

ATTEND 1926 SUMMER SESSIONS University of Oregon

Leading American Scholars Will Be Available to Those Who Wish to Do Advanced Work or Take Undergraduate Courses. An Unusual Opportunity to Hasten the Granting of Your Degree.

Susan Campbell Hall, Women's Dormitory

Friendly Hall, Men's Dormitory

EUGENE

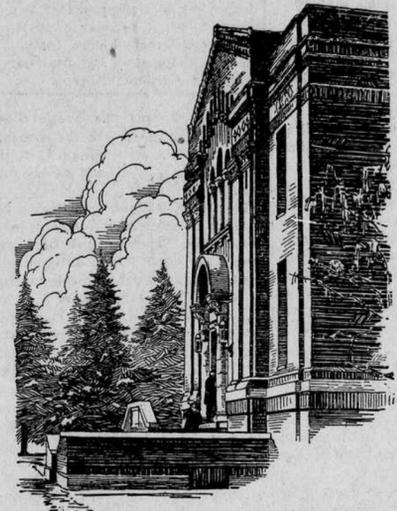

FIRST SESSION—JUNE 21 to JULY 30
POST SESSION—AUGUST 2 to 27

Enroll in Either or Both Sessions

PORTLAND

JUNE 21 — JULY 30
at

Lincoln High School

Entrance, Commerce Hall

Faculty

Notable educators from various parts of the United States have been secured for both the Eugene and Portland sessions. Experts in their various fields will be available to students in class and seminar study.

At Eugene some of the visiting scholars will be Dr. Madison Bentley, head of department of psychology, University of Illinois; Dr. F. H. Hankins, professor of sociology, Smith College; Dr. Edward M. Hulme, professor of history, Stanford University; Dr. Clarence V. Boyer, formerly professor of English, University of Illinois, new head of the English department; Dr. Walter L. Whittlesey, of the political science department, Princeton University; Marion Brown, dean of girls, University high school, Oakland, California.

At Portland some of the well known educators will be: Wilkie Nelson Collins, noted writer and critic; Dr. Benjamin H. Williams, associate professor of political science, University of Pittsburgh; Mildred Harter, outstanding authority on auditorium education, Gary Public Schools, Gary, Ind.; T. L. Torgerson, school of education, University of Chicago; Dr. Victor L. Chittick, professor of contemporary and American literature, Reed College; Dr. Edward L. Schaub, professor of philosophy, Northwestern University.

In addition, some of the best talent from the regular University faculty will give courses either in Portland or Eugene. Most of the heads of departments are to offer work.

Graduate School

Summer sessions are devoted largely to instruction of a specialized, advanced, or graduate nature, wherein the extensive library and laboratories of the University may be utilized fully.

Graduate students from all over the west are attracted to the University every year, and Eugene has rightly been called the "graduate center of the state."

Comparatively small classes and frequent seminar courses offer an opportunity for the student to come into intimate contact with the outstanding educators who are to teach. No other institution in the west offers such an opportunity to get in close touch with the leading minds of the scholarly world.

REQUIREMENTS

The only requirement for admission to the summer sessions is ability to do the work.

FEES AND CREDIT

Registration fee for the session is \$15, and in some of the science courses a modest laboratory fee is charged.

The student may carry the amount of work necessary to earn nine term-hours of credit at either session.

Schools and Departments

Courses will be offered in the following schools and departments:

Botany	Physics
Chemistry	Political Science
Drama	Psychology
Economics	Romance Languages
English	Zoology
Geology	Education
German	Journalism
History	Music
Latin	Physical Education
Library	Sociology
Mathematics	

At the post-session work will be given mainly in History, English, and Education. If the demand is sufficient, courses may be arranged in other branches.

In Education alone 17 courses will be offered in Eugene, while seven are to be given in Portland.

Director of the Eugene session is F. L. Stetson, of the school of education; of the Portland session, Alfred L. Powers, dean of the extension division.

Coaching Schools

Instruction in the coaching of the four major sports will be given by experts in each branch. Dr. Walter E. Meanwell, known as the "wizard of basketball," head coach of the University of Wisconsin, has charge of basketball; Captain John J. McEwan, who ranks with Stagg and Roekne as a gridiron instructor, football; William J. Hayward, Oregon's track coach for 24 years and trainer at the last Olympic games, track; Virgil D. Earl, director of athletics at Oregon, baseball.

The Meanwell school, which lasts from July 5 to 17, has attracted nationwide attention, and will be attended by coaches from all over the west.

Friendly and McClure Halls

Marine Zoology and Geology Camps

A field course at a camp approximately two miles south of the entrance to Coos Bay will be given to give students first hand acquaintance with the shallow water and shore forms in their natural surroundings. Animal life is abundant and unusual opportunity is offered to learn various groups of invertebrate animals and a great variety of marine algae.

The annual geology camp for advanced students will be held in the mountains of the Ochoce national forest in Wheeler county, tributary to the John Day river, famous for its fossil vertebrates. It begins Wednesday, June 23, and continues four weeks. Oregon students will cooperate in an extensive research project undertaken in eastern Oregon under direction of the Carnegie Institute of Washington.
