

TRACK TRYOUTS ARE WEDNESDAY

Varsity Team Will Meet U. of W. This Week

FRESHMEN TO GO NORTH

Coach Hayward Predicts Hard Competition

Tryouts will be held Wednesday afternoon to determine both the varsity and freshmen members of the teams that will represent Oregon this weekend in the two track and field meets. The varsity team will meet the University of Washington men here; while the freshmen will migrate to Portland for a two-day competition with the Rose City high schools.

Coach Hayward stated he was well satisfied with the showing of the Oregon men at the relay carnival at Seattle Saturday, and from the showing made by the northern school, predicted a hard meet for his team this weekend. The Washington squad is especially strong in the distance races.

Captain Ferry Coming

In the quarter-mile, there are three men who are credited with running that distance in slightly over 50 seconds. Captain Ed Ferry of the Washington team and his running mates, Tupper, Applegate and Hathaway, were the competitors who nosed out Oregon's mile relay team in the meet last Saturday. With the Oregon men on their home lot and in a dual meet, the boys will give them keener competition, to say the least.

Washington also has a pair of two milers in King and McGinnis, who have proven themselves distance men of first class caliber. King is also a miler. In the weights, Washington has a man who, in the light of Hartranft's achievements down at Stanford, does not rate so high, but will give any of the shot-putters of the northern schools real competition. Eggvedt has heaved the shot around 44 feet consistently in his competitions this spring; he performs about as well with the javelin and discus. Washington has four half-milers who took second in this event last Saturday; O. A. C.'s highly touted quartet won, while Oregon took a third. Time: 8 minutes, 55-10 seconds.

Washington Weak in Sprints

Washington is weak in the sprints and hurdles; but then Oregon has no outstanding men for these races, consequently, competition will be about even. Washington has a crew of milers who are making around 4:35; Oregon has men in Keating, Tetz and McColl, who, if they are right, will be able to give these men a work-out—although a two-miler or two must be picked also.

In the jumps and polevault, Washington has no men who are in the champion class, so with Spearow, Rosenberg, and Eby working right, the Oregon team has a chance to pile up a few points.

Meet Is Opening One

This is the opening meet for the varsity crew and will give the followers of track an opportunity to see the Oregon athletes performing under fire. With the practice gathered from the weekly meets held during the last two terms, the men should not suffer from stage fright. Sixteen men will be allowed to compete from each school.

PROF. E. E. DeCOU IS HEAD OF COMMITTEE

Professor E. E. DeCou, of the University mathematics department, has been selected chairman of the highway beautification committee, appointed by the Eugene chamber of commerce to improve the appearance of the county highways. Three University alumni are also serving on the committee. They are Judge E. O. Potter, Mrs. L. E. Bean and Robert E. Prescott. Dr. L. S. Kent, a physician of Eugene, is the fifth member of the committee.

A survey of the county to determine where the improvements shall be started will be the first work of the committee. Removal of unsightly buildings, fences and sign boards is the first part of the program. The cooperation of the University in improving certain parts of the campus on the highway will be asked, Professor DeCou stated yesterday. The program of beautification will probably include the planting of trees along the highway later.

TRANSIT OF PLANET MERCURY TO BE SEEN

On Wednesday of this week, there will be a transit of the planet Mercury. According to Prof. E. H. McAlister, head of the University astronomy department,

Mercury will be between the earth and the sun. It will appear to cross the disk of the sun. The planet, of course, merely goes around the center of the solar system.

"These transits are more or less important events in the astronomical world," said Professor McAlister. "A proportion between the transit of Mercury and Venus, and Mercury and the sun, is one way of measuring the distance from the earth to the sun. This method formerly was used almost entirely in measuring the distance, but since later discoveries have been applied, astronomers have not used this transit method of measuring the distance from the earth to the sun."

The sun is so bright and Mercury is so small that it will require special astronomical equipment to see the transit from Eugene.

BISHOP W. T. SUMNER ASSEMBLY SPEAKER

Visitor Will be Honored at Many Functions

Walter Taylor Sumner, Episcopal bishop of Oregon, will be the speaker at next Thursday's assembly, May 8. Bishop Sumner will be on the campus from Thursday until Sunday and will be honored at many functions.

This will be Bishop Sumner's tenth annual visit to the campus, having started this custom of an annual visit in 1914. This is the first time in several years that Bishop Sumner has been able to attend the campus during a Junior Week-end. He says that he is looking forward to the events with much interest.

While on the campus he will hold conferences with students who wish to see him for advice or counsel. He will speak at the Eugene high school and will address other bodies. Those who wish to make dinner or luncheon engagements with him should see Dean Virginia Esterly, who is handling that part of the program.

Bishop Sumner has not yet chosen the topic for his assembly address. The assembly will be held in Villard hall and the music will be announced later.

GUN USED IN FRANCE GIVEN TO DEPARTMENT

University of Washington—(By P. I. N. S.)—Another "battle-scarred" veteran has joined the forces of the military department. The new arrival is an anti-aircraft gun mounted on a light truck chassis. It will be another toy for the cadets to play with.

The new gun was shipped up from California. Several parts were missing, making it impossible to finish the work of assembling so that it might be used for instruction this year. The gun and truck were with the A. E. F. in France, and were among the first anti-aircraft batteries to come from this country.

