

12-7 VICTORY EVENS WILLAMETTE SERIES; IMPROVEMENT NOTED

Varsity Wins Easy In Seven-Inning Matinee Last Saturday

BOHLER TAKES TEAM OFF TO NORTH SOON

Eight Games Scheduled For Trip; Leave Thursday; Back May 1st

The Oregon varsity had little trouble in trouncing Willamette in the second game of the two-game series last Saturday, and won 12 to 7. Coach Bohler's proteges showed marked improvement in Saturday's matinee over the day previous when the Bearcats annexed the long end of the score.

Two more days of practice, and the varsity crew, as yet not definitely picked by Coach Bohler, pulls out of Eugene on their northern trip when they will invade Seattle, Pullman, Walla Walla, Kennebec and Portland, for a series of eight games, returning to Eugene on May 1.

When the team leaves Thursday, they will leave with an average of .500 in the Northwest conference, the result of the two games played with Willamette. Two games with Washington at Seattle will figure in the coast conference percentages, two with W. S. C. in both conferences, while the one contest with Whitman in the Northwest only. A game will be played with a town team at Kennebec, while the varsity mixes with the North Pacific Dentists and the Multnomah club at Portland before returning home.

Contest Is Swiftest.

The contest against Willamette last Saturday developed into a veritable swiftest before the conclusion of the seven innings played. The game was called at 4:30 to allow the Bearcat tossers to catch a train. The varsity amassed a total of ten hits off the two twirlers used by Coach Matthews of the visitors, while Willamette gathered seven off the three moundsmen who saw service under the Lemon-Yellow colors during the game.

Bohler started an infield composed of Ralph Smith on first, Franz Bellar on second, Bill Collins at short, and Charlie Svarverud at third, and for the first time this season used this combination throughout the game. Don Zimmerman held down center field in place of Johnny Gamble. All told, the varsity made but five scattered errors as against eight for the visitors.

Bohler seems to have developed some real sluggers, judging from some of the long distance bingles handed out Saturday. Svarverud, Knudson and Jacobson, during the few innings he was in the contest, batted close to perfection, according to the score books, the first two crossing the pan three times apiece during the contest. The hits came at times when the varsity were able to push runners across for tallies. In the second canto, "Spike" Leslie leaned on one of

BUGS BUZZED, OWNER WANTS PHRENOLOGIST

Leo Abbott's Automobile Roams Streets and Bees the Pastures; Says He Loves Insects.

Leo Abbott, a major in law and a member of the Phi Delta Phi honorary law fraternity, recently purchased a bug. He now further displays his love for the insect family by acquiring two hives of honey bees which he is going to pasture on the Phi Delta lawn and the neighbors' fruit trees.

He says he is making a business experiment and does not stem to consider the fact that he has been stung a number of times any indication of failure. Just now, however, he is in search of a phrenologist who, he thinks, might be interested in the unusual bumps that have so suddenly made themselves painfully noticeable under his hat.

FENTON GIFT TO BE FORMALLY PRESENTED

Donation Will Be Feature Of Assembly Program

Formal presentation of the Kenneth Lucas Fenton Memorial law library will take place in Villard hall on Thursday morning at 11 o'clock. Mr. and Mrs. W. D. Fenton, donors of the library, will be represented by Mr. George H. Burnett, member of the Oregon state supreme court.

The following program has been arranged for the presentation ceremonies: Overture—Morning, Noon and Night, University orchestra.

Introduction of Mr. George H. Burnett, representing Mr. and Mrs. W. D. Fenton, President P. L. Campbell.

Address of Presentation—Mr. George H. Burnett, member of Oregon state supreme court.

Address of Acceptance on part of board of regents—Mr. J. W. Hamilton, president of board of regents.

Address of Acceptance on part of law school—Mr. Louis E. Bean, member of Lane county bar.

The Fenton collection will be a special asset to the Eugene bar, according to Dean Hale, of the law school, for they have free access to the library and use of it at will. This makes the participation of a member of the Eugene bar of special significance, according to the dean.

The books are still temporarily stored in the old commerce building but Dean Hale expressed the hope that work could be started on the shelving shortly. The architecture department has made a survey of the building and pronounced it strong enough to support the weight of the massive collection. The present library will be turned over for use as a stack room only and an adjoining room will be utilized as a reading room, according to Dean Hale.

The addition of the Fenton library to the volumes now owned by the law schools brings the total number of books in the library up to about 20,000. Only the library of the state supreme court at Salem excels it, in Dean Hale's opinion. The supreme court library is said to be one of the best in the country and is the result of long and careful compilation.

Men's Glee Club Which Will Appear Here April 23

The men's glee club, with the record behind them of an exceptionally successful season and a phenomenal success in Portland, will appear in concert in Eugene this coming Saturday.

