How Long Can They Joke?

Jokes at the expense of the college graduate starting out in life are passed. They are no longer justified because the college man of recent times have been initiated into some of the mysteries of business life. The student competition in life insurance salesmanship which is being carried on under the school of business administration this week is an example. Those who compete in a contest of this nature can hardly be considered as beginners in the art of selling insurance.

In former days when Greek and mathematics formed the major part of the curriculum, it was true that graduates often knew little of business methods. Students had the cultural background, and probably outstripped their rivals in the long run. The present tendency is toward the more practical. There is an effort to combine the two ideas, and graduates take their places in society with less adjustment.

There are other examples. Every summer students work at a variety of occupations, which prepare them for their careers. Graduation is getting to be more of a milestone than a stepping-off place. It is merely the change in scenery caused by the turn of the road. All of which goes to make the outside world realize the value of a college education.

Most Important Assembly of Year

The most radical change in student government since the adoption of the new constitution will be proposed at the regular meeting of the A. S. U. O. this morning. The executive council organization is to be investigated. The activities committees are not altogether successful, it is alleged. It will be made easier to win a track letter. No athlete is to be allowed a blanket unless he graduates. The Woman's Athletic association has recommended a change in the method of granting sweaters to women. Another proposal is to make the yelling a member of the student council. These amendments to the constitution will be proposed at the assembly this morning and will be voted on within two weeks.

If you are to consider these amendments intelligently it will be necessary for you to go to assembly this morning. It is the most important of the year. Don't miss it. It is in Villard hall.

Encouraging Local Groups

As the University grows there must be some means of enlarging living facilities. Some colleges provide for it by building new dormitories at frequent periods. At the University of Washington there has been a wholesale policy of organization of local fraternities by the student body. Although a wholesale policy is not necessary here, it would be well to point out that there is a committee which is glad to give advice to any group considering organization.

European Student Movements

Three students from Europe will be visitors on the campus this week-end in an effort to excite interest in the "youth movement" of Europe. There will not be many Oregon students who will be able to discuss intelligently the problems of Europe in education with these visitors. Student discussions and movements common to European universities are the exception, rather than the rule, in American institutions.

Announcement comes that student activities are being encouraged among those enrolled in the extension division at the Portland center. Wonder how long it will be before they need a point system.

"Rules are to be published."—Emerald headline. We suggest that the Emerald pressman distribute a few copies on South Alder street.

ARCHITECTS TO MEET SCRIBES IN HOOP GAME

Journalists Confident After Defeating Geologists

The journalist basketball team, full of confidence as a result of their victory over the geologists last week, tangle with the architects this afternoon at five o'clock in a contest that promises to have all the excitements of a Pendleton Round-Up.

The architects have a picked outfit including Luke Jensen, Dick Sundeleaf, Sid Hayslip and others who have the reputation of slinging a mean basket. Their lineup runs strongly to track men, so it appears that they intend to make a swift getaway if they are being beaten.

The journalists enter the fray with the same galaxy of stars that defeated the geologists after three five-minute over-time periods had been played, by the score of 21 to 19, with Yoeul, Fraser, Piper, Anderson, Hoyt and Akers in the lineup.

A special rosters section is being built in the gymnasium by the hardy architects in a last minute attempt to seat the large crowd of backers which they claim will appear to cheer them. They claim this extra work has sapped the strength of the members of the team though, this being one of the alibis they have advanced in order to secure a return game if they are by chance defeated.

The geologists have already entered a challenge for a return game from the victorious journalists, but until they are able to show a substantial string of victories to prove they are able to play a better game, it will probably not be granted.

The faculty succeeded in winning from the journalists by a close score in an early season game, by the trick of threatening the students with a flock of flunks if they defeated their heavier opponents. Under the conditions the newspapermen were at a great disadvantage and allowed the instructors to take the little mix, but are planning on revenge sometime in the near future, as after a careful canvass they have discovered that none of them are taking subjects from the foxy facultyists who are on the team.

