Bachelors Get Pooch
* * * * *
Pup Offers Services

After many months, during which Bacheloron has found itself without a mascot, a pup has appeared upon the scene. The dog has been christened "Ded," and looks as if it will become the laziest canine on the campus, provided the Phi Sigs don't get another pooch.

"Ded" is a thoroughbred Italian pretzel hound and is but a few months old. It strayed in the Bacheloron fraternity yesterday about 2 o'clock and offered to serve as mascot.

BRILLIANT IDEA OF FRIGID STUDE ENDS
(Continued from Page One)
in leading a campaign to take up a collection for the purpose of purchasing for Harold a nice new pair of pajamas, safely constructed of asbestos.

STUDENTS MAJORING IN GEOLOGY will be the guests of the Condon club and the geology department staff at an informal "mix" at the home of Dr. Warren D. Smith, head of the department, at 8 o'clock Saturday evening.

Movies

Evelyn Shaner, Editor

AT THE COLONIAL—

An underworld mystery concealed under one dress suit, a plot that has more thrills than a subway wreck, a night club raid and a Chicago gang war lumped together; that's "Spies" at the Colonial theatre. As a continental intrigue drama it is decidedly "there," and as a mystery puzzle it also has appeal, not to mention the beautiful and alluring women and the handsome bewhiskered Romeos of Europe's smart resorts.

AT THE STATE—

"Molly and Me" at the State gives Belle Bennett another grand opportunity to do her stuff in character portrayals. As one of a pair of troupers, with Jo Brown as the other half she gives a very convincing performance in her usual big time way.

AT THE McDONALD—

The bill at the McDonald is well rounded this week. George Bancroft in "The Mighty" is a big thrill and the newlyweds, Mr. and Mrs. Frank Alexander have returned to give an organ and piano duet and show the college folks what real romance is like.

AT THE REX—

"Senor Americano" at the Rex introduces Ken Maynard in a new

light as a "talkie" star. The title is Spanish enough, by wait 'till you see Ken in those hot dueling clothes.

AT THE NEW HEILIG—

"Pleasure Crazy" at the New Heilig is a story of modern jazz life in the big places. There are lots of ways of being naughty and this show seems to have hit most of them.

Boulder, home of the University of Colorado, voted last week to have Sunday movies. Several other college towns in the United States are waging fights to allow the showing of films on the Sabbath.

Ousted as principal of New Albany (Indiana) high school two years ago, Charles B. McLinn was elected mayor of the city last week, and is now in a position, if he desires, to reverse the tables on the board of education.

A wedding procession on its way to the church in the village of

Evezman, Yugoslavia, recently was turned into a panic when a meteor 18 inches in diameter fell among the guests, killing a man and injuring another. The wedding was postponed.

During the last four years 101,360,000 feet, or over 19,000 miles of film have been viewed by the Kansas state board of motion picture review, composed of three women, and out of 29,650 reels inspected, only 30 were disapproved and changes ordered in 1,211.

NOTICE!

Sunday canoe rates cut to week day schedule, during December and January.

THE BROADWAY, INC.

We Are Not Beginners But Are the---

PIONEERS In Lens Grinding

In Eugene and in Oregon Outside of Portland

This is the third time we have completely changed our lens grinding machinery the better to meet the newest needs in newest lenses.

Our new machinery and equipment for grinding, surfacing, polishing and edging ophthalmic lenses is completed and ready to serve your optical needs quickly and accurately. We know lenses for we have been grinding them for many years; we know eyes for fitting them with the right glasses has been our exclusive business for a lifetime.

We invite the public to see this up-to-the-minute grinding laboratory, the only one between Portland and San Francisco of this kind.

We specialize in the latest patented ophthalmic wide angle, precision lenses, that are clear to the very edge. We have the exclusive franchise and are the only licensees for making and prescribing these Tillyer lenses in Eugene.

These Tillyer lenses are nationally advertised as the most scientific lens made. The American Optical Company owns the patent and is the largest manufacturers and dispensers of ophthalmic lenses in the world.

They are capitalized at many millions of dollars and have wholesale branches established in 156 cities of 50,000 population or over in the U. S. and Canada.

Our shop foreman and expert grinder is Linn Euley, who was employed by us in the same capacity for nine years at our former location at 881 Willamette street. This is no new or untried venture with us but a continuation of the most dependable and efficient prescription service, the excellence of which only long experience and expert knowledge of eyes and lenses can give.

The lightness, brightness, efficiency and appearance of lenses depend on the glass used, how they are designed, the machinery on which they are ground, the skill of the man operating the machines, and the accurate adjustment of the frames or mounting used for holding them.

Our TELLYER lenses are ground from imported and domestic optical glass, carefully selected and inspected—designed to harmonize with your features—ground on the most modern machinery known—finished by expert lens grinders—placed in a mounting careful study shows is the best—and fitted by skilled specialists, all under one roof and an individual, undivided responsibility and a system that approaches perfection because it is the development of many years of practical as well as theoretical experience. Easy to buy, easy to wear, and no fancy prices.
