

# DOSCH MEMORIAL PROJECT STARTED

### Committee Plans to Cast His Latest Work, "The New Earth," in Bronze.

A memorial to Roswell Dosch, late assistant professor in Modeling and Drawing at the University, is being promoted by representatives of the faculty and student body.

President Campbell, Mrs. George Gerlinger, Professor A. H. Schreff, Dr. George Rebec, Dean E. F. Lawrence and Glenn Stanton, have been named as committee on the Roswell Dosch Memorial.

"It is expected that funds sufficient to have his latest work, 'The New Earth,' cast in bronze, will be raised," said Dean Lawrence. "Several contributions have already been received. Any amount, no matter how large or small, will be accepted."

Those desiring to contribute should remit to L. H. Johnson, treasurer of the Roswell Dosch Memorial fund.

Mr. Dosch was for three years instructor in modeling and drawing at the University prior to his attendance at the Officers' Training Corps at the Presidio this summer, where he received his commission as second lieutenant.

"Mr. Dosch was recognized as without a peer among the sculptors of the northwest," said Dean Lawrence. He was also a student of Bourdelle in Paris.

Lieutenant Dosch's death occurred at Portland, Oregon on November 27, after seven weeks' illness from Spanish influenza followed by pneumonia.

## FJIS, DELTA TAUS, OREGON CLUB, KAPPA SIGS WIN

(Continued from page one.)

about a half dozen fouls, but he missed all of them.

### Oregon Club Looks Strong.

By eliminating the A. T. O.'s the Oregon club proved that they have a team that will have to be taken into consideration when the prospects of league B are discussed, the Oregon Club's fortune lies in Rousleau, forward, who outfoxed the A. T. O. guards and sneaked across a counter every now and then.

The only two trump cards that the A. T. O.'s held last night were Bonney and Huggins, who did all of the scoring for the losers. The team work of the A. T. O. gang was not what might have been expected and they will need a great deal of practice if they expect to come out on top.

The lineup:  
Delta Tau Delta (11) Sigma Chi (4)  
Branstetter.....F..... Moore (2)  
Brown (5).....F..... Hannah  
Askey (6).....C..... Breed (2)  
E. Madden.....G..... Maddock  
G. Madden.....G..... Blake

Referee: Hayward.

**Three Hundred at Fast Games.**  
Three hundred fans hung over the rail of the balcony in the men's gym on Tuesday afternoon, gazed, guffawed and hollered over the first two games of the series. In the first of the "knock-down-drag out" affairs the Betas were beaten by the Kappa Sigs by the small score of 3-2 while in the second game the Fijis had things their own way and nearly whitewashed the Sigma Nus beating them 10-1.

Free throws, caused by frequent fouls in the Beta-Kappa Sig game, occupied most of the time allotted for play and had the Betas a four shooter with any degree of accuracy the score would have been in their favor. As it was, the only scores made in this bout were made by free throws and Still won the game for the Sigs when he broke the tie by dropping one in during the last half minute of play. Of the steller variety "Pinkie" Boylen shone for the Sigs. Pink and "Dubs" Mulkey tangled consistently giving the fans much harmless amusement. Callison tossed in the Betas two points from free throws.

Ritter Helps Fijis Win.  
The Fijis swamped the Sigma Nus by

the stellar performing of Art Ritter. Judging from his share of the Fijis' points Art plays basketball nearly as well as he does baseball. For the Sigma Nus, Gilbert warmed up to the game considerably as did also Matthieu. However, "Wes" Shattuck deserves the laurels for it was he that made the Sigma Nus' lone point.

As a whole the games were beside being amusing also interesting with now and then a flash of fairly good team work and the rooters appeared satisfied with the exhibitions.

The Sigma Nus were crippled by the loss of "Si" Starr, who was unable to play because of the condition of his eyes, and "Chuck" Comfort who was a letterman last year. The Betas who were counting much on the skill of "Skeeter" Manerud and Bill Morrison were unfortunate when these two diminutives were not allowed to play. "Skeet's" bruised head which he received in football kept him out of action while Bill was a sub on last year's varsity quintet and thus he was also barred.

The lineup:  
Kappa Sig (3) Beta (2)  
Dunsmore.....C..... Callison (2)  
Boylan.....F..... Howard  
Still (3).....F..... Watson  
Mantz.....G..... Mulkey  
Laird.....G..... Dresser

Fiji (10) Sigma Nu (2)  
Ritter (9).....C..... Hayslip  
Houston.....C..... Gilbert  
Bain.....G..... Carter  
Larauch (1).....F..... Hollenbeck  
Gray.....F..... Shattuck (1)  
Referee: Bill Hayward.

## MEN SEEK ENTRANCE TO NAVAL ACADEMY

### Examinations to be Held on Campus; Many Applicants From Over State.

At least a dozen applicants seeking appointment to the U. S. Naval academy at Annapolis will be on the campus tomorrow to take the examinations and personal interviews necessary for their recommendation to Congressman Hawley from the University, according to Karl Onthank.

Mr. Onthank has received no fewer than fifteen letters from men throughout the state, during the past week, seeking information about the examinations. Many of them are from seniors in high schools in all parts of this congressional district; a few from men in civil life and a number of university students have signified their intention of taking the examinations.

