

Oregon Daily Emerald

VOLUME XXII.

UNIVERSITY OF OREGON, EUGENE, OREGON, THURSDAY, JUNE 2, 1921.

NO. 144.

SIX JUNE GRADUATES AMONG 21 CHOSEN FOR ASSISTANTSHIPS

Graduate Council Approves 18 of Number; Others to Be Named.

NO RECOMMENDATIONS FOR 3 DEPARTMENTS

Posts in Zoology, History and Sociology Are Yet to Be Filled.

The University will employ 21 graduate assistants next year, 18 of whom are already approved by the graduate council. In the departments of history, zoology and sociology, no recommendations have yet been made for the graduate assistantships. Six June graduates are among those approved for positions.

In the department of botany, the assistant will be Miss Isabel Nauerth, who receives a B. A. in June from the University of Iowa. For two years, she has been undergraduate assistant in the botanical laboratory there.

The department of chemistry will have William Skidmore, who is a graduate of Oregon and who has assisted in the department this year. A new assistant in this department is Roger William Truesdail, who is receiving a B. S. in June, from the University of Redlands, California. He has acted as laboratory assistant in chemistry at Redlands for two years.

In economics, Mr. C. T. Stewart, a 1920 graduate of Indiana University, will assist, in the absence of Professor Crockett. Mr. Stewart has been teaching in the Medford high school this year.

Miss Hawes Chosen.

Mildred Hawes, who will be graduated in June from the department of English literature, will assist in the department next year. She is a candidate for honors in English literature. In the department of rhetoric, two Oregon graduates will be employed as assistants, Harold Lee, who will be graduated with honors in English literature and philosophy, and Sophus Winther, who received a B. A. with honors in 1919. Mr. Winther has been head of the department of English literature in the high school at Hammond, Illinois, since his graduation. In the department of philosophy will be another Oregon graduate, Norman Byrne who will receive a B. A. in June.

The mathematics department will have as assistant Alice Thurston, who has been an honor student in the department and has tutored a class in geometry for the last two years. She finished her work for graduation in the winter term, and began her graduate work this spring. Another June graduate who will have an assistantship, is Claire Holdredge, an honor student, in geology. For the past year he has been undergraduate assistant in the department.

Others Are Picked.

In physics, one assistant will be Arthur Bramley, a student in the department, who will complete his work for a B. A. in the fall term of next year. Mr. Bramley's scholarship record this year has been of unusual excellence.

The assistant in mechanics will be W. Howard Wise, who receives a degree in June from Bozeman College, Montana. He has been a teaching assistant in Bozeman for the last two years.

Mathilda Mathisen, a 1918 graduate of Ripon College, Ripon, Wisconsin, will assist in the department of Latin. She assisted in the department at Ripon, and since her graduation, has been teaching at Menomonie, Wisconsin. In Romance languages, Helen du Buy, who has assisted this year, will continue in the assistantship.

Education Assistants Named.

In the department of psychology will be another Oregon graduate of this year, Wilbur Hulin, an honor student, who has assisted during the last two terms of this year, will continue in the department. A teaching fellowship will be held by Thomas D. Cutsforth, a blind psychologist, who is now teaching at Riddle, Oregon. Mr. Cutsforth has done much research work, and has published several papers on psychological problems.

The school of education will have as assistants Howard Lehman and Horace K. Lane, both of whom are receiving B. A. degrees this June. Mr. Lehman comes from Albany College and Mr. Lane from Montana Wesleyan College. This department may be given another assistant later.

STUDENT OFFICERS TO TAKE HOLD TODAY

Financial and Other Committee Reports Will Be Featured at Last A. S. U. O. Meeting of the Year.

The installation of the A. S. U. O. officers for the year 1921-22 will take place at the assembly today. This will be the last student body meeting of the year, although there will be one more assembly.

The old and new student body presidents will each give short addresses, and it is probable that President Campbell will say a few words.

The graduate manager's report will be read, as well as the reports of the various standing committees.

"Everybody out," says Carlton Savage, retiring president, "and give the new officers a good send-off."

ADVERTISING CLUB IN WORLD ASSOCIATION

"Better Business" Movements to Be Fostered.

The University Ad club has been made a member of the Associated Advertising Clubs of the World, according to word received by officers of the local organization. The Ad club was formed over a month ago and since that time has been working toward membership in the national association.

The Associated Advertising Clubs consists of 188 local advertising clubs, comprising 19 national advertising associations, representing national advertisers newspapers, magazines and other advertising agencies. There is a total membership of 20,000, chiefly in the United States and Canada.

The national organization was started in 1905. One of its principal objects is the fostering of the better business movement through the vigilance committee, by putting an end to all false and misleading advertising. The importance of education in advertising has recently been recognized and a committee has been appointed in an effort to co-operate with the institutions by organizing a committee for that purpose.

