

MEDICAL SCHOOL IS GROWING FAST

Portland Branch is Equipped Well But Lacks Room for Further Expansion

In his biennial report of the conditions of the University which Judge J. W. Hamilton, president of the Board of Regents, has just issued he includes a summary of the affairs and progress of the University of Oregon medical school at Portland with which few members of the student body on the Eugene campus are familiar. The following points which he brings out indicate the rapid growth of this department of the University, and in order that all those connected with the University may be well informed on all phases of its development the outstanding facts are set forth as follows, according to Judge Hamilton.

"The medical school has properly three functions: first, the quest of additional knowledge through research; second, the annual production of a number of well qualified doctors, equipped with sufficient knowledge and qualified to deliver it to their patients, the people of the state; and, third, the direct ministrations to the people of the state by the care of the needy, sick and crippled, and the dissemination of knowledge regarding the prevention of disease. The medical school is now comparatively well equipped and staffed to function on the research side. With the occupancy of the new building, MacKenzie hall, the school can now accommodate a body of students reasonably large, although scarcely adequate to serve a territory as large as that which it is called upon to serve."

The University of Oregon medical school is the only one west of Denver, Colorado, and North of San Francisco, and has been of inestimable value in the health program of the state, Judge Hamilton believes. It is now possible to receive an entering class of about seventy students, while the number of students who qualify each year is always much larger than this, so until further space can be provided the enrollment will have to be kept at its present number.

"With the development of Multnomah county hospital and the construction of other hospitals in the neighborhood of the medical school on Marquam Heights in Portland, which will be undertaken in the near future, the school will become the nucleus of a great medical center in Portland," the report continues. "Such a medical center would be a great asset to the state not only in promoting the health program for the state and in serving the medical needs of the citizens, but also in adding economic wealth to the state by attracting people from all parts of the country to Portland."

"The legislature of 1921 made the customary appropriation for the maintenance of the school of medicine and an additional appropriation of \$113,289.50 toward a new wing to the medical school building, on condition that an equal amount be raised from private sources for the same purpose. The General Education board shortly after announced a gift of the amount necessary to match the state's appropriation, and appropriated \$50,000 additional for the maintenance of the new building and equipment for the school to be available upon the completion of the building."

HEARTY HELLO

(Continued from page one)

are being invited; so are the newspapermen who are covering the session. Clerks of the ways and means committee and some other committees will be included. A list of at least 175 is expected.

The special will stop at the Franklin boulevard crossing, opposite Villard hall. If the day is stormy, autos will be on hand to carry the guests to the Woman's building. If it is not raining, the visitors will walk to the auditorium for the assembly hour.

After assembly, they will be entertained at one of the luncheons for which Mrs. Edna Datson is famous. It was originally intended to have this luncheon in Hendricks hall, but the number that has accepted the invitation is already greater than Hendricks' capacity, and new plans may have to be made.

Visitors Will Inspect

After luncheon, inspection of the campus with student and faculty guides will begin. Classes will be in session and laboratories at work. Inspection will continue until 3:45, when autos will be waiting to transport the guests down town to the chamber of commerce reception.

The reception will last one hour, after which the special will leave for Salem, each excursionist bearing a lunch-basket filled by Mrs. Datson and staff.

Students are to play an important role during the biennial inspection trip of the State University by members of the 1923 legislature.

Friends Will Meet

A number of those who are well acquainted with senators or representatives will be asked to meet the special, greet the men from the home county, and perhaps walk with them to the assembly room in the Woman's building. Students who are to meet the special will be notified personally. All other students are asked to go

promptly from 10 o'clock classes, at 10:50 o'clock, to the Woman's building. The student body and all others not concerned with meeting and escorting the visitors, are asked to be seated in the gymnasium when the legislature arrives.

