

FROSH WIN TWO GAMES ON TRIP

Contest Lost to Ashland; Laid to Slump

WESTERGREN IS HURT

Men Are Working Hard for Battle With O. A. C.

The freshmen squad returned Sunday from the tour through the Southern part of the state, where they played Roseburg, Medford and Ashland. The yearlings defeated Roseburg, 34 to 21, and won from Medford, the Southern champions, by the decisive score of 28 to 20. The team struck a slump, however, in the last contest against Ashland and took the short end of a 30 to 26 count.

Westergren's Less Felt
These were the first games the frosh have played off their home floor. They won the first two games and made an uphill fight in an effort to take the last contest, but the loss of Westergren, the stellar freshman forward, who had the misfortune to break a small bone in his right ankle during the second half of the game against Roseburg, weakened the team. An examination of his ankle revealed the fact that he will be unable to play again before three weeks, even if it heals normally. This will keep him out of the two games against the Rooks at Corvallis on the 29th and March 1. He will be sorely missed by the team, as he was a strong figure in both offensive and defensive work.

Substitutes Work Well
Okerberg and Chiles, who filled in at forward after Westergren's injury, both played good ball. The babes had a hard game at Roseburg and it was made harder by the fact that they were working on one of the smallest and most difficult floors to play on in Southern Oregon. However, the freshmen scored their first victory there, and featured the game by eging 10 out of the 11 tries for fouls.

The hardest fighting and best team the yearlings met on the trip was the fast Medford five, coached by "Prink" Callison, former Oregon football star. The high schoolers led during most of the game and put a thorough scare into the babes by their close checking and fast offensive work. The frosh came from behind, however, in the last five minutes and were leading 28 to 20 at the end of the game.

Ashland Wins Game
The University men could not get going in the last game and dropped it after a hard fight to the Ashland high school five. Ashland has the weakest team of the three played, and has been defeated by both Medford and Roseburg in the district elimination. They had the Indian sign on the frosh, however, that night and took them down the line to a 30 to 26 score, in a very loosely played game.
This was the last game of the freshmen against a high school team this season and from now on they will devote themselves to preparing for the two hard games with the Rooks. Coach Evans will put the squad through strenuous training in order to whip them into shape. If Westergren is not in shape, he will work either Okerberg or Chiles in at forward. Both are dependable men.

WOMEN FOUND TO BE MENTALLY SUPERIOR

(Continued from page one)
Discussing the difference in ability, Professor Young said, "It should not be supposed that the wide difference between the Northern and Southern European groups indicates anything about race or national differences in ability. I believe that the reason for the poor showing of the Southern group is because the

poorer classes came from those countries."

In comparing the sex differences of the two groups the same twelve year old children were used. In both groups the psychologist found that the girls were uniformly superior to the boys. The difference, however, amounts to between 5 and 10 percent in favor of the girls.

Of the fifteen tests applied the girls exceeded the boys in three-fourths of the tests. In fifty percent of the tests it was found that some of the boys did better than the best of the girls, and some did worse than the poorest girl. This conclusion indicates that there are more geniuses to be found among men than women.

The reasons are given by Professor Young for the better average of the girls: 1, the girls are more docile, they learn better, they acquire the elements more readily; 2, the girls on an average are a little brighter, but on the other hand the boys are more variable.

TRADE DIVISIONS HEAR PROBLEMS DISCUSSED

(Continued from page one)

store service, .10 per cent; errors, and the relative value of the various kinds of advertising.

Prof. F. A. Nagley of the school of business administration of the University had prepared two mimeographed papers which presented graphically the average sales costs, rent costs, advertising costs, depreciation and the like, which were prepared from statistics made by Professor Nagley from a questionnaire sent to men's clothing stores throughout the state and from figures compiled by the school of commerce at Northwestern University. Another division group which drew a large crowd was that given over to the dry goods and department stores. Franklin Polts, professor in the school of business administration, had prepared a chart on the board representing the total ex-

penses and turnovers for 10 dry goods stores, representing 10 communities in four separate districts into which the state had been divided for geographical distribution of the statistics.

The results given were presented to show the need of local statistics, and why local figures were more adaptable than those given out by national institutions, as Harvard.

The merchants present were urged to turn in their figures on their business and to answer questionnaires sent out by the University school of business administration, in order that the measuring stick worked out by the school may more adequately fit the local state business men. Round table discussions were held on the subject. J. H. Garrett of Hillsboro, and John C. Mann were appointed by B. E. Sisson of Salem as a committee to make up sample forms of questionnaires which could be used by the retailers in preference to the complicated ones of the University. All divisions met simultaneously at 3:30 p. m. in various rooms assigned in Commerce building.

SQUIBS CAUGHT DURING MERCHANTS' MEETING

But it is more than a program. It is also a year book and contains the constitution of the Oregon Retail Merchants' association in connection with several articles on the association.

It also contains a number of illustrations. Among these is a picture of Dean E. C. Robbins of the school of business administration.

Forty-eight pages is rather large and imposing for a program for a four-day convention.

Incidentally, it might be pointed

out that this is somewhat similar to the situation in which the student finds himself.

A Class Distinction

The Hinge-Cap is the insignia of Williams Shaving Cream and of Williams only. You'll notice three things about Williams every time you shave. 1. Williams lather is heavier and holds the moisture in against the beard. Quicker and more thorough softening takes place. 2. Williams lather lubricates your skin — your razor actually seems to "glide" the hairs off. 3. Williams lather leaves the skin in marvelously fine condition. No matter how frequently you shave, your face stays cool, smooth and comfortable.

You'll enjoy every shave with Williams. It is a pure, natural-white cream without any artificial coloring whatsoever.

Williams Shaving Cream

The Williams Hinge-Cap is "on even when it's off." You can't lose it, and the tube hangs up!

SIMPLE SIMON

Would have recommended George's pies. Crisp, juicy, well baked pies of all kinds and a cup of real coffee. You never put your fork in any better.

Drop in and try one tonight.