The program bears the promise of a concert, the equal of which has not been offered by an Oregon glee club in many years. The numbers which will be sung

will include many of those which were used on the recent trip to Portland and so well received by the audience in the metropolis.

The stunt this year has undergone considerable extra work. Contrary to the usual custom, it is not shrouded in mystery—to avail but little upon the night of presentation. However, members of the glee club say little regarding it, except that it is replete with "local color."

This also is true of a considerable portion of the program, several of the numbers used on the Portland trip being left out to be replaced by interesting take-offs on campus subjects.

The glee club has been under the direction of John Stark Evans, whose ability as a director has been largely responsible for its splendid work this year.

OREGON TEAM WINS RIFLE COMPETITION

Margin of 14 Points Chalked Up Over Aggie Squad

"Ring up another bull's-eye."

As Daniel Boones, Oregon men have the edge on O. A. C.—proved last Saturday when for the second time this year, the Oregon rifle team shot its way to victory over the Aggie cadets. Competition held on the regular range resulted in a 1607 score for the Oregon squad, against a 1593 score made by O. A. C.

The shoot was held by each team simultaneously firing upon its own range, the result of the scores being exchanged by telegraph after the shoot. The firing was done in three positions at two ranges, 200 and 300 yards.

High Men Are Tied.

Charles G. Robertson and Orvin T. Gant were high point men for the Oregon team, each making a score of 175 points out of a possible 200. The team was composed of ten men, Robertson, Gant, Marvin Eby, Dean Hurd, William Durham, Edward McAllister, Don Zimmerman, Orange Lemon, James Meek and Percy Lasselle.

The Oregon squad fired on the target range at the south end of Willamette street. At 200 yards the firing was done from standing and kneeling positions in slow fire, and kneeling position at rapid fire. At 300 yards, prone and kneeling positions were used in slow fire and the prone position in rapid fire.

Eby and Hurd Are Next.

Eby and Hurd shot close second to the leaders of the score, their totals being 174. Durham took third place with a score of 169. The highest individual score for any one position was that of 47 out of a possible 50, made by Robertson in rapid fire at a range of 200 yards.

In the first competition held this year, Oregon was victorious by a score of 860 to 802. This shoot was held on the indoor range, with sub-calibre rifles and ammunition. The scoring and results were handled in the same manner as the shoot which was held last Saturday.

University Is Challenged.

Both matches were sponsored by O. A. C., who issued the challenge to the University of Oregon. The challenge was accepted, and the team coached by Major A. E. Rowland. Several of the members of the team were present at the summer training camp last vacation and participated in the coast competition.

Although no further matches are definitely scheduled, Major R. C. Baird, commandant, expects to make arrangements for two more shoots before the end of the year. He plans, if possible, to bring the O. A. C. team here, so that both teams can shoot upon the same range. The Oregon team would then go to Corvallis for a return match.

WHEELER TO GO TO STANFORD.

Dr. R. H. Wheeler, of the psychology department, will leave for Stanford University about June 20, where he is to be an instructor in the summer school. The subjects which he will teach are mental measurements and psychology for teachers. The summer session at Stanford will last for five weeks. Dr. Wheeler was a summer school instructor at Stanford last year also.

STUDENTS WHO GAZE ON MARS NOT POETS

Those Who Look Heavenward Through Transit, Accomplish Merely a Tomorrow's Task.

If, on some sunny Tuesday afternoon, or on some starry Wednesday night, you should happen to see a group of young persons on the campus taking turns gazing at the heavens through an "engineer's transit," set up on a long-legged tripod, don't think that those young persons are surveyors—nor poets seeking inspiration from a more intimate acquaintance with the heavens.

The gazers heavenward, you may observe, are probably only some members of Prof. E. H. McAllister's class in astronomy—there are six of them, and they do study the sun and stars through surveyors' instruments, and as near as we can learn, they are not at all poetic or temperamental. In fact, Professor McAllister, himself, declared the work to be "shamelessly utilitarian." "It involves a lot of hard work and drudgery," he said. "The students go out by twos, and one observes while the other makes computations."

Well, what is it all about?

"It is a course in practical astronomy," explained the instructor, "The course usually taken by surveyors, and consists of making observations of the sun and stars from which to determine time, latitude, and longitude. Of course," Dr. McAllister continued, "we have to make our observations on days and evenings when the sky is clear. In the evening, it is necessary to have artificial light in order to read the instrument, so the students take a flash light. We select an open place on the campus where there are no trees to obstruct the view."

So there, when you see these star gazers, hereafter, know that they are hard-working students getting their lessons just like the rest of us—even so.

INFIRMARY IS AIDED BY WORK OF STUDENT

Madeline Slotbloom, Senior, Tests All Patients For Signs of Bacteria.

