

PRESENCE OF TEN LETTERMEN LIFTS HOPES OF VARSITY

Coaches Say Best Material In Many Years Out in Uniform Now

ONE VICTORY CHALKED UP

Pacific University Team Is Swamped in Season's First Game

With what the coaches say is "the best material since 1916," a fine schedule, and one game already won from Pacific University, 27 to 0, the predictions of football fans are that Oregon has a fine chance to put a championship team into the race.

Something new for the coaches is the fact that ten lettermen are back, five each from the line and backfield. These men will probably form the bulk of the team, but the stars from last year's Frosh eleven and several new men will also put in a strong bid for regular positions.

The lettermen who are back are Hank Latham, Hal Chapman, George King, Ward Johnson and Dutch Gram from the backfield, while Carl Vonder Ahe, Tiny and Floyd Shields, Bud Brown and Prince Callison the linemen with letters.

Some of the new men whom Coach Huntington believes will put up a strong bid for the positions on the team are Bill Spear, George Bliss, and Tergeson of last year's Frosh, while Cog Campbell an experienced football man who played on both the Frosh and Rook teams is expected to be out some time this week.

Callison Still Laid Up.

Prince Callison is out of the game at present on account of injuries he received while working in a logging camp this summer. Trainer Bill Hayward reports that Callison is rapidly recovering though and may be out for practice by next week. Dick Reed is also in college and will be played at center quite a bit this season the coaches say, because of the fact that they will need an experienced center for the game next season as this is Callison's last year.

Archie "Tiny" Shields who was reported as being badly handicapped because of an attack of pneumonia last spring is back again as ever and will try for his third letter, though he will not work until later as the coaches are taking no chances on his back, which he injured this summer.

While the game with Pacific Saturday showed clearly many weaknesses in Oregon's eleven they are weaknesses that may be remedied. With Dick Reed back and with Prink Callison and Tiny Shields soon to turn out, with Cog Campbell soon to be out in a suit it will be a far stronger and more experienced line that faces the Pacific Coast conference teams than that which swung into action against Pacific.

It is unlikely that Willamette Saturday will prove a stronger foe than Pacific, but next week the Oregon squad will face a real test when they line up against the eleven from Multnomah club. Coach Ted Faulk has some real stars this year and the Lemon-Yellow will be hard pressed to take the heavy end of the score. However the game Saturday with Willamette will afford the football squad some excellent laboratory work in the actual practice of football.

Spear Going Good.

Bill Spear and Bud Brown have been holding down the end positions so far on the team and played there in the Pacific game, in which Spear, playing his first varsity game, grabbed a pass and made the first touchdown. George Bliss at tackle, Byler at center, McCraw at tackle and Tergeson at half also played their first varsity game Saturday.

The second game for the varsity is scheduled here for Saturday when they meet Willamette. The Salem college is rather doubtful as they have played no games yet, but they always have a strong team and a rather close game is expected. The Methodists held the Oregon men to a 7-3 score last year in an early season game, but have scant chance to repeat the performance, for the varsity is far stronger this year than last.

President Campbell Greets Students; Asks Good Work

Message to the Students

The year just opening gives every promise of being a good one. The numbers are larger than ever, the preparation has been good, the spirit is fine, and the general University organization grows better year by year. Life on the campus ought to approximate the ideal. Abundance of interests, abundance of exercise, abundance of good-fellowship, and unselfish living—these are a few of the outstanding factors. The University best prepares for life by making the living good as it goes along.

Speaking for the faculty, I will say that we will all honestly try to do our part, and we are sure that you will try to do yours. Amongst us, we ought to be able to make the year abundantly worth while.

P. L. CAMPBELL.

Work for "Greatest Oregon" Says President of A.S.U.O.

With the resumption of class after the interruption of the summer vacation, John MacGregor, student president for the year 1922-23, sends the following message to the students:

To you all as Oregon students, first, last, and always, I extend the hearty democratic handgrip of our campus, and greet you with the Oregon "Hello." To each of you individually, I, as the representative of you all, give the sincerest of welcomes and wish for a successful year, in this, our State University.

