

LEVITSKI TO APPEAR IN PIANO RECITAL

Composition by Hopkins To Be Featured

Mischa Levitski, famous pianist, will be presented in recital by the school of music on January 14, in the school of music auditorium. Levitski is one of the greatest pianists on tour, and has played in cities all over the world, including nine tours in the United States. He has performed with all the great symphony orchestras in this country, playing nineteen times with the New York symphony orchestra. At the age of 27, he is today probably the youngest world wide figure in music circles.

The concert to be given here is an experiment to test the appreciation and demand of Eugene people for concerts of this type, inasmuch as the A. S. U. O. concerts do not allow seating capacity for enough of the Eugene people. If the concert is successful financially, the school of music will bring some of the world's greatest artists to Eugene.

Levitski has a very pleasing program arranged for this concert, with numbers which are favorites among the average music lover. He will play the "Valse Burlesque," composed by George Hopkins, at present a professor of piano in the school of music and a graduate of the University of Oregon.

Tickets for this concert are on sale at Laraways Music store, and all seats are reserved.

YEARLING HOOP TEAM CONTAINS MANY STARS

First-Year Men to Take Barnstorming Trip

According to a report there are some possibilities that Claire Scallan, all-state forward and all-Portland forward from Franklin high school, will enroll in the University this term. Scallan is rated as one of the best hoopsters ever turned out by a Portland high school. For the past month he has been playing with the strong Multnomah club quintet and has been one of their leading scorers. If Scallan registers in school, Coach Leslie will have practically every man on last year's all-state high school team who is attending college this year. Freshman basketball is still drawing its quota of first-year men with approximately 50 yearling hoopsters reporting three times a week. This squad is very difficult

to handle and towards the end of last term it was divided into two sections. According to Coach Earl "Spike" Leslie, he intends to cut the squad the first part of next week. This, he says, will give him a better chance to work with the men showing the most promise.

A squad of ten men and Coach Leslie will leave Friday morning for Portland where they will meet Franklin high school, Friday night and Jefferson, Saturday night. These two games are expected to give Coach Leslie's hoop ringers much valuable pre-season experience. All ten men will probably be given some action in the two prep school encounters. Practice this week has consisted of the drilling of fundamentals. Fundamentals are being stressed by Leslie before anything else. The squad has had some practice in basket shooting and some scrimmaging. Team work will be a thing to be worked for now and throughout the season. "Spike," however, expects this short barnstorming trip to help bring the team work to the front.

TELEPHONE OFFICIAL WILL LECTURE HERE

The Bell Telephone system is sending M. B. Long, educational director of the Bell Telephone Laboratories at New York, to the University of Oregon on Friday, January 22, according to word received by the physics department.

Mr. Long will give an illustrated lecture on the afternoon of January 22 on "Research and Development in the Bell Telephone Laboratories." The lantern slides used in connection with the address will be of special interest to any students who contemplate going into the telephone industry, as well as to the general public.

While on the campus, Mr. Long will interview seniors who are considering doing telephone work after graduation.

M. B. Long, a graduate of the University of Nebraska, came to the American Telephone and Telegraph company's research department in May, 1919, and later had charge of the telegraph work on the Havana-Key West cable. He has done work on the transmission of pictures over telephone wires, and many of the patents on the apparatus for the synchronization of the sending and receiving mechanism are taken out in his name.

ALL FENCING CLASSES BEGIN WORK MONDAY

New Hours Are Scheduled For Men Fencers

Classes in men's and women's fencing will be resumed Monday, January 11, it was announced yesterday by both departments of physical education.

All women who were active in the classes last term are urged to again be present at their regular hours, beginning next week. Women who were obliged to withdraw from the course last term and any others who wish to take the work are requested to leave their names at the office in the Woman's building.

Hours for instruction in the sport are: Monday, Wednesday and Friday, 4 to 5 p. m.; Tuesday, 3 to 5 p. m.; and Thursday, 2 to 3 and 4 to 5 p. m.

Underclass women will receive regular department credit in the subject, according to Miss Florence Alden, head of women's physical education. Upperclass women who have finished their requirements may also elect fencing. She also announced that plans are under way for a demonstration of all the activities of the department, to be given at the end of the present term. The demonstration, which will be public, will afford those interested an opportunity to see a display of the skill of the women fencers.

Due to an increased demand, new hours for men have been arranged for 5 o'clock on Monday, Wednesday and Friday at the men's gym, instead of Tuesday and Friday, as heretofore, stated Clinton Davisson, fencing instructor.

Mr. Davisson also announced that if the anticipated interest among the men is shown in the sport, open meets with contestants from other schools and athletic clubs may be arranged.

OREGON GRID STARS IN EAST-WEST GAME

What was pronounced by sports authorities as the greatest array of football stars ever assembled, participated in the East-West benefit game December 26 in San Francisco. Among the western stars were found the names of Bob Mautz, 1925 captain of the Oregon team, and Gene Shields, the hard-working guard, who line coach Baz Williams pronounced the best guard he had ever seen.

