

VARSIITY WINS FROM O. A. C. FIVE 30-29

O. A. C. ROOKS TAKE INITIAL GAME FROM FROSH TOSSERS 21-9

Babes Outclassed by Corvallis First-Year Five After Hard Fight.

HJELTE, RANGY AGGIE CENTER STAR OF GAME

Runs Up Total of 15 Points for Team; Oregon Guards Work Well.

The O. A. C. Rooks proved to be too much for the Frosh basketeers yesterday afternoon, and the first year men took a 21 to 9 defeat in the first of a two game series to be played here. The Frosh were outclassed from the start, but kept up a game fight throughout the contest. The game was fast, and the score is a poor indication of the fight shown by the frosh. During the last half, the frosh were unable to annex a single field goal, their lone tally being made on a converted foul.

At the beginning of the first half, the frosh looked as though they would be able to give the Aggies a hard run, but after the Rooks hit their stride, they held their lead throughout the game. The first half ended 12 to 8 in favor of the Rooks, the game being all in favor of the Corvallis contingent during the second canto.

Inability to convert fouls was one of the faults of the freshmen. Allstock converted only one counter out of the several fouls called on the O. A. C. babes, while Hjelte rarely missed a chance to hook a free throw.

The Rooks started out by annexing the first point on a free throw. Hjelte, the Rook captain and center, making the free throw good. The Frosh came back and jumped into the lead when Francis Altstock scored a field basket. Hjelte converted two more fouls, and Altstock made another field basket. Oregon held the lead for a few minutes, and then the rangy Rook center began to chalk up scores regularly and O. A. C. held their position from that time on.

In the second half Oregon was never close enough to the Rooks to cause them much worry. The O. A. C. quintet piled up eight points, while the Oregon babes were only able to annex one.

Hjelte was the star of the game. He was working all the time and was high point man for the Aggies. His height gave him the advantage of the tip off, and the Rooks were able to gain considerable advantage from this fact. He played the floor well, and his size made it easy for him to guard the smaller Oregon men. He did most of the point getting for his team, scoring four field baskets and converting seven free throws out of eleven attempts, a total of fifteen points.

The guard combination of Chapman and Douglas played very good ball for Oregon. It was the work of this pair that held the Rooks score down as low as it was. Neither one of the men slacked up during the entire game and between them they kept the O. A. C. forward combination to only six points. McMillan played the best game that he has played this year. He followed Hjelte all the time, and prevented the Rook man from scoring many times. He was unable to get the tip off but was on his man all the time. He scored one field basket. Rockhey and Altstock both had an off day. They both worked hard but could not get free. Rockhey took many shots at the basket that hovered on the edge, but dropped outside. Altstock scored seven points, and hard luck kept a number of his shots from dropping. The principal trouble for both was the fact that neither passed well. They took long shots when passes might have meant a score.

Oregon only made one substitution during the entire game. That was in the last half when Blackman was sent in for McMillan. O. A. C. sent in Crane for Garrity at the start of the second half, and later sent in Ryan for Crane. Taggart was substituted for Richards in the last period also.

FRESHMEN ENTERTAIN ENJOYABLY AT DANCE

Armory Effectively Decorated For Glee; Balloons Used As Feature.

One of the most enjoyable dances of the year was given by the freshman class last night in the Armory, which was effectively decorated for the occasion.

A most brilliant part of the evening entertainment was the feature which was elaborate and unusual. A cleverly executed balloon dance was given by Verna Shute of Hendricks hall. As this was ended the lights were lowered, and as the orchestra played a slow waltz, balloons of many colors were wated as if by magic from above over the heads of the dancers. Kewpies were attached to the balloons, which were distributed among the girls as souvenirs.

Dainty programs printed in gold and tied with purple ribbon revealed to those present the order of the dances, which was: step, fox trot, waltz, step, fox trot, fox trot, step, feature waltz, fox trot, step, waltz, fox trot, step, waltz.

Music was furnished by a 10-piece orchestra, which played until 11:30. Punch was served throughout the evening to the dancers.

799 SEEK EDUCATION BY CORRESPONDENCE

129 Enroll in January, Young and Old Register.

The University extension division reports 129 registrations in correspondence courses during the month of January, 1921, as the highest record yet reached for a single month. These 129 course registrations represent 113 students, who come from 81 towns and 32 counties in Oregon. The counties having the largest number of registrations are Douglas, Umatilla, Clackamas, Washington, Lane and Multnomah. The registrations for January bring the total number of registrations in correspondence courses to 799.

