

MANY EVENTS CROWD LAST O. T. C. WEEK

Funeral Services Held for Robert Stuart, Victim of Influenza.

The third Oregon State Officers' Training Camp is nearing a close, and the one week remaining has been crowded as full of events as possible.

An all-night trench battle, a camp fire and sing out on No Man's Land and a battalion drill with the band accompaniment will be features of the closing week. Beside the regular work that will be carried on, Alma D. Katz, of Portland, and civilian aide to the Adjutant General of the United States, will be here with his committee to give the examinations to the applicants of the central officers' training camps.

This morning at 10 o'clock on the parade grounds, funeral rites were held for Robert Stuart, a member of the Machine Gun company, who died last Saturday morning with Spanish influenza.

The new chaplain, Rev. Charles E. Dunham, of Eugene, had charge of the ceremonies. Colonel Leader, Major Allen, Major McKinnon and all other available officers and men of the Battalion were present.

Died at Post of Duty.
In his address Chaplain Dunham said in part:
"We have gathered here to honor a comrade dead. There are two emotions at such an hour as this. Our hearts are filled with sorrow at the thought of the passing of a young man full of youth, vigor, hope and possibilities. But our sorrow is tempered by the consolation that our comrade died at the post of duty doing his very best."

"We are gathered to honor this young man upon this occasion. He responded to his country's need and served to the utmost of his ability, and paid the highest devotion that it is given any man to pay. It remains for those of us who today honor him to meet in similar spirit the special needs of the hour, and among those needs is the winning of the war."

Monday afternoon every man will be taught how to use the gas helmet. They will report in squads and each man will have an opportunity to try on this particular piece of head gear.

Campfire Sing in Evening.
That evening the camp fire which has been postponed once will be held out on No Man's Land between the trenches. Songs used as takeoffs on the different companies will be the special entertainment.

Tuesday morning every man will be concentrated on No Man's Land and will do varied field work such as semaphore, bayoneting, topography, bombing, building, trench entanglements, knotting and lashing, facines and gabions, skirmishing, engineering, machine gun drill, close order and drilling. The events will be progressive and all the men will have an opportunity to take part in each event.

Colonel Leader, to talk.
Colonel John Leader will give a lecture in Villard hall at 2 p. m. on Tuesday. His subject is "American Military History."

It is probable that Tuesday morning Alma Katz will be stationed out on No Man's Land and can watch and examine the men out there. If not, the applicants

for central officers training camps will be sent to him by squads during the day. The trench war will begin immediately after the lecture, probably at 3 p. m., and last all night.

Wednesday morning the battle will end with a breakfast in Friendly Hall. The rest of the morning will be given to rest. In the afternoon will come the gas chamber drills.

Afternoons Out of Doors.
Thursday and Friday afternoons will be given over to bridging, using three companies each afternoon. From 9 to 11 on Thursday morning an examination will be held for all the members of this camp. At 2 p. m. Col. Leader will lecture to the men.

There will be a Machine Gun exhibit from 9 to 12:45 on Friday morning. And Saturday morning the Battalion will drill with the band, and the men will get their certificates of which they can not divulge the contents until they get to their own homes.

Four Men Recommended.
Henry L. Corbett, R. F. Wendling, Lt. Willis Clark and Henri H. Cloutier have been recommended by the Commandant in general orders. They are the only four men in all of the three camps who have received such mention. Corbett and Wendling were recommended for their great assistance during the present influenza epidemic. Lt. Clark for his high efficiency of organization in the mountain campaign and Cloutier for acting as staff officer to Lt. Clark in the mountain campaign.

Lt. Willis Clark will act as staff officer to Alma P. Katz during his stay on the campus.

Military Discipline Holds Up Professor Till Dinner Is Cold

Professor R. C. Clark was suddenly stopped and held at the point of a gun by an O. T. C. sentry, while trying to pass the drill ground near the Administration building on his way to dinner Thursday.

The guard approached and said Halt; then kept him waiting until the corporal came up and asked him who he was and where he was going.

Professor Clark could not have been "peevish" of course; but no man likes to be kept waiting for his dinner. It is Professor Clark's opinion that military discipline is a very necessary and a very fine thing—in its place—but he sees no reason why he should be made a target for practice by an over-enthusiastic sentry.

The following quotation might apply to Professor Clark's view of the affair: "Zealous men are ever displaying to you the strength of their belief, while judicious men are showing you the grounds for it."—Shenstone.

NEW LIBRARY HOURS FIXED FOR HEALTH

Relief of Congestion Reason for Change. Says Professor Sweetser.

"Some of the girls on the campus are getting 'peevish' at the wrong time. They have the wrong idea entirely in regard to the new library hours," says Professor A. R. Sweetser, chief sanitation officer of the University.

"It is for their own good, and to relieve the congestion in the main reading room at this critical time in the epidemic, that the girls are being asked on certain hours to go to another room to do their studying."

Men's Work Supervised
The hours from 7 to 9 in the evenings are reserved for the military men, and all work is done under the direction of the officer in charge. From 9 to 11 in the mornings the girls are asked to go to another place since those are the most congested hours. However, on Friday morning the rooms are not crowded, so the girls may have the freedom of the main reading-room during those hours on Fridays. Perhaps these hours on still more days will be opened to the girls if the committee in charge finds that the rooms are not overcrowded.

