

FROSH NINE TO TANGLE WITH SALEM HIGH TEAM

Two Game Series Scheduled for Week-end

The frosh baseball artists are to engage in two games this week-end with the Salem high school aggregation, which is being coached by Bill Reinhart. The yearling squad has been going through a strenuous week since their overwhelming defeat by Columbia university last Saturday, and Coach Shy Huntington says there will be several changes in the lineup which faces the prep team in the two games Friday and Saturday.

That the Salem squad will be a hard nut to crack is proved by the score of their game with the Columbia university nine, the same team which won from the frosh 23 to 8. The Salem high team managed to hold them down well throughout the entire game and lost by only two runs, so the dope is rather against the yearlings, although they did succeed in winning the first Columbia contest by a ninth inning rally.

Coach Huntington could give no definite lineup for the frosh in the two games, but the places will be decided by their showing through the week and tonight's practice. The pitching staff, especially, was deplorably weak in the games last week, but with Branaman and Skinner in shape it should be much better.

The men making the trip on Bill Reinhart's prep team are: Ellis, D. Adolph, and H. Moon, pitchers; Pur-rine, catcher; M. Moon, short stop; Congals, right field; Jones, third base; R. Adolph, first base; Reinhart, center field; Brown, second base, and Moor-man, left field.

The game on Friday is to be played at 4 o'clock and is the only athletic event scheduled for that afternoon on the campus.

OREGON GEOLOGIST

(Continued from page one)

the mere making of money. (There are many, many poor-rich men in the East—men who have paid a terrible price for that kind of success—of the most successful men, I say, the chief characteristics and assets are about as follows: this; 1. Character—nothing takes the place of this; 2. Ability to do and command teamwork; 3. Special training; 4. Physique, not necessarily bigness, but the kind of physique that will withstand hardship and disease; 5. Social adaptability; 6. Ability to speak at least one foreign language (out here Spanish preferably). This last takes one out of a "Main Street" mental condition and puts him in the world's forum.

"It might interest some of your readers to hear something of where my work in the past year has taken me. Recently I was doing some geological and soil work for the Sugar Centrals' agency of the Phil. Nat'l bank in the rich sugar region of the island of Negros and I used the following different kinds of transportation in getting over the grounds

1. Steamship.
2. Motor boat.
3. Locomotive.
4. Automobile.
5. Gasoline track car.
6. Hand car.
7. Balsa (raft).
8. Prahu (native outrigger sail boat)
9. Baroto (Native dug-out canoe).
10. Wagon (four wheels).
11. Tartonilla (two wheels).
12. Horse back.
13. Walking.
14. Man-back.
15. Swimming (this last when we were capsized in a swift mountain stream and had to "chuck" everything and make for shore).

"The above work was in the lowlands; my present work is in the cool highlands of Luzon among the Igorots and has to do with a large group of gold claims. This letter is written from Baguio, the Phil. Simla.

"During the past year I have had, in addition to the above, such interesting and varied work as the investigation of the National Coal company, geologic examination of the proposed new water project for the city of Manila (which will cost from 10 to 25 million dollars); drafting of the new mining laws and regulations for coal and oil; petroleum reconnaissances in virgin territory; exploration of prehistoric cave dwellings, etc., etc., the work is always different, always interesting and oftentimes difficult and hazardous, but "believe me" it is the life and still once in awhile I long for the quiet of my study and the good old classroom discussions. I sometimes wonder if I'll ever have these again.

"I know that the university has changed tremendously in the past two years and I am anxious to be a part of it all again. I trust that it has not out-grown me, and that there is still a place for me there. I assure you that there will always be a place for Oregon in my heart.

"Adios.
"WARREN D. SMITH.
"P. S.—I saw "Herb" Johns at an Inter-Fraternity banquet recently. We were both singing Oregon songs."

SENIOR BREAKFAST DATE SET
Saturday, May 13, has been set as the date of the annual senior breakfast given under the auspices of the Y. W. C. A. for all senior women in the University. The affair will be held in the Woman's building and the junior women will serve as escorts.

JUNIOR PROM TO BREAK ALL RECORDS THIS YEAR

New, Original Decorations and Best Music Provided

That this year's junior prom will surpass that of any previous year is evidenced by the plans of the committee in charge of the annual dance. Nelson English is chairman of the prom committee, and John Palmer is in charge of decorations. Contrary to rumors that have been heard on the campus, it is the plan to have only one dance this year. It is the feeling that it is more advisable to have all students and guests together in one large dance than to split it up into different groups in different buildings.

Bleachers Going Up
The prom will be held at the Armory on Saturday night of Junior Week-end. An especial feature is a new and original decoration scheme which will be fully carried out. The best music on the campus, consisting of a five-piece orchestra, has been obtained.

The permanent bleachers on the mill race are going up in good shape. Several juniors have been working on these during the past two Saturdays, and it is planned to complete them this Saturday. The bleachers are being built with the purpose of being used for many years. They are stronger than those on Hayward field, due to the better foundations. Seats for over 1200 spectators will be provided by these bleachers.

CEMENT MAKING IS TOPIC

Claire P. Holdredge Slated to Address Chemists' Club Tonight

Claire P. Holdredge, a graduate student of geology, will present a lecture before members of the Chemists' club of the University this evening at 7:30 in McClure hall.

Holdredge will speak on the manu-

facture of Portland cement and describe the processes which are undergone to produce this article, which is of great commercial importance. He spent the vacation months of last summer working as a chemist for the Gold Hill Portland Cement company at Gold Hill, Oregon, and his talk will deal largely with his experiences there.

This is the first meeting of the term for members of the club.

"Y" WOMEN TO HEAR MARSHALL

The regular meeting of the Y. W. C. A. will be held at the Bungalow on Thursday afternoon at 5 p. m., under the direction of the World Fellowship committee. Dr. W. H. L. Marshall, pastor of the Congregational church, will speak on some topic relative to the world outlook that college students should have. A special musical program is being arranged under the direction of Florence Buck.

THEY DO IT!
We spent years experimenting with different blends of tobaccos to obtain

- a new flavor
- a more pleasing aroma
- and to obtain what is more important still—the one thing that smokers have always wished a cigarette would do—

"SATISFY!"

And Chesterfields do "satisfy." For in Chesterfields the tobaccos—Turkish, and Burley and other choice home-grown varieties—are blended differently—and better—to give you and all smokers that greater measure of cigarette enjoyment.

They Satisfy
—and the blend can't be copied.
