NUMBER 103

## Webfoot Golfers Prepare For Coast Meet

### Divot Digging Should Be Made Minor Sport; Huskies Here Today

By RICHARD H. SYRING  
Sports Editor

As a reward for having turned in the best scores in a 36-hole medal tournament held at the Eugene Country Club last Saturday afternoon, Edward Crowley and Robert Giffen will represent the University of Oregon at the first Pacific coast conference intercollegiate golf title play on the Lakeside course of the Olympia club in San Francisco, Thursday and Friday, April 19 and 20. Competing in a field of 12 contestants, Crowley and Giffen made the 36 holes in 77, 78, and 81, 83, respectively, John Gray with a 83, 84, and Dick Schroeder with a score of 84, 84, were runners up. \* \* \*

Neither Crowley or Giffen are new men in the Webfoot golf circles, being members of last year's successful team. Crowley was a member of the two-man team with Lloyd Byerley which was defeated in the finals of the best-ball team match by "Chuck" Hunter and Barney Savery last year. It was at this same tournament that Byerley won the Northwest Intercollegiate singles and Crowley tied "Chuck" Hunter for third. \* \* \*

This afternoon will see "Chuck" Hunter and Edgar Wheaton, University of Washington's golf team, arrive in Eugene for several days of practice matches with the Webfoot team on the Eugene Country club course. Hunter, by the way, is one of the most finished golfers on the coast, having been a finalist in the Oregon, Washington and California tournaments last year. He was a medalist in the Western Amateur play-off held in Seattle last summer.

The two Husky divot diggers will accompany the Webfoot pair south. They will probably leave on the Shasta Monday noon. \* \* \*

Leaving early as Monday will give the northern golfers two days of practice before the tournament opens. According to Ed Crowley, the Lakeside course is a long, beautiful, hazardous set of nine. This initial golf tourney will have representatives from nearly every school in the conference. Bob Taylor and Hugh Fitzgerald, O. S. C.; Eddie Meyerberg and Herb Eleischaker, Stanford, and Julian Kahn, California; comprise the majority of the participants. The University of Southern California will enter a team and there is some possibility that W. S. C. may send one representative. \* \* \*

Two days of play will be in the form of a 54-hole medal tournament with 18 holes scheduled for the first day and 36 on Friday. The two outstanding contenders for single (Continued on page three)

Out of Federal Courts**

### Equalization Fee Left In McNary-Haugen Bill Passed by U. S. Senate

(By United Press) WASHINGTON, April 12.—The Haugen farm relief bill, containing the equalization fee object proposed by President Coolidge in his veto of the bill last year, passed the senate today.

The bill would establish a government organization for the orderly marketing of surpluses. Indications are that if it reaches the White House in its present form it will be vetoed by President Coolidge.

The final vote in the senate was 53 to 23.

### Girls' Saloon Is Leap Attraction

### Barroom Bust Assures Pretzels and Soda

The Malamute Saloon will look like a Wednesday night prayer meeting compared with the Hendricks Hall dancing room one week from this evening, on April 20th, the third feature on the Senior Leap Week program will take place.

Following the opening of the "no date when you come, but date when you leave dance" on Thursday night, and the Cat-Astrophe dance Friday afternoon, the peak of the entertainment will be reached and Bar Room Bust will be reversed to a Busted Bar Room when the senior class staggers homeward.

Pretzels and—soda pop will be the main attraction. And a bar—a real B. P. (Before Prohibition) bar will be the most popular piece of furniture. Between pretzels and soda pop the couples will give each other support in the recreation of dancing. The music box will be in the form of a four-piece orchestra, which will give atmosphere as well as syncopation.

Crazy words, crazy tunes, crazy posters, and crazy clothes will be motifs of the evening, says Iris Saunders, who has charge of the Bar Room Bust plans.

The directorate for the Leap Week has had another meeting and all plans are reported to be leaping ahead. Marian Barnes is chairman. She urges all senior men and women to remember that at the dance Thursday all dates must be made—none before or after.

Gay and catchy posters will bedeck the campus next week in honor of the annual event. Hope Crouch and Mary Johnson compose the committee working on them.

### Levine Case Settled Out of Federal Courts

(By United Press)

WASHINGTON, April 12.—The government suit against Charles A. Levine, transatlantic flyer for surplus war material deals, has been settled out of court for \$150,000, it was learned today at the department of justice.