Both were invited by the committee in charge, and they took their places with such stars as Muller of California, Ingram of Navy, Erb of California, Shipkey of Stanford, Martineau of Wisconsin, and many others.

All Track Aspirants Urged To Attend Meeting; More Material is Needed

(Continued from page one)

meeting is called in order to interest more men.

"It is competition that makes track teams. A man on the squad when he has to compete against other men is going to put out more but if he has his place cinched, he is going to slump and fail to put out," said Hayward yesterday.

Every man in the University that has ever done anything in track, either underclassman or freshman, or thinks he can do anything is wanted out to the meeting.

The number of men out for the major sport has dwindled every year. Back in 1905 when the total enrollment of the men in the University did not exceed 300, Hayward had 30 men out. Now with the enrollment of men nearly 1500, few more than that number turn out for the sport. Then was the time when track was the most popular of the sports with a long series of championship teams, and even overshadowed football in popularity.

The work for the term and the outline of the program will be announced by the coach and Virgil Earl, director of athletics for the University.

"More men out" is the constant plea of the coach and this meeting was called for the express purpose of determining where track stands and start the all-year-around scheme off right.

SUBJECT FOR HILTON CONTEST ANNOUNCED

Law Students Have Chance To Win \$50 Prize

The subject of the annual Hilton contest, which is open to students of the law school, to be held in February, is "Shall the power to determine procedure by rule of the court be vested in the Supreme Court of the State of Oregon?"

The question which is of timely interest, occupied the chief place on the program at the last annual meeting of the Oregon Bar Association.

The cash prize of \$50 is offered by Frank H. Hilton, a Portland lawyer, for the best oral presentation of an original legal argument, about 20 minutes in length.

The contest, which has been held for five years, is for the purpose of aiding effective argumentation, and each year excellent arguments are given.

The winner of the contest last year was Rupert Bullivant, a law student of the University.

All those wishing to enter the contest are requested to hand their names to Dean William G. Hale, of the law school, not later than January 15.

GUILD HALL IMPROVED

An entire new lighting system will be installed in Guild Hall in February. Eighteen reflectors have just arrived which will be installed on the stage. An elevated platform has been built at the left of the stage, where the dimmer box is to be kept. Both the house and stage lights will be controlled from this platform.

CHEMISTRY MEETING DRAWS OREGON MEN

Prof. O. F. Stafford, Dr. R. J. Williams, Dr. F. L. Shinn, and Prof. H. G. Tanner, of the chemistry department, will attend the meeting of the Oregon section of the American Chemical society to be held at Corvallis Saturday, January 9.

Dr. Floyd E. Rowland, professor of engineering chemistry at O. A. C., will talk on the "Commercial Production of Oil from Port Orford Cedar." Dr. Rowland has developed a process for producing cedar oil commercially, which is being used by one of the mills in Marshfield, Oregon. Cedar oil is used for such purposes as perfuming soap or ordinary cedar oil polish, which contains really only a small quantity of cedar oil, explains Prof. H. G. Tanner, secretary of the Oregon section of the American Chemical society, in referring to the subject.

Dr. R. H. Robinson, of the Experiment Station at Corvallis, will speak on the "Factors Influencing the Stability of Mineral Oil Emulsions."

All meetings of the American A dance will follow the game.

Chemical society are open to the public, and anyone who cares to attend should see a member of the chemistry staff, so that transportation may be arranged. About 15 now plan to attend the meeting Saturday.

Varsity Basketeers to Meet M. A. A. C. In Portland; Club Has Ex-Stars

(Continued from page one)

Chet Froude, the nimble Washington forward of a few years past. Irve Cole, a veteran guard, and Jimmy Osborne, a product of Portland bush circles, are also seeing service.

George Dewey, former coach at the North Dakota Agricultural College and Franklin high school of Portland, is in charge of the Clubmen. He is a wily, resourceful mentor of considerable experience, and has a reputation of always producing a winner.

As this will be the first game this year on Oregon soil and the only appearance of the Webfoot team in the Rose City, a capacity crowd of both students and townspeople is expected to be on hand.

When the second act has come to an end—and the curtain is rung down amidst whirling applause—when you mingle outside with the excited throngs in the lobby—have a Camel!

WHEN the thrilling second act has come to an end. And you join the crowds outside just as pleased and thrilled as yourself—have a Camel!

For no other friend is so cheerful, so resting between acts as Camel. Camel adds its own romantic glamour to the brightness of memorable occasions. No other cigarette ever made—and kept—so many friends. Camels never tire your taste, no matter how liberally you smoke them. Camels never leave a cigarette after-taste.

So when you leave the theatre pleased and inspired for greater things—taste the mellowest smoke that ever came from a cigarette.

Into the making of this one cigarette goes all of the ability of the world's largest organization of expert tobacco men. Nothing is too good for Camels. The choicest Turkish and domestic tobaccos. The most skillful blenders. The most scientific package. No other cigarette made is like Camels. No finer cigarette can be made. Camels are the overwhelming choice of experienced smokers.

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price. R. J. Reynolds Tobacco Co.