Seniors! You are facing your last year here. You have borne the brunt of three years undergrad work, each of you in his own field of endeavor adding his meed to the good reputation of Oregon, and bringing glory, hard-won on the athletic field, in the classroom, the debating platform, in the publications, the field of music, and the other student activities. To you, now rightfully belongs something of honor, and pleasure in your last year, and to you falls also the duty to typify by word and precept, Oregon Spirit. Remember that next year you will call this University your Alma Mater, and make the last year the best.

Juniors! You are the working executives of the University. You have passed your year of training as freshmen, and the maturing period of your sophomore year. This is your year of accomplishment, which more than any

other, probably should make or mar your reputation as an Oregon student. Make the most of it, and remember that with your success, Oregon succeeds, just to that extent, also.

Sophomores! For a year you have been learning the ways of University life. If you have learned your lesson well, nine months of possible achievement lie before you—and the duty as guides to the new freshmen. Develop your friendships, and lines of student activity of last year, and adopt new ones as you see fit. The coming year should settle the course of your University life and prove a maturing period, preparatory to your two years as upper-classmen at the University.

Freshmen! Hello! That is the Oregon watchword. Learn it and use it. It typifies the Oregon Spirit of camaraderie, and cheerfulness. There is little I can say to you that you will not hear many times in the next few days, and throughout the course of your first year here. To you in the proper time will be given the torch of Oregon student life to "carry on." All that I can say to you now is to bid you to learn the lessons of your first year well, that you may be prepared when that time comes, and to bid you welcome, to the University.

To all, in closing, I say, let us enter the new year with a firm resolution to conscientiously strive not merely for a Greater Oregon, but for the Greatest Oregon.

FIRST ASSEMBLY THURS. IN WOMAN'S BUILDING

Pres. Campbell Will Speak On Endowment Fund

The first general assembly of the term is scheduled for 11 a. m., Thursday in the gymnasium in Woman's building. Due to the limited seating capacity of Villard hall, which has been for years the scene of the weekly assemblies, and to the increased student body, this arrangement has been made. It is hoped by this plan, to accommodate a much larger crowd than it would be possible to handle otherwise.

President Campbell will inaugurate a new note in his address on the University gift campaign program which is being launched throughout the state, with the slogan of "Ten million dollars in ten years, for Oregon." He will deal principally with the contribution to be made by the student body in the campaign, and the various ways in which they can assist in raising the desired sum. Lamar Toozee, '16, field director of the campaign, will outline in some detail the drive program.

John MacGregor, president of the Associated Students of the present year, will be on hand to welcome both the old and new students on the campus.

Rev. J. M. Walters, pastor of the Methodist Episcopal church of Eugene, will deliver the invocation.

Members of both the men's and women's glee clubs who have returned to school will lead the singing of Oregon songs and the men's club will feature with special music numbers. It is expected that members of the yell staff will be on hand to lead in a rousing Oregon "Oskie" and give the entering freshmen a real taste of the Oregon spirit.

The women's gymnasium has a seating capacity of 1800 and standing room for several hundred in addition to this, so that it is expected that 2000 students at least will attend the first assembly of the year and start the term with an abundance of Oregon spirit and enthusiasm.

CALIFORNIA HAS RADIO.

University of California, Oct. 3.—(P. I. N. S.)—Radio club classes in code practice and elementary theory are now in progress in the Mechanics building. The radio station was recently completed and intercollegiate traffic has started.

UNIVERSITY HEALTH HAS NEW QUARTERS

Department Now Located in North End of Friendly

New and artistic tints and hangings, and improvements in the way of space and general facilities make the new quarters of the University health service, at the north end of Friendly hall, more attractive and convenient than the quarters occupied by the department before the fire last summer.

New members of the health service staff are Miss Margaret McGregor laboratory nurse, and Miss Ruth Harvey, nurse in charge of the office and waiting room. Both are hospital-trained. Physicians at the offices of the health service are Dr. W. K. Livingston and Dr. W. E. Savage. Dr. Bertha Stuart, physician to the women of the University, has her offices in the Woman's building. Another new member of the health staff is her assistant nurse, Miss Jane Gavin.

