

PORTLAND MEDICAL SCHOOL NOW ON CAMPUS

(Continued from Page 1.)

Those who apply now for entrance next fall will not know until July 15 whether their application has been granted.

Hospital Ready in 1922.

The new hospital now being built will not be ready for use before October, 1922. If the legislature passes the budget prepared by the medical school, sufficient funds will be secured to increase the equipment and double the staff. If this is done the number permitted to enter each year can be increased accordingly. As conditions are now, the school is taxed to its capacity and more.

With a seven year course as one unit the University Medical School is offering one of the strongest medical courses in the United States and the plan is to make the school a great medical training and research center. This center is expected to serve the entire northwest as it is at present the only school north of San Francisco and west of Denver.

APPROPRIATIONS FOR SCHOOL PASSES STATE LEGISLATURE

The appropriation of \$271,000 passed by both houses of the legislature this week for the University of Oregon Medical School in Portland, and the corresponding amount that is expected from the General Education Board, will make a total of \$540,000 that will be expended on medical training, medical research and medical buildings in Portland in 1921-1922.

Of this amount it is estimated that approximately \$275,000 will be spent in

the construction of a new building, \$100,000 a year as a total maintenance for salaries, supplies, and care of buildings and grounds, and \$100,000 in the next two years for equipment.

Teachers To Be Added.

The increase in the number of students at the medical school will require an addition to the teaching force, as well as an increase in the number of assistants. Admission to the medical school last fall was limited to 60 out of about 100 applicants because of the lack of space and equipment, but with this appropriation a larger number of students can be served.

Probably the greatest expenditure of the appropriation for equipment will be in connection with research work and the free dispensary which has been maintained as a part of the medical school. As director of research in medical science, Dr. Harry Beal Torrey has been working on certain research problems, and especially on cancer. "We hope to have the medical school an efficient factor in a comprehensive state health program," said President Campbell, in outlining the plans. It will be able to co-operate with about 18 health organizations, he explained, and in this way look toward preventive medicine and general public hygiene. It will also co-operate with the school of physical education and the extension division on the campus, and with the Portland branch of the school of sociology, which undertakes the training of public health nurses.

WANTED—University students personal washings. Satisfaction guaranteed. Will deliver to any address. MRS. EDNA HOWELL, Corner 21st. 2092 Onyx St.
