VOLUME XXII.

UNIVERSITY OF OREGON, EUGENE, OREGON, THURSDAY, APRIL 21, 1921.

NO. 115.

## BASEBALL SQUAD TO LEAVE TODAY FOR 7 GAME TRIP IN NORTH

14 Members Taken; First of Series Will Be Played in Seattle

### LINE-UP NOT GIVEN BY COACH BOHLER

Batting Ability of Men Has Much to do With Deciding Those Selected.

Fourteen members of the varsity baseball squad and Coach George M. Bohler will leave Eugene this afternoon on the 5 o'clock Southern Pacific train for Seattle, where they will meet the University of Washington nine in the opening number of a two-game series, tomorrow afternoon. The series with the Sun-doggers will be followed by a two-game series with the Washington State College tossers at Pullman on Monday and Tuesday.

#### One Game Cancelled.

On Wednesday the squad will take a jump down to Walla Walla, where they will meet the Whitman College team for one game. Thursday's game which was to have been played in Kennewick with a semi-pro organization, has been cancelled.

Friday and Saturday will see the Lem-on-Yellow nine back in Portland, where they will meet the North Pacific Dental College team in a return game Friday, and the Multnomah Club aggregation on Saturday. Seven games will be played on the entire trip which will be the only jamm the varsity will take this season with the exception of the games to be played with the Oregon Aggies at Corvallis the latter part of May.

Four pitchers included in the squad which leaves this afternoon, are Art Berg, "Jake" Jacobsen, Rolla Gray and Marc Latham. Berg and Jacobsen are both letter men, while Gray was a member of the frosh pitching staff last year, and Latham worked on the mound for the frosh in the spring of 1919.

#### Lineup Not Given.

Coach Bohler did not give out his lineup for the opening games, although it is probable that the battery will be made up of Berg and Leslie, while the infield positions will be filled by Smith at first, Beller or Base on second, H. Jacobberger at short, and Svaverud on third base. The outer garden will be taken care of by Captain Reinhart, Knudsen and Gamble or Zimmerman.

The task of selecting an infield has been no easy one for Coach Bohler and he has been working the squad hard in the batting cages for the past week in an effort to get together a good aggregation of hitters. Special stress has been made on this particular point and it is evident from the selections made for the trip north that the men who are batting at the top of the list are the ones who have been selected for the positions. Collins, Liebe, Glos and Veatch have all been working good in the infield positions and it is evident that they were left out of the lineup for the northern trip on account of their not ranking alongside the infield chosen in batting averages.

#### Stiff Competition Expected.

Berg, Gray, and Jacobsen have all demonstrated their ability in the box so far and Latham is showing promise, although he has only been out a short time. On account of the seven hard games, it was decided to stock up the pitching staff well.

Both the University of Washington and Washington State College are rated to have a fast team this spring, and the varsity will be up against stiff competition in the north. The Sundoggers have lost but one game in the 14 early practice games they have played with the semi-pro teams in the vicinity of Seattle.

## WILLAMETTE TO DEBATE

Women Schedule Forensic Contest With Washington State.

Washington State College, Pullman, April 18.—(P. I. N. S.)—An all-women's debate will be held between the women of Willamette University and the State College about May 13. This is the first all-women's debate that has been held here for years and is stimulating much interest.

The question is: Resolved, That all Japanese, with the exception of students and diplomatic classes, should be excluded from the United States. It will be a dual debate. The team is not yet chosen, but final tryouts will be held soon.

## DISAPPEARANCE OF "CAESAR" IS MYSTERY

Many Solutions Offered to Explain Loss of Mrs. Anna L. Beck's Chronometer.

Cleopatra by her wiles may have led him astray, or Brutus, not because he loved him less but because he loved Rome more, may have made away with him. However, no matter how it came about, "Caesar," the little alarm clock that for so long has been the temporal ruler of Mrs. Anna L. Beck's classes in the music building, is nowhere to be found.