Education courses are the most popular with the January students, there being 45 registrations. English comes next with 30 registrations, mathematics with 15; literature with 13; and the remainder scattered among drawing, economics, history, physics, physiology and psychology.

The correspondence students range in age from the high school student to men and women well past middle life. Their occupations and interests are as varied as their ages, for they are teaching, preaching, farming, herding sheep, taking care of homes and raising children, serving as clerks, stenographers, engineers, and doing the many other things that make up the life of Oregon communities. But they are united in their ambition to get the education that circumstances have made impossible for them to get in regular school classes. Their desire to get through correspondence courses what they have missed in other ways is illustrated by the following letter received by the extension division from a student who is doing splendid work in English.

"I am in my 70th year. I have had to work hard all my life and couldn't get an education. Now I'm having my chance. I'm a fruit grower. I have had ten children, seven of them are living. Three are still in army service, but when they come home they will be in the Agricultural College and the University."

The extension student may register at any time and continue the work as fast as time will permit. The correspondence student uses his spare time for study; he does not let it interfere in any way with his regular duties, but prepares himself for greater proficiency in his chosen field.

LEGISLATOR VISITS ON CAMPUS.

P. J. Gallagher, member of the state legislature from Ontario, will be on the campus this week-end as a guest of Professor Harl R. Douglass of the school of education and Mrs. Douglass. Mrs. Gallagher arrived from Salem last Wednesday to make a brief visit with Professor and Mrs. Douglass.

SUMMER VACATION TO BE LENGTHENED BY WEEK THIS YEAR

But Time Will Be Made Up By Cutting Into Periods of Other Holidays.

THANKSGIVING REST REDUCED TO ONE DAY

Faculty Also Adopts Plan for Full Seven Year Course in Medicine.

An extra week of summer vacation was granted and one day was taken from the Thanksgiving and four from the Christmas vacation in the schedule for the fall term of the year 1921-22, which was adopted by the faculty at its regular monthly meeting Thursday afternoon. Under the new schedule the term will begin Monday, October 3, and will close December 23, the Thursday before Christmas. The Friday after Thanksgiving will not be a holiday and as a result it will be impossible for a great majority of the students to go home for that event.

More value can be received from an additional week in the summer by a student who works than from the extra days at the Thanksgiving and Christmas periods, said Carlton Spencer, University registrar, in explanation of this action. He further stated that the Thanksgiving vacation always broke into the work of the term, as a great many students did not return to the University until a number of days after the vacation.

Medical Course Approved.
An outline of the proposed seven year medical course was also presented, and was approved by the faculty. This system provides for a three year course at the University, and then a four year course at the medical school in Portland. This will do away with the two year medical requirement at the University. It will also place Oregon's medical course among the highest, as there is only one other school in the country to require more, Johns Hopkins University.

Students in the school of education who are preparing to teach science in high school will be granted the professional degree of Bachelor of Science in education, in the future, according to the decision of the faculty. In order to fulfill the requirements for this degree they will have to take some work in education, mathematics, and four or five different sciences, but the regular 36 hours will not be required in any one department.

To Investigate Registration.
The faculty was asked to appoint a committee to consider the probability of having a system of registration for the whole year. This would enable the student to register for all three terms at the beginning of the first. If this course is found practicable it will save a great deal of time and energy on the part of both the student and the instructor.

The chairman of the committee representing the faculty colloquium gave notice that at the next faculty meeting a motion would be made to refuse graduation to a student unless 140 of the 186 hours required for graduation are above the grade of 5.

Two petitions were denied by the faculty. The first was from a student who asked to be allowed to go through the form of graduating next June, although this student lacked 6 hours of the required number to graduate. The other petition asked that the student be allowed to finish up his correspondence work while attending the University.

CARLISLE ARTICLE PRINTED.

Dr. Chester L. Carlisle, of the United States public health service, who directed the statewide survey of delinquency, dependency and mental defect, for the state of Oregon, has an article in the January number of the Elementary School Journal, published by the faculty of the school of education of the University of Chicago, entitled "A Survey of Conduct in Community and School." The Oregon state survey has had nationwide attention as a unique contribution to community welfare work.

