

NEW GROUP ADDED TO REQUIRED WORK

Fourth Set of Subjects Made Out By Faculty; Only Three Compulsory

At a special faculty meeting Thursday afternoon the members voted to adopt a fourth required group of subjects for undergraduates to be known as the fine arts group. It includes music, architecture, public speaking, and dramatics. Only three of these groups are to be compulsory for any student. Professor F. G. Young, dean of the graduate school, announced that at the next meeting he would make a motion that the entire group system be done away with.

On motion of Dr. E. S. Bates, professor of English, English composition was transferred to the fourth group.

The medical school in Portland has asked permission to grant an A. B. degree to students who have taken three years work in another institution after one year at the medical school; action on this measure was deferred.

President Campbell was authorized to appoint a committee of six men from the faculty who are in favor of broadening the group system to make plans to be discussed at the next meeting in connection with the plans of the present committee, whose members favor doing away with the present system.

The two groups already known as Language and Social Science, Language includes English and American Literature, Greek, Latin, and modern languages, and the Social Science is made up of economics, sociology, political science and philosophy.

UNIVERSITY CATALOG IN BINDER'S HANDS

Book Sixteen Pages Larger Than Last Years; Will be Ready Next Week

Dr. W. P. Boynton, chairman of the committee on catalogue, now has the first copy of the University of Oregon catalog for 1918-1919 with announcements for 1919-1920. Dr. Boynton received the copy yesterday afternoon before all the sheets for the other copies were off the press.

The members of the catalogue committee are Dr. Boynton, the registrar, and Professor W. F. G. Thacher, who is the University editor. They have been working on the publication for some time, according to Dr. Boynton, although the work has been delayed due to unusual pressure on the University Press.

The sheets were taken to the bindery today, and copies for circulation are expected out by the middle of next week, said Dr. Boynton. This year's publication contains 356 pages as compared to 340 pages in last year's book.

All the names of the men in the S. A. T. C. are included in it as well as the names of the regular University students.

J. STITT WILSON HERE WITH STORE OF INSPIRATION

(Continued from Page One)

no hesitation in recommending to the students that they attend his entire series for he has as strong a message for American college men as any man I know of. Urge the students to plan to attend all the addresses for there is a continuity in his message which makes it highly desirable not to miss any of the series.

The lectures delivered by J. Stitt Wilson at the various universities are in a logical sequence and are the result of a thorough investigation of conditions and an intimate knowledge of them. Each one of the lectures in itself is a gem well worth the attention of every student. The lectures as they have been given are outlined as follows:

Lectures are Outlined The War and Democracy: Democracy is the goal of the ages. All up the long centuries men have struggled against tyranny, and oppression, and have suffered and died for some new realization of Liberty and Justice.

Mankind has just passed through another crucifixion; 10,000,000 soldiers have died on the battlefields of Europe; 10,000,000 civilians have suffered death indirectly because of the war; debts to the extent of nearly \$450,000,000,000 are laid upon unborn generations—all this cost in blood and treasure to make the past gains of Democracy secure, and to outlaw the principle and practice of Autocracy in the earth.

There the Supreme Moral and Social Task of every man and woman now is to live and labor for the fruition of Democracy as faithful and heroically as those who died to make the world safe for Democracy.

2. The Very Soul of Democracy. The essence of that Paganism and Materialism, which ever fruits in some form of tyranny, injustice, and autocratic abuse of humanity disrespect for human beings, disregard for their elemental rights, contempt for their latent possibilities, and finally, oppression of their lives and destruction of their liberties.

The World War for Democracy has disclosed to us again the Soul of that Democracy for which men willingly die.

Principle of Democracy The Essence or Soul or Master—Principle of Democracy is the perception of the Inviolable Sacredness of the average man as man.

This Spirit of Democracy pierces foolish camouflages of clothes and culture and cash, and the sad obsessions of Religious Castes, and sees in the humblest human being however poor and ignorant of non-religious he may be, in some sacred sense, the very image and likeness of God, the dwelling place of the Father. In his real essence, every human being is a spiritual being. The average Human Being is the basic "Unit of Democracy."

3. The Master—Virtue of Democracy. This soul of Democracy palpitates with a Master—Virtue—the soul of passion for Social Justice and Economic Righteousness.

This Master—Virtue, perceiving the unutterable sacredness of the human souls, respects and reverences the bot-

tom midsill of the human race, and demands for each and all the full measure of social, political, and industrial advantages of complete human living.

Supreme Virtue Its Humanity —As to the Supreme Iniquity of the Ages has been and is "man's inhumanity to man," so the Supreme Virtue is man's humanity to fellowman in seeking and demanding for his brother the rights, and privileges, and advantages he desires for himself: no other righteousness can be substituted for this first basic, elemental righteousness.

3. The Immediate Objective of Constructive Democracy—The Hindenburg Line of Democracy—Complete Social Reconstruction with the least possible delay, with the greatest possible rational haste, we must proceed to apply the greatest principle of Democracy to our entire Industrial Order. We must seek to democratize our use, (1), of the land (2), of the mechanical equipment of civilization, (3), of the products, and (4), of the instruments of credit and exchange: proceeding on the basis of the sacredness of human lives rather than on the basis of profits and vested interests.

The Goal of Democracy must be the transformation of our whole economic life from the basis of mad competition and strife for profits to a basis of co-operation and mutual service.

Principles Cannot Walk

4. The Consecrated Heroes of Christ —The Creators and Preservers of Democracy. Principles cannot walk. They must be incarnated in the men. There never was in history such a call for true patriots. If ever a man loved his country and his kind, now is the time to demonstrate it. The gathering clouds of world-tragedy call every true man and woman in America to the most unselfish devotion to the cause of Christian Democracy.

Only by an early, complete, and far reaching mobilization of the moral and spiritual forces of America under the leadership of the Christ Spirit on a program of Social Reconstruction can America be saved.
