

Journalism School Offers Master Work

Authority Given Dean To Grant Advanced Degrees

Expect Enrollment From Other Universities

The school of journalism has been authorized by the graduate council to advance its graduate work to major standing, and henceforth the school will grant degrees of master of arts and master of science in journalism, according to Dr. Arnold Bennett Hall, president of the university.

Beginning next year, additional seminars will be instituted in the school, and it is planned also to start some work in Portland open to college graduates only. A seminar in public opinion has already been established with an enrollment of graduate and honor students, and is proving successful, according to Dean Eric W. Allen.

Come From Other States

The expectation is to extend the graduate department next year when there is likely to be an enrollment of from six to ten graduate students, a number of whom will probably come from other universities. Applications from other states for admittance to graduate work have been frequent because the school here has been highly recommended by other universities. A portion of the enrollment will be made up of Oregon graduates, wishing to return for more work, or who can extend their work to five years.

Graduate Seminars Scheduled

Graduate seminars will include technical newspaper research, study of social and psychological backgrounds of newspaper policies and the place of the press in society, study of substance of the news and analysis of major questions of the day with reference to social control and public opinion.

The graduate work here will be developed in line with the investigations being carried on now by the national research council in journalism, of which Dean Allen is chairman, of all methods employed in journalistic research.

Professor Ralph Casey, now on leave of absence studying at the University of Wisconsin, is expected to be back at Oregon next year when the graduate work starts. He then will be practically the first man to have earned a doctor of philosophy degree through work definitely planned as preparation for journalistic teaching, Dean Allen said.

Dinner at Faculty Club

Male members of the romance language department will give a social dinner at the new Faculty club at Fourteenth and Emerald streets on Saturday night. Dining service at the club will begin tomorrow, and formal opening will be held on Friday night at 8:15.

'Power' Movie Today

Dr. Warren D. Smith, of the geology department, yesterday announced the showing of a three reel film on "Power" in Villard hall at 2 o'clock this afternoon. A short time ago a film on water power was shown, but this picture will be on power in general.

mental sculpturing. Lettered tablets will decorate the walls. In the center will be a pool surrounded by flowers and shrubs. At one end of the court will be a fountain, playing into a basin, which in turn empties into a pool over a miniature cascade.

Men's Houses List Sports for Spring In Meeting at Gym

Two Water Polo Leagues Will Start Competition On Next Tuesday

Intramural sports during spring term will consist of baseball, water polo, golf and tennis, according to Gilbert Hermance, who outlined plans at a meeting of the representatives of men's living organizations held yesterday in the men's gymnasium. Actual competition will start Tuesday with water polo as the attraction.

There will be two water polo leagues, one of which will use the international rules requiring a hard ball and five-man teams, the other enforcing intercollegiate rules.

Merrill Hagan will be in charge of the baseball tournament, entries for which must be in by Friday night.

Golf matches will be played on the Eugene Country club course. Carl Nelson will take the golf entries which call for a four-man team from each organization.

Each house will enter one doubles pair to fight for the tennis laurels. Edward Abernethy will supervise the tennis tournament as well as water polo. A mixed doubles tournament in which the entries are free will be held if enough interest is manifested.

Prof. Huffaker Aids In Making of Survey

Prof. Carl L. Huffaker of the school of education and H. R. Gould, superintendent of Eugene's public schools, have completed a building survey of the school system at Ore-

gon City. They have cooperated with Superintendent R. Kirk of that city in outlining a construction program for the next ten years. The work has covered a period of three months and has necessitated several trips to Oregon City for the two men.

Joint Meeting Slated For Theta Sigma Phi

Alumni and active members of Theta Sigma Phi, women's national honorary journalism fraternity, will hold a joint meeting at 4 o'clock, Sunday afternoon, at the home of Mrs. Eric W. Allen.

A program, including short talks by a number of the alumni, will be presented. Later in the evening an informal tea will be served by the active members of the group. Dorothy Baker, president of Theta Sigma Phi, will have charge of the arrangements.

Professor's Article To Be Used as Text

The chemistry department of the University of Buffalo has asked Dr. R. J. Williams, associate professor of chemistry, to send them reprints of the July, 1927, number of the "Journal of Chemical Education" in which his article on the "Ionization and Atomic Structure Theory in Organic Chemistry" was published.

The reprints will be used as texts in the advanced classes of chemistry.

Oregana on Time For 'Week-end' Says J. Nelson

Advertising Income to Cover Increase in Book Expense

Covers Should Arrive for Printers April 10

The Oregana has gone to press, assuring a Junior Week-end delivery, John Nelson, business manager, announced yesterday. Four hundred pages of material has been placed in the hands of Koke-Chapman Printing company of Eugene, so that work may go ahead rapidly.

North tar coated book paper in ivory shade, upon which the Oregana will be printed, has arrived and the borders for the entire issue have been finished. N. B. Zane of the art department has expressed satisfaction with the vivid red borders of modernistic design. Ostrich covers in black and tangerine with a university shield in gold have been ordered and delivery has been promised for April 10.

Although costs for the Oregana will exceed the original budget by \$700, the income from advertising has made a proportionate increase, Nelson declared. The business staff has been operating on a budget providing a \$1,000 margin.

Nelson left Eugene last night for Portland to get approval on advertising copy.

Geo. Otten Plans Landscaping of Skinner's Butte

Site to Include Memorial Of Former President Of University

George Otten, '11, of the University of Oregon, who took a degree in landscape engineering at Columbia university, looked over Skinner's butte last week with Mrs. Maxham, president of the Eugene Garden club, and Mr. Carl Washburne, member of the Eugene Park board. The landscaper to do the work on the butte has not yet been selected by the city council. The beautification of the Washburne, Jewett, and surrounding properties on Fairmount Heights, including the little park below the Washburne home was accomplished by Otten.

He has presented a landscape plan which would add to the beauty of the campus without changing present shrubbery and trees to the uni-

Male Equipment Used by Feminine Baseball Players

Class Teams to Be Chosen In 3 Weeks; All Women Urged to Try Out

It is still called girl's baseball though one wouldn't recognize the lady-like sport by the masculine equipment the women's physical education department has for its baseball players. Their diamond that used to have 35 feet from base to base has stretched this distance to 60 feet "bigger'n ever."

They have mits similar to the mits big league players use, and the catcher wears a catcher's mask to protect her against the oncoming of the new nine-inch ball, slung in an overhand fashion by the pitcher. The new ball has outseams instead of inseams, this seems to be the only offensive part of the whole game, as even the rules are the same as the ones the boys use.

The girls steal bases, they always did that, but they are learning to slide for them in order to cover the 25 added feet between bases that wasn't there before. It's lots of fun sliding in the sawdust field by the Woman's building, just ask one of the players.

Practices are held regular school days from 5 till 6. The seniors are scheduled to play on Monday, the juniors on Tuesday, the soph on Wednesday, the frosh on Thursday, leaving Friday for everyone who wants to come out. "It makes no difference whether you have played before, come out and learn if you don't know how," May Moore, head of baseball announced. Three practices a week are required in order to make one of the teams, which will be chosen in about three weeks. Everyone attending regular-
