

## FORMER STARS OUT FOR FROSH SQUAD

### Basketball Prospects Bright for Yearling Team This Season

With a galaxy of former high school stars from which to choose, and with the heaviest schedule, from the standpoint of the number of games, that an Oregon freshman quintet has ever faced, prospects for a formidable yearling hoop squad this year are especially bright.

For the past two weeks George Bohler, head coach, has spent a hard two hours each afternoon drilling a squad of forty or more hoop aspirants in passing and dribbling the ball and other fundamentals of the game.

This year Coach Bohler has invented a new plan in handling the yearling aspirants. Every hooper who desires to try out for the team must first register with the mentor, after which he is judged according to his individual ability to handle himself on the floor, pass the ball and the like. After the members of the squad have been put through these exercises for a sufficient number of times each player by a process of elimination is graded according to his all-round ability and given a certain rating. Those who have been classified under the ratings of A and B will most likely compose the regular squad during the season.

These men and their former high schools are as follows: Farley, Franklin high, Portland; Carson, Newberg; Stine, Eugene; Toole, James John, Portland; Watson, Jefferson, Portland; Nelson, Pendleton; Gunther, Lincoln, Portland; Murray, Eugene; McGinnis, Marshfield; Stoddard, Baker; Jordan, Enterprise; Mays, Joseph; Tuck, West Cleveland high, Cleveland, Ohio; Gossler, Salem; Cahill, Pendleton; Horn, Pilot Rock; Hobson, Franklin, Portland; Palmer, Washington, Portland; Bryant, Ashland; Leake, Washington, Portland; and Mautz, Washington, Portland. Scriptures, a former Iowa high school star, has not yet registered for the squad but by his performance in the doughnut league is rated among the 22.

The babes will open the season January 12 with a game against Franklin high of Portland. On the succeeding night they will tackle the Washington high school quintet. Games will be scheduled later with nearly all the Portland high schools.

Other basketball quintets with whom the freshmen will tangle are Ashland and Medford high schools, Mt. Angel college, Chemawa, Columbia university, and the O. A. C. rooks. Four games are scheduled with the Aggie babes. There is also a possibility of a contest with the University of Washington frosh.

Heretofore, in the opinion of Bohler, the freshman quintets have had too easy schedules and an effort will be made this year to put an end to such. A large number of the games will be played after the close of the varsity season so that the coach will have a better opportunity to get in closer touch with the future varsity material.

### EVANGELINE FOSTER TEMENID SECRETARY

Joint Meeting Planned With Eastern Star at O. A. C.; Professor Dunn Outlines Ritual

At an important meeting of the Temenids yesterday, Evangeline Foster was elected treasurer. Heretofore the office of secretary and treasurer has been combined but it was found necessary to separate the offices with the growth of the organization during the past term.

Many plans are under way for next term, probably the most important being a joint meeting of the Temenids with the Eastern Star organization at O. A. C. The members at Corvallis have voiced their interest in the organization of a similar club in Eugene and have expressed the desire to meet jointly to work out plans. The two clubs had planned to meet on Saturday of this week, but owing to approaching examinations the meeting has been postponed until the beginning of next term.

Yesterday Professor Dunn outlined a plan for a ritual and gave sugges-

tions for a drill to be given before the Grand Chapter of the Eastern Star in Eugene next June.

The next meeting of the Temenids will be held in Professor Dunn's office, so that members may have the opportunity to view some very beautiful prints of the Vestal Tuccia, and Flavia owned by him. On January 20, the members will be entertained at a dance by the Craftsman club, composed of campus Masons and Shriners.

### JACOBBERGER COACHES LINCOLN

Francis Jacobberger, University of Oregon football and basketball star, has signed a contract to coach the Lincoln high basketball team of Portland for the 1922-1923 season. While at Oregon Jacobberger played varsity basketball and was a two-year letterman in football. He left college in 1920.

Lincoln high enjoys the reputation of turning out strong basketball teams.

### BRUCE J. GIFFIN GIVES PSYCHOLOGICAL TESTS

#### Personality Traits Worked Out at Hawthorne Club Meeting

With Socrates' famous statement "Self-knowledge is the starting point of all true knowledge" as the explanation for his research work, Rev. Bruce J. Giffen, Presbyterian student pastor, presented a series of psychological tests he has collected as a means of classification and measurement of personality traits, at a meeting of the Hawthorne club in the Woman's building last night.

With the motive of working out a test in which the students could honestly obtain some idea of their personality traits, their capacities and limitations, Mr. Giffen stated he had divided his test into four parts, using as a basis Dr. Allport's division, namely: intelligence, temperament with its subdivisions, strong and weak, broad and narrow; self-assertion, and sociality.

As a test of intelligence, Mr. Giffen uses the Otis self-administering tests of mental ability. Although feeling it inadequate, he stated the best he could find as a test for the breadth of emotions is the Pressey X-O test.

"In measuring ability to get on in the world there must be an understanding of what people are thinking that can be judged by facial expressions," stated Mr. Giffen, explaining the third part of facial expressions which the subdivision of his personality test. This part consisted of a series of 18 pictures of a face is asked to classify. The fourth division presented is a questionnaire by which the subject's personal record, education, interests and ambitions, sociality and reactions to certain situations are ascertained.

