

LARGE NUMBER WANT ACTIVITIES

Students Who Desire Extra Curricular Work Number 72 per cent of University

Committee Receives Aid of Prof. Howard R. Taylor in Compilation of Statistics

Seventy-two per cent of the students on the University of Oregon campus are interested in student activities, indicated by statistics compiled by the activities committee from the questionnaires filled out by the students at registration this term.

Of the 2,584 students who registered, 1,808 indicated interest in activities, and 676 signified they were uninterested. It is also interesting to note that, of this number, the greater interest in student activities seems to be among students in organizations rather than among those who are unattached.

A great deal of work has been done on this work by the activities committee, composed of Esther Setters and Paul Ager. They were assisted in compiling the statistics by the Thespians, freshman women's organization.

Psychologist Assists Prof. Howard R. Taylor, of the psychology department, who has been helping the committee with this work, is very much interested in the project and expects it to prove very valuable in the future, if it is followed up with earnest effort.

"The student body is very active" said Professor Taylor, "and has many undertakings under way. In addition to this the student body is anxious to increase its efficiency, and I believe that they are on the right track."

Of course, preferences do not indicate how well the individual can work, he pointed out. The next step in this work is to find out just how much it does show.

"Undoubtedly there is a lot of value in the training students get in carrying on activities," Professor Taylor said, "Such a registration is a gesture, a movement in the direction to give opportunities to those best fitted for it. I think it one of the most important movements in education at the present time. It is a movement to give people training, not in the ordinary fashion, but along lines in which they are most capable, with the idea of improving efficiency where they have the largest opportunity."

Following is a list of the statistics which have just been compiled: Total number of students reporting 2,584 Number signifying interest in activities 1,808

FRESHMEN TO DANCE AT YE CAMPA SHOPPE

To keep them from stealing their refreshments, the seniors are allowing 147 freshmen to have a dance at the Campa Shoppe tonight at 9 o'clock. One table is reserved for an unknown senior chaperone, but whether or not he will be permitted to remain is yet to be seen.

The color scheme will be green. Hats of emerald hue will be worn by the orchestra, and the refreshments will include lime freeze.

To George Weber and Dean McCluskey goes the credit for originating the dance, as well as the suggestive color scheme.

The cover charge will be \$1.00. Only freshmen with the exception of the one senior visitor may make reservations.

are make-shifts and are neither comfortable nor sanitary. The house is poorly ventilated, and as one student expressed it, "We almost have to freeze to death to get fresh air to breathe." The patients are crowded throughout the lower floor, even the kitchen being used. The upstairs part of the house cannot be put into use because of the lack of heating facilities.

One Case Reported Yesterday

With only one additional case received yesterday, Dr. Fred N. Miller, University physician, was hopeful that the peak of the epidemic had passed.

"The infirmary is not even a good ward and we should not keep men there," he said. "If the University is going to do what it says in its catalog, take care of the sick students and isolate contagious cases, it should have a good infirmary with all the facilities necessary to do these things."

"We have tried to make the infirmary as agreeable as possible and have tried to retain the students' goodwill, but we admit that conditions are far from what they should be."

With a diphtheria patient quarantined in one of the rooms of the newer building, space has been further cut down there.

As a precaution, members of the Sigma Alpha Epsilon and Phi Gamma Delta houses were examined before being allowed to attend last night's game.

Charles M. Courboin World Famous Artist To Appear in Concert

(Continued from page one)

ski said of him, I shall never forget my impression of Courboin's playing of the glorious Passacaglia of Bach. It was of an indescribable grandeur."

This recital will be the second presentation of the season by the school of music. Prices for this concert will range from 75 cents to \$1.50, with the bulk of the tickets selling at one dollar. It is the purpose of the school to present these artist concerts to the people of Eugene at as low a price as is possible, in order to satisfy the desire of local music lovers for music of a high quality.

Infant Prodigies True Stories of Faculty Kids

They're all girls—no boys in the Fitch family. Mary Fitch, 18; Elinor, 16 and Janet, 13, are the children of Mrs. Clara Lynn Fitch, secretary of the administrative offices.

Mary, however, who is a sophomore in the University, is the "man" of the family. She is mechanically minded, according to her mother, and likes to be on her own. She is registered in the school of psychology.

Mrs. Fitch believes, though, that dramatics is Mary's forte. Last term, besides being stage manager for "Aria de Capo," a play given by the drama department, she also played a part in "Monday," another play. Mary is a member of Pot and Quill, writers' organization and Kappa Alpha Theta, women's national fraternity.

Elinor, the second girl, is a junior in the University high school, while Janet, the youngest, is a sophomore in the Eugene high school. Elinor is the "greatest committee member," says Mrs. Fitch, explaining that she seems always to be on some class, school or social committee.

