

**Dramatic Class
To Present Play
By Oscar Wilde**

**'Lady Windemere's Fan'
Set for Thursday
And Friday**

**Vivacity, Color, Modernism
Will Be Featured**

Elegance, English aristocracy, magnificent dresses, stunning women and musical atmosphere will be woven into Oscar Wilde's play, "Lady Windemere's Fan," one of the most popular social satires of the stage, which is to be presented Thursday and Friday evenings by members of the dramatic interpretation class at Guild Theatre.

The play will not be unique. All the gruesome futurism and eccentricity featured in the recent production of R. U. R., will be supplemented by a contrast, giving play to vivacity, color, and modernism. From a glimpse into one of the rehearsals, there is every reason to expect some unusually good character work this week end.

The leads are difficult to pick out, since each member of the cast is making his role a lead. Mary Duckitt will switch from the position of stage manager to the role of Mrs. Eryllynne, an outstanding character lead. A Chanel designed gown will be worn by Mrs. Eryllynne in the second act, and an elaborate Chinese negligee will be employed in the costuming for the fourth act.

Lady Windemere is being played by Helen Allen and opposite her is Merrill Swenson in the role of Lord Windemere. Hugh Logan, as Lord Darlington, provides the eternally interesting third party. Listening to rehearsals, one wonders just where true Oregonians ever learned the artistic inflections of the Englishman's speech.

Harriett Hawkins, as the Duchess of Berwick, is able to fondle her long rope of pearls in a manner that corresponds perfectly to the tone of voice which would be used in a duchess's role.

There is a freshness, ease, and an unusual interest shown by all the members of the cast, which, coupled with the colorful staging and musical background, is indicative of success.

Tickets may be secured at the Guild Theatre box office today and reservations may be made by calling 142, according to J. Alden Woodworth, business manager. The box office will be open between 2 and 5 o'clock Tuesday, Wednesday and Friday.

**Oregon Comes Out
Victorious in Meet
At Corvallis Camp**

Johnny Anderson, speedy swim merchant from Bridgeport, Connecticut, broke a Pacific Coast record and was the biggest factor in Oregon's 44-25 victory over Oregon State last Saturday at Corvallis.

The O. S. C. relay team set a new

Pacific Coast record in the four men event with a mark of 1:06.3, one tenth of a second better than the record made by Stanford in 1926. Anderson's record was made in the 50-yard dash which he flashed off in 25.6. He made a new mark in the Pacific Northwest 100-yard dash, but this was not allowed because it was not made in an American Athletic Union meet.

The first event of the meet, the relay, put O. S. C. ahead 6-0, but it was not long until Oregon had the lead. In the 50-yard dash Anderson barely nosed out Johnson of Oregon State in an exciting race.

Charles Silverman won the 440 easily, coming in a half length ahead of Hoover, O. S. C., distance man. Other Oregon first were Smith in the 200 yard breast stroke; McAlpin in the 150 yard back stroke and Silverman in the 220.

**First Earth Is Turned
By Dr. Hall, and Work
On New Dorm Starts**

Actual work of excavating on the property for the men's new dormitory began at 10:30 yesterday when Arnold Bennett Hall, president of the University, turned the first shovel of earth for the project.

A group of University officials witnessed the ceremony, including Karl Onthank, executive secretary of the University; Lewis Johnson, comptroller; Edna Datson Davis, director of the halls of residence, and Dean Elmer L. Shirrell.

The excavation contract has been let to A. C. Mathews. The dormitory will be erected on the western half of the block between Fourteenth and Fifteenth on Onyx and Emerald, across from the tennis courts.

Lawrence and Hosford, architects, are now advertising for bids on the general building contract.

