REDDIE TAKES TITLE ROLE IN "DISRAELI"

Commencement Play Chosen; To Be June 17

With Fergus Reddie in the title role of Benjamin Disraeli, Lord Beaconsfield, Louis Parker's "Disraeli" will be given as the commencement play in Villard hall, June 17. The play was chosen in preference to a Shakespearean production which had been tentatively selected earlier in the season.

In the part of Mary Disraeli, wife of Lord Beaconsfield, Dorothy Wootton will take the role of leading lady. Irene Stewart, Norvell Thompson, Charlotte Banfield and Martha Rice will portray prominent characters in the play.

The story of Disraeli, one of England's greatest statesmen, with the intrigue connected with England's acquisition of the Suez Canal is depicted in the play. A romance connected with Lord Deeford and Lady Perensy, played by Norvell Thompson and Irene Stewart, respectively, runs through the story and culminates with the successful return of Lord Deeford from Cairo where he had been sent as a representative of Disraeli to purchase the canal.

The keynote of the whole play is the strength of the one leading character, Disraeli. Continually being confronted with political and social handicaps, he eventually overcomes all resistance to his plan of acquiring the canal shares from the Sultan of Turkey.

Last year Mr. Reddie took the title role in Clyde Fitch's "Beau Brummel," another historical play with a striking lead.

Can You Save Ten Dollars a Month?

EVERYONE who is earning a fair income knows that he or she can save \$10 a month, even in these high cost of living days, and not miss the amount laid by.

What would you gain by doing this simple and easy thing? What results would follow which would make this systematic practice worth while?

Supposing that you held back \$10 from your earnings each month and placed the amount where it would earn for you at the rate of 8 per cent a year, and re-invested that income from your accumulation semiannually? Do you realize that in 25 years you would have acquired approximately \$9,160?

Of this comfortable little fortune of \$9,160 only \$3,000 would represent the \$10 laid by each month. Over \$6,000 would be the interest or dividends your money earned for you while you were accumulating it.

Just plain, systematic saving and sound investing are all you need to insure prosperity and independence in the years to come.