W. P. Stronborg, vice-president of the Portland Railway, Light and Power Company, is vice-president of the Associated Advertising Clubs and is also a member of the educational committee. Mr. Stronborg is eager to co-operate with the Ad club and will no doubt do much to aid it.

Members of the national association will receive the monthly magazine, "Associated Advertising," published by the organization.

MISSING EMERALDS WANTED AS FILES

Old Copies of Oregon Catalogue Also Needed by Librarian to Complete Collection.

Copies of the Oregon Emerald of December 6, 1919, and January 3, 1920, are needed to complete the files of the student body publication at the library and any student or faculty member in possession of either of these lost issues would confer a favor on the library staff by leaving them at the desk.

Other publications missing from the files, according to a recent library bulletin and which the staff is anxious to obtain are: University of Oregon catalogues for 1881-1882 and 1882-1883 and the following: U. of O. bulletins Vol 6 No. 2, Oregon H. S. Debating League, Sept. 1908; Vol. 10 No. 6, Report of the President of the University, Feb. 1913.

A number of volumes of the Oregon are available for exchange for other college annuals. A list of the Oregon dates will be sent upon request, says the announcement. The following volumes have been added to the library shelves in the past week: "As If"; "Creative Evolution"; "American Bottles, Old and New"; and "Summary of the World War Work of the American Y. M. C. A."

MR. AND MRS. MOWREY VISIT.

Dent Mowrey and wife, who have recently returned from New York, are spending the week on the campus visiting friends. Both Mr. and Mrs. Mowrey are very prominent in musical circles throughout the west. Rex Underwood instructor in the school of music, and Mr. Mowrey studied music in Europe at the same time. Mr. Mowrey's mother is head resident at the Kappa Kappa Gamma house.

ORCHESTRA PROGRAM WILL OFFER VARIETY TO LOVERS OF MUSIC

Alberta Potter, Frank Jue, Herbert Hacker Soloists Tomorrow Evening.

POPULAR SELECTIONS TO BE GIVEN PLACE

Trombone, Violin, and Tenor to Be Added to Numbers By Ensemble.

Variety is the most expressive word to use in describing the program of the concert to be given by the University Orchestra in the Eugene theater tomorrow evening. Included in the program are numbers ranging all the way from full orchestral selections to tenor solos.

In spite of the varied nature of the concert, however, the backbone of the whole structure will be the numbers by the full orchestra, according to Rex Underwood, the director. There will be five of them. Even in them the tiresome repetition of music of the same kind is to be gotten away from. An overture followed by a good popular tune, then an operatic selection, and so it goes. "There is one thing that we can promise without fear of the consequences," said Mr. Underwood. "There is variety enough for anyone."

"Pagliacci" On Program.

The operatic selection is from "Pagliacci," one of the most tuneful operas written. In it, as in "Morning, Noon and Night in Vienna," overture, the orchestra is given an opportunity to do its best. Each instrument is allowed to show what it can do. "Prelude," by Rachmaninoff, is the number so often used as a piano solo. With the orchestra all the mellow depths and the rich crescendos of the selection can be brought out to a much greater extent than is possible on the piano alone.

In between the regular program numbers will be found several popular tunes played by the whole orchestra. Among those will be the "music box number."

The second part of the program will be given over to solos and the feature numbers. Two violin solos by Alberta Potter open the period. The same solos were given in the Hellig theater, Portland, recently, as part of the Girls' Glee club concert. At that time the Oregonian commented on her "excellent technique."

Jazz Not Omitted.

Frank Jue, the popular tenor, though listed for only solo, will be forced to sing several, judging from past appearances. The remainder of the second section of the program will be filled with the two jazz numbers.

Herbert Hacker caused more mirth in the towns of southern Oregon with his trombone than any other member of the orchestra. His solo, "Slidus Trom-

(Continued on Page 4.)

STUDY OF CHEMISTRY NOT WAY TO WEALTH

Dr. Shinn Speaks of Hard Work in Profession.

At the last chemists' meeting of the year held last week in McClure hall, Dr. F. L. Shinn reminded the students that in the chemistry profession a student could not graduate with a B. S. degree and at once get a job which pays well. "It takes a B. A. degree, a doctor's degree, and years of experience before a person can get work in the profession which is good in a material way," said Dr. Shinn. However, the outlook is brighter in this country than it has ever been before because the war excluded German products. Dr. Shinn said that if congress sees fit to place a tariff on chemistry products made in Germany the future of the chemists in this country will be still better.

According to Dr. Shinn the only thing that should call anyone into the profession is pure love for the work. Dr. R. J. Williams also spoke on the future in the chemistry profession.

