Let's Go! On To CORVALLIS

VOLUME XXII. UNIVERSITY OF OREGON, EUGENE, OREGON, WEDNESDAY, NOVEMBER 17, 1920. NO. 36.

## O. A. C. BUBBLING OVER WITH SPIRIT FOR OREGON GAME

### Team Back From Pullman All Ready for Hard Battle on Saturday

## EXCURSION TO ARRIVE AT CORVALLIS EARLY

### Plenty of Time Allowed for Parade; Section Set Apart for Rooters

"I found the O. A. C. campus just buzzing with enthusiasm and preparation for the big Saturday mix," said Marion McClain, graduate manager, who returned yesterday from Corvallis after making final arrangements for the game.

The O. A. C. team came back from Pullman in good condition, according to McClain and will be ready to put up a hard fight on Saturday. "Gap" Powell was not used in the Washington State game. He was apparently saved to help beat Oregon. All the cockiness was taken out of the school by their defeat at the hands of the northern team, McClain continued, and they have buckled down to characteristic O. A. C. fight.

The official Corvallis Southern Pacific special will be divided into two sections, the first to leave Eugene at 12 and the second at 12:10 Saturday. The trains will arrive in Corvallis at 1:45 and 1:55.

## To Parade to Campus.

Immediately upon the arrival of the train, a parade will be formed which will proceed directly to the campus. This will bring the students to the field just in time for the beginning of the conflict, at 2:30.

It is suggested by Mr. McClain that everyone get his lunch before starting, since there will be no opportunity to get it in Corvallis. The town will be completely filled with O. A. C. alumni and others who have come to see the game, he said.

A section sufficient to hold all the Oregon rooting section has been reserved in the bleachers. There will be plenty of room, McClain stated, but the section will not be covered and he advises that students go prepared for Willamette weather.

## Covered Stand for Girls.

All the bleachers on the east side of the field, however, have been covered, and a section there has been reserved for the University women.

Another section has been reserved for Oregon alumni and letters have been sent out to all of them asking them to come and telling them that they may obtain seats at the game by sending two dollars to James J. Richardson at Corvallis.

The return special train will be waiting at the rear of the field at the close of the game and will leave for Eugene at 5:30.

The biggest crowd ever assembled at Corvallis is expected. State officials have written saying that they will be there. Among these are Governor Ben

(Continued on Page 2.)

## HOMECOMING PROVES BUSY TIME FOR CUPID

### Five Engagements Announced During Week-End; Class of '22 Leads With 5.

Whether homecoming had anything to do with the unusual number of engagements which were announced last week-end is not known but something was astir and several were announced.

Miss Marjorie Dalzell announced her engagement to Donald Newbury at the Pi Beta Phi house Saturday evening. Miss Dalzell is a member of the class of '22 and is spending the winter at her home in Klamath Falls; she was a week-end guest on the campus. Newbury is a member of Sigma Nu, and student in the law school.

Miss Ila Nichols announced her engagement to Virgil Cameron. Miss Nichols is a member of Alpha Phi and Cameron an A. T. O. Both are juniors in the University.

Miss Marjory Wells announced her engagement to Harold Simpson at the Alpha Phi house this week-end. Miss Wells is a member of the class of '22, and Simpson, who is a member of the class of '22, is an A. T. O.

On Monday evening Verna Shute, a freshman of Hendricks Hall, announced her engagement to Clifford ("Skeet") Manerude, of the class of '22, who is not attending the University this winter. He is a member of the Beta Theta Phi.

Dorothy Cash, a sophomore of Hendricks hall, announced her engagement to Rolfe W. Skulason, a sophomore and a member of Bachelordorn, Monday at a party at the hall.