The personnel of the nursing staff at the infirmary has also been changed. Miss Orpha Clouse and Mrs. W. B. Martinson are the nurses, Miss Clouse being in charge.

Dean Bovard of the physical education department has his office at present in the part of Friendly hall occupied by the health service, but expects to move as soon as the wooden structure near the administration building is finished.

The walls of waiting room and offices of the health service have been tinted a pleasant soft grey, and the waiting room is made cheery and attractive with bright new cretonnes on the cushions and at the windows. New hangings and wall paper have also made changes at the infirmary.

GOLF INSTRUCTOR HERE.

Golf enthusiasts will be interested in knowing that professional instruction in the ancient Scotch pastime will be at their service this year. Mr. M. C. Shaver, formerly golf professional of the Newberg Country Club is registered on the campus. Mr. Shaver will instruct faculty and students between 4 and 6 on the golf course just south of the R. O. T. C. barracks. Professor Scott, of the physical education department, announces that physical ability men may select golf as an elective.

PHI BETA KAPPA GRANTED OREGON WITHOUT DISSENT

Council Votes Unanimously to Admit University to Honorary Society

SCHOLARSHIP RECOGNIZED

Small Group of Graduating Class Eligible; High Standards Held

The University of Oregon was granted a chapter of Phi Beta Kappa, national honorary scholastic society, by the Council of Phi Beta Kappa meeting in triennial convention in Cleveland, September 12 and 13. The Oregon petition for membership presented by the University Honor society and members of Phi Beta Kappa on the University faculty, was granted without a dissenting vote.

The installation of a chapter of Phi Beta Kappa on the Oregon campus will mean a distinct recognition of the scholastic standards of the University. At present there are chapters in only one hundred universities. A small percentage of the graduating class whose scholastic attainments are most marked are eligible for membership in any chapter.

No definite arrangements have been made as yet for the installation ceremony, but, according to R. G. Clark, president of the University Honor society and a member of Phi Beta Kappa from the University of Texas, it is possible that an installing officer might be sent this term.

First Efforts in 1916.

The University began working for a chapter of Phi Beta Kappa in 1916, but at that time the petition did not reach the senate in time for consideration. Last year, renewed effort was made by the University Honor society, under the direction of its officers, Dr. K. C. Clark, Miss Mary Perkins and George Turnbull.

At present the Honor society consists of about 60 members, including more than 40 students who have been chosen from the classes of 1920, 1921 and 1922, and members of the faculty who wear the Phi Beta Kappa key. In granting the chapter to the University of Oregon, membership in Phi Beta Kappa was not conferred upon the student members, but they are in line for election to the society.

Phi Beta Kappa was founded in 1776 at William and Mary's college in Virginia. The next three chapters were granted to Yale, Harvard and Dartmouth. The first chapter on the Pacific coast was installed at California in 1893, and Oregon makes the third school in the Northwest to be recognized, chapters having already been granted Washington and Whitman.

Faculty Is Pleased.

"The faculty members of the University campus are well pleased with the recognition given to Oregon," said Mr. George Turnbull, secretary of the Honor society. "It really means that Oregon is recognized among the strongest institutions in the country."

President Campbell in his statement at the time of the granting of the chapter said:

"For some years the University of Oregon has been in line for Phi Beta Kappa. The equipment, breadth of work, and general standards of the University have been all that Phi Beta Kappa could ask for some time, and now that a chapter is finally authorized we are very much gratified. Productive scholarship, in which Phi Beta Kappa is most interested, has reached a high level at the University, as evidenced by the various series of monographs describing researches by faculty members, published by the University. Valuable contributions have been made in pure science and in social science.

College Work Improving.

"Undergraduate work in the University has for a number of years strengthened at an even pace with the graduate work and research work, both directly by the quality of the courses and equipment, and indirectly by the permeation of the spirit of the graduate school, in the student body. Graduates of the University have been making noble records in Eastern graduate schools."

