

**MANY CHURCH PEOPLE MEET HERE THIS WEEK**

**World Fellowship Conference Plans 3-Day Program**

Tuesday, Wednesday and Thursday of this week there will be held on the campus a World Fellowship Conference under the auspices of the Y. M. C. A. The visitors to the conference have come from all parts of the world and are sent to represent different church denominations. They are Miss Agnes Hall, the national secretary of the Council of Episcopal Students, of New York; Miss Florence Taylor, the national traveling student secretary for the Presbyterian church, New York City; Miss Nellie Cole from Trebizond, Turkey, representing the Congregational Board; Mrs. Ecker Burton, Centralia, Wash., of the Baptist church; and Mrs. Charles Bowen, Raymond, Wash., of the Methodist Board, and Mrs. Kellems of Eugene. They will meet the girls of the Christian church.

The program for the conference is as follows:

Tuesday noon there will be a luncheon at the Anchorage at which the representatives of the local student secretaries, the chairman of the World Fellowship committees and the Church Cooperation committee will meet to discuss the program for the following two days. Tuesday afternoon and evening, the representatives will meet the women of the local churches.

Wednesday afternoon, from 4:30 to 6, there will be an international tea and meeting at the bungalow for all the women on the campus. Carrying out the international idea there will be girls in costumes of different nations to serve tea. Later in the program these girls will appear in folk-songs and dances. The theme of the talks will be "How Far Can You See." Each of the guests will give a brief talk, giving a glimpse of the different countries.

Wednesday evening, the six visitors will be the guests of the Church Cooperation committee at a dinner held at the Anchorage.

Thursday morning will be left open for individual interviews with the vis-

itors. Thursday noon there will be a luncheon at the Anchorage to draw up the findings of the conference and to discuss any "follow-up" plans.

**BUNGALOW NEARLY READY**

Gift Campaign Headquarters to Be Occupied by End of Week

The bungalow now under construction back of the administration building as headquarters for the Oregon gift campaign is rapidly nearing completion, according to clerk of construction J. L. Hanna. Before the end of the week he believes that some of the offices in the building will be occupied.

W. K. Newell, manager of the gift campaign, Jack Benefiel, graduate manager, Grace Edgington, alumni secretary, Lamar Tooze, assistant manager of the gift campaign and Dr. Bovard, will have offices in the new structure. A large waiting room will occupy a portion of the building.

The idea of beauty has been carried out in the construction of the building as far as possible. When completed flower boxes will be placed in front of all the windows. The roof of the bungalow has been stained a dark green, and, according to Hanna, will harmonize well with the white sides and light green trimmings on the corners of the structure. Steam heat, generated at the power house, will warm the building.

**Stop for 10 Days**

Stop brushing teeth in ineffective ways  
See what new beauty this new way brings

Nearly all the world over, leading dentists are advising people to brush teeth in a new way. Millions of people now do it every day.

You see the results wherever you look. Teeth now glisten which once were dim. Women have new charm, new beauty. They show teeth when they smile.

This is to urge all other people to try this method now. Your druggist will present you with a ten-day tube. Cease your old methods for a few days and see what this new way does.

**Why teeth look dingy**

Your teeth are coated with a viscous film. You feel it with your tongue. It clings to teeth, enters crevices and stays. Food stains, etc., discolor it. So that film, if left, soon forms the basis of thin dingy coats. Tartar is based on film.

No ordinary tooth paste can effectively combat it. So millions of teeth brushed daily were clouded more or less.

Film also holds food substance which fer-

ments and forms acid. It holds the acid in contact with the teeth to cause decay. Film forms a breeding place for germs. They, with tartar, are the chief cause of pyorrhea.

All these troubles were constantly increasing. Very few escaped. The tooth brush, used in old ways, left much film intact.

**The war on film**

Dental science then began a war on film. After long research, two effective film combatants were discovered. Able authorities amply proved their efficiency. Then they were announced, and since then leading dentists everywhere have been urging their adoption.

One acts to curdle film, one to remove it. And this is done in scientific ways, not by harmful scouring.

A new-type tooth paste was created, based on modern research. It brings other new results now considered essential. It avoids several old mistakes. In this tooth paste are

embodied these two great film combatants. The name of the tooth paste is Pepsodent.

**Two other new effects**

Pepsodent brings two other effects which research proves essential. It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids which cause decay.

It was found that tooth pastes based on soap and chalk brought just opposite effects. That is one reason why they proved so ineffective. They reduced the tooth-protecting agents which Pepsodent increases many fold.

These results mean a new dental era. They mean that your children need not suffer what you suffered from your teeth. They mean that film-coats can be combated.

A few-day test will prove this to you. Make that test in fairness to yourself.

**Some Fifty Nations Use this new way now**

Careful people of some fifty nations now use Pepsodent, largely by dental advice. To millions of women it has brought new charm, new beauty. To men of many races it has brought teeth they love to show. To children it has brought protections which your childhood did not know.

Present the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

What you see and feel will very soon convince you. You will be delighted and amazed. Cut out this coupon so you won't forget, for this test is important.
