Homecoming Rally Delegates—Meeting Thursday night at 8:30 in Room 3 Administration building. A man from every organization must be there.

to bake a batch of pies, and when the pies come out, there is heat enough to bake cake without additional electric current. The oven will bake 21 dozen bran gems, or 432 biscuits at one time. That many gems and biscuits are one serving for Friendly hall and the cafeteria. Gems and biscuits for the girls' halls are baked at Hendricks hall.

This electric oven also bakes apples and pears, and roasts meat. The meat is put in about one thirty, and the cooks turn the "juice" low and depart, leaving the oven to do the rest.

Think of making 32 cakes for one meal! When Miss Paradine Doughty, the head pastry cook, is asked to make cake, she takes the receipt 32 times, mixes the ingredients in the electric mixer, and cooks it in 16 huge cake tins. That Miss Doughty and her assistant may not be swamped in pies and cakes, the menus call for these on alternate days for the two kitchens.

Besides the 22 regularly employed cooks, pantry assistants, dishwashers, janitors, etc. this large family supplies work for 60 students. Thirty-one of them earn board and room, or board alone; while 29 others work a few hours a day.

"It is quite a large household to be responsible for," suggested the reporter. "Oh," replied Mrs. Datson modestly. "I'm just the business manager, I just do the buying, and plan the meals: I am responsible for only their physical well being. Their social, mental, and moral upkeep," she laughed, "are in the hands of the head residents in the girls' halls, and the boys take care of themselves."

Besides the dormitory and cafeteria, Friendly hall kitchen supplies meals for the infirmary assistants and patients.

DISTINCTIVE DRESS CHOSEN
Seniors at the University of Utah, have picked as their special dress, ranger hats and distinctive vests, while the juniors wear as their official costume, khaki shirts, knitted ties, and corduroys.

WHERE IS OREGON SPIRIT?
To the Editor: There are nine men out for cross country; they are training hard in an endeavor to increase the long line of victories that OLD OREGON has to her credit in this homecoming event. Nine men from a school of over 2000 enrollment turning out to uphold the proud old tradition established by the former students who lived, breathed and boosted Old Oregon.

There is a new system being installed in the men's physical education department. This system will be an added improvement to Old Oregon. There is a class of students on Oregon's campus who are asking: "What's the idea of this physical test? This system?" and saying "Aw, that's all bunk, I won't do this or that," "They will never get me to go in for this," and, "I'm against everything."
Real Oregon students boost, pull, and work for Oregon all the time. Do you belong in this class?

—D.

Students read the classified ads; try using them.

THE way to economize on clothes is to buy good clothes; dependable woollens, durable linings and honest needle work.

You can be sure of these essentials to long wear when you buy clothes "tailored to measure by Born."

And because of economies made possible by large sales, we can offer you a mighty fine suit or overcoat for \$30 or \$35; other good values at higher or lower prices, if you prefer.

Boots For All Occasions

The Real Advantage in Wearing Boots

Boots are worn by all college men and women because they are the best means for keeping the feet dry in wet weather.

The seniors wear them because they have been in college four years and know and appreciate their usefulness.

The juniors wear them because it is their big year in college and want good foot wear to guide their footsteps.

The sophomores wear them because they wear well with their R. O. T. C. army pants.

The freshmen wear them because they feel it their duty to wear the same as their predecessors.

Light hiking boots, heavy pack boots and boots for all wear.

Established 12 years.

Moore & Moore are tailors for those desirous of being correctly groomed in every detail using the best ideas of the smartest designers. Each tailored garment is an individual model developed by an expert designer and is hand tailored in our own shops to a perfection of detail which the understanding of the requirements of the one for whom the garment is intended.

Our experience in catering to the wants of our customers has developed our service to a high degree of efficiency. Our business reputation will not permit us to risk making inferior clothing, but demands our best effort in each garment.

The consistency of distinguished clientele proves our ability to provide for those, that which is proper.

Help Your Eyes

Persons whose sight is defective cannot enter into the full enjoyment of life. Many things must pass unheeded and others be but vaguely understood if seen imperfectly.

