

CANOEING IN RIVER'S RAPIDS DISCOURAGED

Warning to Students Issued By Faculty Committee.

The dangers of canoeing in the rough water near the head of the mill race has been called to the students' attention by the student advisory committee of the faculty in the hope that it will not require a fatal accident, of which there have been none for several years, to shock students into a realization of the danger of canoeing in rough water.

There is a faculty ruling requiring suspension of students for "shooting the rapids." The committee has no wish to curtail legitimate student recreation, but it does wish to call most emphatically the attention of all students who can go canoeing to the following facts set forth in its report:

"No one who cannot swim should venture into the river in a canoe. Within the last two years there have been at least four accidents on the river which would have resulted in fatalities had not the occupants of the canoes been able to swim. Ample facilities are provided in the University for both men and women to learn to swim.

"Venturing into the rough water near the rapids, whether or not technically 'shooting the rapids,' is for anyone not an expert, a fool-hardy act, and is forbidden by the faculty. Even those who are expert in handling a canoe should, it seems to the committee, be willing to forego the pleasure of riding rough water out of consideration for the safety of others to whom it may look easy, but who might unwittingly invite disaster should they be led to venture into the same rough water."

CO-OP WANTS OLD BOOKS

Students Called Upon to Sell Volumes For Use In Summer Term.

Students with a desire to supply themselves with funds for the carnival may do so by gathering up text books that they no longer need and sell them to the Co-op for the summer term students who will come in three weeks.

The books needed and the prices that will be paid can be obtained from Marion McClain, manager of the Co-op store. This will be a kindness to summer students as well as a big financial help to regular students.

F. E. BEACH ON CAMPUS

Only Man Over 70 Who Runs When He Tires of Walking.

F. E. Beach, a well known Portlander, is the only man over 70 who runs when he gets tired walking, according to C. E. Gratke, former newspaper publisher of Astoria. Mr. Beach and Mr. Gratke were in the party which drove from Portland Wednesday in the interests of the Atlantic Pacific Highway and Electrical Exposition, 1925.

They left Portland before breakfast and planned on eating in Oregon City, according to the story told, but from one cause and another they didn't get a bite to eat until arriving in Eugene.

LOIS GRAY TO LEAVE TODAY.

Lois Gray, instructor in French, is leaving this afternoon for New York, from where she expects to sail for France. Miss Gray is going to take a lecture course at the Sorbonne in Paris this summer. She expects to return in November.

File your CO-OP purchase tickets at the store before the close of school.

Increasing Demand

OUR Illustrated Circular describes the Mountain States Power Company and the 42 communities served in four states. It shows the growth of the Company's business, which growth continued in a very satisfactory measure during 1920.

A large amount of additional business is now awaiting the construction of additions and extensions. The demands for service increase steadily in a much faster ratio than the increase in population.

These services are vital to public welfare. The market for them is as stable and enduring as our cities, towns and agricultural districts.

An investment in our 8% Gold Notes is the kind of an investment you don't have to worry about.

A Safe 8% Investment in an Ever-Growing Business.
