Faculty Supervision

WHEN the Emerald recently asked political candidates in the student body election what sort of a balance should be maintained between done by the A. S. U. O., all said that the faculty fast and none have been available for several days. should occupy an advisory capacity and leave the actual carrying out of details to the students themselves. This seems to be the ideal situation, but unfortunately the students who have been in charge of activities this year are outspoken in saying that this has not been the case.

Chairmen have been appointed for special weekends and traditional days. They sharpen a lot of pencils and work up ideas for the event only to find that members of the faculty have already taken care of important details and some even tactlessly own activities if they find their hands tied and the work taken out of their hands? It can only die and evidences have been noticeable of such an undesirable feeling creeping into student affairs this

a bad thing, but faculty direction is bound to have only one result—they are going to have to handle all the big affairs themselves because they will find students have suddenly lost interest in chairmanships which mean nothing.

A faculty advisor for a week-end or conference is desirable because students assuming the various jobs without previous experience at them need suggestions and cautions from those who know the problems. But for this advisor to take it upon himself to make all the decisions and complete all major plans is a step too far.

Some balance must be set up if the interests of the University are to be served best. Care must be taken or student activities will degenerate into faculty activities with some puppet student chairmen going through the motions of carrying out orders laid down by persons ostensibly only ad-

Political Whispers

POLITICS as a career for university graduates is recommended by Alfred E. Smith, would-be president, and chief exponent of moist morality. The former governor of New York state says that the college man today prides himself on not knowing anything about politics, while he should be ashamed of himself for such ignorance.

"Al," he of the Bowery vocabulary and striped pants, probably is speaking from his experience political meanderings and machinations. He is the opposite, on the contrary. Everyone who dabbles in the college variety at all, and their number is legion in spring term, prides himself on how full

The college man meets a friend on the street. "I hear Zilch is lining up the Alphas and the Omegas. Whatever the advantages of that first preschool week, it is certain that high school graduates are impressed more with rushing talk than entertain the crowds at a wellwith psychology examinations. Dinner dates more known beach in Portland this sumthan lectures fill freshmen programs. The only important common interest of these first-year strangers is pledging. That is enough to repeat.

The only important common interest of these freshmen is their common interest in fraternities and sororities.

Everything is in favor of it. There is no balance of upperclassmen. Those few who do come back for the first week spend all their time rushing. Emphasis, to repeat again, falls naturally on pledging. And perhaps the worst ill-effect is on those men and women who do not get their bids.

While University officials review the reaction to suggestion for deferred pledging, may they also review the effects of Freshman Week.

The economy of co-operative buying is evident from the report made by one of the representatives on the buying of coal in carload lots by several fraternities last winter. It was reported by a committee at an earlier meeting that about ten per cent was saved by these organizations. From the reaction of those present at the meeting, buying of this sort will be engaged in next fall.

It has been found that fraternity buying has not been uniform as far as prices and quantities of supplies are concerned. There has been a range in quantity buying from 25 cents worth of potatoes with college men and their knowledge of national to 50 sacks. The fraternities have not been paying equal prices for their quantities. Emerald Corner for Notables

This is the eighth of a series of interviews by the Emerald with prominent students on the Oregon campus.

Dukes may wait on tables in a night club, princesses scrub floors in a bank, and college graduates just out of school dig ditches. Why do they do it? They must live somehow.
