UNIVERSITY OF OREGON, EUGENE, FRIDAY, FEBRUARY 1, 1924

NUMBER 85

## PLANS MODIFIED BY DIRECTORATE

### Week-end Committees Are Proceeding With Work Following Campus Vote

### MAIN EVENTS ARE KEPT

### High School Guests Will be Rigidly Excluded; Name Change Considered

Now that the student-body has expressed itself as favoring a Junior Week-end without guests, and the student council has upheld that opinion, the Junior Week-end committee is getting to work again to make the event as effective as possible. The committees delayed their work for a week or two while awaiting the decision of the council.

"The present plan," says Ed Tapfer, general chairman, "is to keep the events of the vod-vil, the canoe fete and the junior prom. There will be no high school track meet, and in all probability no campus luncheon. The Junior Week-end committee will co-operate in seeing that no guests are wished on the houses. The elimination of the high school athletic meet will be an aid in this line, as it drew a large number of preppers last year."

### Opinions Are Desired

"The campus luncheon has been regarded by many as an unnecessary evil and if there are no guests it will have even less excuse for existing," says Tapfer. "If the students have other opinions on the subject, the committee will appreciate their comments."

The publicity committee will start at once to publish the action of the student body throughout the state, so that the houses may meet no embarrassment in writing to their guests and telling them that the old plan has been abolished.

The directorate is seriously considering the proposition of changing the name of Junior Week-end in order to make the new plan a distinctive affair and to obviate any hard feeling on the part of the high school students in the state. No decision has been reached on this plan. The committee declares itself ready to put over as good a Junior Week-end as Oregon has ever had, for the enjoyment of the student body.

### Prom Plans Enough

There will be enough performances of the vod-vil so that everyone can see it. For the canoe fete sufficient bleachers will be placed along the race to take care of the entire crowd. The prom committees are meeting at short intervals and report that clever ideas have been adopted, though their nature is being held secret. The program, decoration, feature, floor, refreshments and patron committees are working at the present time.

The canoe fete will be conducted on the same plan as before, men's

## Frolicking Frosh Hopeful Hosts at Glad Glee Tonight

Tonight we will hear the shriek of the green cappers. Tonight we will gleefully gambol down to the green gaffuzzle and glide glibly over the gay boards.

The order of the Green has promised to have the maple spots and deker out in a new coat of hair tonic and resin. Decorations for the big palace of scamper will be in place by the time the all-University hop-Scotch swings into action. The decorations are secret, so we can't tell you about 'em, because we don't know ourselves.

But we might let you in on some of it at that. They're going to be what you think they ain't.

Yes, it's going to be a gay brawl, the best the green will sling this year. It'll be well worth the price of admission, even if you have to haul her there in a taxi. We're in the temperate zone, but still you can get dates, so if you haven't done so, rattle the receiver and ring her up for the glide given by the green tonight.

## TWO ANTIQUE CHAIRS LOANED TO MUSEUM

### Exhibition Will Continue Until February 8

Two European antique chairs have been loaned by Mrs. B. L. Bogart, of Eugene, to the exhibition of arts and crafts in the little museum in the arts building. The textiles, which come from the Portland Arts and Crafts Society, have been on display during the past week, and now the chairs may be seen with them.

The small chair, which Mrs. Bogart brought with her from Italy, is of walnut, upholstered in gorgeous red Venetian brocade. It was obtained on her last year's trip abroad. It is an antique, possibly of the last of the sixteenth or the first of the seventeenth century period.

The larger chair is French design, made by Lionel C. Algoran, a friend of Mrs. Bogart's. The upholstery, done in petit point of quaint birds in browns, greens, and soft blues, with touches of red and yellow, was embroidered by Mrs. Bogart herself.

The entire exhibit will last until February 8. The paintings by Emil Jacques, Belgian painter, will be on display in the museum until February 3, when a collection of wood block prints will arrive to be hung. The paintings will then be sent on to Portland.

## HEATING PLANT STILL USING SLAB WOOD

Due to the lack of a part of the motor, the University heating plant is still using slab wood, instead of the log fuel, which they intend to use later. The machinery is expected to be repaired, and according to H. M. Fisher, superintendent of buildings and grounds, can be installed within the space of two or three hours. Two of the three boilers have been in use since Christmas, and the third will be ready soon.

## STAGE ALL SET FOR FROSH GLEE

### Big Social Affair of Year Will be Staged at 8:30 This Evening Down Town

### MOTIF IS KEPT SECRET

### Decorations and Programs to be New and Original, Those in Charge Promise

The Frosh glee, biggest and most important event for the entire student body during the winter term, will be held tonight, beginning at 8:30 in the armory. Members of every class in the University will be guests of the freshmen class.

