

14 STUDENTS TAKEN INTO HONOR SOCIETY

40 Members Attend Initiation And Banquet

OFFICERS TO HOLD OVER

Chances for Phi Beta Kappa Regarded Good

Fourteen new members were taken into the University Honor Society at the banquet and initiation held at the Anchorage Thursday evening at 6:30. Forty members were present out of the complete roll of 50 both on and off the campus.

Members of the present senior class who were initiated are as follows: Laura Duerner, Frank Palmer, Marie Ridings, Leo Cossman, Arthur Hicks, Harold Lee, Ralph Hoerber, Alice Lighter, Mildred Hawes, Robert Bradshaw and Marian Gilstrap. Three members of the junior class were taken in. They are Verne Blue, Ian Campbell and Isabelle Kidd. Harold Benjamin, principal of the Umattilla high school, was to have been initiated, but was unable to leave his work, and will be taken in next year.

Dr. R. C. Clark, president of the organization, presided. In making the address of welcome to the new initiates, he reported on the status of the Honor Society's application for a chapter of Phi Beta Kappa and said he was hopeful of securing it at the next national convention of that fraternity.

Other speakers who expressed a welcome to the new members were President P. L. Campbell, Professor E. S. Bates and Miss Mary H. Perkins, who are members of Phi Beta Kappa and of the University Honor Society. President Campbell called attention to the rapidly improving scholastic standards of the University, and expressed his hope that the local organization would succeed in securing a chapter of Phi Beta Kappa. Marie Ridings and Arthur Hicks responded for the new members.

All the old officers of the society were re-elected for the coming year. They are as follows: Dr. R. C. Clark, president; Miss Mary H. Perkins, vice-president; Professor George Turnbull, secretary-treasurer. The committee in charge of the banquet was Miss Mary Watson, chairman, Dr. W. E. Mhne and Professor F. S. Dunn. Senior members of the society initiated last year, who were present at the banquet were Dean Moore, Wilbur Hulm and Mary Turner.

SELECT GROUP NAMED SUMMER INSTRUCTORS

Able Men and Women in Faculty For Term; St. Paul Superintendent of Schools Coming.

Although the number of outside instructors for this year's summer term is small, it is regarded as a select and worth while group. The faculty is made up mainly of the regular members of the University's professors and instructors. The new people come from New York, Minnesota and California.

S. O. Hartwell, superintendent of schools in St. Paul, Minnesota, will give courses in school administration and secondary education. Dr. Horace A. Eaton, who comes very highly recommended from Syracuse, New York, is to have charge of the courses in English literature. Miss Mary Brown Humphreys, reference librarian of the Washington State College at Pullman, will offer two courses in library methods. Mrs. Laura Ripley, art supervisor in the Eugene schools, has consented to give two courses at the University summer term.

Miss Margaret Crim, supervisor of the school playgrounds in San Francisco and head of the physical education department at Mission high school, will be a slated addition to the summer term faculty for physical education.

3 IN ORATORY CONTEST

Failing-Beekman Prizes Will Be Awarded Thursday, June 16.

The annual Failing-Beekman oratorical contest will be held in Villard hall at 8:30 on Thursday, June 16, according to an announcement issued Friday by the public speaking department.

John J. Canoles, San Francisco, will speak on "Monuments for Soldiers"; Abe Rosenberg, Portland, on "A Debt of Honor—Unpaid"; and Ralph Hoerber, of Portland, on "The New Despotism." Wilbur Carl, of Portland, will also compete.

Judges for the event have not been chosen as yet. The Failing prize is of \$150 and the Beekman \$100.

RECITAL TO BE GIVEN.

Twenty-four students who have been studying voice under Madame Rose McGrew will be presented in recital on next Tuesday and Thursday evenings, at the Methodist church.

20 PROFESSORS TO GO ON A. A. U. P. ROLL

Oregon Has Larger Number Nominated Than Any Other College in United States.

Out of the list of 91 nominations for membership in the American Association of University Professors, 20 are from the faculty of the University of Oregon. This is more than any other single college represented upon the roll of prominent colleges and universities from various parts of the United States.

This information is contained in the April number of the official bulletin of the association which gives further outlines and plans of the association for the current month.