The meeting was open to the public and many persons interested in chemistry were there. Plans were discussed for a picnic, but no definite arrangements were made. Professor J. L. Whitman was elected to membership in the club.

Bones of Extinct Monster, Veteran of Oregon's Ice Age, Donated to Condon Museum

Thousands and thousands, perhaps millions of years ago, a giant animal, resembling a mastodon, lay down to die near the present site of McMinnville, Oregon. This animal, thought by Dr. Packard, of the geology department, to be the ancestor of the mastodon, which in turn is the ancestor of the modern elephant, may have succumbed to the cold, for it lived during the Pleistocene, or ice age.

"At the time this giant animal lived," said Dr. Packard, "the climate of Oregon, Washington and the rest of this region was very cold. Immense sheets of ice spread over the country, Puget Sound was a great glacier, so this father of the mastodon probably had a great many things to contend with."

The fossils of this animal, found by Mr. Wardele, a jeweler residing at McMinnville, were recently donated to the geology department and will be made a part of the museum started by Dr. Condon. Parts of the animal found, were a jaw, with two remarkably well-preserved teeth, a leg bone, four feet in

length, which is completely preserved, and a fragment of a tusk about four feet long, and with a diameter of seven inches, showing that it was about nine feet in length.

"Specimens such as these, especially ones so large and well-preserved, are very rare," Dr. Packard explained. "It is plain to be seen that they are parts of an animal that easily exceeds the mastodon in size, and which, in all probability, is an ancestor of the mastodon itself. Interesting developments may be expected from the study of this prehistoric animal."

Mr. Wardele discovered these relics along the banks of the Yamhill river about 40 feet below the level of the flood plain. Fragments, such as teeth, parts of ribs, and parts of tusks have been found in other parts of the northwest, showing that mastodons existed in this region.

Included in the collection donated by Mr. Wardele were teeth of mammoths, teeth of ancient horses, and other interesting specimens of pre-historic life.

18 SENIORS RECEIVE TEACHING POSITIONS

Students Aided By Appointment Bureau On Campus.

Eighteen seniors or former graduates of the University have been given teaching positions in high schools through the appointment bureau of the school of education, says Professor C. A. Gregory, who is head of the bureau.

These 18 are the students and graduates who have been definitely placed. "A number who have been offered positions have not accepted, and a number who have not as yet been favorably placed are being favorably considered for various positions," Dr. Gregory said. "We have not been able to supply the demand for teachers of science and athletic coaches for men."

Those who have received appointments for next year, the high schools where they will teach, and their subjects, are as follows: Beatrice L. Crowdon, McMinnville, languages; Leo H. Cossman, Vale, science; Lester R. Gladden, The Dalles, mathematics; Marie Ridings, Ashland, mathematics; Alice Hamm, McMinnville, English; Edith L. Pirie, Hermiston, science; Laura Moates, University of Oregon, graduate assistant in English; Mary Turner, Redmond, French; Wanda Brown, Klamath Falls, science; Howard S. Wines, Klamath Falls, commerce; Rhetta Templeton, North Bend, Spanish; Leota Rogers, Ashland, English; Naomi Robbins, McMinnville, physical education; Enid Lamb, Eugene Bible University, mathematics and English; Eve Hutchinson, Baker, English. These students are all seniors. In addition to this year's graduates, Ruth Wilson, '18, has been appointed through the bureau to teach mathematics in the Pendleton high school, Leone Graham, '20, to teach English in the Enterprise high school, and Alice Farnsworth, '13, to teach commerce in the Gresham high school.

Read Bain, who will be graduated this June, has been offered positions in Portland and Medford, Dr. Gregory says, but will probably remain at the University as a graduate assistant.

All students and former students of the University who are qualified to hold teaching positions may receive the services of the appointment bureau. School superintendents throughout the state report vacancies to the bureau, which recommends wherever possible. The school boards take action upon these applications, and report the result. The appointment bureau also sends out circular letters to school superintendents, asking them to report any vacancies.

NO TROUBLE TO GET CREAM CONES TODAY

Girls of Phi Theta Kappa to Be All Over Campus; Raising Money For Scholarship.

If you see a sedate senior, sitting on the library steps, biting the top off of a big ice cream cone, or better yet, if campus piggers treat their girls to ice cream cones before the eyes of the admiring world today, don't be surprised.

Today is ice cream cone day, staged by the girls of Phi Theta Kappa, honorary commerce fraternity, for the purpose of raising a \$50 scholarship fund for a junior or senior commerce major. Ila Nichols, president of the organization, will have charge of the sale, which will be held between 9 and 5. Cones will cost 5 cents.

The following initiated members will conduct the sale: Ila Nichols, Lulu Rasor, Dorothy Lowry, Mildred Amiller, Virginia McDougle, Marian Taylor, Esther Fell, Helen Nelson and Madeline McManus. They will be assisted by six Phi Theta Kappa pledges.