The following list of faculty members belong to chapters of Phi Beta Kappa at other institutions: Mrs. Eric W. Allen, W. C. Barnes, E. S. Bates, W. P. Boynton, B. D. Casey, Dan E. Clark, H. A. Clark, R. C. Clark, T. Cloran, Mrs. J. Fayard Coon, M. H. Douglas, J. S. Evans, R. Justin Miller, W. E. Milne, Mary Perkins, W. D. Smith, H. B. Torrey and George Turnbull.

DONALD SMYTHE, EX '19, TO TALK ON PERU MINES

The geology of a country located in the clouds 15,000 feet above sea-level will be the subject of the talk to be given in Condon hall at the rear of the Administration building at 7:30 this evening by Donald D. Smythe, University of Oregon graduate, who has been in Peru for over a year in the employ of a mining incorporation. Mr. Smythe is a member of the 1919 class. He received his M. A. degree from Cornell.

Mr. Smythe, who was associated with Cerro de Pasco Copper company in Peru, is not to give a technical address and students and residents of Eugene who are interested in South America or who like to hear tales of adventure have been invited by the Condon club to be present for the meeting. Ian Campbell, a post graduate student in the department of geology, is president of the club this year and will preside at the open meeting this evening.

The Cerro de Pasco mines are only 60 miles distant from Lima, the capital of Peru, yet in that distance the mountains rise from the plains of Lima, near sea-level, to a height of over 15,000 feet—twice the elevation as that of the Cascade range. Mr. Smythe will probably explain the geology of these mines and the surrounding area.

Mr. Smythe is well known to Eugene people. He married Erma Zimmerman, also a University graduate, who remained in Eugene while her husband was in the Andes.

NEW STRUCTURES MAY BE FINISHED BY JAN. 1

Two Schools Now Crowded For Class Room

Buildings for the school of journalism, the art school, and the gift office are now being rushed to completion. The building for the school of journalism, which calls for a contract price of \$34,000, will be a wing of McClure hall. The art school will be housed in a \$34,000 frame building. Headquarters for the \$10,000,000 gift campaign will be in the wooden structure now being completed behind the Administration building.

It is hoped that these buildings can be occupied by the first of January, said Karl Onthank, secretary to President Campbell, yesterday, but bad weather may delay operations. Every effort to have them for the winter term will be made, he further stated, for both schools are badly congested. Some courses were omitted entirely.

The school of journalism will occupy the entire lower floor of their building. The department of chemistry and psychology will be located on the second floor. The art building will have one special feature, a studio and display room, three-fourths concrete and fireproof. This is to prevent misfortune, such as the one this summer when many valuable art displays and works were burned.

The infirmary, which was housed in the burned structure, is now located in the east end of Friendly hall. A new building for the infirmary is a possibility this year. State funds are not available, but Lamar Toozee, chairman of the gift campaign expects to raise funds immediately which will be used for this purpose.

PRIZES PROMOTE LEMMY'S DRIVE

Unless 2000 Lemon Punch subscribers are found among the students in the near future the magazine is likely to go out of existence says "Doc" Braddock, editor of the University comic magazine.

The drive for 2000 yearly subscribers was started Monday and up to noon yesterday only 400 had been reported. The prize of \$10 offered to the person selling the largest number will evidently go to either Inez King, Don Woodworth, Kenneth Cooper or Margaret Seymour unless other rapid salesmen appear in the race.

"Lemmy" rated fifth among the university and college comic publications of the United States last year, and staff members say it is to be better and bigger than ever this year if the drive goes across.

According to Milton Brown, circulation manager, unless the 2000 subscriptions are taken in by the end of the drive the publication will be suspended and Oregon will lose one of the best comic magazines in the United States. All houses which subscribe 100 per cent are to be given a leather bound volume for the year. Alpha Sigma was the first to rate the volume, with the Delta Zetas second with 100 per cent subscriptions.

Two loving cups which will be given to the men and women who obtain the most subscriptions are now on display at the Co-op.