"Caesar was too ambitious, therefore some Brutus nipped him," was the only explanation that Mrs. Beck could give of the disappearance. It appears that the clock ran a little too fast and Mrs. Beck thinks that some member of the class was so conscientious that he took it so that classes would not be let out early.

Rex Underwood has an entirely different explanation of the mystery. He says he thinks "Caesar is a-roaming." Mrs. Beck believes firmly, however, that if Caesar could tell her his story, he would not say, like his namesake, "Gallia est omnis divisa in partes tres." His words would be, "Gallia est omnis contenta in una persona."

## 13 TRACK MEN WILL MAKE SEATTLE TRIP

Varsity Is Handicapped By Wet Weather

Thirteen track men, accompanied by Coach Bill Hayward and Assistant Graduate Manager Jack Benefield, will make the trip to Seattle to enter the relay carnival this week-end. Relay teams will be sent in the half mile relay, the mile relay and the two mile relay. Arthur Tuck will enter the pentathlon.

The men to make the trip, in the 220 will be Art Kuenhausen, Del Oberteuffer, "Ole" Larsen and Roscoe Hemmenway. "Sean" Collins, Tommy Wyatt, Ray Lucas and Dick Sunderleaf will enter the 440 distance. The half millers will be Glenn Walkley, "Speed" Paltier, Wayne Akers and Bill Coleman. The track men have been handicapped during the past two weeks by bad weather and have not had much opportunity to work out. Kincaid field has been muddy and the Hayward field track has not had sufficient rolling to make it hard. The tryouts were all run in slow time, due to the spongy condition of the field.

Little is known of the teams of the other colleges, but with the exception of O. A. C. they have not had to contend against the rain.

The half mile team looks like Oregon's best bet in the carnival, with Walkley and Paltier running about a dead heat, and Akers and Coleman not far behind.

The 220 team is a doubtful quantity as the races this year have all been run on poor fields, and the men have not had a chance to show all that they have. Oberteuffer looks better than last year, and Kuenhausen stepped a good pace in the tryouts. Larsen has been laid up with a bad leg until recently, but seems to be in good shape now.

"Sean" Collins, in the quarter, is able to step with any man in his distance on the coast. Sunderleaf is a letter man from last season, and is in good shape. Lucas and Wyatt are both new men and will have a chance to prove their metal in the meet. The team will leave either tonight or tomorrow morning.

## DURNO TO COACH U. H. S.

Eddie to Handle Athletics For Rest of the Year; Baseball to Start.

Eddie Durno has been secured by the University high school to teach physical training and athletics to the boys of the high school for the rest of the year. This work has been handled by the Y. M. C. A. since G. E. Finnerty resigned to accept the position of principal of the Eugene high school at the beginning of the year.

The gymnasium in the University high school has made it possible for the training to be conducted in the new building. As soon as the baseball diamond is in shape Durno will issue a call for candidates for the high school baseball team.

## SIGMA NU HOLDS CONVENTION.

The Nevada chapter of Sigma Nu, the national fraternity, is holding its annual 17th division convention at Reno this year. Chapters of the Universities of Arizona, California and Stanford are represented among the delegates.

## BENEFIELD IS NAMED TO SUCCEED M'CLAIN UNTIL END OF YEAR

Present Assistant Made Acting Graduate Manager; Final Selection May 26

### ATHLETIC COUNCIL TO HUNT FOR CANDIDATES

Oregon Man Preferred But Not Essential; Applicants Are Many

Jack Benefield, a senior majoring in commerce, who during the past year has been serving as assistant graduate manager, was last night named as acting manager of the associated students to succeed Marion F. McClain, whose resignation as graduate manager was accepted. Election of a permanent manager will not be made until May 26, the A. S. U. O. constitution definitely stating that the graduate manager not be named until two weeks after regular student elections, which occur on May 12 this year.

Benefield Makes Schedules. Benefield has, during the past year, largely taken over the duties of graduate manager, and is familiar with the details of the work necessary. He attended to the arranging of practically all schedules except football during the past year.