PLEDGING ANNOUNCED.

Phi Sigma Pi announces the pledging of Archie Merrifield, of Marshfield, Oregon

FOREIGN GIRLS WILL GO TO CONFERENCE

Y. W. Invites One to Asilomar; Two to Seabeck.

Three foreign students at the University will attend Y. W. C. A. student conferences this summer as international representatives. Germaine Dew, Anna Karagozian and Lillian Goon are the girls from Oregon who have been invited to go to the conferences by the national board of the association.

Germaine Dew is going to attend the conference at Asilomar, California, the student center. She is planning on continuing her work at Stanford next year so this will be the conference in which she is interested. Miss Dew expects to return to France after she has completed her education and so some sort of social service work. Since she has been in the United States Miss Dew has worked her way through college as her property in France his yielded no income since the war.

"I want to get a lot of Y. W. C. A. experience, and I think going to the Seabeck conference will give me a broader outlook on the work," said Anna Karagozian when asked about her prospective trip to Seabeck. Anna is very anxious to learn all she can about Y. W. C. A. work, is it is her ambition to go back to Armenia and serve her people as an association secretary.

Lillian Goon has been asked to go to the high school girls' conference at Payette, Idaho, as a representative of her country. The University will not be out in time for her to attend this meeting but she is going to Seabeck if possible. Lillian is also very much interested in Y. W. C. A. work and hopes to be able to go to China in a few years and work in her own country.

FLYING START GIVEN 'Y' CAMPAIGN WITH DRIVERS' OWN CASH

Sixty-six Men Subscribe \$4.00 Average Each to Help Work On Campus.

\$2000 MARK IS GOAL IN VIEW FOR TONIGHT

Promoters at Luncheon Hear Talks on What Y. Means to Students.

At noon yesterday the biggest drive for funds ever staged by the University Y. M. C. A. received a big boost, when the 66 campaigners who have been chosen to solicit funds subscribed, out of their own pockets, approximately \$4 apiece, to show their faith in the work.

The launching of the drive was attended by a luncheon, served by the girls of the campus Y. W. C. A. and paid for by the churches of Eugene. There was practically a 100 per cent turnout of workers and the spirit which was shown indicated a very successful campaign, according to President Callaway.

Among the speakers at the luncheon was Harris Ellsworth, who told of the work of the Y. M. C. A. on the campus and emphasized the effect which the drive will have in keeping Hal Donnelly, campus secretary, at the University. "Hal has received a number of offers from other schools," said Ellsworth, "but the vote of confidence which the successful termination of the campaign will give him, will probably mean that he will remain on the campus for at least another year."

To Be Collected Next Fall.

"Danny" Woods explained the general financial standing of the Y. M. C. A. and pointed out the fact that the money would not be collected until next fall, when student pocketbooks would stand the strain more easily. Speaking along this same line, Roy Veatch, who heads the "Reds," said that students should consider the Y. work as a part of their necessary expenses at the beginning of each school year.

Hal Donnelly outlined the work of the campus Y. during the past year, telling of the many social events, of the frosh "bible" and of the bringing of good speakers to the campus. All of which were distinctly Y. M. C. A. activities. "The Oregon University Y. M. C. A. is an organization of students and by students," he said, "and the central office or the secretary has no authority over the way the affairs are conducted. We are merely to help the students put across the work which they outline."

Callaway Is Toastmaster.

Owen Callaway, president of the campus Y, acted as toastmaster of the luncheon.

Immediately following the meal the workers and the officers present made their personal subscriptions. Elston Ireland, leader of the "Blues," and Roy Veatch, of the "Reds," each made a talk. The campaign will last until Friday noon and if yesterday afternoon's pledges is any criterion the \$2000 mark will be reached by tonight.

Luncheons will be held each day for the workers, who will compare notes and make plans for rounding up any slacker organizations that do not do their share in the drive. Men not in campus organizations will be solicited by their own group of workers and each house has been assigned two men. It is the aim of the drive to reach every man on the campus.

A report which was read at the luncheon yesterday and which is of interest to supporters of the campaign follows:

The men at the University of Oregon contributed \$250 to the budget of the campus Y. M. C. A. for the past year, as compared with \$1200 at O. A. C., \$1500 at the University of Southern California and like amounts at other universities of the same caliber.

The University of Washington Y. M. C. A., besides its regular budget, raised \$2000 for work in China, the University of California \$6000, and the University of Southern California \$2500. In every case the sum pledged was more than was asked for in the campaign.

The average student budget of the Y. M. C. A.'s in state universities all over the country is \$3880, and the average subscription is \$250 for every 100 men enrolled. The University of Oregon Association is asking for \$2000, which conforms to this average.