Preparations for tonight's dance, under the management of Bob Love, have been actively under way for the three weeks past. Although the nature of the decorations has been kept secret by the committee, the general motif is said to be appropriate for occasion. Carpenters, architects, and painters have been called into service to make the hall into a new place. The features and programs will be original and novel.

### Music to be Better

"The programs will be in a unique shape which will make them valuable moments of an enjoyable evening," says Chairman Love, "and the special placing of the orchestra promises to give greater volume to the music than usual." The Mid Night Sons will furnish the music.

The checkroom facilities at the armory have been increased in order to adequately handle the large crowd that is expected to attend, and there will be punch, of the right kind to mitigate the thirst of the dancers.

### Committee is Listed

Freshmen men are supposed to take only freshmen women to the glee, according to tradition, says Dean John Straub, although freshmen women may go with upperclassmen if they choose.

The committee chairmen under Bob Love have spent much time, effort, talent, and money in order to insure the glee being a success. They are: decorations, James Forestel; features, Carmalita Hadley; programs, Morton Coke; patrons and patronesses, Holt Slaughter; music, Billy O'Byrant; and refreshments, Frances Strange.

## DEAN WRITES ARTICLE

### Discussion of Motion Pictures in Demand by Libraries

"Several eastern libraries have sent requests to the University extension division for an article which recently appeared in the visual instruction number of the extension Monitor, written by Earl Kilpatrick, dean of extension division," said Alfred Powers, who is connected with that department.

The article, which is titled "Motion Pictures in Education," is an original discussion of motion pictures by Mr. Kilpatrick, and was used to some extent by him in the Portland summer session of the University as well as over the radio before being printed in the Monitor, Mr. Powers said.

## FIRST TEAM WINS GAME

### Easy Victory Gained in Women's Class Basketball Series

In the women's class basketball game played Wednesday night, the first freshman team beat the third freshman team with a score of 35 to 18. Tagged playing and a lack of teamwork were noticeable throughout the game, due to the fact that the members of the teams are not yet used to playing together.

Both teams failed to complete passes, largely through the slow work of the centers. The third team guards, Ruth Crofton and Francis Dadds, did good work in holding down the opposing players. Vesta Scholl and Genevieve Spears, forwards for the first team, played the best game for the winners.

## Dark, Very Dark; the Door Locked a Deserted Maid

### The Friend in Need is a Friend Indeed

It was dark, very dark, for it was the hour after dinner time. The doors were locked; the windows were too high for a maid to jump out unassisted; the campus was deserted. She was an Emerald reporter; she must hurry; but there she was—locked fast within the palatial walls of the old journalism shack.

The time dragged on. Again and again she tried the door, but it remained locked and resisted all efforts. Again and again her desire to dare almost overcame her as she approached the window preparatory to jumping. Each time she hesitated.

And then—well, miracles always happen in such cases. Three of her scribe friends approached, and when they heard her call, one grabbed her books, and the other two helped her descend from the window.

It happened that the night watchman, like most campus persons, unable to keep track of Emerald reporters, locked the place up.

## EDUCATIONAL VISION IS DR. WINSHIP'S SUBJECT

### Students Urged to Keep Pace With Progress

Educational vision was the plea of Dr. A. E. Winship in his assembly address yesterday. He impressed upon his audience the value of far-sightedness in educational projects, emphasizing the necessity of keeping up with the progressive views and ideas of this day.

In that line Dr. Winship, editor of the Journal of Education and prominent in that field, pointed out that the plan of education had progressed from public education to democracy in education, that is, making it possible for a greater number of persons than ever before. This plan is progressing, because within the last eight years attendance all over the United States in high schools has doubled.

"We are living in a time when it is better to know the world and where it is going than where it came from," he said, showing the value of keeping up with the progress of the world. To illustrate his point he drew parallel cases between the progress that education must make and the progress that has been made in various lines of industry. The silk industry shows this in the new process of making silk from wool, dispensing with the silk worms. The coal industry shows the same benefits of the progressive idea. From the great waste that there used to be in gases and pitch in making coke in the old-fashioned way have been made by-products worth more than the coke itself. "I want to emphasize that we have to learn in education, as elsewhere," summarized Dr. Winship, "that you will find, where you least expect it, this power, these benefits to mankind."

A place where education could bring out such benefits, pointed out Dr. Winship, is in the case of the eight million boys and girls in the country who would be benefited by the program carried on by the boys and girls clubs throughout the states. As it stands seven hundred thousand boys and girls receive this training and produce products valued at \$8,000,000. If the rest were educated along the same line, he said, the result would be astounding.

In concluding, Dr. Winship urged that all students realize that they must keep pace with progress and that back of their studies was their chief business to do something for God and humanity.

