

GREGORY'S MANUSCRIPT TO BE PUBLISHED SOON

Faculty Man Signs Contract with Appleton Company

Professor C. A. Gregory, of the school of education, has signed a contract with D. Appleton Co. for the publishing of his manuscript, "The Principles of Tests and Measurements with the Elements of Statistical Methods." An effort is being made by the publishers to get the book out for use in summer schools.

In reviewing the book for the company, H. A. Sprague, superintendent in one of the larger cities of New Jersey, said in part: "I have read Dr. Gregory's book with increasing interest. His style is simple, direct and clear. The treatment in general is scientific, logical, and interesting. I believe the book is not too easy for the average college group nor too difficult for normal school classes. Sections dwelling upon needs of educational measurements will prove very convincing to the average teachers in service."

"Teachers, principals, and supervisors will find the chapters which explain the tests and their relative merits very helpful. The book also offers one of the simplest treatments of the fundamental steps in statistical methods which I have read."

In explaining the purpose of the book, a statement in the preface says: "This book is an attempt to bridge, in part, a gap between theory and practice in educational tests and measurements."

Language Simplified

"This book deals with the processes and problems in a somewhat evolutionary way so that the teachers and students may see the order in which the problems have arisen and their attempted solutions. A mere manual of directions for giving tests and scoring papers will not develop a professional spirit among the teachers in the field. They must understand the fundamental principles or the work becomes purely mechanical and non-professional. It has been the aim of the author to present the fundamental principles in non-technical language as far as it is possible to do so and to confine the statistical treatment of the data almost entirely to simple operations in arithmetic."

It is a book of about 375 pages, consisting of 11 chapters. The first two chapters, developed at length, give a brief description of experimental psychology prior to the time of psychological tests, showing how measurements of intelligence developed largely from the work of the psychiatrist. A discussion of the Binet test with adaptations and revisions is given.

"My experience in giving tests and measurements in public schools," says Dr. Gregory, "has been that most people do not understand fundamental principles." Hence the chapters which follow those dealing on school achievement are devoted to a discussion of fundamental problems. The last 150 pages treat of statistical methods applied to education.

BELGIAN FELLOWSHIPS TO BE OFFERED HERE

Awards Established by European Universities in Honor of Relief Commission

Announcement has been made of the offering of graduate fellowships for Belgian Universities to be awarded by May 15, 1922. The fellowships have been established to commemorate the work of the commission for relief in Belgium during the World war, and to promote closer relations and the exchange of intellectual ideas between Belgium and America.

To be eligible as a candidate for a fellowship, one must be an American citizen; must have a thorough speaking and reading knowledge of French; must be a graduate, at time of application, or before September, 1922, of a college or professional school of recognized standing in the United States; and must have definite plans for his proposed study in Belgium.

Preference in selection is given to those applicants who intend to take up teaching or research as a profession. The fellowships are open on equal terms to men and women.

For the year 1922-23 not more than eight fellowships will be awarded. Information can be obtained by addressing the Fellowship Committee, C. R. B. Educational Foundation, Inc., 42 Broadway, New York.

PROF. COON GOING ABROAD

(Continued from page one)

structors in composition; in fact the entire faculty is made up of the recognized musical artists of France.

Jean Fayard-Coon, instructor in French at the University, has also been granted a leave of absence and will spend the summer resting at Fontainebleau. In the winter she will study philosophy and modern French literature at the Sorbonne in Paris.

Mr. and Mrs. Coon will also spend some time gathering material for lectures that will be of interest when they return to America.

Madame Fayard, mother of Mrs. Coon, will accompany them to France and will visit her old home in Nice and at Besancon.

The granting of the leave of absence to Mr. Coon is in line with the general policy of the University school of music

to enable members of the faculty to continue their study at intervals. Two years ago John Stark Evans was granted a leave of absence in order to study, and this year Aurora Potter is studying with Edwin Hughes in New York City.