The following names of University of Oregon faculty members are on the candidates' list: Eric W. Allen, W. P. Boynton, A. E. Caswell, Herman A. Clark, Peter C. Crockett, W. C. Dalzell, Birchard W. DeBusk, Edgar Ezekiel, DeCou, Colin V. Dymont, C. A. Gregory, William L. Hayward, W. E. Milne, Earl L. Packard, Mary Hallowell Perkins, Fred Lea Stetson, W. F. G. Thacher, George S. Turnbull, Mary Elizabeth Watson, Raymond H. Wheeler, Harry B. Yocom.

GIRLS WILL OFFER SWIMMING PROGRAM

Faculty Members and Wives Are Guests Today.

Faculty members and their wives, townspeople and visiting women's athletic teams will be the guests of the department of physical education at a swimming program given in the pool room in the Woman's building this afternoon at 3 o'clock. This program takes the place of the annual meet with the Oregon Agricultural College and about 40 members of the advanced, intermediate and beginning classes will take part in the various events, which will take place as follows:

Demonstration of swimming methods, including bubbling, "jelly fish," "turtle," face float, back float, "frog leg," face and back, flutter, back, breast and side strokes, and crawl.

Racing, two lengths of the pool (120 feet), four competitors.

Racing, breast stroke, four competitors.

Surface diving.

Swimming under water and back stroke race.

Stunts: Marching on water, wheelbarrow, back stroke with one leg out, umbrella race, candle race, double crawl, double diving and somersaults.

Relay racing, two lengths of the tank two teams each.

Demonstration of life-saving methods. Relay racing, one length.

The participants in the different features of the program have been chosen from members of the swimming classes, advanced, intermediate and beginners, and from the class teams. Miss Catharine Winslow, instructor in swimming, will be in charge of the program.

MEN WILL ATTEND CAMP

Summer Military Training Is Offered Civilians at American Lake.

The President's office is in receipt of a request that as many students as possible from the University attend the summer military camp for civilians, which will be held at Camp Lewis this summer.

This camp is conducted for men who have had no military training and is endorsed by a score or more of the prominent educators of the country, according to the bulletin issued describing the idea. It is not connected with the R. O. T. C. camp, to which a number of students have already signified their intention of going.

Students interested are asked to see the executive secretary, Karl Ontank.

DEAN ALLEN HONORED.

Eric W. Allen, dean of the school of journalism, has been asked by President E. A. Birge, of the University of Wisconsin, to represent that institution at the installation of Richard F. Scholz as president of Reed College, June 9. Dean Allen and President Scholz were not only students together at the University of Wisconsin, but before they matriculated had been classmates in high school.

LOCAL PAPER TO BE PUBLISHED BY CLASS

Editing Students to Have Charge of Register Friday.

Following a precedent established eight years ago, the class in editing of the school of journalism will edit, publish and otherwise supervise one issue of the Eugene Morning Register. The issue selected has been that of Friday, June 10.

The nine members of the graduating class without assistance from any source will do the work of the issue and have full charge. Neither Mr. Jenkins, of the Register, nor Dean Allen, of the school of journalism, will appear upon the scene, though both will be consulted regarding policies to be maintained before issuing the paper.

Last year, according to Dean Allen, there was no advance publicity given by the downtown papers regarding the annual custom of the class, it being the desire of the department to learn if the subscribers could tell of a change in management. The experiment proved a success, in that, as far as could be found, no one noticed any difference in the paper.

Stepping into a strange newspaper office and taking over the entire plant is one of the problems that will confront future journalists, and it is to successfully cope with such a situation that this problem is annually given the class in editing as a test of their ability.

Charles Gratke has been selected as managing editor and Harry Smith will be in charge of the editorial page. The Associated Press service will be handled by Gene Kelly on the telegraph desk, Jacob Jacobson and Carlton K. Logan will be responsible for the main city news, assisted by Jennie Perkins, Robert Boettcher and Stanley Eisman. Proof reading is to be cared for by Frances Quisenberry.

\$25.00 PRIZE TO BE GIVEN

Albert Award Will Be Voted Upon By Senior Students.

To the student in the graduating class who during his or her college course has made the greatest progress toward all around development will be awarded the Albert prize of \$25 at the close of the college year, University officials announce.