## MEN ASKED TO REPORT AT JOURNALISM SHACK

Following men will please report to the editor of the Emerald in the office, old journalism "shack," at five o'clock this evening: Jim Case, Lowell Baker, Parker Branin, Floyd Greeley, Robert McCormack, Fred Michel, Ed Miller and Lester Talbot.

## HUSKIE QUINTET COMES MONDAY

### Game to be First Real Test For Varsity Basketball; Washington Determined

### VISITORS RATED STRONG

### Oregon to Have Chance at Trying Quick Pass Work on Veteran Hoop Team

The first real test for the varsity basketball team comes Monday evening when the Webfooters tackle the league leading Huskie five from Washington. A good idea of how the local quintet will stack in the conference race may be gleaned from the game Monday.

Washington is the first real team the varsity goes up against. While the pre-season games have not been setups, they have proved easy for the Webfooters and have resulted in top-sided scores.

### Huskies are Powerful

The Huskies are invading Oregon with the intention of returning to the Seattle encampment with their belts loaded with scalps. They have a powerful team with a number of veterans. Frayne and Hesketh make up the forward combination. Both have been in action before against the varsity and know the game. Anderson, Welts, Gardner and Froude are not new at the court game. They helped defeat the Aggies at Seattle last week.

In going against the Huskies, Oregon will have a chance to find out how the quick pass system works against an Al team. So far the varsity five has had little trouble working the ball down the floor into the enemy's territory and registering points.

### Oregon Lineup Strong

Likewise the defensive play of the Webfooters will receive its first real baptism. Very few of the opposition have been able to penetrate the five-man defense perfected by Reinhart, and have had to be content with long shots, very few of which were good. The big six will undoubtedly bear the brunt of the coming tiff. Hobson, Gowans, Latham, Shafer and Chapman have been working well together and King fits right in when he is sent in for relief duty. Jost is improving daily and may get a chance at the northern squad Monday.

After the Washington game comes the Aggie series, and Oregon's chances against the Corvallis hoopers can be judged somewhat by the showing made against the Huskies.

## HANDBALL GAMES WON

### Bachelor in Line For Trophy; Phi Delt Wins Its Games

Having won the final game in its league, the Bachelor handball aggregation now remains undefeated, and in direct line for the trophy. Yesterday at 4 p. m. the Bachelor pair were easily victorious over the Delta Tau Delta combination by a score of 21-2, 21-15. With little difficulty, the Bachelor pair, Patterson and Garner, defeated the Deltas, represented by Herlit and Boyd.

In the second game of the afternoon, the Phi Delta Theta handball squad defeated the Kappa Delta Phi aggregation by a very close margin. The score of the contest was 23-21, 21-19. As both teams played an aggressive game and at a fast pace, it was difficult to judge the winner, until the last point had been scored. Playing on the winning team were Staley and Powers, while the Kappa Delta Phi combination was made up by Robinson and Brooks.

## PLEDGING ANNOUNCEMENTS

Phi Sigma Pi announces the pledging of Lloyd Franks of Oakesdale, Washington.  
Chi Psi announces the pledging of Donald Gidley of Marshfield, Oregon.

## Winter's Cold Is No Deterrent to Women Pungers

Swimming in the race at this time of the year is generally a matter of compulsion and one is usually propelled into the icy waters by too willing hands. But three girls claim the honor of being the first to go swimming in the mill race this year of their own accord. But a greater wonder than that is that they really enjoyed the icy plunge.

"It was marvelous," said one of the trio. "It surely made me feel good." The other two were equally loud in their praise of winter swimming. It was real winter swimming, too, because they went in yesterday afternoon when the sun was A. W. O. L.

The names of the girls are withheld, but if anyone wishes to contest their claim to honor, one of them is a junior, tall and well known around the journalism shack. The other two are freshmen. Besides, one can probably tell who the girls are by picking out the three girls with the worst colds on the campus.

## MATERIALS CLASSES TO HAVE NEW HOME

### Laboratories Will Replace Old Steam Plant

"The brick chimney of the old steam plant is just about torn down, and before long now the classes in strength of materials will have a new laboratory," said Professor E. H. McAlister, head of department of materials and astronomy. "We expect to be installed in our new laboratory some time after the first of March," he said.

The work in tearing down the old chimney has progressed slowly. The bricks were pried up one by one by workmen using a crow-bar, and then dropped through the four foot square hole in the chimney to the ground below, rather than outside, to prevent them from falling on people passing by.

The two old boilers in the plant have been taken out and soon the installing of radiators, the concrete floor, and partitions will begin. The 1,600 square feet of floor space to be used by Mr. McAlister's materials class is to be partitioned off into three rooms of about the same size. This means that each room will have a little more than 500 square feet of floor space.

