

Bryson To Appear in Recital

Tonight at Music Auditorium

VOLUME XXXIII

Oregon Leads Pacific Coast in Math Research

University Professors **Publish Books**

Department Contributes **Important Material To Science**

More important mathematical researches have been published during the past three years by members of the mathematics department at the University of Oregon than by any other similar departments on the Pacific coast, a survey recently made by E. E. De-Cou, head of the department here, shows. In addition to this the faculty members have written extensively on other topics, and two of them, Dr. W. E. Milne and Dr. D. R. Davis are co-authors of a textbook, "Introductory Mathematics for College Freshmen," which has

been so successful here that it is Single-Act Plays to be published in permanent form by a national book company next summer

Moursund Paper Printed

Andrew W. Moursund, Jr., new instructor in mathematics this year, had his paper on "On Nevanlinna Summability of Fourier Series" accepted for publication in the October number of Annals of Mathematics" published at Princeton university. For the past three years Mr. Moursund has been E. L. Marston fellow in mathematics at will receive his doctor of philosophy degree next summer.