But the best of life is open, even to these, with the aid of our correctly-made glasses. All can be made to see easily and clearly, if only the defects are taken in hand early enough.

The Right Way is Our Way

Student Opinion on the Armament Conference.

At the request of the Student Council, a speaker has been invited to address the student assembly today on the coming armament conference. Considerable agitation has been carried on among the various colleges and universities throughout the country to resolve into some sort of united action on the question of limiting armaments, and to send resolutions to the conference in Washington, D. C., next month.

Oregon students will have the opportunity of listening to an explanation of the purpose of the conference today, and it is probable that they will be expected to voice their opinion in the near future, on the question of united college action.

The question is vital. We as college students cannot afford to confine our thinking powers to the campus. As citizens we have a right to our opinion on political and economic questions and we should exercise that right in order that we may act deliberately and with serious purpose.

Admiral Mayo sensed a danger that student opinion might be idealistic and impossible. Is there such a danger? Do we not consider seriously the vital questions of the day and deliberate on them?

We are interested in the coming conference and we should take every opportunity to hear all sides. Then we should be able to decide on our own stand.

SCIENCE CLUB TO VISIT ORGANIZATION AT O. A. C.

University Faculty Members to Make Addresses When Group Gathers For Exchange Dinner

Friday afternoon the University of Oregon Science Club will make the trip to Corvallis, where an exchange supper will be served by the members of the O. A. C. Science club in compliment to the members of the campus organization.

After the supper Doctor Harry Beal Torrey will speak on "Experimental Control of Secondary Sex Characters in Fowls." He will be followed by Doctor A. E. Caswell, also of the University campus, who will speak on "Phenomena Associated With Conduction in Metals."

Thirty-one members from the Oregon campus are going. Some will leave early in order to visit on the campus. Dinner will be served at 6:00 promptly. The University of Oregon Science club is composed of members of the science faculty, graduate assistants, and a few elected students of superior ability. Doctor Torrey is president of the organization.

The O. A. C. club came to the Oregon campus last spring, when the first of the series of exchange dinners was given by the University science faculty. The plan was put forth to create cooperation between the science faculties of the two schools.

WOMAN'S LEAGUE TO MEET

Joint Session Planned With Y. W. C. A. Election to Take Place

The full program planned for the joint meeting of Woman's League and Y. W. C. A. this afternoon, has necessitated changing the hour from 5 o'clock to 4:30.

Mrs. Millie B. Trumbull, secretary inspector of the State Industrial Welfare commission will address the meeting on "Problems of Women in Industry." The musical numbers will consist of a harp solo by Betty Green and a cello solo by Lora Teschner.

Ella Rawlins, President of Woman's League, will preside over the business meeting of the League which is to take place just before Mrs. Trumbull's talk. Miss Rawlins is to leave Saturday for Berkeley where she is to attend a women's league convention to which delegates are to be sent from all the western states.

Election of president for Y. W. C. A. is to take place also.

DORMITORY FAMILY FOOD

(Continued from page one)

table and cooking, six sacks of sugar a week are required. Every day, 12 1/2 pounds of coffee are used to make the 30 gallons of coffee for these 470 persons. Besides coffee, they drink 15 gallons of chocolate and tea, and milk in indeterminate quantities.

The family eats 80 glasses of home made jelly at one meal. Five hundred gallons of jam has already been made this year. Some of it has gone down the throats of the students, and some remains in the cellar of Friendly hall.

Also, in that same basement storage, may be seen what remains of the 14,000 quarts of home canned fruit that was put up for use this year. Mrs. Elizabeth Prescott, mother of Mrs. Datson, makes all jelly and jam; and with a corps of assistants, cans all fruit. Besides this home canned fruit, the dormitory family eats countless cases of canned pineapple, apricots, and peaches which are purchased as they are needed. When fresh apples are served, five boxes are required. To serve the family once, it takes three cases of oranges, or three bunches of bananas.

Do they eat pie? I'll say they do! It takes 14 gallons of mince meat and 58 pounds of pastry to serve them pie once. That is 76 pies. These are baked in an electric oven, 36 pies at a time. The oven requires 30 minutes