The Albert award is an annual prize and a committee of judges composed of three members chosen by the student council and three selected by President Campbell will judge the respective merits of the individual members of the graduating class and base their decision upon character, scholarship and qualities of leadership in student activities. Three will be selected and nominated, and one of these will be elected by ballot of the senior class to receive the prize.

Adelaide Lake was winner of the prize in 1920.

SUMMER DEAN IS NAMED

Miss Edgington Will Act in Absence of Dean Fox.

Miss Grace Edgington, secretary to Dean Dymont and instructor in pre-journalism English, will act as dean of women on the campus during the summer session, in the absence of Dean Fox. Miss Edgington will teach a class in English, in addition to her duties as dean.

"I am looking forward with pleasure to the summer here," she said. "It will be a somewhat new experience for me."

Dean Fox will spend the summer in attendance at Columbia University, and visits to relatives in various eastern states.

WILLAMETTE IS DEFEATED.

Madeline Slotboom won two sets against Miss Bowen, representing Willamette University, yesterday afternoon in the singles matches between Willamette and Oregon. No other matches were played. The scores were 6-3 and 8-6. O. A. C. will be played today.

R. O. T. C. WORK BETTER.

Steady improvement in the quality of the work done by members of the University unit of the R. O. T. C. has been noted during the year, according to Major R. C. Baird.

A COLLEGE ENTERPRISE

BAYOCEAN, one of Oregon's finest ocean resorts, located on the Tillmook branch of the Southern Pacific will this summer be under the complete management of three college students with a competent Corps of college people for assistants.

TO OREGON STUDENTS we offer a beach run by college students with a good, clean college spirit and a genuine good time.

TO ALL OTHERS we offer this same college spirit plus the conveniences of a thoroughly modern hotel, the best bungalows and tent city on the coast, a \$75,000 Natatorium, the largest in the Northwest, and four miles of fine sand beach.

OUR AIM is a high class beach with a genuine spirit behind it. Amusements in the way of tennis, bowling, billiards, swimming, dancing, hiking and anything else that a good live crowd can think of will be provided.

WE SOLICIT YOUR COOPERATION in inducing your friends, as well as yourself, to spend their vacation here with us.

(For further details and employment write J. T. Hamilton Reed College Portland)

Strawberry Shortcake

Gee, but it's good. Anyway you want it, ala mode or with whipped cream. They're going strong just now.

The Peter Pan wishes to thank the students for their patronage this year, and aims to add many features which will be attractive to you all.

PETER PAN

Walt. Hummell, Prop.

What Is Research?

SUPPOSE that a stove burns too much coal for the amount of heat that it radiates. The manufacturer hires a man familiar with the principles of combustion and heat radiation to make experiments which will indicate desirable changes in design. The stove selected as the most efficient is the result of research.

Suppose that you want to make a ruby in a factory—not a mere imitation, but a real ruby, indistinguishable by any chemical or physical test from the natural stone. You begin by analyzing rubies chemically and physically. Then you try to make rubies just as nature did, with the same chemicals and under similar conditions. Your rubies are the result of research—research of a different type from that required to improve the stove.

Suppose, as you melted up your chemicals to produce rubies and experimented with high temperatures, you began to wonder how hot the earth must have been millions of years ago when rubies were first crystallized, and what were the forces at play that made this planet what it is. You begin an investigation that leads you far from rubies and causes you to formulate theories to explain how the earth, and, for that matter, how the whole solar system was created. That would be research of a still different type—pioneering into the unknown to satisfy an insatiable curiosity.

Research of all three types is conducted in the Laboratories of the General Electric Company. But it is the third type of research—pioneering into the unknown—that means most, in the long run, even though it is undertaken with no practical benefit in view.

At the present time, for example, the Research Laboratories of the General Electric Company are exploring matter with X-rays in order to discover not only how the atoms in different substances are arranged but how the atoms themselves are built up. The more you know about a substance, the more you can do with it. Some day this X-ray work will enable scientists to answer more definitely than they can now the question: Why is iron magnetic? And then the electrical industry will take a great step forward, and more real progress will be made in five years than can be made in a century of experimenting with existing electrical apparatus.

You can add wings and stories to an old house. But to build a new house, you must begin with the foundation.

General Electric
General Office Company Schenectady, N. Y.

All year we have daily used this space. We believe in the University, in their patronage. We thank you all for the same and hope to serve you better in the future.
