lines."