RUSH WEEK ENDS; 204 ARE PLEDGED BY FRATERNITIES

Some Organizations Take In More Than Ten Members; Men Have 114

KEEN COMPETITION SHOWN

Changes of Residence Made By Several Groups; One House Is Built

The pre-quarter week of rushing by the various fraternities came to a close last night with 114 men and 90 women pledged. Last year at the termination of the second day of registration 95 men had been pledged and the girls' list, given out on the third day of the fall term, had 104 names.

It is the consensus of opinion that never before has there been such a whirlwind of keen competition between the various organizations for the choice of the new students. The intensity of the feeling aroused has been created, it is believed, by the more than ordinary size of the incoming freshman class. No official figures have as yet been issued showing an increase in numbers over last year, but fraternity circles, and serenity too, concede that the season has presented itself as the most promising in the history of the University, and that the organizations are anticipating doing big things this year.

House Locations Change.

An interesting feature which entered into the rushing this year is that several of the fraternities have changed their place of residence since the close of school last June. Phi Delta Theta fraternity is at the present time completing the only new structure on the campus. It is a striking building, four stories in height, with housing capacity for 30 or more. The Kincaid residence where the Phi Delta were located last year is being occupied by Beta Theta Pi, while the Delta Zetas have moved into the old Beta house on Mill street. Alpha Tau Omega is located in a new residence on 13th street which was erected for them last summer. Kappa Theta Chi has purchased a home on Eleventh and Hilyard streets, and has remodeled the interior for comfortable occupation. Alpha Delta Pi has a new house southeast of the campus, and a new local fraternity has been organized to occupy their old home on Alder street. Several of the older houses have been renewed with a coat of paint, and the entire group of fraternities is all ready for a successful year in 1922-23.

Pledges Are Announced.

The pledges who were announced yesterday by the men's organizations are as follows:

Alpha Tau Omega—Robert McKnight and Sam Miller, Eugene; Clayburn Carson, Newberg; Ben Jordan, Enterprise; Richard Adams, Ontario; Joe Peak, Gresham; Ted Mays, Joseph.

Bachelorhood—Ray Mosier, Ambrose Cronin, Fred J. Martin, Jack Rivenburgh, and Charles Norton, Portland; Rex DeLong, Aberdeen, Wn.; Arthur Skinner, Emmett, Idaho.

Beta Theta Pi—Francis Drinker, Clarence Toule, Harry Cofoid, and Waldemar Seton, Jr., Portland; Gale Vinton, McMinnville; Richard Rice, Pendleton; Kenneth Bailey, Los Angeles, Ben Callaway, Corvallis.

Delta Theta Phi—William Haverman, Newberg.

Delta Tau Delta—Mingus Aiken, Ashland; Wade Rutherford, St. Helens; George Mansfield, Medford; Hilton Rose and Herman Blessing, Portland; Killing Schuerman, Ashland; Robert Dodson, Portland; David J. Johnson and Robert E. Williamson, La Grande; James A. Cass, Portland.

Kappa Theta Chi—Mahlon Hoblett, Silverton; John Clappe, Bend; George Stewart, Baker; Robert Orenduff, Portland; Garland Meader, Prairie City; Webster Jones, Vale; Bartlett Kendall, Redmond; Bob Gardner and Jack Wells, Portland; Leland Walker, Creswell; Alfred Meyers, La Grande.

Kappa Sigma—Jack Bliss, Berkeley, Cal.; Ralph Van Waters, Robert Mautz, James Leake, and Walter Pearson, Portland; Ben Smith, Bus Byers, and Charles Snyder, Pendleton; Eugene Bryant, Ashland; Charles Stockwell, Aberdeen, Wn.

Sigma Alpha Epsilon—Howard Hall and George Joseph, Portland; Edwin Hicks, Canyon City; Arnold Southwell, Tacoma, Wn.; Willis DeVaney, Albany; Robert Wells, Eugene.

Sigma Nu—Carl Dahl, Delbert Finnigan and Ira Berstetta, Portland; Gordon Bennett, Astoria.

Sigma Chi—Louis Anderson, North Bend; Morris Zende and Ralph Prag, Portland; Parley Stoddard, Baker; Robert McCabe, Wauna; York Herron, Portland.

(Continued on page three.)
