

Freshman Team Ready to Battle Husky Yearlings

Return of Harden, Star End, and Shift Helps Strengthen Team

Second Stringers Ready to Tackle Varsity

Slow up! These two words state the course of the freshman football squad for today and tomorrow. After two days of hard drill in brushing up on the plays to be used against the baby Purple Tornado team Saturday, Coach Reinhart feels that his boys are on edge for the coming tilt and does not wish them to be over-coached. The program for the final two days of preparation for the onslaught of the Washington babes is one of light workouts with the team going through their formations in signal drill.

The yearling line-up has been greatly strengthened by the return of Harold Harden, husky end, who was injured in the Columbia game. Harden tips the scale at an even two hundred pounds and stands a little over six feet. He is a sure tackler and one of the fastest men on the squad. Another shift which is expected to prove successful is the shifting of Chuck Williams from the backfield to end. Williams starred at half in the Chemawa game last week and after sizing him up the coaches believe he is a great prospect for an end berth on the varsity next year. Williams is a chunky fellow weighing about 170 and is five foot ten inches tall.

The super-freshman team has been given the California plays to demonstrate to the varsity in scrimmage tonight. These boys will get plenty of experience from the exercise and are strong enough to give the varsity plenty to think about. The freshman coaches are taking no chances with their first string players in the scrimmage but are saving them for the coming game.

The squad will leave Eugene Friday morning so as to be able to hold a short workout in the Portland civic stadium that afternoon. They will proceed to Seattle Friday evening. It has not yet been announced which men will make the trip and the coaches probably will not decide until the last minute due to the keen competition. Washington is reputed to have an exceptionally strong freshman team this year and the yearling squad from Oregon will take no chances on losing the game through over confidence.

Faculty Magazine Prints Reviews of Oregon Geography

The Commonwealth Review of the University of Oregon, edited by the faculty of the schools of sociology and education, and the departments of economics, political science, and history, has devoted this issue to an article on "The Coast Range Province" by Dr. Warren Du Pre Smith, professor of geology. Dr. F. G. Young, professor of sociology, supplements Mr. Smith's work with a review of the historical background of the region.

Dr. Smith deals with the geography of the coast region, giving an extensive survey of the topography, climate, position, and population. Dr. Young follows the development of the coast country from the time it was called the "Coast Range Province," to its present subdivision into the state of Oregon.

The geology of the coast range is detailed and a survey of the pretertiary and tertiary formations is given an important place in the article.

In dealing with the natural resources, the article discloses that the outstanding resources today are timber and fisheries. "Certain other potential or just beginning to be exploited resources will in time take a prominent place in the economies of the region," Mr. Smith writes, "but at present they are unimportant."

The soil resources are rated thus: dairy farming, truck farming, berry culture, bee culture.

"The actual and positive miner-

Campus Guns Leave For Town of Dispute

SH-H-H! The mice will play while the cat's away, so let's out with the truth. Whisper it, though: Sol's gone to Reno! What's more, he has not gone alone.

Steady, now, for it was only Si Slocum, Emerald manager, and Jack Benefiel, graduate supervisor, who accompanied Mr. Abramson on the Nevada trip yesterday. So of course 'tis not the quick dissolution of unhappy homes that occasioned the journey.

The annual convention of the Pacific coast intercollegiate press association is in session there this week and these three men will represent the University of Oregon at the meeting. On the return, they will carry at Berkeley long enough to witness the Oregon-California struggle this week-end.

al resources of this region include the following, in order of their importance: coal, road metal, agates, building stone, gold, petroleum."

It is the belief of the author that "the future development of this region will proceed normally and steadily along the lines already indicated by the present activities if we conserve by rational use the resources we now have, and this will be permanent if we so desire. On the other hand, if we give the commercial hog a loose rein the next generation will be left with a squeezed lemon."

Mrs. C. W. Williams To Talk Before Y. W.

Mrs. C. W. Williams of Portland will be the guest of the Y. W. C. A. cabinet this afternoon at its regular weekly meeting in the Bungalow at 4 o'clock, and will talk to the girls informally. Mrs. Williams is quite familiar with the Oregon campus, having often visited here before, and has always stimulated the interest of the campus women, in her former sojourns here. Mrs. Bruce J. Giffen is entertaining with a tea in her honor this afternoon at Westminister house. She will speak at the second Mass meeting of the Y. W. C. A. tomorrow at 5 o'clock in the Bungalow.

Dye

(Continued from page one) I must attend to," she smiled graciously.

"We started our assembly in July, 1894," she continued. "And from that time have never missed a session and always the state University has been there. In those glorious days Professor Thomas Condon brought his collection of prehistoric bones and his wonderful lectures. I see him yet, without a hat, his eyes shining, leading enthusiastic throngs to the rocks. Professor A. R. Sweetser, your distinguished botanist, a mere youth then, outran the gayest in his search for flowers. Joaquin Miller was there, with his long hair, his high boots, and his poetic jolly; and Irving Glenn, round and jolly, led our singing for several years. Lillian Tingle opened the first cooking school we ever had, in a tent—"

These words trailed away as once more Mrs. Dye was borne away from me, this time by her hosts.

Handball Doubles Tournery Enters In Second Round

New Drawings for Play Announced; Men Fix Own Time

Nothing startling happened in the first week of the donut handball doubles tournament except that some teams won and others were not so good and lost.