The infirmary has been greatly strengthened this year according to Dr. E. H. Sawyer, by the assistance of Miss Madeline Slotbloom, the "laboratory technician," whose special duty it is to make a chemical and bacteriological analysis of disease germs and bacteria. Miss Slotbloom works every afternoon at this work, having as her laboratory a part of Dr. Sweetser's in Deady hall. This is the first year that such an analysis has been made at the University.

This work is especially important in cases of epidemic, for it enables such cases to be isolated early, and also the right kind of treatment to be administered at once. A bacteriological and chemical analysis, made on six students this year which told of typhoid and diptheritic germs were found to be of great value for the treatment and diagnosis of these patients in the infirmary. "Such work as hers," said Dr. Sawyer, "is absolutely indispensable to modern medical work."

Miss Slotbloom also assists Dr. Bertha Stuart in taking the blood counts of underweight girls, and in finding out cases of anemia. Such cases which are not actually sick cases, but show blood impoverishment are showed up by her and given effective treatment.

Another of her duties is that of testing the swimming tanks for germs, which is done daily.

HAYCOX IS FIRST IN STORY CONTEST

Edison Marshall prize given to "The Veil"

First place in the Edison Marshall short story contest was won by Ernest Haycox, whose story was entitled "The Veil," according to an announcement made by Professor W. F. G. Thatcher yesterday. This award carries a prize of \$15.

Irene Stewart took the second prize of \$10 with her story, "Constin." Third place was given to Geraldine Cartmel for her story entitled "All His Goods He Spent." An autographed copy of Marshall's latest book was offered for third prize.

All three of the successful contestants were members of Professor Thatcher's advanced short story class. Miss Stewart received honorable mention in last year's contest.

The judges did not agree in their first decisions and the final decision was reached only after a compilation of the grades given the papers had been made. In a letter to Professor Thatcher, one of the judges said, "I think one of the most amusing things in several of these manuscripts is the ingenious and vicarious knowledge of 'the world, the flesh and the devil' that the writers display."

Judges for the contest were Miss Grace Edgington, of the English department, Miss Grace Torrey, well known Portland short story writer, and E. L. Devereaux, of Portland.

SCIENCE CLUB TO TAKE 7 STUDENT MEMBERS

Fifty Men and Women of Sigma Xi Will Be Here For Initiation Banquet.

Seven student honorary members will be initiated into the University Science club tonight, following a banquet, which is to be held at the Anchorage at 6:30. About 50 men and women, members of Sigma Xi, national honorary science fraternity, will be the guests of the club for the evening. Besides the initiation, there will be a number of talks on scientific matters.

The Science club has made it a custom to elect a certain number of seniors each year to membership, who have shown ability and enthusiasm in their work in science. The seven chosen this year are Alice Thurston and Marie Ridings, mathematics; Arthur Bramley, physics; Wilbur Hulst, psychology; Robert Bradshaw, botany; Ben Horning and Mary Chambers, zoology.

Professor Henry Hartman, of the horticulture department at O. A. C., will give a talk on "Localized Variations in Plant Individuals." Professor Samuel H. Graf, of the department of experimental engineering, will talk on the subject of "Physical Properties of Matter As Revealed By Its Microstructure."

A number of the guests, all of whom are interested in pure or applied physics, will arrive on the campus during the afternoon, to be the guests of the University while here.

PLEDGING ANNOUNCED.

Sigma Alpha Epsilon announces the pledging of Clarence R. Baldwin, of Maui, Hawaii.

FROSH TRACK SQUAD ADMINISTERS 82-38 DEFEAT TO FRANKLIN

Sparrow Oregon High Point Man With Three Firsts And One Third

MULLEN RINGS IN 11 POINTS FOR PREPPERS

Three Men Tie For Top Notch In High Jump; Freshmen Win Relay

The Oregon frosh, under the guidance of "Hank" Foster, administered a fall-fledged defeat to the Franklin high school squad Saturday afternoon. A score of 38 to 82 was the best that the preppers could do against the yearlings. The meet was held on Hayward field.

One of the striking events of the meet was the high jump, in which three men tied for first place. Patterson, of Franklin, and Sparrow and Campbell, of Oregon, each cleared the bar at five feet, seven inches.

Franklin was able to annex all three places in the mile. Oregon took all three places in the shot put. The relay race went to the freshmen with a time of one minute and 37 seconds.

High point men for the meet were Sparrow, of Oregon, with 16 points, and Mullen, of Franklin, with 11 points. Sparrow placed first in the high jump, broad jump and pole vault and third in the javelin throw. Mullen placed first in the low hurdles and second in both the 100 and 220 yard dashes.

The results of the events were: 440 yard dash—Covall, Oregon, first; Poulsen, Franklin, second; Jones, Franklin, third. Time 53 seconds.

100 yard dash—Grilley, Oregon, first; Mullen, Franklin, second; Ghio, Oregon, third. Time 10 1-5 seconds.

