

DANCE DRAMA TO BE APRIL 23

University Orchestra Will
Render Program

SKETCHES ARE GIVEN

Concert Not One of Regular
Student Body Series

The Dance Drama, which will be given by members of Miss Lillian Stupp's dancing class, in conjunction with a concert by the University symphony orchestra, is to be presented at the Hellig theater, Wednesday night, April 23. The first half of the program will be selections by the orchestra conducted by Rex Underwood, and the last, a group of dances with orchestra accompanying.

Two dramas will be given, the first called Wedgewood China, in which a plaque of blue will be used for a background, with the figures of the nine muses robed in white against it. As they come to life, four different figures are formed, with the small groups dancing in the foreground.

Second Title Given

The Cycle of the Hours is the title of the second drama, and depicts the progress of the day. At dawn, when the early morning hours begin the day, the call of the chase echoes through the hills, bringing forth the huntresses. They are followed by the gleaners on their way to the distant fields. Then Apollo comes, driving the hours of the day before him, and wine carriers hasten to refresh the toilers of the field at noon-day.

Afternoon finds a shepherd lad playing with a pretty shepherdess,

DE COU RETURNS FROM MATHEMATICS MEETING

Eugene to Be Scene of First Convention of
Northwest Section in August

The recognition of the Northwest and the exertion of the most important influence in unifying mathematics on the coast of any action ever taken by the San Francisco section of the American Mathematical society, was the two-fold achievement of the organization at a meeting held at Stanford university last Saturday, in the opinion of Prof. E. E. DeCou of the University mathematics department, who recently returned from the session.

As a result of action taken at the southern convention the first regular meeting to be held in the Northwest will occur at the close of the summer sessions about August 1, 1925, at the University of Oregon.

At a special meeting of the society held at the University of Washington on December 22, attended by Professors W. E. Milne, Lloyd L. Smail, E. H. McAllister, and E. E. DeCou, from the University, it was felt that the Northwest, which has been furnishing more than half of the papers for the section for the past five years, should have a fuller representation in the meetings, and it was proposed that an attempt be made to have regular sessions in the Northwest, and also that the name

and as twilight falls, the gleaners and reapers pray until the Angelus has died away. With night comes peace, elusive will-o'-the-wisp, and dreams.

Practices Being Held

Thirty-five girls will partake in the dancing. The program for the orchestra has not been announced as yet, but Mr. Rex Underwood, conductor of the orchestra, is con-

ducting practices preparatory to its selection.

This affair is not one of the regular student body series, but a special concert, at which the admission will be 50 cents. The profits are to be divided equally between the orchestra and the dancing department.

of the organization be changed to the Pacific section of the American Mathematical society. Resolutions were passed to that effect and Professor DeCou was made chairman of the committee to draft the resolutions to be presented at the meeting at Stanford. Professor D. Buchanan of the University of British Columbia was also a member of the committee, and Professor Smail was appointed secretary.

The convention also provided that one meeting should be held annually in Southern California whenever needed.

A paper written by Professor Milne of the mathematics department was on the program of the session.

TICKETS TO BE GIVEN FOR WOMEN'S TENNIS

Girls Entering Tournament
Will Escape Tax

Tickets have been obtained from Jack Benefiel, graduate manager, for the women's doughnut tennis tournament which is to start Monday, April 14. All entrants from the women's houses will be given tickets for their matches by Augusta DeWitt, head of tennis, as soon as the schedule is made out.

The women's houses have been asked to turn in the questionnaires sent them early in the week asking for the names of their entrants. As the schedule is to be made out Saturday, April 12, it is necessary that all names be turned in before that time.

The granting of tickets is expected to stimulate greatly house competition, as any girl trying out for the team will be allowed to escape the ten-cent-an-hour tax. Points toward awards and sweaters will also be granted.

Although only a few girls have been turning out so far, several have developed into stellar racket wielders, and the spring is expected to produce a large crop of skilled cloth-ball clouters.

OREGON STUDENT RECEIVES HIGHEST IN EXAMINATION

San Francisco, Cal.—Out of 41 men and women who passed the examination in Los Angeles for license to practice medicine, the state board of medical examiners announced that Dr. David R. Robbins of the University of Oregon, made the highest mark, 88.59 per cent.

"SHY" HUNTINGTON TO BE EUGENE BOY SCOUT LEADER

"Shy" Huntington, former football coach, is to be one of the Boy Scout leaders in Eugene and will

soon take up his new position. A number of boys have already signed up for the new troop of Boy Scouts that is to be organized, and indications show that the Eugene troops will be among the most prominent in Oregon. Plans for the summer camping trip are well under way.

CAMPA SHOPPE STUDENT PROPRIETORS FINED \$20

Two students, Don Woodworth and Harmon Chapman, were found guilty by the jury in the Eugene police court Tuesday evening on the charge of selling cigarettes to a minor. The students have leased and are managing the Campa Shoppe. A fine of \$20 was assessed by George A. Gilmore, police magistrate. Although the two student proprietors were not present at the time, the terms of the law hold them responsible for the actions of those they employ.

THE SCHOOL OF
CHEMICAL ENGINEERING PRACTICE
OF THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY

A GRADUATE SCHOOL offering a course of study leading to the degree of Master of Science, with field stations in the plants of six different companies. These companies produce steel, pulp, paper, caustic soda, chlorine, heavy acids and salts, sugar, gas, ammonia, benzol, etc.

The more important unit operations of chemical engineering are studied systematically by means of tests and experimental work on full scale plant apparatus.

The work is wholly educational and independent of control by the plant managements. The attention of the student is directed exclusively to the study of Chemical Engineering.

The total number admitted to the school is limited and the students, studying and experimenting in small groups, receive individual instruction from resident professors. For entrance requirements and details address R. T. Haslam, Director, School of Chemical Engineering Practice.