The examinations will be held in Professor Winger's room in the Administration building from 8 a. m. until 4 p. m. tomorrow. A committee composed of Prof. E. E. DeCoun, chairman; Colonel W. H. C. Bowen, Professors Eric Allen, E. H. McAlister and E. P. Boynton will have charge of the examinations and interviews.

Following the examinations and the grading of papers each applicant will be given a personal interview by the committee in charge so that his personal fitness can be judged. The names of the successful applicants are telegraphed to Congressman Hawley by the University and he will in turn exert his influence in gaining the appointments to the academy.

Applicants for the appointments were few last week and for a while no one had made application to take the examinations. Stories telling this fact which were printed in the Portland papers and letters announcing the examinations which were sent to the high schools of the state by the University last week caused the shower of letters which the president's office has received during the past week, in the opinion of Mr. Onthank.

**SCIENCE CLUB TO MEET**  
The University Science Club will meet on Tuesday evening, January 21, in room 25, Deady hall. Professor E. E. DeCoun will speak on "The Development of Japanese Mathematics."

## DR. PACKARD GIVEN AID FOR RESEARCH

### Advanced Geology Students to Benefit; Additions to be Made to Museum.

An appropriation of \$200 has been granted Dr. Earl L. Packard, of the department of geology, by the California Academy of Science, of which society he is a member, for the purpose of research work and collections of cretaceous fossils from southwestern Oregon.

This appropriation, Dr. Packard says, will mean a great deal to the department of geology here at the University, both in an opportunity for field work by the advanced students in geology and in additions to the museum and geological literature.

The Academy of Science makes this appropriation to Dr. Packard for field work in the study and collections of rocks and fossils. He then is granted the use of all their laboratories and libraries for his analysis, and adds to their museum the results of his work. In addition to this collection he will make a report to the academy which they will publish. However, any duplicates found in his work will be given to the local museum as well as the result of his findings in published form, according to Dr. Packard.

The most of the work will be done by Dr. Packard during the coming summer near the localities of Medford and Ashland and other towns of southwestern Oregon. However, he hopes to take some short trips at different times in the spring and it will be on these trips that he plans to take advanced members of his geology classes. Before this time such trips have been impossible because of the expense attached but the appropriation makes possible splendid opportunities for field work, according to Dr. Packard.

The California Academy of Science, of which Dr. Packard, Dr. J. F. Bovard and Professor A. R. Sweetser are members, is an old institution of the western states for the promotion of science research work. A few years ago the society moved into splendid buildings in Golden Gate park in San Francisco and has a very interesting museum there which they have put in not only for the use of persons especially interested in the sciences but for the laymen.

## RETURNS FROM ACADEMY

### Joe Ingram, Discharged from Navy, may Enter College in Spring.

Joe Ingram, a freshman at the University last year, and a member of the Phi Delta Theta fraternity, is back on the campus for a few days, after having attended the naval academy at Annapolis since May, 1918. He has been discharged from the navy and expects to enter college in the spring term.

According to the new rulings, he would have had to attend the academy for four years in order to obtain his commission. As he would then have been commissioned in the regular navy, and not in the reserve, he decided to apply for discharge. He has a brother who is about to graduate at the academy.

Ingram, whose home is in Portland, is a Lincoln high school graduate in the class of June, 1917. He expects to work as a clerk on one of the committees at Salem for the next month and a half.

## COOPERATION ASKED IN HEALTH REPORTS

### Men on Campus Fail to Fill Blanks; Students Urged to Use Dispensary.

"The boys of the University are not making out the daily health reports as they should," said Dr. J. F. Bovard, chairman of the student health committee. "At present the flu condition on the campus seems to be improving but it will continue to do so only as long as all the precautions are kept up and the daily health reports are probably one of the most important of these precautions."

The girls, who had practice in this last term, are doing their part but the boys do not seem to be educated up to it yet, was the opinion of Dr. Bovard. On one day it was found that only four girls from an enrollment of over 500 did not make out the health reports, while on the same day more than 100 boys from practically the same number failed to do so.

**Reports Are Best Safeguard.**  
Every man outside the fraternities and the dormitory are the ones who have this to do, and they should not neglect it. "The use of the report is the best safeguard of the University," said Dr. Bovard, "and it is the duty of the students to make them out and the duty of the faculty to ask for them."

When a student fails to hand in a health report the files must be gone through to find whether that student was present in the school that day; if so he is probably in good health but if not he may be ill and the case must be looked into further. The report coming into the office really means that the student is well enough to attend classes, no report should mean that a student is unable to be in school.

"The health committee wants it understood," said Dr. Bovard, "that no student or member of the faculty should try to be in the classroom with even a slight cold. Stay home until you are well, and you will get back sooner and will not endanger others in the meantime. A rule to this effect has been made by President Campbell, on the recommendation of the student health committee, and it must be kept by every one if not for your own sake at least for the sake of others."

"Use the University dispensary freely," went on Dr. Bovard, "for in this way the student may protect himself and a close watch may be kept on the health conditions on the campus."

At the assembly Wednesday President Campbell urged upon the students the necessity of cooperating with the health authorities.
