ETHYL

HAS NO SUBSTITUTE

No other gasoline will give the performance of Ethyl!

Ethyl compound was perfected after seven years intensive research in the great laboratories of the General Motors Corporation—after the testing of more than 33,000 separate formulas. Prior to its discovery, high compression motors were commercially impractical while today, as the result of Ethyl, high compression performance is available in more than 68% of all automobiles manufactured. Fifty of the greatest oil companies in the world have endorsed Ethyl and add it to their finest gasoline.

Ethyl gasoline will improve the performance of any car. With Ethyl, carbon deposits actually increase the power and efficiency of old style motors, and to secure maximum efficiency from modern high compression motors, Ethyl is an absolute necessity. The many advantages of Ethyl are easily proved in your own car—greater speed, power and acceleration, easier driving with less gear shifting in traffic and on hills, and the elimination of the destructive, annoying vibration that hastens the depreciation of your motor.

Do not be misled by imitators who attempt to capitalize on the recognition given Ethyl. Your protection is the genuine Ethyl trade mark on every Ethyl pump. Try Ethyl today for a new thrill in motoring.
