

LIBRARY ADDS NEW VOLUMES

Rent Collection Has Books Covering Wide Field

GARRISON SKETCH HERE

Works of Anatole France Much in Demand

Several new books have been received by the library. Scientific works and histories are included in the number. Mrs. McClain reports that more students are interested this year in rent books of a higher type.

A recent book received by the library is entitled, "William Lloyd Garrison on Non-Resistance." Mr. Garrison was the father of Fanny Garrison Villard, the widow of Henry Villard for whom Villard hall was named.

Rent Books Popular

The book contains a personal sketch by Mrs. Villard and a tributory by Leo Tolstoi. An idea of Garrison in his daughter's eyes is given.

Among the popular rent books are "The Green Hat" by Michael Arden and "Mark Twain's Autobiography," the first of which is so much in demand that a new copy has been secured.

The works of Anatole France are much more frequently called for now. Mrs. McClain attributes this to his recent death. The same might be said of the late Joseph Conrad whose two sets of works are never on the shelves any more.

Histories Added

Three copies of the "Scientific Ideals of Today Popularly Explained" by Charles R. Gibson are recent arrivals. In them is given a popular account of the nature of matter, electricity, light and heat. It is written in non-technical language and contains 42 illustrations and diagrams.

Two beautiful volumes of "The Illustrated History of the French Literature" by Gustave Lanson have been secured. Each book has about 800 illustrations on an excellent quality of paper. Volume one covers the 16, 17 and 18 centuries while volume two continues on with the latter part of the 18 century up to the present.

Better Literature Read

Mrs. McClain says that the rent books read this year are of a higher grade than those read last year. Then there was a demand for three or four books of the "ultra-cheap" class but now the reading seems to be over a wider field of interest. Towards the latter part of the week, Mrs. McClain says the rent books and 7-day shelf dwindle while it lengthens out at the first of the week when people don't have time to read.

KANSAS STUDENTS SHAVE AFTER FOOTBALL VICTORY

University of Kansas.—Because they won their first football victory of the season last Saturday, several thousand students of Kansas university will be allowed to shave and to have their hair cut. Because of their failure to win the first two games this year, a plan was proposed and accepted by the students that they would not shave or have a haircut until their team won a game.

TWO MAPS OF CAMPUS RECEIVED BY UNIVERSITY

Two maps of the campus, one to be used in the business office, and the other in the University depot, have just arrived from the Sanborn Map company. Made on a scale of a hundred feet to the inch, the maps give the exact size of each building, and designate by color the kind and quality of material used in its construction. Distances between buildings are also recorded, with the size of water pipes connecting them, and the location of fire hydrants.

E. O. IMMEL, ATTORNEY TALKS TO LAW FRATERNITY

E. O. Immel, local attorney, was the speaker at the luncheon Tuesday noon given by Delta Theta Phi, national law fraternity, at the College Side Inn. The topic discussed by him was "The Situations that Confront Attorneys Starting out in the Practice of Law."

HARVARD MEN ARE HOSTS TO SINGULAR ASSEMBLY

Harvard University.—"The knot hole gang" composed of boys who in the past had never seen a football game except through knot holes, were guests of the Harvard Athletic association at a recent game. They invaded the stadium 2500 strong.

ation recently took place between Argentina and New Zealand stations.

Flies are the carriers of at least 30 different disease organisms and parasites.

There are more than 5,000 farmers' grain elevators in the United States.

Dried whale meat, seasoned for a year or two, is a favorite article of diet in the Faroe Islands.

Fifteen thousand ground hogs were recently killed within an area of ten square miles in the state of Washington during a campaign directed by the U. S. biological survey for the local extermination of these troublesome animals.

The production of milk in 1923 was 7,000,000,000 pounds more than in 1922.

A Pan-American congress on standardization will meet in Lima, Peru, next November in an effort to arrive at a system of uniform engineering standards for all countries in the western hemisphere.

The freezing point of milk varies according to its composition; usually it falls between 29 and 31 degrees Fahrenheit, or a little lower than the freezing point of water.

A San Francisco inventor has arranged mirrors and lenses in what he calls a "solar furnace," which can generate a temperature high enough to melt an ordinary brick.

Pneumonia is most prevalent during the seasons when people spend most time indoors.