Neither of these regulations applies to Friday evenings, Saturdays or Sundays.

A study room has been provided for the girls in the basement of the library with an attendant in charge. Reserve books may be had there as well as at the upstairs desk.

New Exhaust Fans
Professor Sweetser is superintending the installing of a set of exhaust fans in the library, which will greatly improve the ventilation of that building. Between all the periods the windows will be opened and these fans set in motion and the air changed as much as possible in the ten minutes, without danger of drafts.

In addition to these other health measures, the floors are washed and all the tables and chairs wiped off each day with an antiseptic.

Personal Mention.

Beatrice Gaylord, '17, who is teaching school in Monmouth, arrived Friday evening for a week-end visit at the Pi Beta Phi house.

Jean Geisler, Phebe Gage, Helen Nicolai and Hazel Young are visiting their homes in Portland this week-end.

Initiation is being held by Alpha Phi this week-end for Lucile McCorkle and Elsie McMurry.

Agnes Brookes left Friday for a short visit in Albany.

Margaret Gray has returned to the campus from her home in Portland.

Vivian Hopson has returned from Salem.

Dinner guests at the Kappa Alpha Theta house Friday evening were Mr. and Mrs. Dean Walker.

Ruth Graham, Bess Colman and Alice Lightner are in Portland for the week-end.

Theodora Stoppenbach, Jane Murphy and Margaret Biddle left for Portland where they will attend the wedding of Paula Lim and Charles Dundore.

Era Godfrey has gone to Lebanon to visit her brother who is home on a furlough.

Marion Coffey and Carolyn Cannon are spending the week-end in Albany.

Miss Elizabeth Carson, a graduate last year, has been teaching in the Dufur high school but has resigned her position to take a similar one at Hood River high school.

Mercedes Jones and Brownlee Haynes, freshmen last year, are attending the University of Idaho this year.

Helen Guttery, '19, expects to enter the University the second term. At present she is at her home in Hood River and has been doing substitute teaching.

Vivian Hopson, of Salem, arrived Tuesday noon to continue her school work. She is a freshman in the University.

Myrtle Jane Albright, '20, expects to term. She is teaching at Malheur return to the University for the second term. She is teaching at Malheur, in Malheur county.

DINOSAUR BONES ARRIVE

Collection from Alberta Soon to Be Displayed in Museum.

A recent addition to the geology department museum is the collection of dinosaur bones from Alberta, Canada. They were collected by Alexander Sternberg, famous paleontologist, whose fossil specimens may be seen in the largest museums in the world.

The specimens are not on display yet because of lack of space in the museum in Johnson Hall, but anyone may see them by going to the geology department.

C. A. GREGORY HEADS SCHOOL RESEARCH

Two Faculty Members on Bureau to Test State's Education System.

A bureau of educational research whose purpose is to test the school systems of Oregon has been organized under the direction of Professor C. A. Gregory of the school of education with Dr. B. W. DeBusk as assistant.

Oregon has been far behind the eastern states in testing the efficiency of its school system. Realizing this fact the bureau was organized and already Penicton, The Dalles, Baker, Eugene, Tillamook, Silverton, and many other smaller places have signified their desire to co-operate in testing their school systems this year.

Dr. DeBusk has charge of the educational clinic and the physical and mental measurements and Professor Gregory has charge of educational measurements and school tests. Tests in arithmetic, reading, algebra, writing, spelling have been sent for and Professor Gregory is preparing a test in language. These tests are to be sent to the school superintendents of Oregon upon request, and upon their completion they are to be returned to the University where they will be compiled, comparisons and correlations made and sent out to the school superintendents in bulletin form. These bulletins, through the data obtained, will give accurate comparisons of the progress of the school systems of Oregon.

Professor Gregory plans to spend the second quarter of this year in the field doing work in relation to tests and measurements.

Copies of the tests will be available for distribution by November 10 and they may be secured by sending a letter to the Bureau of Educational Research at the University of Oregon. The tests are handled at cost so may be obtained as cheaply there as by sending to the original publishers.

MAURINE ELROD, 15, YOUNGEST STUDENT

Portland Girl, Oregon Native, Pledge of Alpha Phi, Has Social Service Aim.

Maurine Elrod, 15 years old, member of the freshman class, is the youngest student on the campus. She is a native Oregonian, having been born in Moro, Sherman county, Oregon, November 3, 1902. Her father, J. O. Elrod, is a well known lumberman of Portland.

Maurine would never be noticed as the youngest student on the campus, for she "does her hair up," dresses and acts just as classmates two or more years her senior do.

This year's youngest student is just nine months younger than Robert Lees, of the sophomore class, who held the record as the youngest student last year. Mr. Lees was younger when he entered than Miss Elrod is now.

Maurine is a graduate of the Lincoln high school, Portland, in the class of June, 1918. She attended school previously at the Portland Academy. Social service is her aim and after her graduation from the University, she intends to follow this work. She is at present taking a general cultural course. She is a pledge of Alpha Phi, as is also her sister, Lucille Elrod, who entered with her this term.