KAPPAS DEFEAT HENDRICKS

Susan Campbell Will Meet Winners to Decide Do-Nut League Champions

The Kappa Kappa Gamma swimmers won the championship of league I last night by defeating the Hendricks hall team 35 to 32. The winners of the first league will contest for the do-nut championship Friday at 5 o'clock when they meet the Susan Campbell team, the champions of league 2. Both these teams have had a very successful season, outswimming each of the four teams they have met.

The competing teams in last night's meet were quite evenly matched, and the points ran close during the meet. Anna De Witt of the Hendricks team was the high point winner of the meet with 13 points to her credit. Marion Nicolai, Joy Johnson, Kappa, and Isabel Stuart, Hendricks, tied for second place, each earning 11 points. The Kappa team was composed of Marion Nicolai, Joy Johnson, Gretchen Clemens, and Neva Service. Hendricks hall swimmers were Anna De Witt, Isabel Stuart, Yvonne Smith, Augusta De Witt, and Harriet Veazie.

AMERICANIZATION TO BE TAUGHT IN SUMMER

Extension Division Secures Eastern Authority to Conduct Course at Portland Center Sessions

The University of Oregon will cooperate with the leaders of the Portland Americanization Council in offering a summer course in connection with the Portland summer session.

Ralph Boas, who is in charge of Americanization work in Springfield, Mass., will be in Portland to direct a course in "American Ideals," and one on "Americanization Methods." Ben H. Williams, of the University of Pennsylvania, will also offer a course in American government in connection with Mr. Boas' work.

Field work will also be undertaken directed from the office of the Portland Americanization council. The council itself is a federation of organizations interested in Americanization work. Among these are patriotic organizations, schools, teachers' associations, churches, Reed College, and the Oregon Federation of Women's Clubs.

OREGON MEN AT HARVARD

Spangler and Winnard Taking Work in Medical School

Paul Spangler, a graduate from the University in 1918, now in the Harvard medical school, has just won a scholarship. He is a senior there now and has won a scholarship during each of his four years.

Norton Winnard, a member of the class of 1922, has written that he has passed his mid-year examinations, receiving honor grades. He says that he is in love with Harvard. He adds also, in praise of his alma mater, that he has found that the preparation he received in the Oregon pre-med course is as good as any that could be had anywhere. He speaks especially of the foundation scholarships he received in chemistry.

CAMPUS BULLETIN

Notices will be printed in this column for two issues only. Copy must be in this office by 4:30 on the day before it is to be published and must be limited to 25 words.

Life Saving Class—Meets tonight at 7:15.

Girls Volley Ball—Practice tonight at 5 o'clock.

Phi Mu Alpha—Luncheon Thursday noon, The Anchorage.

Christian Science Society—Regular meeting tonight at 7:15, Oregon hall.

Oregon Knights—Meeting tonight at 7:30. Election of Chancellor of the Exchequer.

Pro and Con—Meeting tonight at Commerce building at 7:30. Open discussion on income tax.

Hammer and Coffin—Formal meeting today noon at Campa Shoppe.

Dial—Meeting tonight at 7:30.

State Aid Men—Reports must be filed on or before Monday, March 4, at window 15, Administration building.

Honor Societies—Grades for fall term must be turned in to the office of the registrar if a complete list is to be printed.

Aspirants for Pitching Staff—Candidates for varsity baseball team to meet with Coach Bohler at men's gymnasium today at 4 o'clock.

Point System Headquarters—Office hours will be from 12:30 until 1:30 on Mondays, Wednesdays, and Fridays in the Woman's building. Those wishing to look up the number of points in activities carried by anyone, call between these hours.

All Girls—Those wishing to get milk and crackers at the women's gym may do so now at Mrs. Hempy's desk. Announcement was made two weeks ago that the sale of these things was being conducted, but those in charge had to postpone the sale until next week.