DRAWINGS TO BE SHOWN

Work of Louis Rosenberg, Former Oregon Professor, Attracts

All students and members of the faculty are urged to attend the opening of the exhibit of drawings done by Louis Rosenberg, formerly of the University faculty, on Thursday afternoon at the Architectural building. A reception will be held from 4 until 6 o'clock and will mark the opening of the exhibit, which will be of particular interest to the friends of Mr. Rosenberg who are on the campus. According to Dean Lawrence of the school of architecture and allied arts, this group of drawings will be valuable to students in that department, as the collection includes sketches of the best examples of architecture in Europe where Mr. Rosenberg has been studying for the past year and a half.

STUDENTS TO ENROLL FOR YEAR PASSES 2200 MARK

Spring Registration Reaches
1802 with Men Leading

Total registration for the spring term reached the 1802 mark, according to figures compiled in the office of Carlton E. Spencer, registrar. This figure exceeded Mr. Spencer's previous estimate by only two additional students. The men outnumbered the women with 947 to 855. Total enrollment for the year is 2241.

The freshman class was the largest, as usual, numbering in all 593, 300 men and 293 women. However, the junior class exceeded the sophomore with 218 men and 180 women, totaling 398, as opposed to 192 men and 190 women, totaling 372.

Graduate students numbered 73, 46 men and 27 women. Specials, with 69 men and 38 women, totaled 107. Of the five law specials, four were women.

Nineteen students returned to college who were here last fall term, but stayed out during the winter. Registration in the fall was 2012. In the winter term there were 178 new students, while this term 51 new students registered. This brings the total enrollment for the year to 2241, with no duplicates.

CRAFTSMEN CLUB ELECTS

Annual Election Held Last Evening;
John MacGregor, President

The Craftsmen club, at its meeting and annual election at the Anchorage last evening, elected officers for the next school year. John MacGregor was re-elected president; Dan L. Woods, secretary; Robert Callahan, treasurer; and Herbert Hacker, sergeant-at-arms. Professor F. S. Dunn and Carlton Spencer were elected to the executive committee of the club.

C. J. Fulton, Master of the Eugene lodge, A. F. & A. M., Judge G. F. Skipworth of Eugene, and Charles Dyckman, president of the Masonic club at O. A. C., were guests at the meeting and spoke to the club on Masonic subjects.

SCULPTURE CLUB ELECTS

Sculpture club announces the election of Jeanne Elizabeth Gay, Dorothy Campbell and Charles Irwin.

'PREPPER ISSUE' NAME OF NEXT LEMON PUNCH

Humorous Magazine Will Have Different Make-up

The "Prepper's Issue" will be the name of the next number of the Lemon Punch which will appear during the Junior Week-End. A larger magazine and a wider circulation is the aim of the staff which promises an issue bigger and better than ever before.

An entire new make up of the magazine will be used this time, according to "Doc" Braddock, editor, and the Punch will be alive with new cuts, more full page features and a larger variety of short jokes. Two features of this issue will be a different arrangement of cuts and a greater number of poems.

With the good material that is pouring in from new contributors, both the art work and the jokes are high class. The addition of several new contributors to the art department has made a marked difference in the illustrations. The work of Doris Bothwell is receiving recognition although she is a new contributor to the Punch. Others whose work has been featured in past issues are: Ray Bethers, Katherine Nickerson, Beatrice Morrow, Wilbur Hulm, and Owen Calloway.

A lighter and more pleasing make-up will be used in this issue, according to the staff. A different arrangement of cuts will be featured, and the editorial page will present a new appearance.

Contributions for this issue have been received from many old contributors; Kelly Branstetter, Ep Hoyt, Allen Carn-

cross, Ernest Haycox, Harold Evans and others.

ADDRESSES TO BE PUBLISHED

The addresses and short personal sketches of commercial club secretaries who attended the short course given on the campus during the spring vacation by the School of Business Administration are being prepared for publication in the next issue of the Extension Monitor which will appear in about two weeks.

Peppermint flavored chewing gum with Peppermint Sugar Coating.

"Sugar jacket" melts in your mouth, leaving the deliciously flavored gum center to aid digestion, brighten teeth and soothe mouth and throat.