**Rooks Down Frosh
In Final Hoop Contest**

In their last hoop game of the season, Saturday night at Corvallis, the duckling eagles lost to the Aggie rooks in the final minutes of play, 26 to 23. The score was tied five times throughout the tilt. Frosh basketeers led at half-time, 15 to 10; but in the last period the rooks became "whirling dervishes," according to press reports, and engulfed the Oregon infant with an avalanche of baskets that finally decided the game. Dvorak and Olinger were high scorers for the frosh with nine and seven points respectively.

**Coach Leslie Meets
Duckling Batterymen**

Freshman battery practice started yesterday when about a dozen pitchers and catchers reported to Coach Spike Leslie in McArthur court. Leslie has disbanded his frosh hoop squad and will now turn his attention to yearling diamond activities.

A general call for freshman baseball will be issued about March 1, according to Leslie. At present he wants the pitchers to begin limbering up their arms to be ready for regular practice later.

The frosh will work out indoors in the Igloo for a while, until the entire squad is out and batting practice is instituted.

Faculty

(Continued from page one)

year will avoid any pronounced trend toward narrow specialization and will represent rather an introduction to a field of knowledge broader in scope than any present department, while at the same time serving as an apprenticeship in methods appropriate to any field of investigation.

Heretofore the college has been divided into departments and students would choose a major from these, as in English, mathematics or geology. The departments will continue but will only have actual jurisdiction over students during the last two years and in graduate work. The college departments, for the purpose of facilitating the new system, will be affiliated into groups. Group one will be language and literature; group two, social science; group three, mathematics and physical science; group four, biological science. It is from these four that the students will select three-year courses from different groups. If they register in a professional school, they will fulfill the lower division requirement in their school, and take two-year courses from different groups.

For each of the four groups a chairman appointed by the president and a committee representative of all departments in the group are charged with the task of formulating a lower division curriculum.

The proposed legislation will necessitate a change in the present advisory system for first and second year students. A committee on admissions will be organized to correspond with prospective students before they come to the campus

and endeavor in so far as possible to give them friendly instruction and advice that will enable them to make important decisions so that they can be advised properly when they arrive on the campus. After arrival they will be assigned to the chairman of the group or the dean of the school in which they have indicated their principal interest and this chairman will distribute them to individual advisers who have been selected for this particular work by reason of their special humanistic qualifications.

A technical adviser will be provided by the registrar's office, and simplification of the registration and keeping of grade records is expected to be carried out.

The four groups will be made up

of subjects as follows: Language and literature; English, Germanic languages, Greek, Latin, romance languages. Social sciences; economics, history, political science, philosophy. Mathematics and physical sciences; mathematics, physics, chemistry, geology, geography, mechanics and astronomy. Biological sciences; animal biology, including physiology, plant biology, including bacteriology and psychology.

The new plan is expected to have a great effect on the present foreign language regulations. While it will still be possible to obtain a bachelor of science degree without foreign language, several departments will impose this requirement. Entering

students will be told of this, and advised to plan their courses accordingly.

Members of the committee drawing up the plan are Percy P. Adams, Eric W. Allen, John F. Bovard, C. V. Boyer, Edmund S. Conklin, Ed-

ward H. Becker, Edgar E. DeCou, F. E. Folts, John J. Landsbury, A. R. Moore, Earl M. Pallett, P. A. Parsons, H. D. Sheldon, Warren D. Smith, and O. F. Stafford. This group represents the deans of schools and heads of departments.

SEEK YE NO FURTHER, DIOGENES . . .

This jobbie Diogenes was a Greek who left his fruit stand for the commendable purpose of questing for honesty by good old-fashioned lamp-light. And now, loud and ever clearer, rings the cry from the housetops: "Diogenes—throw away your lantern . . . here's an honest cigarette! Have a Camel!"

Camels have but one raison d'être—to pack the smoke-spots of the world with the "fill-fulment" every experienced smoker seeks. Fill your own smoke-spot with a cool cloud of Camel smoke, and hear it sing out—"Eureka!" (from the Greek, "Eureka," meaning—"Oboy, here 'tis!")