SALESMANSHIP CONTEST WILL BE ABILITY TEST

Office Boy and Prospective Buyer Will Present Difficulties to Student Agents

The salesmanship contest to be put on tonight at the Eugene chamber of commerce by members of the school of business administration will not be an uninteresting proceeding, according to C. L. Kelly of the school of business administration, who is in charge. The contestants will enter the office of a prospective insurance buyer. Before he is admitted to the presence of the owner of the office he must be able to get by the office boy in charge. This in itself may require a good bit of persuasion, as J. H. "Bones" Skelton will represent the model office boy, and will make it his business to find out what the salesman wants and what his references are. It is likely that if the contestant succeeds in getting past "Bones" the encounter with the buyer will be easy.

Once in the presence of the prospective policy buyer the agent will exert all his persuasive powers to convince him just why he should buy a policy in Oregon Life, or which ever company he is selling for. There are six contestants, Betty Pride, Wesley Frater, Darle Seymour, Harold Bonebrake, Eugene Walters and Ned Strahorn.

The judges who will decide who is to receive the cash prizes of \$30 and \$20 respectively are Reverend Frederick Jennings, rector of the Episcopal church, A. A. Rogers of the First National bank, and A. R. Gray of Gray's Cash and Carry grocery store.

WANDERLUST HAS HOLD ON MORE THAN FIFTY

(Continued from page one.)

other groups were cited by Lane. One was that of an Englishman named Ralph Stock who circled the globe in a 46 foot single mast boat under conditions somewhat similar to the trip as proposed by Lane. By stopping and working whenever it is necessary the party will be able to keep the finances of the organization up.

In selecting his crew it is the idea of Lane to take those who have some knowledge of geology, anthropology, photography and journalism. Lane himself has had experience in such traveling, having spent a great deal of his time in the last few years visiting many foreign countries in his first trip around the world. He has lived in New Zealand for eight months.

The party will start, according to Lane, sometime next fall if arrangements can be made. It is the plan to be in the South Sea Islands and other points in the southern hemisphere during the time when it is summer there.

THE GIRL AND THE TRAMP

The Heilig theater will present, at popular prices, on Monday, March 5, the picturesque laughing show "The Girl and the Tramp," a four-act comedy drama which is making good all along the line.

All the ingredients necessary to successful comedy are contained in this amusing play. The author has taken two characters, a girl and a tramp, and has built around them a most amusing series of situations. The plot is one easily understood, the comedy is fast and furious, and one laugh after another is the result.

WOMEN'S ASSOCIATION OPEN TO OREGON GRADS

International Federation Has Well Known Members

Senior women in the University have an opportunity of joining the American Association of University Women, upon graduation, composed of alumnae of 130 colleges of the United States. This association is one of the 17 national college associations represented in the International Federation of University Women. College women from these 17 countries meet for an International conference once in two years and discuss the problems of education in their various countries.

This association has branches in many cities. For the college girl who is planning to take up work in a new city it offers an opportunity to make new friends.

Some of the most prominent and best known women in the country are members and are coming to regard the National club house at Washington as the place for meeting other college women for conferences upon all possible subjects. Some of the nationally known women who are members are Mrs. Herbert Hoover, Mrs. Calvin Coolidge, Annette Adams, First U. S. Asst. Attorney General of the United States, Judge Florence Allen, first woman judge; Jane Addams of Hull House; Florence Wilson, librarian of the League of Nations at Geneva.

The national headquarters and club house of this organization is located at 1634 Eye street, Washington, D. C.

"In Terms of the Colossal"

THE co-ordination of commercial strength, architectural vision and engineering skill which created this titanic quadruple office building represents the motive and creative force which has turned the eyes of the world toward this type of American architecture.

This, the largest office building in the world, possesses fundamentally magnificent largeness in its conception, and a clean-cut directness in its execution which place it among the most significant of American buildings.

With such existing structural achievements no architectural future is impossible, no project too vast or too complex to come readily to our imagination.

Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.
