Smith Flays Condemnation Of Nippon Attack as Unjust

"I haven't any patience with a too ready condemnation of Japan," said Warren D. Smith, professor of geology and geography in regard to the present Chinese-Japanese war. "While I think the activities on the part of the Japanese have gone too far, I think that Japan has a real equity in the situation."

"My personal sympathies are with the Chinese because Manchuria as far as I know has been considered a part of China, though the Manchus have in times past ruled over China. However, the Japanese point of view cannot be neglected. She has been forced to go somewhere, not only for land but particularly to get coal and iron both of which she is in great need. Harvard-Oxford Forensic Encounter To Be on Radio

The argument, between the two schools 3000 miles apart and separated by the Atlantic ocean, will be rebroadcast in this country to the national hookup of the NBC, and it is probable that the British Broadcasting company will do the same in England.

The event, the first of its kind ever to be held, will also be the first debate between Harvard and Oxford since 1925.

Five All-Campus Tourney Crowns On Victors' Heads

Fred Deuel Latest To Take Title by Capturing Tennis Finals

Five of the six all-campus tournaments which began early this term are in possession of champions, with the title of one still undecided.

Fred Deuel was the last to don a crown when he took the tennis singles tourney by defeating Harlan Thompson.

Warren Cress, by conquering Deuel, captured the handball singles scepter. Together, Cress and Deuel are in possession of the handball doubles championship by virtue of winning from Sol Scheider and Al Schneider.

Bob Near showed his heels to the divot-diggers this fall and breezed in with the donut golf gonfalon. The followers of the ancient game of "barnyard golf" crowned Rich Prochnow king of the horseshoe tossers on the campus.

The tennis doubles tourney is the only competition left which cannot lay claim to have crowned anyone ruler in that division.

Pre-Law Adviser Schedule Revised For Winter Term

Grouping of Classes To Be Put Into Effect Here Immediately

A reorganization of the adviser schedule for all the pre-law students on the campus goes into effect immediately with the posting of the new list today by Dean Wayne L. Morse, of the law school.

The plan just going into effect automatically groups the students by classes, these in turn being assigned to members of the law school faculty. The old adviser assignments for pre-legal students are definitely cancelled.

In general the advisers in the future will be: freshmen, Claire and Howard; sophomores, Hollis; sophomores and juniors, Spencer.

The name of each student and that of his adviser is posted in the glass bulletin board of the law school on the second floor of the Oregon building.

It is necessary that pre-legal students go to their new advisers during winter term registration, and in order to get their new assignment they must consult the list immediately.

The new advisers are also to be consulted before registration if the student wishes to take up any of his problems with an adviser in the meantime.

Dr. Rainey's Installation At Bucknell Scheduled

Former Oregon Professor Is Now President-Elect

A report on the inauguration this month of Dr. Homer Price Rainey, University of Oregon professor of education from 1924-28, as president of Bucknell university at Lewisburg, Pennsylvania, has been received by Dean James H. Gilbert from F. D. Struck, class of 1911 and now head of the department of industrial education at Pennsylvania State college.

Mr. Struck writes that the trend of thought which ran through all the addresses at the ceremonies was that "the chief function of a liberal arts college is to develop in America a greater sense of public responsibility in political, economic, social, and educational affairs."

Dr. Rainey, while at Oregon, specialized in school administration as professor of education and wrote several articles for Oregon publications, among them "Liberal versus professional training" for the Oregon Educational Journal of 1930.

He had been president of Franklin college, Franklin, Pennsylvania, prior to inauguration at Bucknell university.

Studes To Offer Special Vocal Numbers

Guests To Be Entertained With Dancing and Feature Stunts

The affair will be entirely informal. It is being sponsored by a large group of students and faculty members, on a fifty-fifty participation basis. There will be dancing to the music of the best campus orchestra, according to Ethan Newman, in charge of the orchestra.

Gifford (Buck) Nash and Professor S. Stephenson Smith will organize a group of 50 or 60 carollers to sing at the Revels, and Kenneth (Mickey) Vail and Jack Hewitt will organize a similar group of mimmers, tumblers, and jesters.

Radio Broadcast Over NBC Circuit Honors Webfeet

Doc Spears and the University of Oregon football squad were to be guests of honor at a special Webfoot program broadcast Friday night at 10 o'clock from the NBC studios in San Francisco, but the Oregon contingent had already started north before the message was sent them.

Speeches from the coach and from each member of the team had been planned by Jennings Pierce of the NBC who arranged the program. An interview from Doc Spears was to be on the broadcast.

The early departure of the Webfoots after their encounter with St. Mary's Gaels at Kezar stadium Thanksgiving day, did not stop the Oregon program from being put on the air, however, and a very satisfactory broadcast was presented. Oregon songs and an orchestra and quartet, an interview with Lloyd Yoder, San Francisco football referee, and the selection of an all-Coast team filled out the hour program.

Modern Football; an Amateur Game as Viewed by C. Gauss

Practically every college in the country has subsidized athletes, declares Dean Christian Gauss of Princeton in an article in December's Scribner's magazine. He does not even exempt those institutions which escaped the censure of the Carnegie Foundation bulletin last year.

Although colleges have codes of amateurism in which the subsidizing of athletes is forbidden, in virtually all colleges, even the best, this rule is violated in secret as a result of private alumni enterprise, writes Dean Gauss in the Scribner's article called "Our Professional Football Amateurs."

Quoting Chief Justice Hughes when Governor of New York that "we cannot expect to have an honest horse-race until we have an honest human race," Dean Gauss details incidences of alumni subsidizing of athletes without the knowledge of the college and in some cases without the knowledge of the athlete himself. He tells of an alumnus who increased the sal-