## PRESIDENT TO RETURN TO EUGENE THIS WEEK

## Prospects of Help for Medical School Found Good

President Campbell is now enroute between Washington and Portland, and will reach the latter city sometime tonight. During his three week's absence he has attended the annual meeting of the Association of State Universities at Washington, D. C., and other conferences of educational bodies. He has visited eastern universities in company with Dr. Richard B. Dillehunt, dean of the medical school of the University, and Dr. Harry B. Torrey, head of the department of zoology and director of medical research in the University, and has conferred with representatives of the General Education Board in regard to a grant from this board to the school of medicine.

President Campbell telegraphs that the prospects for help for the medical school are excellent, but that no definite announcements have yet been made by the General Education Board.

The president will remain in Portland on business for the University for a day or two before returning to Eugene. Next week he has engagements to speak before the county institutes of Lane, Linn and Marion counties.

## TEXAS PUNISHES HAZING.

Students convicted of hazing at the University of Texas are immediately suspended from college and not allowed to return for three years.

## ANTI-STRIKE ISSUE PICKED BY PRINCETON FOR OREGON DEBATE

### U. of O. Takes Negative Side of Question To Be Discussed

## MYERS AND CANOLES CHOSEN AS SPEAKERS

### Contest to be Held During Christmas Vacation in Portland

The question for debate with Princeton as submitted in a telegram from that university received by W. M. Michael, coach of the debate team, has been accepted by Oregon. According to previous agreement, Princeton was to have choice of subject and Oregon be permitted to choose the side of the question submitted. Princeton chose the question, "Resolved, That congress should pass laws prohibiting strikes in essential industries," and stipulated that the constitutionality of the question should be wayed. The Oregon debate team choose the negative side of the question, at a meeting held yesterday afternoon and notified Princeton to that effect.

The debate will be held in Portland during the Christmas vacation, although the exact date has not yet been decided as Princeton stated they were sending this information together with other details, by letter.

C. Carl Myers and John J. Canoles comprise the team which will meet Princeton. Myers was a member of the team scheduled to meet O. A. C. and his place in that debate will be taken by Boyd Iseninger, who won a place as substitute. Both Canoles and Myers are new at the University this year. Canoles was chosen as a member of the team but was not eligible to take part in either the debate with Reed College or with O. A. C. because he would not have been matriculated three months before these debates were to take place. He will have fulfilled the requirements by the time the Princeton debate is held. He is registered as a senior in the liberal arts.

The teams as they now stand are: Remy Cox and Ralph Hoerber, affirmative, to meet Reed College here, Kenneth Armstrong and Boyd Iseninger, negative, to meet O. A. C. at Corvallis. These debates are to be held December 10, and the speeches are in good shape, according to Professor Michael. Nearly all of the research work has been done and actual practice on the delivery will begin the last of this week.

Cox, Hoerber and Armstrong are all varsity debaters, and the new men on the teams have made records in other schools which they attended.

## SAILORS TAKE OREGON EXTENSION COURSES

### Mathematics and Trigonometry Work is Ordered by Headquarters at Washington.

Correspondence courses offered in algebra and trigonometry by the extension division of the University are being utilized by the United States navy in connection with its educational work among the men in the service. At present time 350 sets of the courses are being prepared by the extension division to fill the order received from the navy department.

The order was sent in by L. R. Alderman, graduate of the University of Oregon and former state superintendent of public instruction, who is now educational adviser of the navy department, with headquarters at Washington, D. C. He said that he inquired at the library of congress for their best courses in mathematics and was given the correspondence lessons prepared by the extension division at the University of Oregon. As a result, orders were placed with the division for the desired work.

Mr. Alderman was connected with the extension division at one time, when he served as a field agent for the department. In addition to serving as state superintendent of schools he was for several years head of the Portland public school system.

## Ph. D. to be Given for Graduate Work in Psychology and Physics

### Departments Well Equipped in Apparatus and Courses for Research; Graduate Council Decision Raises Standing

Another milestone in the advancement of scholastic standing at Oregon was reached last Thursday when the graduate council passed the applications of the department of psychology and the department of physics, to give the degree of doctor of philosophy. The degrees of bachelor of arts and bachelor of science have been given since 1876 by this university. The doctoral standing given to the two departments therefore represents the outcome of nearly 50 years of progress in higher education at Oregon.