As a summary the speaker devised a graph in which are plotted interest, judgment, emotional strength and weakness, ascendance and submission, and type of personality of the subject.

### FINAL ATHLETIC EXAMS BEGIN NEXT WEDNESDAY

Physical Education Department Will Conduct Tests for Men to Last for Three Days

Final examinations in physical education for men will be given to both the freshmen and sophomore classes on December 13, 14 and 15. The final grades will be determined by the outcome of these tests. Grades in the freshman classes are based upon the following point scoring system:

Rope climb.....16 points  
High jump.....16 points  
Two-lap run (196 yds.).....18 points  
Posture and daily work.....50 points

Total.....100 points

The examination for the sophomore classes will be given with the following scoring system:

Tumbling.....16 points  
3 forward rolls.....6  
3 backward rolls.....6  
Handspring, snap-up, or handstand (10 sec.).....4  
6-lap run.....18 points  
Proficiency at game.....16 points  
Posture and daily work.....50 points

Total.....100 points

Method of grading: 93 to 100, I; 85 to 92, II; 77 to 84, III; 69 to 76, IV; 60 to 68, V; Below 60, F.

## COLLEGE TRAINING BACKED BY MILLER

### Environment Is Priceless Says Washington Dean

"We're a specialized lot of people in a sense of spiritual activity," said Stephen I. Miller, dean of the school of business administration of the University of Washington at the weekly meeting of men at the Y. M. C. A. hut yesterday afternoon.

The dean advocated that religion undoubtedly sprung from the heart and that the church should be dedicated to the brotherhood of man and not narrowed to the tribe or community.

In defense of college instruction, Dean Miller said that an education creates an environment which is priceless and that the business man is realizing day by day the actual value of the college-educated employee. He particularly stressed the fact that "the five or seven million people who are standing in the shadowland of poverty" are there because of "economic maladjustment" which has passed over them in their lack of educational environment.

Some 60 persons, members of the school of business administration and students majoring in some department of that school, met yesterday noon for a luncheon at the Anchorage, Dean Miller being the principal speaker. The five honor societies of the school of business administration, Alpha Kappa Psi, Phi Theta Kappa, Beta Gamma Sigma, Beta Alpha Psi, and Pan Xenia, were represented.

Dean Miller, who was introduced by Dean Robbins, of the school of business administration, told how the various honor societies could assist the school or be of help in developing leaders. Dean Miller said that there were two types of men—machine-like men

and leaders, the latter being the group which leads the human element,—those who could develop men to give returns to the state that educated them.

During his Anchorage address, Dean Miller, who Wednesday evening installed Pan Xenia, a society for the promotion of foreign trade, on the University campus, touched on the danger of over specialization in the various branches of commerce, pointing out the necessity of being versed in all divisions in order that future eventualities can be faced. It is the duty of honor societies, said Dean Miller, to guard against such an over-specialization and to correlate the principles of the different commerce branches. Dean Miller said that members of honor societies should lead others and should assist students.

In pointing out the importance of contact with the public in the field of business administration, the dean of the Washington school of commerce told how the apprentice theory was given practical application at the University of Washington, many of the students working in Seattle business offices.

In conclusion, Dean Miller congratulated Dean Robbins and the commerce honor organization for the work which has been accomplished by the University school of business administration.

### ANNUAL COLLEGE BALL ARRANGEMENTS MADE

Christmas Affair Will Be Held at Multnomah Hotel, Night of December 26

Plans for the annual Christmas college ball under the auspices of the University of Oregon Women's League, are now nearing completion, according to Georgia Benson, general chairman of the affair.

The ball will be held on December 25, and both ballrooms and the adjoining tea-garden of the Multnomah hotel in Portland have been secured. Bob Gor-

don's two orchestras, of five pieces each, will furnish the music. Everyone home for the holidays is invited. There will be present a large number of "preppers" and students from other college residing or visiting in Portland during the Christmas vacation.

Tickets will be on sale at Spalding's and at Sherman and Clay's in Portland, and there will also be a campus sale with Edwina Richen in charge. Single tickets are 75 cents; couples, \$1.50. The single tickets have been arranged for, so everyone wishing to "stag it" may do so.

Sixty-four patrons and patronesses are on the list, including President and Mrs. P. L. Campbell, Professor and Mrs. DeCon, and many Portland people. Proceeds from the affair will go in part to the Foreign Scholarship fund, which the Women's League is raising.

Preceding the College Ball there will be a number of informal dinners, dinner dances and un-host parties.

### CAESAR FILM TONIGHT

A movie consisting of several reels portraying the life of Julius Caesar will be given by the Latin class of the University high school in the high auditorium this evening at 7:30 o'clock. Mrs. Edith Pattee, head of the foreign language department at the high school, declares that the play is full of interest for those who study the classics.

### "Designing in Masses"

THE new architecture transcends detail and expresses the component solids of the great buildings of today and tomorrow. Gigantic profiles are reared against the sky—true expression of structural facts has now come into its own in architectural design, linking architect and engineer ever more closely together.

Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.