In accepting the resignation of McClain, the athletic council, in its meeting last night when action was taken, expressed its appreciation to McClain for his services to the associated students during the years he has been graduate manager. In the future McClain will devote his entire attention to the Co-op, of which he is manager.

The athletic council will make every endeavor to seek the services of a fully qualified man for the position as manager, and the committee named at the last meeting of the council will continue to act. Every possible candidate for the position will receive ample consideration, it was stated, and the entire field will be looked over.

#### Large Number Apply.

A large number of applicants have already appeared, and are being taken under consideration by the committee and the council. A motion made during the meeting was to the effect that Oregon graduates were to be favored for the position, providing they were found to possess the proper qualifications. A previous motion to the effect that only Oregon graduates be considered, was withdrawn.

The meeting was held at 5 p. m. yesterday afternoon and lasted until 6:30. The executive council was also present.

## MOON'S ECLIPSE MAY BE HIDDEN BY CLOUDS

All Planet To Be Shadow Covered at 11:23, Says De Cou.

The moon doth eclipse this night, and all who are wakeful through the eerie hours when the day is spent may view the phenomenon—provided the god of storms chases his clouds into the fold and clears the sky.

"This will be a total eclipse, and if it occurs according to astronomical predictions, it should begin to be visible to the eyes of the ordinary observer at three minutes past ten, at which time the moon will enter the umbra, or shadow proper, and will appear to have a small bite taken out of the side," says Professor E. H. McAllister, who teaches astronomy in the University. "The shadow of the earth will continue to move across the moon, darkening a bigger section, until, at 11:23, totality will begin. The disc will remain completely in the shadow until 12:05, when the observer may see its light appearing again on the side.

"At 1:25, the moon leaves the umbra, and the eclipse is over as far as the ordinary observer is concerned," continued Professor McAllister. "It will be in the penumbra, or outer shadow, until 2:32, but this shadow is faint and perhaps the only unusual thing visible to an untrained eye will be a coppery color which is sometimes noticeable in the moon at this stage of the eclipse."

Total eclipses always occur at full moon, explained Professor McAllister. There will be a partial eclipse on October 16 of this year.

"Of course," warned the professor, in conclusion, "if the sky is overcast, the phenomenon will be lost to us."

## Fenton Law Library, Gift of Father of U. of O. Graduate, To Be Presented At Assembly

The Fenton Memorial Library, given to the University of Oregon by Mr. and Mrs. William David Fenton, of Portland, in memory of their son, Kenneth Lucas, will be formally presented this morning at the regular assembly meeting in Villard hall.

The library itself, representing one of the largest gifts ever made to the University, consists of approximately 12,000 volumes, and will increase the size of the present library to more than 20,000 volumes.

The gift is to bear the name of Kenneth Lucas Fenton, who was graduated from the Portland Law school in 1911, after which he was admitted to the bar, practicing with his father until the time of his death on May 31, 1917. Before attending the law school in Portland, Lucas was graduated from Yale, with the class of 1910. His pre-legal training was obtained at Stanford, where he was prominent in athletic as well as academic work. He starred at both Rugby and baseball, coaching the freshman baseball team at Yale.

Lucas was one of three sons of Dr. W. D. Fenton, all of whom attended the University of Oregon. Dr. Ralph Fenton was graduated with the class of 1903, and Dr. Horace Fenton took his degree with the class of 1906.

The library represents the entire legal collection made by W. D. Fenton during a long period of practice. Its compilation was started in 1875, when he was admitted to the bar of the Oregon supreme court after ten years of study while acting as assistant librarian at Salem. The library was steadily added to until his retirement from active practice at the beginning of the recent year. The books include reports from every state in the Union, complete reports of

the supreme court of the United States; statutes at large of the United States, together with numerous volumes of digests and lawyers' reports. It includes also a number of valuable books on important cases, which are out of print, as well as a complete set of Oregon session laws of the organization of the territory.

