OREGON MEN AT WAR.

With the S. A. T. C. established only a month and military drill but a year, Oregon is represented by a large percentage of officers in the army and navy—men who have made good above the average. The training they received in Oregon, the Oregon Spirit, did it for these men. That college activities, when they do not detract from the primary business of study, are of real value is proved by the list of graduates of the training camps for officers.

Virtually all the Oregon men who have received commissions had been leaders in the student life of the University. They had already learned how to direct men and how to handle problems of administration which overwhelmed those without experience.

Among the Oregon men holding commissions in the army is found the names of several presidents of the student body, a former editor of the Emerald, varsity, debaters, many prominent athletes, football men, track men, wrestlers, baseball players, and scores of others who had taken advantage of the opportunities for leadership offered by college life at Oregon.

Speaking of versatile men, Colonel Leader not only led the attack in France but the fashions as well. We get the dope from the Chicago Apparel Gazette.

The women are carefully observing the request to use the library only Friday and Saturday evenings, reserving book privileges for the men on other evenings. This still leaves the women one-third of the evenings. But will the faculty be satisfied with one-third of the reference work completed?

The printers can't tell the difference between O. A. C. and O. T. C. but the O. T. C. men can!

Oregon women get their chance to show the Oregon Spirit this fall by raising a United War Work quota of \$5,000. The influenza will probably have little effect on this activity.

MEDICAL OFFICERS HERE

Captain George Wilson to Examine Candidates For Officers' Schools.

Captain George Wilson, army surgeon, arrived from Portland at 6 o'clock this morning and is registered at the Hotel Osburn. He is here to give the physical examinations today and tomorrow to applicants for admission to central Officers' Training Camps.

An examining board headed by Alma E. Katz, of Portland, civilian aide to the United States Adjutant-General, will arrive next Monday to consult with the candidates for admission to the training schools.

LIBRARY RECEIVES LATEST WAR BOOKS

"Martial Adventures of Henry and Me" and Technical Editions Received.

The Library has been adding to its collection of books a number which deal with the war and its problems. There are military books telling how to handle the various weapons now in use and one book named "Lessons from the Enemy" by J. R. Dill, tells what the allies have learned from the enemy and how they have perfected it and are now outwitting the Hun at his own game. "The Martial Adventures of Henry and Me," by William Allen White, editor of the Emporia (Kansas) Gazette, deals with the European war. In the list of biographies is "The Melancholy Tale of 'Me,'" by E. H. Sothern the noted actor. The list contains the following books:

RHINOCEROS, APES NATIVES OF OREGON

Fossils of Former Animal Life Displayed in Geological Department.

Get acquainted with Oregon fossils. Oregon minerals, with Oregon's magnificent scenery and with the Merrychippus, the three-toed horse that once roamed wild in the John Day Valley. You have only to visit Dr. W. D. Smith's Geological Department in Johnson Hall. At the entrance to the museum is a large part of a petrified tree, which was presented by D. Walter Morton, dean of the University School of Commerce. The tree was unearthed in the property purchased by Mr. Morton for his home in Eugene. In the Eastern Oregon of today are the archives of a large part of the wild horse history of the past. The fossil horse of Oregon is full of scientific interest. The form of the horse that most abounded here in the early Miocene period was the Mesohippus. It varied in size from that of a Newfoundland dog 25-27 inches in height to that of a small donkey. In most features it bore a close resemblance to our living horse. Many animals of graceful outline about the size of an antelope. The teeth are wonderfully preserved in outline and so completely silicified as to carry the luster of agates. There are bones of the extinct Mammoth, the large elephant that roamed over North America just before and during the Ice Age. One large Mammoth's tooth was found at Dayton, Oregon, and the portion of a lower jaw in the locality of Walla Walla River. The rhinoceros lived in the John Day country in a past geological period. There are a number of fossils of the upper and lower jaws of this great animal in the museum. A petrified ape's head from Deschutes, Oregon, weighing about 25 pounds would be of considerable interest to those in favor of Darwin's theories. The face is very prominent, the mouth and eyes very prominent. It is remarkably well preserved as to shape of head and features.