### Governor Al Smith Leaves on Vacation

(By United Press)

NEW YORK, N. Y., April 12.—Governor Alfred E. Smith left late today for a two weeks' vacation at the Biltmore Country club at Asheville, N. C. He was accompanied by William F. Kenney and his boyhood chum, James Riordan.

Two days of play will be in the form of a 54-hole medal tournament with 18 holes scheduled for the first day and 36 on Friday. The two outstanding contenders for single

### 'Big Train' MacDonald Has Plenty Of Speed; Career Begun in East

As a speed ball pitcher, Oregon has an outstanding performer in the person of Reynold MacDonald, who has been called the "Big Train" of this year's diamond squad. "Mac" is the huskiest of the 1928 mound-men, weighing around 188 pounds, and when he bears down on a pitch the batter is frequently aware of no more than a streak of white across the plate.

Reynold made emeralds last year in both basketball and baseball, playing guard with the hoopsters and pitching for the baseball team. Mac came to Oregon from Buffalo, New York, where he graduated from the Masten Park high school of that city. In high school he played four years with the football aggregation and is about six feet in height.

Mac came to Oregon from Buffalo, New York, where he graduated from the Masten Park high school of that city. In high school he played four years with the football aggregation and is about six feet in height.

### New Fund Is Set Aside For Scholarships

### Underclassmen To Be Recipients Under Regulations

### State Committee Will Be Named To Solicit Donations

Scholarship funds providing aid for underclassmen whose personality, character, intellect and physique, together with practical experience in the direction of student affairs, giving evidence of the quality of community leadership, have been established by the University and are to be known as the Oregon Commonwealth Scholarships, it is announced by Elmer L. Shirrell, dean of men and member of the committee to administer the scholarship funds.

These scholarships are not primarily to replace other funds and scholarships, but are intended for underclass students for whom loan funds are not available, and who are so far removed from graduation and earnings that it is undesirable to encourage them to borrow extensively.

#### Group to Administer

A committee to administer the scholarships has been formed and consists of the President of the University, dean of men, director of athletics, chairman of the scholarship committee, the registrar, and one alumnus of the University appointed by the President of the institution. The present members of the committee are: President Arthur Bennett Hall, Dean Elmer L. Shirrell, Virgil Earl, Dean James H. Gilbert, Earl M. Pallett, and John C. Veatch, president of the alumni association.

President Hall will appoint a number of sub-committees to cooperate with the committee in administering the scholarships. These will consist of from three to seven members each, and the majority will be alumni of the University. These committees will be responsible for securing funds in their regions for the scholarships.

#### Expenses and Fees

Funds received by the University of Oregon Scholarships are made over to the University of Oregon and handled by the comptroller, who is a bonded financial agent. The funds will be disbursed only upon the order of the committee.

The amount of any scholarship is determined by the committee and may vary in accordance with its judgment, depending upon the need of the individual and the availability of the funds. Scholarships awarded for living expenses are to be paid monthly in advance; those for fees are to be paid upon the date fees are due.

#### Awards for One Year

Awards are ordinarily made for one year. The committee will formulate regulations, forms and procedures for making the awards, and will keep in touch with the recipients of scholarships.

The amount which has been donated to the scholarship fund has not been made public, but a considerable sum has been set aside for this purpose. Donations should be made to the Oregon Commonwealth Scholarship fund. Donors who wish to establish scholarships as memorials or for special purposes may do, however, and have them administered by the committee. Awards and scholarships cleared through this committee will be listed in the catalog, and will be recognized only if administered in this manner.

### Junior Men Asked To Help With Vod-Vil

An urgent call for junior men to appear at McArthur court Friday afternoon and all day Saturday to help build and paint scenery for the Junior Vod-Vil, has been issued by George Mason, chairman of construction work. Little or no response has heretofore been received and the work is progressing very slowly.

Several elaborate and beautiful scenes under construction have been temporarily shelved due to lack of workers, according to Mr. Mason. It is necessary to finish these scenes at once so that pictures may be taken of them to be used in publicity work, he stated.

### Here Rests Future of Junior Week-end

THE directorate which is in charge of arranging the entertainment for the big annual function of the junior class. Reading from left to right, the committee includes: Roy Herndon, canoe fete; William Haggerty, publicity; Mel Cohn, assistant chairman; Jo Balston, campus luncheon; Joe McKeown, general chairman; Agnes Petzold, secretary; Billy O'Bryant, junior vodvil; Ed Winter, junior prom; and William Eddy, campus day.

