

### SCHOOL OF ARCHITECTURE EXPECTS MANY STUDENTS

#### Lack of Room is Handicap to Department

#### TUITION FEE PROBABLE

#### Dean Lawrence Asks for More Assistants

The high standard of work offered by the school of architecture of the University has been brought out in the annual report of Dean Ellis F. Lawrence to President Campbell. Many facts and statistics of the departments of architecture and allied arts are given, telling of the work now being accomplished and the aims of the school.

The number of major students in these departments now totals 119, representing an increase of 60 per cent over the past school year. This number greatly overcrowds the room space and taxes the limited number of instructors. So crowded have the classes become that it has been necessary to move some of the classes in normal arts to the low-storied, poorly lighted basement, which was formerly the locker room of the women's old gymnasium.

#### Dean Explains Increase

Dean Lawrence points out that the rapid growth of the school has come as a result of the investigation and reports of visiting judges and architects. There has been no advertising or special bulletin issued by the department since 1918. The general announcement of courses, issued by the University, is the only advertising the courses have had.

Despite this fact students are coming from a number of outside states, and constant inquiries from Oregonians indicate that there will be another large increase of enrollment next year.

Word has already been received from a Tacoma architect that he is sending three students from his office for work in the architecture school next year. This decision came after a thorough investigation of all coast schools. A Californian chose Oregon, after an investigation of the California schools. At present there is one student in the department from Iowa; still another came from the University of Washington this year.

#### Sculpture Attracts Many

Several Californians are at present corresponding with Professor Schreff about entering next year for his work in fine arts. Avarad Fairbanks, who offers the only professional work in sculpture north of San Francisco, has 70 students enrolled. Five students are now specializing in sculpture. Several more are expected next year.

In his report Dean Lawrence asks for immediate relief in his department, both for more rooms and a larger staff of instructors. Unless this is done at once, he says, it will be necessary to control the enrollment in some manner. A high standard for grades is maintained already and fees have been applied wherever possible. Unless the situation is relieved, however, it will be necessary to apply a tuition fee. This will be applied only as a last resort, it is explained.

### MATHEMATICS MAJORS TO FORM CLUB TONIGHT

#### Knowledge of Calculus is Only Requirement for Membership; 30 Now Considered Eligible

A mathematics club is to be formed on the campus. Those interested in such an organization will meet in Professor DeCou's room in the Administration building at 8:00 Wednesday evening to consider plans of organization. The idea of the club is the result of agitation that has been carried on by math majors with the sanction of the mathematics faculty.

A mathematics club did exist on the campus several years ago, but in the excitement of the war interest waned and the club was allowed to drop from sight.

"Students with a knowledge of calculus are eligible to membership to the club," said R. M. Elliott, a graduate student in mathematics. "There are about thirty people on the campus eligible for membership."

Students in pre-engineering, physics,

and science courses can become members of the club if they desire and are interested.

Mathematical problems will be discussed at the meetings and other interesting propositions will be considered. Practical as well as pure mathematics will merit discussion. The meetings of the club will not be limited to discussion groups only. There will be social activities now and then during the year.

At the meeting Wednesday evening, Dr. Milne of the mathematics department will speak on "Prime Integers." This will be a non-technical address and will deal with the development of the subject. This is a problem which mathematicians have studied for ages. Following the address the organization of the club will be taken up.

### FRENCH CLUB RECEPTION PLANNED FOR TONIGHT

#### New Members of Foyer Francais Will be Received Into Organization at Meeting in Bungalow

Ten new members who were recently elected to Le Foyer Francais, honorary French society on the campus, will be received into the club this evening at 7:30 o'clock at the Y. W. C. A. bungalow when a reception will be given in their honor. A special program is being arranged by Wilbur Bolton, chairman of the program committee.

"The club is an honorary society," says Verne Blue, president of the society, "which is open to students who have had one year of college French or its equivalent." Certain scholarship requirements are also necessary for entrance, according to Verne Blue.

"The purpose of the club," says Blue, "is to make working French more interesting, to vitalize it by taking it out of the classroom, and to establish a closer relationship with French and French interests." Co-operation with other French societies of other colleges was also cited as being one of the purposes of the organization. "We believe that these two republics, France and the United States, should and can work together."

"Our programs have been exceptionally good this year at all the meetings," said the president of the club. "Music furnished generally by students is always one of the features. Talks by members of the club are held every other Wednesday evening at the Y. W. C. A. bungalow at 7:30. Students, members of the faculty, and others who are interested in French are invited to attend this meeting."

### PROGRAM OUTLINED

(Continued from page one)

of Student Body Organization, "High School Athletics," "High School Dances," "Student Officers and Elections," "Hi-Y Clubs," "Debating," "Dramatics," "High School Fraternities and Clubs," and other discussions.