The psychology department, in its application, showed not only a satisfactory undergraduate course but a proper sequence and quantity of graduate courses covering all essential aspects of psychology.

## Many Courses Offered.

Fourteen courses, including research and thesis, are offered of a graduate character, as follows:

- Advanced Experimental Psychology.
- Advanced Physiological Psychology.
- Introspective Psychology of Memory and the Image.
- Introspective Psychology of Attention and Perception.
- Higher Thought Processes and Volition.
- Behavioristic System and Theory.
- Psychoanalytic Theory.
- History of Psychology, General.
- Seminar in History of Psychology.
- Methodology.
- Ethnic Psychology.
- Psychology of Religion.
- Psychology of Criminology.
- Research and Thesis.

In a comparative statement, the department also showed that this program ranked favorably with those of Yale, Princeton, Cornell, Northwestern, University of Indiana, University of Chicago and Clark University.

## Laboratory is Complete.

The department satisfied the graduate council that it had on hand the necessary equipment of technical literature and apparatus for these advanced degrees. It has complete sets of 31 psychological journals and incomplete sets of five foreign psychology journals, and receives regularly additional periodicals of use in classroom work.

In the way of apparatus, the department showed a comfortable supply of kymographs, tambours, time markers, electrical fittings and a large number of miscellaneous pieces of apparatus. It has good facilities for many experimental problems, such as the phenomena of learning, theories of mental measurements, problems in memory and forgetting, and problems in vocational psychology.

## Department is Large.

There are already several candidates for higher degrees, two being for doctor's degrees. Three hundred and fifty

undergraduates are taking courses in psychology.

Dr. Edmund S. Conklin, head of the department who received his doctor's degree from Clark University, has contributed many psychological articles to such journals as the Pedagogical Seminary, Volta Review, American Journal of Research, and American Journal of Psychology.

Dr. Raymond H. Wheeler, Clark University, professor in the department, served on the Beta committee, division of psychology, surgeon general's office, and helped to devise the intelligence tests used in mental examination of recruits. Other members of the psychology staff are Dr. Harold R. Crossland, Clark University, Dr. Kimball Young, Stanford University, and Colia V. Hager, University of Oregon.

## Physics Courses Open.

In the department of physics, there are offered 18 graduate courses, similar to the doctoral courses offered in the large eastern universities, such as Yale, Harvard, and Columbia. In common practice with these schools, three years of undergraduate physics and the calculus will be regarded as a reasonable preparation for the advanced degree, which will normally require four years of work, the last year to be devoted to study and research.

In the matter of apparatus and library the physics department was able to satisfy the high requirements of the graduate council. In addition, the plans of the department call for the installation of a competent mechanic with an adequate shop equipment. A liquid air plant, whose output would be used largely in research work, is also included in the equipment to be added.

## Periodicals in Library.

The physics library contains files of all the most important periodicals, complete for the modern epoch.

One hundred and fifty undergraduate students are taking courses in the physics department.

Since 1903 the head of the department has been Dr. W. P. Boynton, who is the author of a book, "The Kinetic Theory," and of a large number of articles published in the principal physics magazines of the country.

The other members of the departmental faculty includes Dr. A. E. Caswell, whose articles on the "Extension of the Electron Theory of Metals," has attracted national attention, and Professor E. H. McAllister, who handles the work on mechanics and astronomy and who has contributed important articles on water power in Oregon.

Dr. George Rebec, director of the Portland extension center of the university, is head of the graduate school, which this year has more than thirty candidates for the master's degree.