### Jesus' Way Is Foster's Desire

### Evolution Treated God's Own Process

"I recommend the way of Jesus to anyone who wants to march on into the future at the head of the column," said Dr. Allyn T. Foster, lecturer of the Baptist board of education, in his speech at yesterday's assembly. His subject was, "Does Evolution Dispose of Religion?"

"Is Jesus Christ a product of evolution? Suppose He is, we have Him just the same. The processes of evolution are God's. By no chance can they belong to the scientists. If Christ were a product of evolution He would still be the one altogether lovely, and chief among ten thousand. Somehow Christ was a revelation of God," the speaker declared.

"We describe things by accurate measurements and then by symbols, or first by symbols and then by measurements," explained Dr. Foster.

"God is not an Oriental potentate, wearing a tinsel crown and surrounded by His courtiers, but a cosmic God. He is everywhere, imminent and transcendent."

"We are with Him all the time. We do not lose God. We see Him in every reaction in the laboratory. God is not lost, but found," he said.

Some postulate constant improvement in mankind, and believe that they have but to sit tight and they

will go to the Elysian Fields, accord-

ing to the speaker, but they have

only to go into the laboratory and

hear a scientist speak on evolution

to know that there is a bloody strug-

gle going on everywhere. He quoted

the Biblical definition of sin as

"the transgression of law," and re-

marked that when an organism vi-

olates the plan of nature it pays the

regular cost of graduation.

Arrangements for the announce-

ments were completed yesterday,

and orders will be taken immedi-

ately. However, owing to the

length of time which is necessary

for the turning out of a good job,

the orders should be placed without

delay.

### Secrecy Hiding Stunts May Be Lifted as Time For April Frolic Nears

### Tomorrow you can say, "Tonight's the night," co-eds.

For tomorrow night at 7:30 the doors of the gym in the Woman's building will be opened to what promises to be the most entertaining April Frolic in April Frolic history.

Assurance of this comes from Frances Plimpton, general chairman of the Women's League event.

She got the tip from the heads of the four class stunts and the various committees for features, curtain acts, music, etc., all of whom have been working hard so that they can truthfully say it.

It is also hinted that a touch of humor will pervade the class stunts, although the birdies are keeping their knowledge of the stunts secret as yet. Rumor has it, though, that they will not be able to keep it out of tomorrow's Emerald.

"We describe things by accurate

measurements and then by symbols, or first by symbols and then by measurements," explained Dr. Foster.

"God is not an Oriental potentate, wearing a tinsel crown and surrounded by His courtiers, but a cosmic God. He is everywhere, imminent and transcendent."

"We are with Him all the time. We do not lose God. We see Him in every reaction in the laboratory. God is not lost, but found," he said.

Some postulate constant improve-

ment in mankind, and believe that they

have but to sit tight and they

will go to the Elysian Fields, accord-

ing to the speaker, but they have

only to go into the laboratory and

hear a scientist speak on evolution

to know that there is a bloody strug-

gle going on everywhere. He quoted

the Biblical definition of sin as

"the transgression of law," and re-

marked that when an organism vi-

olates the plan of nature it pays the

regular cost of graduation.

Arrangements for the announce-

ments were completed yesterday,

and orders will be taken immedi-

ately. However, owing to the

length of time which is necessary

for the turning out of a good job,

the orders should be placed without

delay.

### Bremen Flyers In Mid Ocean

### Three Intrepid Aviators Not Sighted

(By United Press)

NEW YORK, April 12.—Three intrepid aviators, flying into cloud and gale, were presumed tonight to be on the second half of their transatlantic flight from Baldonnel Air-drome to Mitchell Field, N. Y.

They started from Baldonnel at 12:38 p. m. eastern standard time today and should be over the Atlantic coast near at about 12:30 a. m., Friday, and at Mitchell Field at about 12:30 p. m.

At 12:30 a. m., or 24 hours after they started, nothing was known of their fate.

ST. JOHNS, Newfoundland, April 13.—Weather conditions at midnight, New Foundland time, were becoming more unfavorable from the standpoint of the three aviators attempting a westward crossing of the North Atlantic. Skies were lowering and the forecast indicated that gales were possible with rain and sleet.

The following morning will be filled by several exhibition tennis matches between stellar players, and golf matches with O. S. C. and Oregon competing. At noon the campus day luncheon will be held and an entertaining program has been arranged for this.