K. T. ROWE TO TEACH AT OREGON NEXT YEAR

Kenneth T. Rowe, at present an instructor at Rice Institute, Houston, Texas, will come to Oregon next year to teach written and spoken English. Mr. Rowe comes to this University very highly recommended.

He is a graduate of Rice institute, where in his junior year he won the first prize in a local short story contest. He was also the Rice candidate for the Rhodes scholarship in 1921. Mr. Rowe received his bachelor's and master's degrees in that institution and taught there after graduation.

DILLEHUNT TO INSPECT BIOLOGY DEPARTMENT

Dean Dillehunt, of the University of Oregon medical school of Portland, is to be on the campus Wednesday as the guest of Harry B. Torrey, head of the local biology laboratories and other features connected with the pre-medical school.

Wednesday evening, a meeting of all those interested in medicine, and especially students of biology and medicine is scheduled in Alumni hall, where Dr. Dillehunt will be the speaker of the occasion.

OREGON PROFESSORS TO VISIT HIGH SCHOOLS

Two speakers to be sent out by the extension division this week are Dr. John J. Landsbury, dean of the school of music, and Dr. Edmund S. Conklin, dean of the graduate school.

Dr. Landsbury will give the commencement address at the Ontario high school on Thursday, May 8. His subject is to be "Molds of Men." Dr. Conklin will address the high school assembly at Baker, Oregon, on Friday, May 9. He will talk on "Personality," the topic he used in addressing the University assembly when he spoke this term.

CAMPUS LUNCHEON IS EVENT OF FRIDAY NOON

Tables to be Under Trees in Front of Deady

At 12 o'clock Friday noon, under the shady trees in front of Deady hall, one of the most popular Junior Week-end features will be staged. Tables will be stretched on all sides, and the multicoloring throng will gather for the one thing which attracts everyone—food.

The campus luncheon is an old and honored institution, and this year's luncheon promises to combine all the features which have made past luncheons so enjoyable. Here only can all the students get together in an informal way, talking and eating and realizing their common interests. The committee is doing a great deal to promote this idea of congeniality.

An invitation has been issued to the faculty and their families. The University orchestra will play during the hour and a half of serving, from 12 to 1:30.

The menu, announced by Maude Schroeder, head of the luncheon committee, consists of roast pork, escalloped potatoes, fruit salad, hot rolls, coffee, ice cream (in cones), pickles and olives. There will be four serving tables in order to allow a greater speed in serving the crowd.

The long lines of waiting students will thus be eliminated, the committee hopes.

Those who are on the luncheon committee are Maude Schroeder, chairman; Melba Byrom, Laveria Spitzberger, Marguerite McCabe, Mary Griffin, Augusta DeWitt, Lowell Angell and Elam Amstutz. The names of those who are to serve at the luncheon will be announced later in the week.

PRINT PURCHASES ARE ON EXHIBITION TODAY

head of the normal arts department, "is to give the students standards for the perfection of the lesser arts such as etching and engraving. We want them to take native material here and work it out in designs." Some of this work is now being done in the design II class.

Besides the wall exhibition there is a case of textile wood blocks printed on linen, silk and velvet, loaned by two Portland craftswomen.

The print exhibition will be followed by one of decorative screens, pastels, posters and textiles by N. B. Zane, art instructor in Jefferson high school, Portland. It will open on June 1 for two weeks. Mr. Zane is to be an instructor in the University next year.

VARSITY BALL SQUAD FACES HARD CONTESTS

at short. Troutman was tried out there last night and may cinch a regular berth. Another alternative may be to use Hobson in the short-patch and big Hunk Latham at third. At any rate, Reinhart is doing his best to get a smooth-working combination ready for the next games.

Nominations Are Closed for Student Body Offices But—

A volume entitled "Elements of the Theory of Infinite Processes," whose author is Dr. Lloyd L. Smail, assistant professor of the University mathematics department, is attracting international interest, according to letters received here.

The book has recently been reviewed favorably in "Science Progress," an English journal which states that it is a valuable compilation of material on this subject, and a letter has been received from the head of the department of mathematics at the Tohoku Imperial university at Sendai, Japan, who says that he is using it for his students, and ex-

WORLD WAR VETERANS TO BE INTERVIEWED

Meeting Called on May 9 for Problem Cases

SIEFERT'S STUDENTS WILL APPEAR TONIGHT

Dr. Smail came to Oregon from the University of Washington where he was graduated and on the faculty for some time. He received his Ph.D. at Columbia university.

Ex-service men on the campus will be interested to learn that Kenneth L. Cooper, Portland sub-district manager of the United States Veterans' bureau, and Roger R. Reynolds, district government insurance representative, will arrive in Eugene at noon, May 9, for the purpose of interviewing World War veterans of this city and vicinity relative to compensation and training grievances. They will remain in this city but one day.

A special meeting of the local American Legion post is being planned at which these men will explain how war risk insurance may be reinstated or term insurance converted into permanent forms of government policies, as well as to take up problem cases directly with the war veteran concerned or his representative.

Appointments to meet either or both of the government men during their stay here may be made through George E. Love, commander of the local legion post.

TWENTY PRIZES GIVEN FOR FORENSIC WORK

four years, winning her shield last year. Margaret Woodson and Mildred Bateman are two-year women.

The forensic committee found it advisable to change the appearance of the debate award this year. The new award is an improvement over the old because it is standardized and is characteristic of forensic work, the two requisites of an award of this kind. It is a good-sized block of containing a curved bar running from