The editors' conferences are to be taken in charge by the school of journalism of the University. All students in that school will be expected to cooperate. The facilities of the school will be used to advantage in illustrating journalism in its various phases to the visitors.

#### For Girls' Athletics

Special topics to be discussed by the girls' conferences are "Duties of a Student Body Secretary," "Women's Leagues in High Schools," "Girls' Athletics," "Codes of Ethics for High School Girls."

A tentative program which has been sent to the principals for consideration includes a banquet on Friday evening with addresses by President P. L. Campbell, and others; Saturday morning, inspection of the University campus and visits to the departments, with talks by Deans of University Schools; Saturday afternoon, general conferences on student self government and honor codes; Saturday evening, music and entertainment at Alumni hall.

### WOMAN SOCIAL WORKER IS VISITOR ON CAMPUS

#### Miss Avis Lobdell Addresses Practical Ethics Club on Opportunities in Welfare Work

Miss Avis Lobdell of the Bureau of Women's activities of the Union Pacific system, with headquarters at Portland, was guest on the campus yesterday. She addressed the freshmen girls at their class in practical ethics yesterday morning. Miss Lobdell is in charge of the welfare work of the bureau in Portland, in connection with the women who are employed by the railroad concerns in the city and her address to the students was on the opportunities open to women in welfare work. She cited a number of her experiences in the business world and emphasized the importance of women being able to think for themselves and urged the girls to be ready to take up whatever presents itself. There is value in every experience, according to the speaker, who said that the mere service of doing any work well was in itself the biggest part of work. "No matter how little you may depend on the work you are doing or how long you intend to continue it you have no business to do anything but the best," said Miss Lobdell. She maintained that every woman who is efficient in her work helps to lift up every other woman in the eyes of the world.

terday morning. Miss Lobdell is in charge of the welfare work of the bureau in Portland, in connection with the women who are employed by the railroad concerns in the city and her address to the students was on the opportunities open to women in welfare work. She cited a number of her experiences in the business world and emphasized the importance of women being able to think for themselves and urged the girls to be ready to take up whatever presents itself. There is value in every experience, according to the speaker, who said that the mere service of doing any work well was in itself the biggest part of work. She maintained that every woman who is efficient in her work helps to lift up every other woman in the eyes of the world.

### DR. J.M. WALTERS TO SPEAK

#### "Difference That Christ Has Made" Subject of Methodist Pastor

"The Difference that Christ Has Made," will be the subject on which Dr. J. M. Walters, pastor of the First Methodist church of Eugene will speak this afternoon from 5 o'clock to 5:45 in the University Y. M. C. A. hut. Dr. Walters is taking the place of Dr. A. R. Sweetser, head of the campus botany department, who is confined to his home with an attack of the grip. Dr. Sweetser has been lecturing on the general topic, "The Christian Faith in an Age of Science."

Secretary Putnam has made this arrangement in order that those who have been accustomed to reserve this hour on Wednesday to hear Dr. Sweetser, may not be disappointed. "Dr. Walters will be remembered," says Mr. Putnam, "as an exceptionally fine speaker by those students who have heard him at the church. He is a popular speaker with many of the students, and the church has built up wonderfully during his pastorate."

Students read the classified ads; try using them.

### MRS. L. T. HARRIS ATTENDS ALUMNAE MEETING HERE

#### Maintenance Plans of Mary Spiller Scholarship Discussed; Dues Given Room and Board to Girl

Mrs. Lawrence T. Harris of Salem was in Eugene yesterday to attend the business meeting of the Alumnae association, held at the home of Mrs. F. L. Chambers, its president.

The Alumnae association is an organization to which every woman graduate of the University is eligible. It has for its main purpose the maintenance of the Mary Spiller scholarship which consists of room and board in one of the halls of residence of the University for a year. The dues of the Association go to the scholarship fund and the scholarship is awarded each year to one girl, chosen by a committee. The one selected is mentally, morally and physically fit and is reasonably sure that she will continue her education and graduate from the University of Oregon.

The scholarship was awarded last year to Laverne Rumbaugh of Portland, and is being held this year by Maple Dell Moore of Wilbur. The present officers of the Association are Edith Kerns Chambers, '95, president, Jennie Beattie Harris, '96, treasurer, and Mary Watson, '09, secretary.

### PROFESSORS' WIVES SERVE

It took Mrs. Eric Allen, wife of the Dean of the school of journalism, and Mrs. W. P. Boynton, wife of the head of the physics department, working with four other jurors, just 15 minutes to convict a bootlegger in justice Wells' court, yesterday afternoon. "Four months" said the judge.

# STETSON HATS

Styled for Young Men

STYLED for "Young Men" is only half the Stetson story.

There's Quality, too.

Fifty-six years' experience making hats for young men—and a range of choice that guarantees the hat that suits your physique and personality.

Come in and see the new Spring Stetsons.