Geologists Plan Three Weeks' Summer Camp Near Medford For Party of Twelve Students

A summer camp for geology students, offering opportunity for field work in new territory, is announced by the department of geology as a feature of the University summer school, to open June 20.

Preliminary plans for the camp, which is to duplicate that of last year, are being made by Dr. E. L. Packard, head of the department of geology. The camp, which will be held during the first three weeks of summer school, ending July 9, will be set up some distance south of the one last year, which was established near Raygold, a few miles north of Medford. Five hours University credit will be allowed the members of the party.

The vicinity selected, according to Professor Packard, affords exceptional opportunities for geological survey work, as there are, within a comparatively small area, numerous kinds of formations.

Last year the party, which consisted of seven students headed by professors of the geology department, mapped approximately 15 square miles of territory in the Medford quadrangle in the vicinity of Raygold. The maps, which show general characteristics of the country, including contours, were made with plane tables. The different formations are entered upon the map, so that it presents the result of a comprehensive study of the district.

The country, according to Professor Packard, is rich in scenic and historic as well as geological interest. The students last year took particular interest in a section of table land, to the northeast of the portion of the country in which they

were working. It was at this place, according to the stories, that the Indians made their last stand in this part of the state, against the white men. On this mesa, ending on the south in a cliff of some 150 foot drop, the red men were surrounded and put up their last heroic battle.

In order to gain an idea of the general geology of the country in which they were working, the students last year made a trip to Crater Lake. With the same purpose in view, this year, the party will spend the last few days of the trip visiting the Oregon caves, widely known for their scenic interest.

The camp, which will be established some distance south of Raygold, will conduct its operations to the south of the portion which was mapped last year. The result of the two years work will be put together, and this progress continued year after year, until a comprehensive study of the country has been made. The method used by the geology department is the same as if the party were sent out by a commercial concern, to study the formations, history, origin, and age of the district, and determine whether or not any economic products exist beneath the surface of the ground. One portion of the country covered last year was actually under development for oil.

The camp is open only to more advanced students of geology, who have completed certain requirements made by the department. The party is to be headed by Professor Packard, and the personnel will be limited to approximately 12, according to the present plans.

FIRST CONTEST WON BY HENDRICKS HALL

Theta Team Defeated 12 to 4 In Basketball Game.

Hendricks hall won the first game of the doughnut girls basketball series Thursday evening by defeating the Kappa Alpha Theta team 12 to 4. The dextrous team-work of Lynetta and Vernetta Quinlan, forwards for Hendricks, ran up their score, while "Boom" Cannon easily starred for the Thetas, playing at guard, but changing to forward long enough to make the first basket for her team. The game was fast and the ball was not held by either team to any great extent, the Thetas losing several good chances at the basket.

The line-up was as follows:
Hendricks Hall. Lynetta Quinlan...F... Catherine Bain Vernetta Quinlan...F... Star Norton Agnes Christie...C... Carolyn Cannon Helen King...C... Elizabeth Torrey Ruth Wolff...G... Jessie Lewis Emily Perry...G... Dorothy Maguire
This is the first year doughnut basketball contests have been held for the women's houses. Thus far, Kappa Alpha Theta, Hendricks hall, Oregon club, Gamma Phi Beta, Pi Beta Phi, Zeta Rho Epsilon, Thacher Cottage, and Alpha Phi have signified their intention of entering teams, and a schedule of all the games will soon be arranged.

The games are to be played in the outdoor gymnasium, since the baskets have not come for the indoor floor as yet. Miss Emma Waterman is coaching the teams and refereed the Hendricks Hall-Theta game. A trophy will be awarded to the winning team by the Women's Athletic Association.

CHAPERONS SCARCE AT IOWA.

It is almost impossible to obtain chaperons at university affairs at the University of Iowa, because they cannot countenance the mode of dancing and because they do not like to reprimand the couples on the floor.

PLEDGING ANNOUNCED.

Alpha Phi announces the pledging of Della Deich of Portland.

STUDENT BODY PLAY TRYOUT TO BE SUNDAY

"Arizona," Melodrama To Be Put on in March.

Tryouts for the part of Bonita Canby, leading lady in "Arizona," a melodrama by Augustus Thomas, will be held in the Y. W. C. A. Sunday at 4:30 p. m. The play will be given sometime in March as a student body production, under the direction of Mask and Buskin. It is desired that all women on the campus who have had any experience in the stage attend the tryout.