The law library has been received here and will be placed in the present law reading room, which will be converted into stacks as soon as the space can be made available. The intrinsic value of the library is estimated at between \$45,000 and \$47,000.

Personally representing the donors, George H. Burnett, member of the Oregon supreme court and an intimate friend of the family, will make the presentation address. Judge J. W. Hamilton, of Roseburg, president of the board of regents, will formally accept the gift on behalf of the board, and Dr. W. G. Hale, dean of the law school, will express the thanks and appreciation of the University to the donors.

Louis E. Bean, speaker of the state house of representatives and a prominent member of the Lane County Bar Association, will represent that body.

Men and women connected with the legal profession and Oregon state editors have received a special invitation to participate in today's ceremony. An excellent musical program has been arranged by the University orchestra to precede the speaking.

The students have been especially urged by President P. L. Campbell to attend the assembly this morning, not only for the reason that the talks, by some of the most prominent men in the state will be worth while, but in order to show the University's appreciation of the splendid gift.

## WILL HAYWARD TRACK BE READY FOR MEET?

"Bill" says "No", But Supt. Newell Is Optimistic

"It's far from finished, and I doubt if it's in shape for the Pacific Coast Conference track meet," said Bill Hayward, track coach, in discussing the new oval around Hayward field. W. K. Newell, superintendent of the University grounds, who has charge of supervising the work, reports that the track is all but finished, is in fairly good shape, and will surely be ready before the date of the big meet. "It's all finished but the final touches," said the superintendent, when interviewed. "Just as soon as it dries up work will start again, and Hayward's gang can start work there."

Before the recent rains a number of tracksters tried the new track out and were quite enthusiastic about its possibilities. Work was started last fall on the field but during the rainy months very little could be done toward its completion. Approximately \$8000 has been spent to date in its construction.

A cross section of the track, which is a quarter of a mile long, would show several feet of subsoil, graded to a nicety, then six inches of coarse gravel, four inches of crushed rock and a surface of three inches of crushed cinders, mixed with clay.

Considerable difficulty was experienced in obtaining cinders from the O.-W. R. R. N. and their final cost was \$5.50 a yard.

Little or nothing has been done on the short track for broad jumping and this is one of the features of the work which caused Coach Hayward to despair of having the work finished in time.

## RUCH'S STORY PRAISED

Former Principal of University High School Gains Recognition.

The February 21st issue of the "Bulletin of the Bureau of Tests and Measurements of the University of Michigan" reviews with appreciation G. M. Ruch's "A Study of the Mental, Pedagogical and Physical Development of the Pupils of the Junior Division of the University High School, Eugene, Oregon." This study was published as number 7 of the University of Oregon publications. Mr. Ruch was last year principal of the University high school. He now has a fellowship at Stanford.

## EASTERN IDEAS USED BY MEN'S GLEE CLUB

John Stark Evans Picks Up Features While Studying

A number of new ideas gained while he was studying in the east last year are said to be incorporated by John Stark Evans in the Men's Glee club concert which is being presented under his direction next Saturday evening. Many new features were picked up from eastern glee clubs which Mr. Evans heard while in that part of the country.

Exceptional ability at directing a men's glee club is possessed by Mr. Evans, according to those in close touch with the local organization. He has good qualities of leadership and the men have responded for him in an admirable way, it is said. The members have been prompt at rehearsals and have steadily cooperated with him in his efforts.

In addition to the glee club rehearsals, Mr. Evans has been training a quartette, which will offer several numbers at the Saturday night concert. This quartette is composed of George Hopkins, John Stark Evans, Glen Morrow and Maurice Eben. In the Portland concert last January this quartette received a great deal of praise and a critic of that city stated that it was one of the best he had ever heard.

A varied program with a well balanced assortment of offerings is promised by Evans in charge of the concert. A new stunt with a good bit of local color mixed in is said to form a pleasing part of the evening's entertainment.