Pole vault—Sparrow, Oregon, first; Rosenberg, Oregon, second; Poulsen, Franklin, third. Height, 10 feet, 6 inches.

12 pound shot—Parsons, Oregon, first; DeArmond, Oregon, second; McCraw, Oregon, third. Distance, 47 feet, 3 inches.

220 yard dash—Grilley, Oregon, first; Mullen, Franklin, second; Gooley, Franklin, third. Time, 23 seconds.

High jump—Sparrow, Oregon, and Patterson, Franklin, tied for first. Height 5 feet, 7 inches.

Broad jump—Sparrow, Oregon, first; Rosenberg, Oregon, second; Holmes, Franklin, third. Distance, 20 feet, 7 inches.

75 yard hurdles—Campbell, Oregon, first; Poulsen, Franklin, second; no third. Time, 12 seconds.

Discus—Parsons, Oregon, first; McCraw, Oregon, second; Keyser, Franklin, third. Distance, 106 feet, 6 inches.

Low hurdles—Mullen, Franklin, first; Cook, Oregon, second; Sulfrigt, Franklin, third. Time 28 seconds.

Javelin—DeArmond, Oregon, first; Rosenberg, Oregon, second; Sparrow, Oregon, third. Distance, 140 feet.

Half mile—Peake, Franklin, first; Beatty, Oregon, second; Getz, Franklin, third. Time, 2 minutes, 9 seconds.

Relay—Oregon. Time, 1 minute, 37 seconds.

DEAN HERE FROM REED

Miss Bertha Young Addresses Class In Vocational Guidance.

Miss Bertha Young, dean of women of Reed College, arrived in Eugene on Saturday to be the guest of the University for a few days. She came, at the invitation of Dean Fox, to attend the Matzner concert on Saturday and will address the class in vocational guidance today. Friends of Miss Young planned several delightful social affairs in her honor. Dean Fox and Miss Gertrude Talbot gave a dinner for her at Hendricks hall on Saturday, and yesterday Mrs. Campbell and Miss Talbot entertained at a tea for Miss Young.

THESE MEN REPORT AT 4 TO DAY ON KINCAID FIELD

Orval Millard, Elwyn G. Miller, Eugene D. Miller, Darrell J. Mills, Allen H. Mooers, Paul Mortimer, Charles Myers, Jack S. Myers, Raleigh S. Myers, Williamson C. Myers, George Neale, Herman Oakes, John J. O'Farrell, Warren E. Oliver, Russell C. Olson, Orin O. Page, Walter L. Palmer, Herbert V. Pate, George H. Pfeuffer, Federico B. Plurad, Benjamin H. M. Pollock, Harold E. Porter, Howard E. Powell, Bennie A. Reed.

Oregon and O. A. C. Cabinets Meet on Upper McKenzie

Council meetings of various kinds are usually bore some, routine affairs, but the girls of the O. A. C. and Oregon cabinets of the Y. W. C. A., who met this weekend at the Blue River hotel about 45 miles up the McKenzie river for a conference, declared they had a wonderful time besides accomplishing a lot of real work.

The council sessions were taken up with the discussion of different phases of the work of the association. The place of Christianity on the campus, the definition of Christian, the purpose of the Association, and the relation of the cabinet members to the campus as a whole, were some of the subjects discussed.

The seven O. A. C. girls, Miss Gladys Taylor, secretary from Corvallis, ten Oregon girls and Miss Dinsdale left Friday afternoon for the hotel in cars provided by men of the University. These men managed to amuse themselves upon arriving by going fishing. Four other girls came up Saturday morning, bringing with them Miss Alice Brown, student executive for the northwest field of the Y. W. C. A.

A Seabeck luncheon, with the centerpiece on the table fixed to represent the lagoon at Seabeck with its bridge and

swimming pool, was the idea carried out Saturday noon. Impromptu Seabeck toasts were given by the different girls, and Seabeck songs were learned.

In the afternoon all of the girls started on a hike to the Lucky Boy mine, but only seven reached the goal. The mine was about 14 miles from the hotel. The mine is an old-fashioned silver mine.

A huge bonfire and a marshmallow toast were the order of the evening. The marshmallows were especially enjoyed because they had been given up for lost for such a long time. Several boys threw the marshmallow box into the river causing great consternation among the girls. It was empty, however, and after having enjoyed the effects of their joke, they brought the candy back and peace was restored. Oregon and O. A. C. songs were sung and several new things along the musical line were introduced, according to participants.

Two of the girls who did not go to the mine visited a construction camp. Having seen all of the camp they wished, they managed to get transportation to Belknap springs and home again.

The girls had their rooms in cottages near the Blue River hotel. They took their own cook and food and had plenty of opportunity to wait on tables and set
