Instead they chipped in and put a copy on reserve. In the flyleaf of the book is written: "To the University of Oregon library this book is lovingly given. To philosophy students of free will and determination, who are guided by their instructors, we almost unintelligibly propose that it is almost unintelligible to cry that this book is so class be embarrassed by the demand to buy such a book during the last two weeks of a term." American Education too Objective, Says Swami Raimohan Indra Dutta

Calcutta Lecturer Visits Eugene on U. S. Tour; Makes Investigations

By JANET ALEXANDER

Eugene can boast of a distinguished visitor for the next fortnight in the person of Swami Raimohan Indra Dutta of Calcutta, India, who is delivering a series of lectures in this city.

A diminutive, modest-appearing man is Swami Indra, yet he possesses a most remarkable mind. In order to investigate the educational situation in this country, he is touring the United States by automobile, visiting every state in the Union.

"Education, as a whole," says Swami, "is too objective, and so subject to requirements that it almost defeats its own purpose. It should deal rather with the development of the soul."

Swami Indra received his A. B. degree from the National College of Calcutta in 1905, and in 1920, he took post graduate work at the University of California.

Literature was his major subject throughout the years of his academic training, and he is extremely well-read in modern as well as in classical literature. His favorite American author is Emerson, because the latter adheres to practically the same philosophy and conceptions as prevail in India.