There are only two observatories established specially for the study of volcanoes, one on Vesuvius and one on Kilauea.

The United States government has already set aside 30 national monuments to preserve historic landmarks, prehistoric structures, and other objects of historic or scientific interest.

Although sea water contains far more chlorine than it does iodine, sea plants contain more iodine than chlorine.

The dahlia is a native of Mexico.

The ease with which water can be pressed from the leaf tissue of winter wheat indicates the amount of cold it can stand.

The city of Denver is considering a smoke nuisance ordinance.

The world's largest sapphire, found in Ceylon during the middle ages, weighs 916 carats.

Dublin lake, New Hampshire, contains a species of fish, the glacial trout, that is found only in one other place in the world, Switzerland.

There are 50,000 square miles of wheat in India.

German railroads are testing the use of wireless telephones on trains.

Blocks of rubber are being used in automobile construction to eliminate sudden shocks, noise, and the necessity for lubrication at various points in the chassis.

The Mexican bean beetle is spreading northward in this country at the rate of 150 miles a year.

The eels of both Europe and America breed in salt water thousands of miles from the streams where they spend their adult lives.

Nicotine has become one of the most important insecticides on the market.

Airplanes used for the spreading of poison dust against boll weevil in Louisiana have also successfully operated against mosquitoes in the same region, by spraying their breeding swamps with Paris green.

Young fish of the salmon and trout family are benefitted by the shade of riverside vegetation.

The Chinese were the first to use kites in weather observations.

Christmas trees are being raised

DAVIS PERFECTS PLANS FOR Y.M. CONFERENCE

Asilomar Trip to be Made In Cars by Students

Transportation plans are being perfected by C. W. Davis of the Y. M. C. A. for the benefit of the University students who are going to attend the all-Pacific coast student conference at Asilomar, California, from December 27 to January 3. The Asilomar conference has heretofore been limited to California students, in the same way that the Seabeck has been to the Oregon and Washington students, but this year all the Pacific coast states are to be included.

Several students have signified their intention to drive down in automobiles and are willing to accommodate as many as their respective machines will carry. The cost of the round trip fare will thus be reduced from the normal train charge to approximately \$15, not including incidental expenses. At the conference, a fee of \$6 is charged for operation expenses, but all other expenditures in regard to food and entertainment will be supplied by the California students who will act as hosts.

Since this is the first conference of the sort held in Asilomar, the quota of students from each college and university has been limited. From the University of Oregon, there are to be 15; from O. A. C. an equal number; and the rest of the Oregon institutions, in proportion to the student body. Noted speakers from the East and West will be included on the program.

as a regular market crop in Massachusetts.

In prehistoric times the water that now plunges over Niagara Falls flowed from Lake Erie to Lake Ontario through five different channels.

A new type of shock absorber, consisting of blocks of compressed rubber, has been brought out for motor cars.

Cottonwood trees were brought into court in the case of Texas-Oklahoma boundary dispute and made to testify as to the age of the sand dunes in which they grew.

The French have westernized Saigon and Hanoi, in Indo-China, very much as Americans have westernized Manila.

Airplanes are being used in connection with the river and harbor conservation program.

No increase in world wool production is in prospect for the immediate future, for there has been a decrease in the number of sheep in seven countries that produce more than half the world supply of wool.

COAL MINING SHOWN IN MOTION PICTURES

Three reels of motion pictures dealing with coal mining in the United States were exhibited to students in chemistry and geology in Villard hall at 9 o'clock Wednesday morning. Professor Warren D. Smith presented the pictures together with a lecture upon coal mining. Besides the motion pictures slides on the percentage of efficiency obtained from coal by various means of consumption and some of the modern methods of mining coal were given.

DR. RAINEY TO ADDRESS INSTITUTE AT CORVALLIS

Dr. Homer P. Rainey, supervisor of the bureau of research and guidance, department of education, will deliver a talk at the Benton county teachers' institute, which will be held in Corvallis on Saturday of this week. The subject of his paper will be "The Opportunities for Education of American Children." Dr. Rainey will contrast the educational systems of this country, as well as the programs, with those of other nations.

ALPHA CHI, TAU NU, KAPPA WIN DOUGHNUT GAMES

Last night in the women's doughnut basketball games, Tau Nu won from Kappa Omicron with a score of 12-7; Delta Gamma was defeated by Kappa, 31 to 9; Alpha Chi defeated Chi Omega, 8 to 10.

