WEDNESDAY, FEBRUARY 22, 1928

LITTLE BLUE EYES LEARNED IN SUNDAY SCHOOL THE OTHER DAY THAT YOU CAN NEVER GO TO HEAVEN IF YOU TELL A LIE.

She says she doesn't care any way, because it would be awfully lonesome up there with only George Washington.

"ANGLE WORM'S REVENGE" FACES UNEXPECTED DELAY

Publication of the famous serial, "The Angle Worm's Revenge," was halted today when the author, I. Scream Cohn, in a fit of rage ate up the last chapter, a description of an apple orchard, to appease his appetite. When he remembered that there were caterpillars on the apples, he grew alarmed and called the University doctor.

Some of the papers are said to have lodged in his throat, but at a late hour this afternoon, men who were trying to spear them with a gaff-hook said that none of the papers had been recovered.

Subscribers of the Emerald, fearing that the Angle Worm's Revenge could not now be published, have besieged the Emerald office threatening cancellation of their subscriptions. Mr. Cohn is said to be in grave danger of mob violence as he is being protected by the Eugene police force.

Prudent Precautions For a Lean Year

IN accordance with immemorial tradition, the University's new dormitory undertaking was fittingly observed when excavation was begun the other day. Ground-breaking ceremonies of this nature are usually auspicious. They mark the realization of a happily conceived vision. But instances may occur when actually they are portentous.

When President Hall turned that first shovel-ful of earth over, the University practically embarked on a program whose ramifications will touch every corner of the organization. There is nothing startling in that; few projects do not extend a certain amount of influence that far. But the dormitory plan will inevitably overturn the student living situation as it has been known for many years. For with the dormitory accommodations comes a problem of delicate adjustment among the fraternities or else they will suffer.

Many of the freshmen who come down to the University next fall may never know what a fraternity house-bill is because they will be boarded and housed by the University. That may be no loss for the new men, but it is a serious menace to the living organizations. It simply means that a spring pledging campaign must be waged with attendant overcrowding, or that a method of introducing the proposed rushing regulations gradually must be perfected.

As yet the matter is not at all in the clear. But it demands attention before the season has advanced too far. It must be acknowledged by University authorities that campus living organizations have been the solution and the salvation of the student living problem in the past. And a just recognition of this service to the University would dictate a considerate solicitude for their welfare during the crisis of adjustment. All fraternities will suffer financial distress if a moderate form of restricted rushing is not permitted.

The popularity of the present halls of residence as student living quarters shows that the new dormitory will not suffer for lack of patrons. Neither does it seem imperative to us that the personnel must comprise freshmen only for the first year. If a considerate policy is adopted by the administration, there is no reason why either a drouth of pledges or a shortage of men for the dormitories must ensue.

We Have With Us Today—The Cheat

WHY do students cheat in examinations? What can be done to put a stop to the practice? The question is one which has been the subject of many remedial attempts but still remains a puzzler to students and faculty alike.

The more common procedure has been to try either rigid police methods during the examination period or to introduce the honor system. The result has been that the police methods have aroused the ire of student bodies as wholes and that the honor system has demonstrated that many students are without honor when it comes to writing examinations. Also, students balk at informing on their fellows who are not above cheating, a feature usually included in plans for honor systems.

For policing the classroom and the honor system, Edward A. Collier, writing in the University of Denver Clarion, would substitute student loyalty to the professors. This loyalty, he says, is to be created by the professor making himself a "good fellow."

Mr. Collier leaves it to his readers to figure out how this loyalty to the professor lifts the students to a plane from which they will not stoop to cheat when the "good fellow" gives them a difficult examination. Perhaps it is intended that the teacher become so good a fellow as to give an examination that even the poorest of students could pass without more than half trying.

It does sound interesting but we are afraid it will not work. We have known professors who were "good fellows" and we have seen cheating carried on in their examinations.

It is said that the policing of a classroom causes cheating on the part of students who would not do so otherwise. Such may be the case with a few. Most students who cheat do so because they do not have the requisite knowledge stored away in their brains and it is a resort to the sole means left to their disposal by which they can make a grade at the last moment. When a student is reduced to cheating, he is not likely to stop and consider whether he has a personal like or dislike for the particular instructor giving the examination.

Some day, perhaps, a genius will come forward with a plan that will put a stop to all cribbing. For the present, or at least as long as grades are what the average student strives to attain, it seems that such a plan will have to be a scheme which will guarantee the student's learning enough that he will no longer feel the necessity to cheat. —W.C.

Floyd Dell Lectures On Campus March 6

Floyd Dell, author and journalist, who was to lecture March 7, for the A. S. U. O. lecture series, notified Jack W. Benefield, graduate manager of the University, that he would not be able to lecture on the date set because of his travel schedule, but will lecture on March 6, at the Woman's building, instead.

FAMOUS SAYINGS OF FAMOUS PROFESSORS

Dr. Edmond S. Conklin: "By reason of the structure of the eye it is perfectly correct to see double without violating the Volstead Act." (What a grand alibi some of our friends will have now.)

"Not a coffin; a carload," said the Chicago gangster as he turned his machine gun on the crowd.

Reinhart, prof. in baseball coaching, has at last devised a method whereby he wakes the students and teaches them at the same time. Demonstrating with a piece of chalk how to throw the ball, he lets the missile fly, deftly hitting the sleeping student on the forehead, arousing him to the delights of the class.

The victims of this delightful system are usually the snoozing Deltas in the front row who are always weary from the long jaunt in from the farm. (Country estate; excuse us.)

ODE TO A FRATERNITY BROTHER

The Sig Eps have no "Lingerie Department" or "Hardware Department" and wish that central would be more careful in calling McMoran & Washburne's, whose number is 2700, much like the Sig Ep number 700.
