

FIGURES INDICATE ENROLLMENT DATA

Business Administration in Lead With 377, English Next With 233

Of the 2060 students on the campus this term, the school of business administration has the largest number of majors, according to the statistics from the registrar's office. There are 326 men majoring in this school and 51 women, making a total of 377 students.

Women are in prominence in the language departments. One man is majoring in romance languages. One man is majoring in German, and the Latin department must be an object of aversion since no men are specializing in it.

The departments of botany and geology have an opposite enrollment. There are 27 women and 3 men majoring in botany and 37 men and 2 women in geology.

The following statistics show the enrollment in all the schools and departments:

MEDICAL BOOKS RECEIVED

Library Gets Volume of Works on all Present Use Medicines

"Materia Medica for Nurses" by J. E. Groat, a volume recently added to the library is one of a number of materia medica books. These books contain for the most part information that is scarcely known outside of the medical profession. They tell the origin, sources, use, preparation and amounts to be given, of all the medicines in use at the present time.

The origin and sources of medicines read like tales of wizards brews or the ingredients of a witch's hell-broth.

Here is a short list of a few substances used: Pepsin from stomach of the hog, Bark from off wild cherry's log, Lime and iron and mustard oil, Fat fresh plucked from ocean whale, Lily-of valley root and stalk, Powdered down as dry as chalk, Boiled down fish-bone gelatin, Honey, lead, and turpentine, Secretion of the wild musk deer, Young calves stomach juice, so clear, Juice of poppies, acid wine, Seaweed, ashes, iodine, Ginger, petrolatum, gas, With Spanish beetles dried en masse.

COLD EPIDEMIC ABATES

Students Asked to Follow Directions Given by Health Service

The epidemic of colds has somewhat abated at present, according to reports from the University Health Service yesterday. This week the number of students calling at the dispensary for treatment has been light, in comparison with last week. However, students are urged to follow the directions of the health staff implicitly, if the epidemic is to be wiped out.

Last Wednesday the climax was reached when 108 students reported for treatment of colds. Friday there were 86, and the number has rapidly decreased with the change in weather. On Saturday the dispensary was open in the morning, and on Sunday from ten until twelve a number of students

took advantage of aid offered, and came to have throats and noses treated. Advice from Dean Fox's office to all students is to heed the instructions of the health department in every way, and not become careless at the first signs of recovery. If students continue to take care, there is no doubt that colds can be checked, according to word from the dispensary office.

OREGON PROFESSORS TO LECTURE IN PORTLAND

Geology, Science and Evolution to be Discussed

With the object of enlightening the general public, especially those interested in Geology and Science, Drs. Hodge, Packard, and Smith of the geology department are giving a series of lectures in Portland beginning Monday, February 5.

These talks will be under the auspices of the Educational committee of the Mazama club, and the University of Oregon Portland Center. They are to cover a period of three months with one two-hour session a week.

"Science and geology are rather popular subjects at present," said Dr. Warren D. Smith yesterday, "and we hope to give people a birds-eye view of what geology means in present day life, where a man is going when he dies, and the light that geology throws on the whole evolution of mankind."

The following is a list of the subjects for the series of lectures:

- Feb. 2. (a) Geology and Our Civilization
(b) Outstanding Geological Problems
Feb. 9. The Earth in the Making...
Feb. 16. The Dawn of Life...Packard
Feb. 23. Volcanoes and Earthquakes
Mar. 2. The Origin, Growth and Death of Mountains...Hodge
Mar. 9. The Reptilian Horde...Packard
Mar. 16. The Rise and Fall of the Ammonites, Their Contribution to the Evidence of Evolution...Smith
Mar. 23. Coal and Iron in Nature and Civilization...Packard
Mar. 30. The Rise of Mammals...Hodge
April 6. Gold, Its Geologic Occurrence, Extraction and Economic Role...Smith
April 13. The Story of Oil...Hodge
April 20. Man's Place in Geologic History...Packard

SPECIAL CARRYING

(Continued from page one.)

The party will proceed on foot directly in the Woman's building for the brief assembly of welcome. The assembly will provide their only opportunity to see the students together. In the afternoon the distribution of students among classrooms and library will prevent any mass grouping. Except for about 20 minutes in classes generally, there is to be no interruption of scholastic routine on account of the visit.

From assembly the guests will go to Hendricks for luncheon. About 20 faculty members and a few town-folk will accompany them. The dining rooms at Hendricks being comparatively small, and the list of guests large, only the necessary committeemen and a few others of the faculty can be accommodated, and very few or no students.

Few Addresses Planned

Details of the luncheon program have not been given out. There will be some musical entertainment, but no stunts. There will be a few talks, mostly or wholly by legislators.

About 2 p. m., the inspection of buildings will be begun. At 3:45, autos will be, waiting on Thirteenth avenue, in front of administration, to take the party to the chamber of commerce rooms, where a downtown reception will be given. The special will leave about 5:15. Luncheon will be provided to eat on the train.

LEAGUE WILL GIVE REVUE

Affair Will be Held for Benefit of Portland Children's Clinic

A parody on the novels of today featuring heroines as "Sirens of the South Seas, Fashionable Ladies of the Effete East, Filippant Flappers, Jazz-Mad Youth, Slow-moving Main Streeters, Mystifying Sleuths and Genuine Buxom Maidens of the Golden West from your favorite books" are all cast in the musical revue "Heroines" to be presented by the Junior League of Portland. Students planning on spending the week-end in Portland are very enthusiastic over the affair which is being given for the benefit of the Junior League's Children's Clinic.

The cast includes one hundred young women and fifty young men and is a play full of clever lines, catchy music, gorgeous costumes, and lovely dancers. Mail orders are being received now at the theatre, and as it is such a big affair it is urgent that students desiring to go attend to the matter of reservations early.