Plans to be Laid

Plans that have been arranged for the entertainment of the legislators will be outlined at a meeting in the Villard hall at 7 o'clock tonight. All seniors, officers of the Oregon Knights, members of the student council and all students who have informed the reception committee that they are acquainted with legislators are urged and expected to be present, according to Haddon Rockney, committee chairman. Guides to show the visitors about the campus will be selected from the students who are present at tonight's Villard hall meeting. In all probability the campus routes to be taken will be submitted and no person can serve adequately as a guide who is not at the gathering this evening.

Dean Colin V. Dymont and Chairman Rockney will explain in detail plans for student participation, which is all-important, in the reception and entertainment of the visitors.

A. R. SWEETSER IS AUTHOR

Leaflets Relating to Botany are Collected by Librarian for Student Use

Professor Albert Raddin Sweetser, head of the department of botany of the University of Oregon, is author of a dozen or more leaflets relating to his department. The titles of some are the following: "Dentaria (Spring Beauty), Floral Calendar, Key and Flora—some of the common flowers of Oregon, Relation of leguminous plants to soil fertility; Some Botanical Notes from the Biological Laboratory; Some Botanical Notes on the Hydrographic Survey of the McKenzie river; Some Oregon Wild Flowers; Some Trees and Shrubs of Oregon; Toadstool Talks; Wild Hollyhock or Mallow Family; List and description of Birds of Oregon, and a Biennial Report.

These leaflets and bulletins of Professor Sweetser's are kept on file in upper room of the library with the rest of the special Oregon Collection. They are helping to build up the invaluable records of life and products and native resources of Oregon.

WRITING GAME DRAWS

(Continued from page one.)

has to the students, a few statistics will be enumerated here from the results of the Fall term last year: Ninety-three students were employed last term in regular jobs of steady employment. The salaries from these jobs ranged from \$12 to \$60, making the sum of \$9,428 for regular jobs during the term. Two hundred men accepted odd jobs and the sum of \$1,500 was made by the entire number. The grand total of the regular and odd jobs amounted to \$10,928, a sum of no mean importance when it comes to the maintaining of students who are depending upon these jobs for their existence in the University.

Last year, letters were sent out by the employment committee to many of the citizens of Eugene thanking them for their cooperation in helping the students who desired positions. In these messages a plea was also extended to continue the good work. This year more letters are now being designed and will be sent out with the same object in view. Indications are that there will be a falling off of about \$3000 from the total salaries this term due to the decrease in business in general and the committee is doing all it can to replenish the opportunities for obtaining positions.

CASTLE PRICES REDUCED

The management of the Castle theatre is announcing a permanent policy, under which the patrons of that newly equipped theatre are to be assured of the highest class of pictorial presentations at a nonvariant scale of admission.

Heretofore, the special productions shown at the Castle have, due to the stipulations made by the producing companies, been presented at an advanced rate of admission. Under the new contracts entered into by the management, it now becomes possible to show all future feature pictures at a standard price regardless of the cost and magnitude of the production. Under this new policy the patrons of the Castle will have the opportunity of seeing the pick of the motion picture industry, at the lowest prices Eugene has ever known.

"IF YOU BELIEVE IT, IT'S SO"

Aside from its general excellence, special interest attaches itself to "If You Believe It, It's So." Thomas Meighan's picture, which is today's feature of "Replay Week" at the Rex. Owing to the fact that it had been selected by the late George Loane Tuskner to succeed, "The Miracle Man." The wisdom of such a selection, is evident from the nature of the story, which deals with a city crook who seeks and finds reformation in the open country spaces. The story is convincing and highly entertaining. The star is superb, giving one of the greatest characterizations of his career.

COMMERCE ROOF LEAKS

Leaks in the roof of the Commerce building necessitated the services of three men Saturday to bail water from the roof until the rents were mended. Everything is in good shape again and those inside state that there is now no danger of their having to move for fear of being deluged.

SCIENTIFIC STUDY MADE OF RELIGION

Clash Between Two, Fallacy Declares Instructor of New Campus Course

To get people to see that religion can be studied and analyzed the same as any science is the aim of Rev. W. H. L. Marshall, who is starting a new course on the Oregon campus and who will instruct those interested in religion and its phases of practicability. His course is "Outlines of the Philosophy of Religion."