One of the rooms is to be used for testing cement and concrete. There will be an arrangement for preparing concrete and other materials in a second room. In the third room a large testing machine is to be installed. This machine will be capable of exerting a pressure of 200,000 pounds. Electric motors will be used to operate all machinery in the laboratory.

## MRS. R. D. CASEY RETURNS

### HER HOME AFTER OPERATION

Mrs. Ralph D. Casey, the wife of Professor Casey of the school of journalism, has returned from Mercy hospital to her home, 1206 Mill street, where she is convalescing after an appendicitis operation.

## "Be in the Game That Is Going to Be," Says Dr. A. E. Winship

By Catherine Spall

"I want to be in the game that is going to be," declared the white-haired man as he looked out over the campus from the large window in the President's office, with his blue-gray, far-seeing eyes, earnest, intent, and serious. The simple statement was the substitution Dr. Albert Edward Winship, educator, editor, and lecturer, offered for the philosophy that "I'm always seeing the things that are, in relation to things as they are going to be."

In appearance Dr. Winship strikingly reminds one of Clemenceau. Short in stature and inclined to be plump, he has a white mustache, a firm mouth, and a broad, intelligent forehead. Intriguing and individual are his buttoned bulldog-toed shoes

## VARSIY TAKES MEET 30 TO 29

### Frosh Are Close Contenders in Swimming Contests Held in Women's Tank

### LOMBARD IS HIGH MAN

### Times Are Rather Slow; Breaststroke Has But One Entry; Dives Pretty

In a regular Frank Merriwell finish, the varsity mermen took the green cappers into camp by a final score of 30 to 29 last night in the Woman's building tank. The medley relay, consisting of six laps, decided the meet, and at the finish, a scant yard separated Palmer, for the varsity, and Lombard, for the frosh. Lombard was the high point man of the meet with a total of 15 points, taking first in the 40-yard backstroke, 80-yard dash and the 200-yard dash. The times in last night's races were rather slow, but on the whole, the races were close and more than once brought the crowd to its feet.

The varsity jumped into the lead in the first event, the 40-yard dash, Palmer and McCabe taking first and second, with Stone, of the frosh, third. The time was 23 seconds. The babes evened the score a few minutes later by taking first and second in the backstroke, Lombard and Stone being the frosh entrants. Yoran, of the varsity, took third. The winning time in this event was 46:1.

### Diving is Pretty

Since the frosh had no entry in the 200-yard breaststroke, Al Sinclair swam an exhibition, doing the 10 laps in 1:26.1. The youngsters pulled into the lead in the fourth event, when Lombard won the 80-yard dash in 51:2. Palmer took second and Bonbright, of the frosh, took third. In the dives, a pretty contest between Stone and Horsfall ended in a victory for Stone, McCabe, varsity, taking third.

Lombard took his third victory of the evening when he copped the 200-yard free style in 2:32.1. Horsfall took second and Alderman third. Heider and Alderman tied at 57 feet for the plunge, but first place went to the varsity man because his time was .45 seconds while Alderman took 59 seconds. Wiswall, varsity, took third with 52 feet 6 inches.

The varsity relay team, composed of McCabe, Yoran, Horsfall and Palmer, took the relay, which decided the meet, by a scant margin, the time being 1:7. The relay was a medley affair, with the first two men swimming one length apiece and the last two going two lengths. Both coaches expressed themselves as being pretty well satisfied with the work of their respective proteges.

Officials, Scott, starter; Fahl, announcer; Reinhart, and Widmer, timers; Foster and Webster, judges; Cooper, scorer.

## Education Urgent Necessity in China, Says C. K. Edmunds

By Marian Lowry

"No more efficient effort can be made to create a spirit of friendship, and of closer co-operation between the United States and China, than the preparation of an adequate and capable corps of teachers by America for the Chinese schools." It was Dr. Charles K. Edmunds, president of Canton Christian college, China, speaking. He is on the campus until Saturday night, with the purpose of meeting prospective candidates for positions as teachers in the Canton institution.

"The desire of the Chinese people for education, can not be measured. It is extreme. They are flocking to the schools in greater numbers than can be taken care of," he said.

Dr. Edmunds has been connected

with the Canton college since it was founded in 1903. From 1903 to 1907 he acted as professor of physics, and since 1907 he has been president of the institution.

"There are unlimited opportunities in China for teachers," Dr. Edmunds said. "Canton Christian college offers an unusual chance, in that the medium of the institution is English. Instructors there teach in English, but they are expected in time to learn the native language. Our time consists of 200 acres. It is located on an island not far from Canton, which is the second largest non-Christian city in the world, and the largest in China. There are 1,000 pupils in the institution, all of whom live in