Sigma Pi Tau with Alton Gabriel and Harold Houser drew first blood in the series by defeating McGinnis and Hutchinson, Chi Psi, 21-10, 21-6. Prue and Llewellyn playing for Delta Tau Delta rallied after losing a set and beat Sigma Phi Epsilon's men, Frank Wilson and Don Dundas 12-21, 21-13, 21-9.

Phi Sigma Kappa, in the persons of Shaw and Ermler, beat Rogers and Erkenbrecher of Phi Kappa Psi 21-8, 21-12.

In the Kappa Sigma-Friendly hall games, the behemoths, Jack Bliss and John Morrison, took the not-so-big Marvin Cone and Palmer into camp 21-10, 21-10.

Theta Chi forfeited their match to the Alpha Beta Chi pair and Sigma Chi with Sorsby and Rice swamped the Bowery Boys' duet, Butler and Laird, 21-1, 21-2.

Sigma Alpha Epsilon with Hicks and Joseph beat Enke and Stew McDonald for Psi Kappa 21-9, 21-13.

The rest of the teams drew bytes and will play in the second round which is as follows:

Sigma Pi Tau vs. Sphinx, Delta Tau Delta vs. Phi Delta Theta, Phi Sigma Kappa vs. Alpha Tau Omega, Kappa Sigma vs. Sigma Nu, Alpha Beta Chi vs. Beta Theta Pi, Sigma Chi vs. Sigma Alpha Epsilon.

Teams are to arrange their own times for playing with Bill Sorsby at the handball courts.

Orchestras Needed by Admiral Oriental Line

Five-piece orchestras, composed of college boys, are needed by the Admiral Oriental Line to play on the steamers during their trips to the Orient. The general passenger agent of the Admiral Oriental Line, D. J. Hanscom, is on the lookout for college boys who might be interested in making the trip.

These trips enable the boys to see the Orient without expense and have popularized the American type of orchestra throughout the Orient, where they have been engaged in various hotels while the ship was in port. During the past few years the steamers have used approximately 145 different college orchestras, practically all of whom have orig-

inated throughout the Eastern and Middle Western states. Up to date they have been able to maintain a waiting list of suitable orchestras, but at present they have come to the point where the supply will not equal the demand.

Members of the orchestra in the University, and others interested in the proposition, may communicate with D. J. Hanscom, general passenger agent, Admiral Line, Seattle, Washington.

New W. A. A. Bulletin Tells of Sports System To Girls on Campus

The first number of a "Bulletin of Sports," a pamphlet put out by the Women's Athletic association, is being circulated by the sports committee. W. A. A. decided that a greater number of girls could be reached through the bulletin than any other way, and for this reason decided to publish it.

"The purpose of our Women's Athletic Association Bulletin is to explain our sports system to you and encourage every girl to turn out for sports," says Myrtle Mast, president of W. A. A. in the opening number. "You may work for a small 'O', and then for the highest award, a white Oregon sweater given by the association. Everyone that comes out has a chance to make a team if she works conscientiously. There is also a possibility of working from a second or third team up to a first team. Here is an opportunity for you; why not take it?"

The pamphlet outlines the fall sport program, explains what is necessary to be eligible for teams and for membership in W. A. A. It also gives details of the point system and how to gain extra points and tells of the work of the order of the "O".

Homecoming Is Lavish In Support of Webfoot

Homecoming and the Webfoot. They don't sound like synonymous terms but they are in one sense: they both made their debut on the same day. The Webfoot supported Homecoming and Homecoming supported Webfoot! Douglas Wilson, business manager of the new campus magazine, is quite well pleased with the sale on the campus outside of regular subscriptions. He started with 500 copies and has approximately 50 copies left.

He announced that there would be a sale in the near future of these extra copies. The place will be definitely decided upon later although it will probably be the Co-op.

Due to the fact that 1000 subscriptions were necessary before the magazine could materialize, the first issue was put out in less than two

weeks. This rush will be eliminated in the succeeding issues, and a copy, as good as careful work can make it, is assured for next time.

A subscription for the remaining five issues may now be obtained for \$1.00, it was announced.

Dr. Yocom Conducts Biological Seminar

Seminar for the graduate students and faculty members of the biology department was conducted last night by Dr. Harry B. Yocom, professor of zoology. His subject was "Factors Influencing the Rate of Reproduction in Protozoa."

These seminars are held every two weeks in the blue room of the Woman's building. At the next meeting R. R. Huestis, assistant professor of zoology, will speak on "Secondary Non-disjunction in Drosophila," or certain activities of fruit-flies. Dr. A. R. Moore, head of the department of zoology, spoke at the first seminar of the year on the subject of "Animal Luminescence."

Yell-Kings

(Continued from page one) ed to the rooster's repertoire. The last two are no longer standard.

Rally ideas came thick and fast, and in 1910 "Beauty" Robinson, who spoke at the Stanford rally in the Armory last Friday night, originated the idea of a "Smokeless Smoker." In those days the smoker was held the night before the annual "Alumni game" instead of the present plan, which presents the smoker to alumni and seniors the night preceding the Homecoming game. Robinson and his assistant, Luckey, also get credit for a spring rally preceding baseball

games and track meets. This has long since been discontinued.

"Busher" Brown was elected yell king in 1911 and since his time little variation has been made

to Oregon rallies. The burning of the big "O" on Skinner's butte this year, instead of the annual bonfire was perhaps the most radical change since Alton's time.

A DRAMATIC STORY of love with a background of war—a picture filled with tears and laughter—tense, thrilling, appealing.