Tickets for the concert are now on sale at the Coop and at Kuykendall's drug store downtown. All seats may be reserved after 9 o'clock Saturday morning at the box office of the Eugene Theatre. Prices are fifty cents, seventy-five, and one dollar.

## O. A. C. PLANS WEEK-END.

Elaborate preparations for junior week-end, to be held Friday, Saturday and Sunday, May 26-29, at O. A. C., are announced by the committees in charge. A baseball game between the University of Oregon and O. A. C., the big athletic event, is scheduled for Friday, May 27. All classes will compete at the junior vaudeville show, at which a silver loving cup will be presented for the most original skit. Saturday the freshmen and sophomores will stretch a rope across the mill race for the annual tug-of-war to see which class is pulled into the water.

## 50 SCIENCE FACULTY MEMBERS OF O. A. C. UNIVERSITY GUESTS

Sigma XI Fraternity Attends Banquet Held By Local Organization

### SIX STUDENTS GIVEN INITIATION INTO CLUB

Dr. H. B. Torrey Elected Head; Interesting Lectures Are Heard

The University Science club entertained as its guests at its regular April meeting on Tuesday, about 50 members of the science faculty at the Oregon Agricultural College, members of Sigma XI, national science organization.

Most of the visitors arrived from Corvallis during the afternoon, and were escorted about the campus by graduate assistants, and under-graduate scholars of the various science departments.

A dinner was served at the Anchorage at 6:30 to the visiting members from O. A. C. President P. L. Campbell and Dean Colin V. Dymont were the invited guests. About 80 people were present.

#### Club Makes Special Recognition.

Following the dinner, a short business meeting, with the initiation of the six students from the various science departments who had been elected to honor membership in the club, was held. It has been the custom of the science club for a number of years, says Dr. R. H. Wheeler, to bestow special recognition on students in the science departments, who show serious interest in science and research. It is one of the highest honors which the science faculty can give to students who have a genuine scientific scholarship standard. One of the requisites for this honor is that the individual must have the ability to think independently, and another that he must be actively engaged in some particular research.

The ceremony of initiation was in charge of Professor E. L. Packard, who gave a short account of this system of inviting honor members, and then called upon the heads of the various departments to formally present to the club those members whom their department had elected. Alice Thurston, Marie Ridings, Mary Chambers, Ben Horning, Wilbur Hulm and Arthur Bramley were the students honored.

**Elections Are Held.** In the business meeting following the initiation, Dr. H. B. Torrey was elected president, and Dr. R. J. Williams, secretary of the club.

The rest of the evening was taken up by two lectures given by members of the O. A. C. delegation. The first of these was by Professor Henry Hartmond, of the horticulture department, on "Localized Variations in Plant Individuals." This lecture was illustrated with actual samples and pictures of plant leaves and fruits; showing types of variations which he discussed.

"The Physical Properties of Metals as Revealed by Their Microstructure," was the subject of an illustrated lecture by Professor Samuel H. Graf, of the experimental engineering department. He explained the different types of steels used in safe building, and told why some steels were dangerous for construction purposes, due to the influence of heat and strain.

**Invitation Is Extended.** The O. A. C. science men have extended an invitation to the Oregon science men to go to Corvallis next October and present a program there, and although there has been no opportunity to express a formal acceptance on the part of the local scientists, it is believed that the invitation will be accepted.

The people on the campus who are interested in science feel that this exchange between the two schools will prove helpful to both institutions. The stimulation in ideas which must result will lead to better work.

#### CO-EDS GETTING HUSKY.

Co-eds of the Oregon Agricultural College are learning how to throw the javelin and to hurdle in order to compete in the interclass track meet the last of May. Much interest is being shown in the various track events, and several stars are being developed. The following events are listed for the meet: Fifty yard dash, 25 yard hurdles, running broad jump, shot put, discus throw, javelin throw, basketball and baseball throw for distance, relay race.

#### PLEDGING ANNOUNCED.

Alpha Delta Pi announces the pledging of Ramah Her, of Toledo, Oregon.