Janet is the "grade-hound," according to the mother. Janet has been on the school honor roll ever since she came to Eugene with her mother and sisters six years ago. None of the girls as yet has any special ambitions, Mrs. Fitch says, except that Mary is "decidedly

from a Vandal, and dribbled in. Oregon 5; Idaho 0.

7:35 Hobson snared long shot. Oregon 7; Idaho 0. (Time out, Idaho).

7:38 Gunther fouled Miles, who scored, for first Idaho count. Okerberg followed immediately with cripple. Oregon 9; Idaho 1.

7:39 Hobson scored from under net. Oregon 11; Idaho 1.

7:40 Jost dribbled in. Oregon 13; Idaho 1.

7:45 Westergren fouled Miles, who missed. Fields and Nelson for B. Canine and Reamer.

7:47 Fields scored from under net. Oregon 13; Idaho 3. Hobson scored long try. Oregon 15; Idaho 3.

7:48 Fields fouled Westergren, who converted. Oregon 16; Idaho 3.

7:49 Miles scored roller. Oregon 16; Idaho 5. Okerberg scored. Oregon 18; Idaho 3.

7:52 Okerberg made beautiful shot under basket. Oregon 20; Idaho 5.

7:53 (Time out, Oregon) Lamphere for Jacoby. Miles floored Okerberg with a right to the body, but went unpenalized.

7:54 Miles scored long one. Oregon 20; Idaho 7.

7:55 Half over.

8:06 Play began, Okerberg getting tip-off.

8:09 B. Canine scored first basket of half. Oregon 20; Idaho 9.

8:13 B. Canine fouled Westergren, who converted. Oregon 21; Idaho 9.

8:14 Okerberg dribbled in. Oregon 23; Idaho 9.

8:15 B. Canine again fouled Westergren, who missed. Westergren bounced long one off backboard. Oregon 25; Idaho 9.

8:16 Okerberg fouled Lamphere, who missed. Nelson fouled Westergren, who missed. Lamphere scored. Oregon 25; Idaho 11.

8:17 A. Canine and Jacoby for Fields and B. Canine. (Time out, Idaho).

8:22 Miles scored. Oregon 25; Idaho 13.

8:24 Technical foul on Idaho. Okerberg missed try. (Time out, Oregon).

8:27 Gunther scored on pretty dribble. Oregon 27; Idaho 13.

8:28 Westergren scored from side. Oregon 29; Idaho 13.

8:29 Westergren again scored. Oregon 31; Idaho 13.

8:30 A. Canine scored floater. Oregon 31; Idaho 15. Hobson scored invalid, and followed with side shot. Oregon 33; Idaho 15. (Time out, Idaho). Edwards and Kiminki substituted for Okerberg and Westergren.

8:32 Jost scored. Oregon 37; Idaho 15.

8:33 Miles counted. Oregon 37; Idaho 17.

Game over.

ENGLISH REQUIREMENT MOTION IS EXPLAINED

The motion proposed by Dr. J. H. Gilbert, acting dean of the University, at the last faculty meeting, that freshmen students showing efficiency in the required year of English should be exempt from taking it after the first term, would not debar them from taking up other English work or continue that course if they cared for it, said Dr. Gilbert yesterday. "In other words," he said, "it is permissible but not mandatory."

The departments in the school believe that this English requirement takes time that could be used to a better advantage in specializing.

This giant hydro-electric unit weighs 750 tons and consists of a vertical shaft hydraulic turbine attached to an electric generator delivering 52,000 kilowatts at 12,000 volts.

Bigger Generators—Cheaper Electricity

A 70,000 horsepower hydro-electric unit recently installed at Niagara Falls utilizes the same amount of water as seven former 5,000-horsepower units, yet does the work of fourteen such units. And it saves 700,000 tons of coal yearly for the nation.

As more and still more uses are found for electricity, larger and more economical generators are installed. At the power plant, as well as at the consumer's end, important changes and startling developments have steadily reduced the cost of electricity for light, power, and heat.

And wherever electricity has blazed its trail—in towns, cities, industrial centers, and rural communities—comfort and progress have come to stay.

Generating and distributing electricity concern the technical student. But electricity's application in the betterment of industry, the professions, and home life concerns every educated person. Cheap electricity means many startling achievements today, but countless and unbelievable possibilities tomorrow.

The General Electric Company, as of December 31, 1924, had 37,716 stockholders, of whom 45 per cent were women. The average number of common shares held by stockholders was 55. In ownership, policies, past and present activities, G-E is unselfishly dedicated to the cause of electrical progress.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.