The World of Sport

(Continued from page one)

The football game between Los Angeles high school and Polytechnic high school of Los Angeles in the Los Angeles Coliseum, Saturday, Nov. 22. This is claimed to be the largest crowd ever attending any high school athletic contest.

The game was hard fought every minute. The score was 7-0 in favor of Los Angeles high school up to the last five minutes of play when a series of passes and end runs netted the Polytechnic boys 85 yards and a touchdown, which tied the score.

RANGE-FIRING TAUGHT FRESHMEN IN E. O. T. C.

Practical instruction in the use of rifles in range firing is being given all freshmen units of the Reserve Officers' Training Corps. Regular drill periods have been turned over to this work and time given the various phases of positions, aiming and firing. Officers have announced that during examination time some cadets will practice firing in the gallery with light rifles at the same time others are taking their examinations in close-order drill. This work is required in the first term course in military training.

PROFESSIONALISM FEARED BY WISCONSIN UNIVERSITY

University of Wisconsin.—Professionalism is so feared at the University of Wisconsin that the varsity swimmers have been forbidden to dive for pennies in the college pool as that might be construed as the use of their swimming knowledge for financial gain.

HAROLD BENJAMIN TO SPEAK ON HIGH SCHOOL PROBLEM

Harold Benjamin, principal of the University high school, left yesterday for Roseburg where he will speak at a teachers' meeting. His subject will be: "The Place of the Project in the Socialized School."

Only the new CORONA FOUR has all these features

- No other typewriter, large or small, offers you all these advantages.
- Standard four-bank keyboard
- Standard 12-yl., two-color ribbon
- Standard 10-inch carriage
- Self-spacing carriage return
- Automatic ribbon reverse
- Accelerating type-bar action
- Back spacer on keyboard
- Margin release on keyboard
- Straight line visibility
- Portability
- Proved durability

Come in and see it. Or phone us and we will send it to you.

LIBRARY PLANS TO ADD NEW BOOKS NEXT TERM

Mrs. McClain wishes to announce that new books are to be added to both the rent collection and 7-day shelf next term so that if any student or instructor has suggestions to make they should write them down and put them in the suggestion box by the gate of the circulation desk.

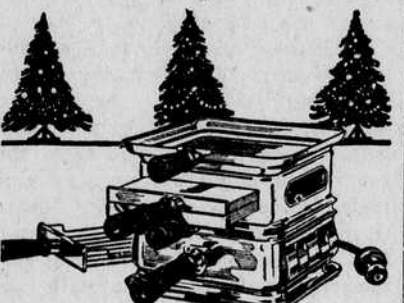

Over the Thanksgiving vacation the library was open as usual except on Thursday. Books that went out from the circulation desk totalled 246 for Wednesday, 340 on Friday, 339 Saturday and 130 Sunday, according to Mrs. McClain.

CHRISTMAS "OLD OREGON" WILL BE PUBLISHED SOON

Material for the Christmas number of "Old Oregon" is being assembled by the editor, Miss Jeanette Calkins. She expects the book to be off the press before the end of the school term. In addition to stories of basketball, campus affairs, and class news, there will appear a story by Herbert Thompson, ex-'96, on music in Eugene of earlier days. His story is entitled, "Singers, Reed Organs, and W. F. Sudds."

GEOLOGIC TYPES SUBJECT OF CLASS' TERM PAPERS

Classes in geology under Dr. E. T. Hodge have been required to write term papers on special geologic formations and characteristics in Oregon. Of the large class no two students are permitted to write upon the same subject, thus making the research work extensive. The students have been asked especially to deal with features of geologic interest in their home localities.

Always a Welcome Gift

If you want to give a Christmas present that is always appreciated, make your choice an Armstrong Table Stove. Every woman is glad to get one.

With this wonderful stove you can prepare whole meals right at the table. It cooks three things at once, and enough for four people. You can boil, fry, toast, broil or steam—and make waffles!

Come in and let us show you an Armstrong Table Stove—you're sure to have at least one person on your Christmas list who would be delighted to receive one. Only \$12.50 with aluminum utensils—toaster, griddle, deep boiling pan, four egg cups and rack. Waffle iron, \$4.00 extra.