The student body play is an innovation on the campus. Many have long felt the need of such an activity separate from the work of the public speaking department and this play comes as the initial move in response to this demand.

Direction of the play will be in the hands of Bob Earle, who has had a great deal of experience, having played all over the northwest in Chautauqua and in stock companies in Washington. He is anxious to get in touch with all interested in the play.

"Arizona" is without doubt one of the best melodramas on the stage today. The story is laid at the ranch of a successful cattleman near a frontier fort. Much soldier life of the 1890's is depicted with many harrowing scenes tense with action.

UKRAIN WANTS SCHOOL

Nation, Near Russia, Asks About Oregon With Idea of Starting University.

The new nation of Ukraina, located on the southwestern border of Russia, wants to know about the University of Oregon with the view of establishing similar institutions in Ukraina.

The request for information came from the Ukrainian Diplomatic Mission at Washington, D. C., but is originally from the Ministry of Education of the Ukrainian peoples republic. Copies of the constitution and by-laws and other data pertaining to the conduct of the University were among the things desired.

BASKETEERS WREST INITIAL COURT TITLE FROM BEAVER QUINT

Eddie Durno Star of Contest; Converts 20 Free Throws for Counters.

VISITORS LEAD 19-11 END OF FIRST PERIOD

Game Replete With Fouls On Both Sides; Aggies Strong At End.

Oregon Agricultural College, Corvallis, Feb. 4. — (Special to the Emerald.) — In a spectacular and fight-to-the-finish game the University of Oregon basketball team slipped over a 30 to 29 victory with the Aggie five.

The game was battle royal from the starting whistle with Eddie Durno starting by his brilliant playing. By his miraculous shooting ability and clever floor work Durno had the Aggie team baffled. He converted 20 out of 23 free throws, while Stinson converted 17 out of 21 fouls. The game was characterized by an unusual number of fouls on both sides, most of which were of a highly technical nature.

Durno started the scoring by making a difficult basket from the center of the floor. Stinson and Durno then alternated on five free throws. Latham had the jump on the O. A. C. center during the first half. Free throws, rather than field baskets predominated. Stinson and Durno alternated with four fouls. Stinson then missed three fouls, Eddie Durno playing like a wild man. He made an astounding shot from the middle of the floor. Stinson converted a foul. Oregon easily had the edge on the Aggie team during the first half. Accurate passing and excellent team work caused the half to end 19 to 11 in Oregon's favor. Bill Reinhart was substituted for Hugh Latham, just before the close of the half.

In the second half Arthur started the fireworks by making a free throw for O. A. C. Sanders rangy O. A. C. center, scored a basket when Bellar pulled a sensational play by tossing the ball through the hoop from the middle of the floor. Both teams were out for blood the second half, and O. A. C. was gradually gaining on Oregon's lead. A sudden spurt netted O. A. C. four points, made by Sanders and Arthur. The referee continually halted the fast game by calling technical fouls. Again the Aggies added to their score by Arthur making a free throw and Hubbard scoring a basket. Two fouls called on O. A. C., Durno converting one and missing the other. Stinson, standing on the sidelines, shot a basket from a difficult angle. Arthur scored another two points.

The game grew rougher and faster toward the end with O. A. C. making a last desperate effort to win. In the last few minutes of play, with the score 30-29 and the Oregon and O. A. C. rosters wildly cheering, neither side was able to score, and the lemon-yellow team emerged victorious.

With the exception of Durno there were practically no individual stars although Chapman and Latham performed well. The O. A. C. letter men put on their initiation between halves. The second game of the two-game series will be played Saturday night.

O. A. C.
Durno 20.....F..... Stinson 19
M. Latham.....F..... Arthur 6
H. Latham.....C..... Sanders 2
Bellar 2.....G..... Ross
Chapman 2.....G..... Hubbard 2
Referee: T. H. Gawley, Portland Y.
M. C. A. Substitutions: Oregon, Reinhart for Latham.

STATEWIDE SURVEY ON FILE.

Copies of the statewide survey of delinquency, dependency and mental defect, just completed by Dr. C. L. Carlisle, of the United States public health service for the state legislature, are now on file at the library, for inspection by all interested. The survey was made under the auspices of the extension division of the University.
