their laugh riot, "Check and Double Check," at the Heilig theatre. The film is loosely knit, but amusing tale built around the characters created by them in their radio broadcasts. Sue Carol, Irene Rich, and a dozen other screen personalities are supporting them.

"Common Clay" Is Gripping Drama

Bringing a stage play to the speaking screen and at the same time making it of absorbing interest and entertainment value to the audience might seem a difficult task, but Victor Fleming has accomplished it with his production of "Common Clay," with Constance Bennett enacting the leading role, starting today at the Fox McDonald theatre.

In a sophisticated and smart modern comedy, his first as a talkie star, John Barrymore comes today at the Colonial. Based on Ansley's play, "The Man From Blankley's," is a very high hat play on mistaken identity. Its humor is Dickensian.

When a man, supposedly hired as a dinner guest, arrives a trifle tipsy, and announces himself as a lord intent on being the life of the party, there follows an amusing series of adventures with the guests—an odd collection as Dickens ever created—and a love affair with the governess, played by Loretta Young.

The Colonial is bringing "The Man From Blankley's" to their theatre as a first run picture, but are not altering their admission policy.

The banks of G-E floodlights at Georgia Tech's Grant Field can be adjusted to illuminate track meets as well as football games.

G-E Floodlighting Wins Favor for Football - Hockey - Track - Baseball - Tennis

G-E floodlighting equipment has a winning record. Its victories are counted in terms of pleased spectators, increased attendance, satisfied coaches and players.

The development of G-E athletic-field floodlighting equipment was planned with every consideration for the fundamental and special playing conditions it must meet. That is why the big Novalux projectors give ample and evenly diffused light over the entire playing area.

The development of General Electric floodlighting equipment has largely been the work of college-trained men in the G-E organization—other college-trained men are largely responsible for the continuing leadership of General Electric in furnishing the many other products which bear the G-E monogram.
