

"THE WEDDING GUEST" SCORES BIG SUCCESS

Hildegarde Repinen Takes Lead in Guild Production

TO BE REPEATED TONIGHT

Seniors Act Extra Parts; Comedy is Good

"The Wedding Guest" which was produced last night and will be repeated again tonight in Guild hall came nearer to the high mark of perfection than any play produced by the company this year.

The play itself is novel in as much as it is a problem play with an ending that is entirely satisfactory and the difficulties are completely cleared up, although the suspense is held up to the last scene in the last act.

Miss Repinen Has Title Role

The work of Hildegarde Repinen as Katy Omnaney deserves particular mention not only because it is her first appearance in a large part on the Guild hall stage, but because the spirit which she was able to bring into her role was unusually remarkable.

Lorna Coolidge as Margaret Fairbairn, the carefully, but innocently reared daughter of a wealthy old Scotch gentleman, also portrayed her part cleverly.

Arthur Johnson played the artist, Paul Digby, who had to decide between two women, the woman whom he had once loved and who still loved him, and his wife. Kate Omnaney showed her extreme unselfish disposition and made it possible for the play to end happily.

Comedy not Lacking

Although the play deals with a problem which on the morbid it was not lacking in pleasing comedy. Claire Keeney who is to be well fitted to any comedy part played the father, Mr. Fairbairn. His Scotch accent was delightful and the scene between him and the Reverend Mr. Gibson which showed them playing chess was one of the best in the entire play.

Margaret Nelson was a grand old Scotch lady who, although she seemed severe enough at first, before the play ended showed herself to be forgiving enough in her conventional way. Jenny Geddes a very old little girl was played amusingly by Doris Pittenger.

EDDIE DURNO TO GO SOUTH

Former Oregon Star to Referee Games of Eugene High School

Edwin Durno, freshman basketball coach, leaves today for southern Oregon where he will referee three games which are to be played between Eugene high school and three of the southern Oregon teams.

The teams that Eugene are to meet are Ashland, Talent, and Medford. They play at Talent on Thursday evening, Medford on Friday, and Ashland on Saturday. The Eugene aggregation has been going good this year and has yet to be defeated by a high school squad.

Coach Durno's services as a referee are in demand this season, as he has built up quite a reputation as a basketball player and referee since he has been connected with the University.

RESEARCH ON PACIFIC ADVOCATED BY YALE MAN

Dr. H. E. Gregory Here Urging Granting of Fellowships

"The Pacific, with its undeveloped lands and resources, will some day replace the Atlantic as a center of world activity," said Dr. H. E. Gregory, professor of geology at Yale University, who is on this campus for the purpose of interesting the university in problems of the Pacific.

Dr. Gregory is a member of the National Research Council, and is the head of its committee of Pacific investigation. He is now on a tour of the colleges and universities of this country for the purpose of interesting them in the development of the countries of the Pacific.

Aid to Scholars Urged As a solution to the needs of these countries in research work, Dr. Gregory suggests that the American universities offer fellowships of not less than \$1000 to aid men who are working on Pacific problems.

"The waters of the Pacific, its islands and countries, present an almost undeveloped field to the research worker of today," Dr. Gregory said, "Around New Zealand are salmon banks greater than the fish banks of New England, while the islands of the Pacific will some day, due to their ideal climate, be the cattle raising centers of the world."

Field Most Inviting "The plant life of the tropical Pacific, the shoals, teeming with sea animals of all kinds, offer the most interesting field known today for the student of zoology, botany, and geology."

The request of the committee for investigation of Pacific problems is meeting with the favor, stated Dr. Gregory, of American Colleges, and several are expected to establish fellowships for Pacific research work in the near future.

Dr. Edmondson Met While in Hawaii as the head of the Pacific problems committee Dr. Gregory became acquainted with Prof. O. H. Edmondson, formerly of the University of Oregon, who is now director of the Marine Zoological Laboratory of the University of Hawaii.

CHAMPION MILER MARRIES

Grant Swan, O. A. C. Track Captain and Runner, Marries Norma Davis

Oregon Agricultural College, Corvallis, Jan. 24.—(P. I. N. S.)—The secret marriage of Grant Swan, Pacific coast champion in the one mile run, and captain of last year's track team, to Norma Davis of Salem, was made public this week. The wedding occurred January 5. Swan was late in coming back to college and the Aggies feared they had lost their one-mile specialist. He is back on the job now, while his wife is visiting in Salem.

STUDENT COUNCIL

(Continued from page one)

that the committee favored restriction of the cost but recommended postponement of definite regulations until next year because they believed that regulations would have more weight if made only a short time before Homecoming.

Large Sum is Cleared The dance committee reported that \$126 was cleared at the last student body dance. Ella Rawlings, chairman of the committee on concessions, reported that the Home Economics club had been granted the concession to sell doughnuts at all of the basketball games during the season.

Criticism of students smoking on the sidewalk and curbing around the Commerce and Law buildings led to the passage of an amendment to the present rule governing smoking on the campus. The recommendation of the committee, as passed by the council, is as follows:

For the purposes of limiting smoking on the campus, we recommend; that the campus boundaries be extended to include that area on the north side of 13th Street from the curbing to the street car track between Kincaid and University Avenue; that the walk on the east side of Kincaid Avenue running from 13th Street to 11th be included; that the curb on the south side of 11th be included; that the curbing on the west side of University Avenue, running from 13th Street to the railroad be included; that the walk begin-

ning at the alley on the west side of the Administration building and running to the corner of 13th be included; that the area included within the east and north alleys and the west and south curbs surrounding the men's gymnasium be included; that the area immediately surrounding the Woman's building be included; and that the area surrounding the women's dormitories be also included.

PADDOCK TO SPRINT FOR U. S. C.

Los Angeles, Cal., Jan. 24.—(P. I. N. S.)—Charlie Paddock, world famous sprinter, will compete for the U. S. C. track team during the coming season. The speed marvel will probably try to lower the 100 yard dash record, and the quarter mile sprint record.

PANAMA CANAL EMERGENCY DAMS GATUN LAKE, eighty-five feet above sea level, is the reservoir holding the water to feed the Gatun Locks (which lead to the Atlantic) and the Miraflores and Pedro Miguel locks on the Pacific end of the Canal. Every ship going through the canal in either direction uses the water from Gatun Lake to lift it from the one ocean and lower it into the other. Should some accident destroy a lock, the weight of water released might force down the others and cause tremendous damage and, by lowering the level of the lake, make the canal inoperative until rain had refilled the lake. Therefore these big emergency dams were constructed. Normally they are not used. In emergencies they would be swung over the locks, the gates would drop into position and effectually dam the opening. Otis engineers designed, constructed and installed the machinery for operating six of these gigantic dams. It is a feat typical of the worldwide scope of Otis activities in engineering and the vertical transportation of men and materials. Most of the famous buildings of the world are equipped with Otis Elevators. OTIS ELEVATOR COMPANY Offices in all Principal Cities of the World