## ONLY FEW INJURIES RESULT OF VARSITY-WASHINGTON BATTLE

### No One to Be On Hospital List as Result of Homecoming Game

## NO OVER-CONFIDENCE FELT ON COMING FIGHT

### O. A. C. Sure to Present Best Front for Contest at Corvallis Saturday

Minor injuries in the form of a few bruises and sore muscles, some rather painful burns caused by the lime used in marking off the field, are the sum total of all the ill effects suffered by the Oregon eleven in the Washington game last week. A light scrimmage for Coach Huntington's proteges determined the extent of the injuries last night, and it is practically certain that there will be no one kept out of the coming battle on account of hospital duty.

The team was in the best physical condition they have been this year, when they met the Sun Dodgers, and the fact that there were not more serious injuries resulting from the conflict is positive proof of the statement. The game was hard fought throughout and had the team not been in such good shape they would not have been able to stand the grueling. This is good news to the fans for it was feared that possibly a few men would be injured in the Washington battle and would be unable to get into the game against the Aggies at Corvallis this week.

Although they had a comparatively easy time defeating the Sun Dodgers, the Oregon eleven is not afflicted with any over confidence about the oncoming battle. The Aggies are always known to fight about three times as hard against the lemon-yellow as they do against any other eleven on the coast, and this season is not expected to be an exception to the rule. So far the Beavers have won but one game this season and that over the Washington eleven by a scant three points. They are out to vindicate themselves in their last big game of the year and this will be their only opportunity to stage a "come-back." Dope may give the University of Oregon the best of it from comparative scores but dope spells nothing in football games. The Aggies held California to a lower score than any other team on the coast has been able to do and they are playing on their own home field Saturday, and everyone knows that the Aggies have the advantage when they play on their own home field.

The Aggies gridiron has a reputation which few others in the west can lay claim to. It is a mixture of gumbo which in addition to its sticking qualities also has tendency to be extremely slippery when the Oregon mist comes to its aid, as it usually does at this season of the year. Over this gumbo is spread a thin layer of sawdust which might make the spectators think that the field is perfectly dry, but it doesn't make the players think so. There is not much chance for speed on such a field and the heavier line and backs of the Aggies will give them an advantage in the game. The speedy, open style of attack which Coach Huntington's warriors used so successfully against the Sun Dodgers will not be so useful on such a gridiron.

It is probable that there will be another shift in the lemon-yellow backfield quarter in the game Saturday, according to the present outlook. The work of "Bill" Reinhart in the final quarter of the game against the Sun Dodgers in which he made yardage three times, carrying the ball about a dozen consecutive times for the gains, may mean that he will play in a halfback position against the Aggies. Reinhart handled the team at quarter until injured in the Stanford game, and in addition to his being a heady field general he is a consistent ground gainer; this fact was not only displayed in the Saturday game against Washington but also in his work against the Idaho and Stanford elevens. Coach Huntington worked Reinhart at left half in practice

(Continued on Page 2.)

## Four Colleges in Four Years, is Record of Assistant in Botany

### INTRODUCING MILDRED JOHNSON, assistant in the botany department.

She has attended four colleges in the course of her four years of university work, and she emphatically states that the changes were all entirely voluntary on her part. The emphasis is entirely unnecessary, however, for anyone seeing her snappy brown eyes and her peppy way of doing things knows that any school with a particle of discernment would want to keep her.

She started out with the University of Minnesota, but her health was not good and she went to Virginia. There she attended the Randolph-Macon Women's College.

She left Virginia because it was too cold! It was an unusual winter, and

the snow was a foot thick when she packed up her tooth brush and college pennants and started for Oregon. She picked out Willamette University by mail order, and on arriving in Oregon went to school there. Next she attended O. A. C. and was graduated there last year.

She plans to add a fifth college to her list, and is hoping to go to either Cornell or Wisconsin to get an M. S. in plant pathology, which was her major in undergraduate work.

She now finds herself in an embarrassing position. She is loyal to both O. A. C. and Oregon. The question then arises—shall she root for Oregon or O. A. C. at the game next Saturday? She thinks it will be best to beg the question and stay at home.

M. L. B.
