Junior Vodvil at the Heilig

The annual junior class spree plays tonight, tomorrow matinee, and tomorrow evening. Plenty pep, color, and music. Better see it!

"Strangers May Kiss" at McDonald

Ursula Parrott's story, "Strangers May Kiss," in which glorious Norma Shearer again competes for the honors she so lately won in the "Divorcee," will continue today and Saturday at the McDonald.

The story deals with a modern girl who thought women should have the right to "love and ride away," but who found that it is not easy to forget when love comes along.

Robert Montgomery, Neil Hamilton, Marjorie Rambeau, and Irene Rich make up the supporting cast.

PARTY LINES HOLD AT NOMINATING ASSEMBLY

(Continued from Page One)
lators committee, to which the graduate manager will be added if the recommendation is approved by the students at the coming election, changes in the procedure of issuance of warrants for the payment of A. S. U. O. debts, and changes in the method of selection of candidates for editor and business manager of the A. S. U. O. publications.

Parties Remain Quiet
After a climax of parades and

rally dances Wednesday night and nominations yesterday, the two parties remained quiet and undemonstrative last night and probably will not resume intensive campaigning until next week. The situation, which has been unstable for the past two weeks, has assumed a more crystallized state, there being little evidence of a breaking up in either political camp.

Two sororities are alone among the "fence-sitters," and last night's reports from each were that votes in their houses would be split up between the two tickets.

The present lull in the battle, however, marks in some respects at least the pause before the storm, and the few days yet remaining before election will probably see a growing excitement and enthusiasm on the part of ardent student political geniuses.

Foreign Government Books Arrive at Libe

The library is now receiving a rather interesting series of interesting appearing booklets edited by the H. W. Wilson Co., of New York City. These official-looking booklets contain the government publications of every foreign country in the world since 1815, including all colonies.

Great Britain and France head the list, as would be expected, but the surprising facts discovered in the booklets are the number and pompousness of the government bulletins from small out-of-the-way countries never heard from unless indulging in a revolution. And the state documents of the various provinces of India occupy over a hundred pages in the booklets. Even tiny islands with few inhabitants very often have imposing lists of government documents.

When the library receives a series of these booklets they check all the documents and publications which are here, and return the list to the publishing company. After all the libraries have done this, a mammoth encyclopedia will be compiled, showing which libraries have which volumes. If, then, any student desires one of such government documents, he knows where he can find it merely by looking in the encyclopedia.

DR. MEZ TRANSLATES ESSAY ON ECONOMICS

(Continued from Page One)
sity, dean of American economists, who has written an introduction for the translation. "I am glad to pay this tribute to my old friend Boehm-Bawerk," he wrote Dr. Mez, "and glad to have so excellent a translation of this excellent piece of work put at the disposal of your readers."

Concerning the essay, he says: "This paper is noteworthy in two ways: It re-states the main conclusions of the author on the distribution of wealth, and in some ways amplifies them. It also points out the manner in which social conditions and currents may modify them, while yet the reasoning on which they are based is not impugned."

Real Understanding Shown
"In this respect, there is shown a clear understanding of the realities of life, and of the manner in which the underlying dominant forces may be deflected, concealed, sometimes even permanently altered in their workings by those on the surface. The whole is to be commended to the serious student of economics as a model of systematic exposition, of thoroughness in method and treatment, and of noble spirit."

Mrs. Warner Back From Visit in East

Mrs. Gertrude B. Warner, donor of the Murray Warner Oriental art museum and a friend of Oregon students, has just returned from the East.

On her return while passing through Portland she appeared before the Northwest convention of the Rotary club. She made an appeal for a scholarship fund to be raised to send two American students to attend school in Japan and to arrange for the attendance of Japanese students to American universities.

Mrs. Warner's proposal was greeted with a favorable reaction and it was suggested that instead of two, perhaps five students could be sent. The International Rotary clubs are very active in promoting world friendship and while no definite action was taken it is hoped that in the near future some arrangement can be made for an exchange of students.

ESKIMO TRIBE CAME DOWN FROM NORTH

(Continued from Page One)
so much more abundant than that they had found on the Asiatic shore that they never returned.

"Other Asiatics came and found the food equally bountiful. They remained, multiplied, and moved on, always following the shore line. This line is deeply indented, and each indentation forms a haven for sea life. They also served primitive man as a haven from storms that lashed the Pacific coast nine months of the year. Because of its safety and food supply, the coast formed the only logical pathway which these primitive men followed," Doctor Hodge concluded. "Thus it is my belief that Asiatic man did not go inland to become the ancestor of the Eskimo but turned southward along the oceanside."