SCORING SYSTEM USED IN RESTRICTIVE WORK

Defects May be Corrected by Exercise Says Scott

The scoring system which has hitherto been applied to the regular education and physical ability classes, is now also being used for determining the grades of restricted exercise students, according to Harry A. Scott, director of the physical education department. This will, as much as possible, says Mr. Scott, eliminate the personal element in determining grades for the term. A greater stress is laid upon the student's attitude towards his self-correction work, than on any other one attribute in the compilation of grade-points.

In regard to the work of the physical education department in the restricted or corrective work, Mr. Scott stated the following:

"Every man entering the University is required to take a thorough physical examination before he is permitted to engage in any physical activity. If, during this examination, he is found to have some physical or organic defect, he is immediately assigned to the Restricted Exercise group. This does not necessarily mean that he is an invalid incapable of enjoying physical exercise. He is thus classified for one or both of the two following reasons: there is a possibility of correcting his type of defect by proper, supervised exercise; or there is a possibility of severe injury to him if he is permitted to take part in a normal vigorous physical education program. This is true because certain types of physical or organic defects call for modified physical exercise."

"While it is true," continued Mr. Scott, "that many types of defects may be corrected or arrested by means of exercise, it must be well understood that satisfactory results come only after long and faithful application of the corrective program. Such programs are necessarily individual in nature, and the benefits gained are directly in proportion to the attitude and amount of energy expended by the individual himself. The three meetings of the restricted exercise class a week is not enough time in which to work great changes. The prescribed exercises should be practiced faithfully every day until results are obtained. Time in the regular class should be spent in learning some suitable recreative activity which may be played throughout the greater part of life.

GIRL'S GLEE CLUB WILL

(Continued from page one.)

beautiful and unusual, and are intermingled with the chorus parts, which are heavy and difficult and will show the ability of the club perhaps more than any other part of the program. The rest of the program will be made up of songs of a lighter nature, with some solos by Ruth Akers, Florence Garrett, and probably Bernice Altstock.

Virginia Owens, a pupil of Mr. Evans, and a freshman in the school of music, will accompany the club, and give a group of piano compositions. Miss Owens studied music in New York before entering the University, and is a delightful and accomplished pianist.

During spring vacation the club will visit several southern Oregon cities, entertaining the inhabitants with Oregon songs, and Oregon spirit. The first plans were to take a trip north through Puget Sound to Seattle, but the executive council ruling permitting only one organization to leave the state each year caused a change in their plans, and the Men's Glee club was given the preference this year.

Ted Gillenwaters, manager of the club, has lately returned from an advance trip through the valley, and reports everybody as being favorable, enthusiastic, and eager to have the club this year, and good support has been promised.

The entire trip will be made in one of the large Greyhound buses which have been chartered from the Interurban Motor company, said Gillenwaters. "In this way, we will not have to travel according to train schedule, but will be able to arrange our traveling time to suit ourselves. We also save considerable money by traveling this way," he said.

"In all cities where we expect to entertain, I was fortunate in meeting prom-

inent Oregon alumni. They were very eager to have the club appear in southern Oregon points, and promised to talk it up, and give it good support." They also informed Gillenwaters that the girls would be taken care of and entertained royally while on the trip.

The club will leave at the beginning of spring vacation, and will be kept very busy. Arrangements have been made for the girls to appear in six towns, Yoncalla, Oakland, Roseburg, Grants Pass, Medford and Ashland. "The success of the southern Oregon tour will depend greatly upon the support given the club by the student body at the home concert to be given February 16," said Gillenwaters. "The personnel of the club has been very slightly changed. Most of the old members are back this year, and few new ones have been taken in."

Mr. Evans, who will direct the club, is well known on the campus, for his ability as a musician, and as director of the Men's and Women's Glee clubs. Mr. Evans studied extensively in the East and abroad, and since coming to the school of music he has done much by way of furthering interest in music among the students. He is also responsible for the complete organization of the University choir, which furnishes music for the monthly University vesper services.

LEGISLATURE ASKED

(Continued from page one.)

versity property is an important one. In accordance with the state policy, the regents of the University have not purchased commercial insurance on the University. Their confidence in the value of state insurance has been reinforced in the past by the prompt action of the Emergency Board. Should the legislature fail to make good the fire loss incurred last summer, the regents will be forced to conclude that the state insurance cannot be relied upon and will be compelled to take

immediate steps to protect the University by the purchase of commercial insurance. The cost of adequate insurance upon the value of University buildings, libraries, scientific apparatus and other property would be exceedingly heavy. There is no margin in the University budget to provide for this expenditure. It would seem to be greatly to the interest of the state that confidence in the State insurance be not impaired."

HOLT FIGHTS IN PICTURE

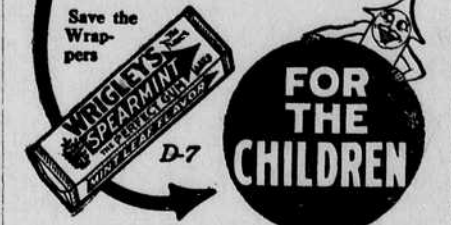

There are three great fistie battles in Jack Holt's Paramount picture, which is today's feature of Replay week now at the Rex. "While Satan Sleeps," no shadow-sparning, but the regular hit-and-no-miss stuff

After Every Meal WRIGLEY'S

Top off each meal with a bit of sweet in the form of WRIGLEY'S.

It satisfies the sweet tooth and aids digestion.

Pleasure and benefit combined.

Which? SOME say the derby. Others swear by the "softie." Either is correct, according to which is more becoming. What say you? Drop in and look 'em over.