Despite the fact that this is a non-credit course, ten young people have already enrolled and according to the sentiment expressed by Mr. Marshall, others will join the class as soon as conflicts are adjusted. The course will be given every Tuesday at 5 o'clock and Thursday in room 101, Oregon building.

The first phases of the course will be enumerated under the topic of "What is Religion?" The early objects of worship, the study of a number of great religions such as Mohammedanism and Confucianism, the revelations of God as the proof of his existence and other interesting topics for discussion are scheduled for this class.

"There is no clash between science and religion," said Marshall. He expressed the idea that religion is always in the mind of the thinking person, and that people are interested in religion. Therefore, it is important that a better understanding be had of the subject.

The length of this course will depend upon the speed which it will take to accomplish the work required in the outline that Mr. Marshall has carefully constructed for students in this course. If the course is proved a success, then it is believed that the University will recognize it as a study worthy of giving credit and will establish a school of Religion on the campus.

Y. W. CANDY SALE NETS \$30

The Y. W. C. A. bungalow reports that the proceeds from the candy sale at the "Raggy Man" amounted to about thirty dollars. This money is to go towards a benefit for the Astoria Y. W. C. A. Their building was destroyed by the fire as well as most of their furnishings. Their income for the year has also been sadly diminished because they depended largely upon subscriptions from the Astoria citizens, who now find it hard to contribute.

stroyed by the fire as well as most of their furnishings. Their income for the year has also been sadly diminished because they depended largely upon subscriptions from the Astoria citizens, who now find it hard to contribute.

DORRIS SIKES ON CAMPUS

Former Emerald News Editor on Cottage Grove Paper

Dorris Sikes, a former student in the school of journalism here and one of last year's daily news editors on the Emerald staff, spent Saturday and Sunday on the campus.

Miss Sikes is at present employed on the Cottage Grove Sentinel. Last summer while Elbert Bede, editor of the paper, was away on a trip to the East, she was in charge of the paper for several weeks.

Miss Sikes is not a graduate of the University, but expects to return next year to finish her course. She is a member of Theta Sigma Phi, and of Zeta Kappa Psi, and was prominent in campus activities.

W. A. A. MASS MEETING TODAY

Revisions to the point system adopted by the Womens' Athletic Athletic association at its last meeting of the fall term will be presented to a mass meeting of the association to be held at 5 p. m. today in the Woman's League rooms of the Woman's building, and a final vote will be taken.

Changes in the constitution will also be brought up for discussion and vote.

Business Methods

Do you keep your notes and papers in the business form—have you an accurate record of your work?

Proper supplies will assist you in this; we have a complete stock of office supplies that are just the things for students—work organizers, files, brief, cases, loose leaf note books, ect.

Successors to Schwarzschild's Book Store

Koke Tiffany Co.

You should be the owner of an

Electro Magnecoil Blanket

WHAT THE MAGNECOIL IS—

The Magnecoil is a modern and strictly scientific method for the treatment of acute and chronic diseases, a blanket in which a force akin to the principle of life is involved; this blanket is built on strictly scientific principles, it is not a heating device, IT GENERATES MAGNETISM, a force the value of which is now being widely demonstrated in the great Laboratories of the world.

If you are suffering with rheumatism, brights disease, diabetes, asthma, high blood pressure, eczema, erysipelas, menstrual trouble, nervousness, liver, kidney or bladder trouble, or any combination of these maladies, then treat with the Electro Magnecoil; the Magnecoil treatments will purify your system from within, out; it has cured where all others have failed, for colds, flu, and grip it has no equal. Don't worry about your troubles, but sweat them out with the Electro Magnecoil blanket. It will pay you to investigate; every home should have one of the Magnecoil Blankets. Free demonstrations. A few free treatments at your home. You are under no obligations whatever. All we ask of you is to give this nature's treatment a trial—it costs you nothing.
